

# **SENATE BUDGET SCOREKEEPING REPORT**

**December 1, 1975**

**No. 15**

**a cumulative report prepared weekly**

J892-28  
5252-28

**94th Congress, 1st Session**  
**UNITED STATES CONGRESS**

## FOREWORD

---

This budget scorekeeping report is prepared for the Senate by the Congressional Budget Office in cooperation with the Senate Committee on the Budget. It is prepared weekly except during periods of congressional recess. This series is designed specifically for the Senate. It expands on and is complementary to the series of periodic scorekeeping reports for the Congress as a whole that is issued by the Congressional Budget Office.

The Congressional Budget Act requires an entirely new concept for budget scorekeeping. Previous scorekeeping was oriented to the impact of congressional actions on the budget as recommended by the President. It is now necessary to have a scorekeeping procedure for tracking congressional budget actions against the budget targets established by the *Congress* in the concurrent resolutions on the budget. Moreover, previous scorekeeping largely totaled past actions. The new budget procedures require that each Senator know the budgetary implications of today's vote in the context of competing legislation which will be on the floor in the *future*.

Much of the information in this report is in summary form. Back-up detail regarding any of the line items in the report or answers to questions regarding any aspect of the report may be obtained by calling the Budget Analysis Division of the Congressional Budget Office (225-5480).

Because this report represents an entirely new concept for budget scorekeeping, we would welcome any comments and suggestions for improvements in the presentation of the basic data. Our objective is to make these reports as useful as possible for the Senate. Suggestions for improvement may be addressed to James Blum of the Congressional Budget Office (225-4846) or Sidney Brown of the Senate Budget Committee staff (224-0560).

## INTRODUCTION

---

On May 14, 1975, the Congress adopted the First Concurrent Resolution on the 1976 budget (H. Con. Res. 218) specifying target levels for budget authority, outlays, revenues, the budget deficit and the appropriate level for the public debt. These targets were intended to guide subsequent congressional budget actions. While H. Con. Res. 218 did not subdivide the budget authority and outlay totals, the statement of managers accompanying the conference report on the budget resolution did provide a breakdown of budget authority and outlays by the 17 functional categories. These functional category figures were to serve as guidelines for the Congress, to explain the steps by which the conferees reached the aggregate budget totals and to provide benchmarks for the Second Concurrent Resolution now being considered. These figures form the basis for this scorekeeping report. Further work will be required to develop the appropriate scorekeeping methodology for Federal revenues, the budget deficit, and the public debt limit.

### GOES BEYOND TRADITIONAL SCOREKEEPING REPORTS

This report is designed to provide the Senate with budgetary information relevant to consideration of upcoming legislative actions. It goes beyond the more traditional scorekeeping reports by highlighting legislative actions with major budgetary implications *in prospect*, and by including cost information on authorizing legislation (see definition below) that does not formally relate to the First Concurrent Resolution targets but which could have a significant impact thereon through subsequent appropriations legislation. The formats of the various tables in the report are constructed so as to highlight action in the Senate.

### DOLLAR ESTIMATES

The Congressional Budget Office has determined all of the dollar estimates contained in this report. To the extent that items in this report are included in the basic scorekeeping reports of the Congressional Budget Office, the dollar estimates are the same. It should be noted that many of the figures contained in this report, including all of the outlay numbers, are Congressional Budget Office *estimates* of

the impact of congressional action and therefore are not firm. The Congress makes decisions on specific figures for new budget authority in appropriation bills, but not on outlays which will result from these bills. In some other spending legislation, such as entitlement programs (e.g., social security, unemployment compensation), the budget authority figures also are estimates.

#### POSSIBLE ADDITIONAL LEGISLATION

The Senate Budget Committee staff has determined the items that are included in the lists of "possible additional legislation" in the individual functional sections. These lists are designed to show the potential budgetary impact of spending bills not yet reported in the Senate (other than Presidential requests) and authorizing bills at all stages of action in the Congress.

The lists are selective in that they include only those bills that are judged to have reasonable prospects for passage. However, they should not be taken as predictions of what will occur; some bills on the lists may not be enacted, and the dollar amounts in many cases are subject to change. Rather, the lists are designed to inform Senators of the possible relationship to the congressional budget targets of bills on which they have voted or may be required to vote.

#### DEFINITIONS

Throughout this report, reference is made to "spending legislation" and "authorizing legislation". These terms are defined as follows:

- Spending legislation* consists of (1) appropriations legislation; (2) legislation that provides budget authority directly without the need for subsequent appropriations action; and (3) entitlement legislation which, while requiring subsequent appropriations action, essentially "locks in" budget authority at the time of authorization.
- Authorizing legislation* consists of legislation that authorizes the provision of budget authority through subsequent discretionary appropriations action (i.e., authorizing legislation other than that covered by points (2) and (3) in the preceding paragraph).

#### DIFFERENCES IN FIGURES

The reader will note a substantial difference between the "new budget authority" and the "estimated outlays" figures shown on the same line in summary table 1 and table A of each functional section. The reasons for this are as follows:

- On the "enacted in prior years" line (line II.A.1), the FY 1976 "estimated outlays" total includes outlays which result

from new budget authority enacted in prior years but first becoming available in FY 1976 *plus* outlays from unexpended balances of budget authority available in prior years. Thus, on this line the estimated outlays are frequently higher than the amount shown for new budget authority.

- On all other lines, the "estimated outlays" total includes only those outlays which will result in FY 1976 from the new budget authority granted in FY 1976. Therefore, the outlay estimate will frequently be lower than the amount shown for new budget authority. The difference indicates the amount of spending from new FY 1976 budget authority which will likely occur in future years.

## HOW TO USE THE REPORT

---

This report consists of three parts. The first part highlights major legislative actions that may occur this week in the Senate. The second part presents summary tables for the budget as a whole. The third part presents tables for each of the 17 functional sections of the budget.

The core of the report is summary table 1 and table A in each functional section. All of these tables have the same format. They present the following information for the FY 1976 budget as a whole and for each functional category:

- Category I*: the budget authority and outlay totals contained in H. Con. Res. 218 and the accompanying conference report.
- Category II*: a section listing action on spending legislation to date from the Senate reporting stage onward *plus* Presidential spending requests for ongoing programs that have not yet been reported in the Senate. (The President's spending requests for ongoing programs not yet reported are included to give a *rough* idea of the degree to which the spending totals are apt to be encumbered; next year, when Section 302 of the Congressional Budget Act is operational, this entry will be replaced by Senate Committee allocations not yet reported.) The *current status* line at the end of this section shows the relationship between these actions and the First Concurrent Resolution targets.
- Category III*: a section listing the budgetary effect of possible additional legislation that in the opinion of the Senate Budget Committee staff has potential budgetary significance in FY 1976. This category consists primarily of authorizing legislation, but also includes spending legislation not yet reported in the Senate other than that requested by the President (unreported Presidential spending requests are included in category II of the table, described above). It should be kept in mind that the authorizing legislation in this category is funded through subsequent appropriations action, and passage of the authorizing legislation does not of itself have an effect on the budget. However, these items are

included in this report because of the potential pressure that authorized but unfunded programs exert on the appropriations process. The budget authority and outlay estimates for many of the items in this category are inexact; ranges are employed where there are different versions of an item or where it is not possible to make a specific estimate. The *potential impact* line at the end of this section is designed to show the effect on the First Concurrent Resolution targets if the items in this category were funded in FY 1976.

Apart from the core tables described above, the report contains a summary of the *current status* and *potential impact* entries on the individual functional tables. Also included are a summary of major non-discretionary re-estimates since adoption of H. Con. Res. 218, tables detailing the individual legislation included in Category II.B.2 and Category III of table A for each function, and summary table 1.

In the case of all tables in the report, details may not add due to rounding.

All dollar estimates in this report are as of November 20, 1975. The latest weekly report contains all of the information necessary for scorekeeping and supersedes all earlier reports.

## LEGISLATIVE HIGHLIGHTS

---

*Note:* This is a listing of bills with major budgetary implications that are on the Senate Calendar or may be reported. A section is also included reporting action on such bills during the past week in both the Senate and House.

### *Major Senate Actions Possible This Week*

#### **SPENDING LEGISLATION:<sup>1</sup>**

- Floor action possible on Federal Aid Highway Act of 1975 (S. 2711). *See p. 28.*

#### **AUTHORIZING LEGISLATION:<sup>1</sup>**

- Floor action possible on Conference Report on International Development and Food Assistance Act (H.R. 9005). *Part of function 150, p. 17.*

### *Major Congressional Actions Last Week<sup>2</sup>*

#### *House and Senate:*

- Agreed to Conference Report on Military Construction Appropriation Act (H.R. 10029).
- Agreed to Conference Report on Education for All Handicapped Children Act (S. 6).
- Agreed to Conference Report on Older Americans Act Amendments (H.R. 3922).

#### *Senate:*

- Passed Second Concurrent Resolution on the Budget (H. Con. Res. 466).
- Passed Department of Defense Appropriation Act (H.R. 9861).
- Passed Interior and Related Agencies Appropriation Act (H.R. 8773).
- Passed bill to increase borrowing authority for the Tennessee Valley Authority (H.R. 9472).

#### *House:*

- Agreed to Conference Report on Foreign Relations Authorization Act (S. 1517).

---

<sup>1</sup> See introduction for definition.

<sup>2</sup> Week of November 17-21 (last week prior to recess).

# Summary Table 1—FY 1976 BUDGET TOTALS

[In billions of dollars]

Category	Fiscal year 1976

<b>Potential Impact:</b>		
Under target.....	.....	.....
Over target.....(range)...	†32.3/37.6	†11.3/12.3

<sup>1</sup> See introduction for definition of "spending legislation". This is the legislation to which the First Concurrent Resolution targets formally apply.

<sup>2</sup> Adjusted, where applicable, to reflect (1) the cost of current law in cases where the President's request assumes legislation to reduce the cost of current law, (2) elimination of Presidential requests for new programs, and (3) completed congressional action on legislation that authorizes appropriations for ongoing programs at levels lower than the President's appropriations request.

<sup>3</sup> See the introduction for a discussion of this category and the definition of "spending legislation" and "authorizing legislation." This category consists of legislation not included in Category II which may have a potential budgetary impact in FY 1976. It is not intended to be a prediction of what will occur.

†See note †, p. 39.

‡ Includes \$9.0 billion in budget authority and \$7.2 billion in outlays for major nondiscretionary reestimates that have occurred since adoption of H. Con. Res. 218 (see summary table 3, p. 13).

# Summary Table 3—MAJOR NON-DISCRETIONARY RE-ESTIMATES SINCE ADOPTION OF H. CON. RES. 218

[In billions of dollars]

*Note:* Changes in budget authority and outlays of a non-discretionary nature may occur from time-to-time, either upward or downward. They are essentially uncontrollable under current law, such as changes due to more accurate estimates of caseload for a mandatory entitlement program, or changes in the rate of spending by the executive branch from authority granted in prior years. When re-estimates of this nature occur later than May 15, they will not have been taken into account in the targets contained in the first concurrent resolution on the budget, yet they will ultimately affect the totals to which those targets apply.

Set forth below is a listing by function of *major* non-discretionary re-estimates of budget authority and outlays for FY 1976 that in the opinion of the Congressional Budget Office have occurred since adoption of H. Con. Res. 218. These amounts are therefore not included in Category I ("First Concurrent Resolution Target") of summary table 1 and table A for each function. They are, however, included in Category II of those tables ("Spending Legislation") and therefore affect the "current status" and "potential impact" entries on those tables. The information below is provided so that the reader may understand the degree to which the "current status" and "potential impact" entries in the various tables are affected by non-discretionary changes occurring since adoption of H. Con. Res. 218.

Function	Fiscal year 1976	
	New budget authority	Estimated outlays
050—National Defense.....

See notes to summary table 1, p. 9.

†The President's budget and H. Con. Res. 218 adopted as the measure of budget authority for long-term contracts under subsidized housing programs, the maximum payment permitted by law for the full life of the contracts. Using this measure, the budget authority for the program of annual contributions for assisted housing was calculated at \$26.1 billion on the assumption that all such contracts would be for the maximum period of 40 years permitted by law. The Conference agreement on the Housing and Urban Development—Independent Agencies Appropriation Act adopted in principle the concept of full disclosure of budget authority at the outset, but reduced the level of budget authority for this program from \$26.1 billion to \$17.0 billion on the grounds that this is a more realistic estimate of costs in view of the fact that not all of the contracts under this program will run for 40 years and not all of them will require the maximum permissible Federal payment. An adjustment of \$9.1 billion is therefore being made in the Scorekeeping Report so as to put the H. Con. Res. 218 budget authority target on the same basis as the subsequent action by the Congress on the Housing and Urban Development—Independent Agencies Appropriation Act. Outlay estimates are the same under either approach.
