During the fiscal year [1929] *1930* the head of any department or independent establishment of the Government having funds available for scientific and technical investigations and requiring cooperative work by the Geological Survey on scientific and technical investigations within the scope of the functions of that bureau and which it is unable to perform within the limits of its appropriations may, with the approval of the Secretary of the Interior, transfer to the Geological Survey such sums as may be necessary to carry on such investigations. The Secretary of the Treasury shall transfer on the books of the Treasury Department any sums which may be authorized hereunder, and such amounts shall be placed to the credit of the Geological Survey for the performance of work for the department or establishment from which the transfer is made: *Provided*, That any sums transferred by any department or independent establishment of the Government to the Geological Survey for cooperative work in connection with this appropriation may be expended in the same manner as sums appropriated herein may be expended.

During the fiscal year 1930, upon the request of the head of any department or independent establishment engaged on an authorized project of mapping in the United States, the Secretary of War or the Secretary of the Navy is authorized to furnish aerial photographs required for such mapping projects, in so far as the furnishing of such photographs will be economical to the Federal Government and does not conflict with military or naval operations or the other parts of the regular training program of the Army and Navy flying services, and the head of such department or independent establishment is authorized to reimburse the War or Navy Department for the cost of making the photographs, and the department or establishment receiving such photographs is authorized to furnish copies to any State, county, or municipal agency cooperating with the Federal Government in the mapping project for which the photographs were taken. In the event that the War or Navy Department is unable to furnish such photographs, the department or establishment requiring aerial photographs is authorized to contract with civilian aerial photographic concerns for the furnishing of such photographs (submitted).
