BUDGET MESSAGE OF THE PRESIDENT

To the Congress of the United States:

I am transmitting my recommendations for the Budget of the United States for the fiscal year ending June 30, 1950.

Under the laws of our country, the Budget, when approved by the Congress, becomes the plan of action for the Federal Government. It thus embodies decisions of tremendous importance, particularly in these times, to the American people and to the entire world. The preparation of the Budget is one of the most important duties of the President. It represents a carefully prepared plan for carrying out the many activities and services of Government which the Congress has authorized, and others which I am recommending, in response to the needs and desires of the American people.

This is the fourth Budget prepared since the close of World War II. The character of the postwar world still presents many complex problems and unanswered questions. This Budget is the clearest expression that can be given at this time to the program which the Government of the United States should follow in the world today.

It is founded on the conviction that the United States must continue to exert strong, positive effort to achieve peace in the world and growing prosperity at home. Substantial direct assistance is provided for other members of the family of nations, and expenditures in support of our armed forces are materially increased. Funds are included for the necessary strengthening of our economy through the development and conservation of the Nation's productive resources. Increased emphasis is placed on the provision of badly needed measures to promote the education, health, and security of our people.

To support this program, the Budget provides for expenditures of 41.9 billion dollars for the fiscal year 1950, about 1.7 billion dollars above the requirements for the present year. Under existing law and with continuing high levels of economic activity, revenues for the fiscal year would be 41 billion dollars. This would result in an estimated deficit of 873 million dollars.

In a period of high prosperity it is not sound public policy for the Government to operate at a deficit. A Government surplus at this time is vitally important to provide a margin for contingencies, to permit reduction of the public debt, to provide an adequate base for the future financing of our present commitments, and to reduce inflationary pressures. I am, therefore, recommending new tax legislation to raise revenues by 4 billion dollars. Because of the normal lag in the collection of taxes, however, tax receipts in the fiscal year 1950 would be considerably less.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

In presenting this financial program to the Nation, I have carefully considered the present economic situation of our country and the effect upon it of large Government expenditures. The Economic Report, submitted recently to Congress, emphasized the compelling need for financial prudence by the Government at this time. The actions taken in preparing this Budget reflect that policy.

Because of heavy prior commitments requiring larger expenditures for a number of continuing programs in the fiscal year 1950 and the presence of inflationary forces in our economy, it has been necessary to deny many requests for additional funds which would normally be desirable. Necessary increases in our national defense program are expected to result in additional expenditures in 1950 of 2.5 billion dollars, or 21 percent, over 1949. Public works already authorized and now under way also require higher expenditures. Despite these and other unavoidable increases, the total expenditures contemplated for 1950 are only 1.7 billion dollars above the level of the present fiscal year.

Within the framework of this Budget, provision is made for inaugurating certain essential economic and social programs which should no longer be delayed. An estimate of 290 million dollars is included for aid to education. An additional 500 million dollars is included for such programs as housing and slum clearance, expanded social security and the national health program. In addition, there will be an increase in receipts and expenditures of trust accounts under my recommendation for strengthening the contributory social insurance system.

The plans of each Government agency have been thoroughly reviewed, and the amounts shown in the Budget represent, in my judgment, the minimum requirements for the next fiscal year. I believe that this Budget reflects the necessities of our national policy and the desires of our people and that an extensive review by the Congress will result in its acceptance as a sound program of governmental action.

BUDGET TOTALS

[Fiscal years. In millions]

	1948 actual	1949 estimated	1950 estimated
Receipts	$42,211	$39,580	$40,985
Expenditures	33,791	40,180	41,858
Surplus (+) or deficit (−)	+8,419	−600	−873

NOTE.—Estimated expenditures are based on existing and proposed legislation. Estimated receipts exclude new tax proposals. Throughout this Budget, payments of refunds of Government receipts are reported as deductions from total receipts; in the past, they have been reported as expenditures.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

The 1950 Budget, like all those since the end of the war, is dominated by our international and national defense programs. Together, they are expected to amount to 21 billion dollars, or half of all Budget expenditures.

International affairs and finance account for 6.7 billion dollars of expenditures in the fiscal year 1950, compared with 7.2 billion dollars in 1949. Most of these funds will be spent as part of the strong economic support we are extending to the free nations of Western Europe, whose recovery is the key to continued independence and to safeguarding freedom in many other parts of the world. Our investment in European recovery will repay us many times in terms of increased strength and improved organization for peace.

But in existing circumstances, economic strength is not enough to assure continued independence to free peoples. Under the Charter of the United Nations, therefore, we have been discussing with some of the Western European countries measures designed to increase the security of the North Atlantic area. To further this objective, I expect later to request funds for providing military supplies to those countries and to certain other countries where the provision of such assistance is important to our national security. It is not possible now to predict accurately what will be needed, and I have therefore included no allowance in the Budget. The fact that additional funds will be required to meet the demands of this program emphasizes even more strongly the need for increased revenues in the years ahead.

While we believe that active participation in the work of the United Nations and support for the economic recovery and growing strength of free nations are the most important steps we can take toward peace, we must also maintain adequate national defense forces. In this Budget, expenditures for national defense are estimated to total 14.3 billion dollars in 1950, compared to 11.8 billion dollars for 1949. New authorizations recommended for national defense in 1950 total 15.9 billion dollars. Defense expenditures to maintain the present program are expected to be higher in 1951, as a result of expanding programs now under way and the large orders already placed for aircraft, ships, and other material and equipment, which will be delivered and paid for in the next few years.

The military forces recommended in this Budget are the most powerful this Nation has ever maintained in peacetime. The principal objective we should have in mind in planning for our national defense at this time is to build a foundation of military strength which can be sustained for a period of years without excessive strain on our productive resources, and which will permit rapid expansion should the

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

need arise. The recommendations in this Budget move toward this objective. I believe that they will permit this Nation to maintain a proper military preparedness in the present uncertain period.

Two other commitments of the Government will continue to have a major impact on Budget expenditures in the fiscal year 1950. These are interest on the public debt and our program of services and benefits provided for veterans and their dependents. Together they total 11 billion dollars, or 26 percent of the Budget.

A general decline in the number of veterans drawing readjustment benefits reduces expenditures for veterans to 5.5 billion dollars, 1.3 billion dollars below the current year. Interest on the public debt, however, shows an increase from 5.3 billion dollars in 1949 to more than 5.4 billion dollars in 1950.

Expenditures for all activities of the Federal Government, exclusive of those required for the four items—international, national defense, veterans, and interest on the public debt—total 10 billion dollars or 24 percent of the Budget.

Programs devoted to social welfare, health, and security require expenditures of 2.4 billion dollars. Of this amount nearly half is in direct grants to States for public assistance.

Development of our natural resources, including atomic energy, is estimated to cost 1.9 billion dollars. Programs devoted to agriculture and agricultural resources require expenditures of 1.7 billion dollars. Provision for transportation and communication facilities and services, many of them supporting our national defense activities, requires 1.6 billion dollars.

All other activities of Government—for housing, education, labor, finance, commerce, and industry and the costs of general government—amount to 2.3 billion dollars, or 5 percent of the total Budget.

Expenditures of 6.4 billion dollars are included within the foregoing Budget totals for new legislation. Of this amount, 5.6 billion dollars is directly concerned with international and national defense activities, while the remainder provides for domestic needs.

There are many activities of Government, authorized at various periods, which impose continuing financial obligations and tend to represent fixed elements in the Budget. A careful review has been made of these programs to assure that they meet only the most essential needs in the light of present conditions. As a result, cutbacks have been recommended in the veterans' hospital construction program, recommendations for new public works have been included only where it is not in the public interest to postpone them, as in the case of some power projects, and an increase in postal rates has been

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

recommended to lower the postal deficit. Similar changes are reflected in other areas.

In addition, a great deal of effort has been devoted to achieving the economies which should be obtained through more effective organization and conduct of Government operations. There is no easy way of attaining this type of economy, but the size and complexity of our governmental activities require that we devote continuing attention to improving the management of the public business. Further, we must make it possible for responsible Federal executives to take the actions which will lead to increased efficiency, economy, and closer coordination of activities.

To make more rapid progress toward this goal, to which I am firmly committed, this Budget includes a request for a management improvement fund of 1 million dollars to be appropriated to the President and utilized by him to carry on necessary and worth-while management improvement activities. The Budget also reflects certain anticipated savings which should result from management improvement activities now under way.

To strengthen further the management of the Government, I am recommending the immediate enactment of legislation to increase the salaries of the heads and assistant heads of the departments and agencies. The Budget includes a tentative estimate of the funds needed to provide these increases. I also recommend that the Classification Act be revised to permit the payment of more realistic salaries to career employees and to correct the dislocations and inequities created in recent years. The Government and its employees should be assured that the salaries paid for positions at all levels are fair compensation for the work performed.

Fiscal prudence requires that we consider the Government's program, not on the basis of a single year alone, but in the light of the continuing national policies already adopted. It must be recognized that expenditures in the fiscal year 1951 are likely to be larger than those for 1950. Expenditures for national defense can be expected to rise substantially above the level estimated for 1950. We cannot expect any material decline in our international responsibilities. We must face squarely the fact that we foresee a deficit in the fiscal year 1950 under existing tax laws, even without any allowance for new military aid, and that even higher expenditures will probably be required in future years.

Furthermore, in the fiscal year 1950, the present large excess of receipts of trust accounts, with its anti-inflationary effects, will be sharply reduced by the scheduled payment to veterans of a dividend of about 2 billion dollars from the national service life insurance fund.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Finally, it must be apparent that in times like the present we must be in a position to make new plans if conditions change. I do not consider it prudent under such circumstances for the Government finances to be in unbalance, or even in precarious balance. In prosperous times like the present, we should take the necessary steps to reduce the public debt and place the Government finances on a sounder footing.

Therefore, I am recommending that the Congress enact new revenue legislation.

It is not an easy step for me to take to recommend new taxes. I do so with a double conviction, first, that under present circumstances a prosperous country cannot afford an unbalanced budget and second, that after thorough review of the cost of each Government program my recommendations represent a level below which our responsibilities will not permit us to go in the next fiscal year.

The Budget of the United States Government is large because its responsibilities are large. The Budget reflects the realities of our international position and our concern for a strong and progressive domestic economy. This Nation is today the strongest bulwark of freedom in the world. The decisions we make concerning our national finances must be based on a sober understanding of this fact.

BUDGET RECEIPTS

On the basis of existing tax legislation, Budget receipts for the fiscal year 1950 are expected to total 41 billion dollars, an increase of more than a billion dollars over receipts in the current fiscal year. The estimates assume the continuance of full employment and approximately the current levels of economic activity.

Income taxes.—Income taxes on individuals and corporations are the major source of revenue of the Federal Government. Receipts from these taxes represent over two-thirds of Budget receipts at present.

The Revenue Act of 1948, passed over my veto, is causing a sharp reduction of individual income tax collections in the fiscal year 1949. Even though the continuation of the present high level of personal income is assumed, these receipts in the fiscal year 1950 will remain below the corresponding receipts in the fiscal year 1948.

Receipts from taxes on corporations are expected to increase substantially in the fiscal years 1949 and 1950. With the end of the war, the rates of these taxes were reduced and collections declined sharply from the high levels of the war years, but the general prosperity that followed the reconversion period has brought steadily rising profits and higher tax yields.

BUDGET RECEIPTS

(*Including proposed changes in employment taxes and miscellaneous receipts*)

[Fiscal years. In millions]

Source	1948 actual	1949 estimated	1950 estimated
Direct taxes on individuals:			
Individual income taxes	$20,997	$18,530	$19,135
Estate and gift taxes	899	797	653
Direct taxes on corporations:			
Corporation income taxes	9,851	11,515	12,112
Excess profits taxes	323	194	140
Excises	7,402	7,715	7,900
Employment taxes:			
Existing legislation	2,396	2,610	3,324
Proposed legislation:			
Health insurance			260
Expanded coverage, old-age and survivors insurance			1,700
Customs	422	407	407
Miscellaneous receipts:			
Existing legislation	3,809	2,276	1,750
Proposed legislation			81
Deduct:			
Appropriation to trust funds:			
Existing legislation	1,616	1,754	2,420
Proposed legislation:			
Health insurance			260
Expanded coverage, old-age and survivors insurance			1,700
Refunds of receipts	2,272	2,709	2,097
Budget receipts	42,211	39,580	40,985

NOTE.—Payments of refunds of Government receipts are now reported as deductions from total receipts; previously, they were reported as expenditures. Overpayments by taxpayers are not true receipts of the Government nor are they, when refunded, properly chargeable as operating costs of the Government. Payments by wholly owned Government corporations and enterprises for retirement of capital stock and surplus, which were formerly reported as miscellaneous receipts, are also excluded from both receipts and expenditures, since they do not represent operating costs or true receipts of the Government. These improvements in reporting practice result in reducing Budget receipts and expenditures for each year by equal amounts, and therefore have no effect upon the amount of surplus or deficit.

Excises and miscellaneous receipts.—Excise taxes and miscellaneous receipts are the other major sources of Federal revenue. Excise taxes are expected to continue the gradual upward trend of recent years, reflecting the continued high level of business activity. Miscellaneous receipts have been declining from the peak reached in the fiscal year 1947. The disposal of war surplus is nearing completion, and consequently by the fiscal year 1950 miscellaneous receipts will be approaching a more stable level.

Employment taxes.—The continuation of full employment brings gradually rising revenues from employment taxes. Furthermore, under existing legislation, the tax rate for railroad retirement increases in January 1949 and that for old-age and survivors insurance in

800000—49——III

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

January 1950. I recommend that the rate increase for the latter tax be moved forward to July 1949.

I have recommended programs of health and disability insurance and expansion of coverage for the social insurance programs now in operation. These measures would result at the outset in added collections of employment taxes greater than the added payments for benefits, but the funds would be transferred to trust accounts and would not appreciably affect Budget receipts.

Refunds.—This Budget reflects the recent change in Federal financial reporting, under which refunds of receipts are shown as deductions from receipts, rather than as expenditures. These refunds are not true operating costs of the Government but are for the return of overpayments of taxes and duties. Such refunds are exceptionally high in the fiscal year 1949, because of the unusual "over withholding" of individual income taxes for January through April 1948, resulting from the lower rates set retroactively by the Revenue Act of 1948. Interest paid on refunds continues to be shown as an expenditure.

RETIREMENT OF THE PUBLIC DEBT

The change in the Budget outlook in the last 12 months has meant a corresponding change in the rate of reduction of the public debt. Instead of the Budget surplus of nearly 5 billion dollars estimated last January for the fiscal year 1949, we now face a deficit of 600 million dollars. Accordingly, there will be no net reduction in the debt during fiscal year 1949, other than that made possible by a small reduction in the Treasury's cash balance during the year. The debt on June 30, 1949 is estimated to be 251.6 billion dollars.

The major reason for the failure to achieve any sizable debt reduction in 1949 is the tax reduction enacted by the Eightieth Congress. The increase in taxes which I am recommending should permit us to make, in 1950, the minimum reduction consistent with responsible fiscal policy in prosperous times such as these.

BUDGET EXPENDITURES AND AUTHORIZATIONS

The complex Budget of the Government can best be summarized in terms of major functions. These major functions—national defense, international affairs and finance, veterans' services and benefits, and so forth—set forth the broad purposes for which the Government spends money, regardless of which department or agency carries them out. Estimated expenditures for the fiscal year 1950 of 41.9 billion dollars include all expenditures from the general and special accounts of the Treasury as well as the net expenditures of Govern-

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

ment corporations and enterprises. They exclude expenditures made from trust accounts.

The full impact and direction of the Government's program cannot be measured in terms of expenditures alone in any one year. Many of the commitments made under the appropriations and other authorizations enacted by the Congress for any year do not result in expenditures until a later year. For example, of the estimated 1950 expenditures, 34 billion dollars will be made from new appropriations and authorizations recommended in this Budget, and 7.9 billion dollars will be made from those enacted in prior years.

BUDGET EXPENDITURES AND AUTHORIZATIONS BY MAJOR FUNCTIONS

[Fiscal years. In millions]

Function	Expenditures			1950	
	1948 actual	1949 estimated	1950 estimated	Net new appropriations	Other authorizations
International affairs and finance	$4,782	$7,219	$6,709	$6,349	----------
National defense	10,924	11,745	14,268	13,219	$2,455
Veterans' services and benefits	6,567	6,799	5,496	5,701	----------
Social welfare, health, and security	1,853	1,963	2,358	2,271	92
Housing and community facilities	82	349	388	227	1,987

General government	1,504	1,187	1,224	1,160	7
Interest on the public debt	5,188	5,325	5,450	5,450	----------
Reserve for contingencies	----------	45	150	200	----------
Adjustment to daily Treasury statement basis	−388	----------	----------	----------	----------
Total	33,791	40,180	41,858	[1] 38,536	6,039

[1] In addition, this Budget includes 3,036 million dollars of appropriations recommended to liquidate prior year contract authorizations.

In order to give a comprehensive picture of the financial requirements of Government programs, my Budget Message sets forth the net new appropriations and other authorizations requested. "Net new appropriations," totaling 38.5 billion dollars for fiscal year 1950, represent total appropriations requested (including permanent appropriations), less those to be used to liquidate prior year contract authorizations. "Other authorizations," totaling 6 billion dollars for fiscal year 1950, include contract authorizations which permit the placement of specific contracts but require later appropriations to liquidate these contracts, and special authorizations to use the pro-

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

ceeds of Treasury borrowing to finance certain types of Government programs. Together, "net new appropriations" and "other authorizations," totaling 44.6 billion dollars, represent the new obligational authority recommended for carrying on the Government's business.

Specific Programs

The following sections describe in broad outline the Government programs in each of the major functional areas and the principal changes proposed in this Budget.

INTERNATIONAL AFFAIRS AND FINANCE

Two world wars and the years between have convinced the people of the United States that their security and well-being depend on conditions of peace and stability in the world. The complexity of the international postwar recovery problem and the tensions which make the transition to peace more difficult have deepened this conviction.

The fundamental objective of United States foreign policy is to achieve world peace and international security resting on the strength, mutual interests, and cooperation of free nations. The Budget reflects this policy in the funds provided for our participation in the United Nations and for the regular operations of the State Department and other agencies. But the instruments of our policy requiring the largest measure of budgetary support are the extraordinary programs of economic and military aid to those nations and peoples who share our international objectives and our determination to make them effective. Through all these means, we are acting to strengthen the great moral force of freedom on which we believe the advancement of people everywhere depends.

Total expenditures for international activities, exclusive of possible expenditures for a new program of providing military supplies to certain countries, are expected to be 6.7 billion dollars in the fiscal year 1950—a drop from the 7.2 billion dollars estimated for the fiscal year 1949. Expenditures for economic assistance may be expected to decline in subsequent years with continued progress toward world economic recovery. But any forward estimate of our international expenditures must be highly tentative in view of the present uncertain world situation.

Reconstruction and military aid.—Our aid to European recovery is the major program of economic assistance in which we are now engaged. Begun in April 1948, this program is expected to result in 4.6 billion dollars of expenditures in the present fiscal year, and 4.5 billion

[1] In addition, this Budget includes 17 million dollars of appropriations recommended to liquidate prior year contract authorizations.

dollars in the fiscal year 1950—nearly 70 percent of our 1950 expenditures for international activities.

United States aid to western European countries and the mutual self-help which it has stimulated among them are already resulting in substantial progress toward economic recovery and political stability. The volume of production—both agricultural and industrial—is increasing as the months go by. This momentum must be maintained if the European economy is to become independent of extraordinary outside assistance by the target date of July 1952. To meet this objective, it is also extremely important for this Nation to undertake through such means as an extended and less restrictive reciprocal

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

trade act, those adjustments in our foreign trade pattern which will help to bring about a higher level and a better balance of world trade.

Further authorizing legislation by the Congress will be necessary before the end of the current fiscal year in order to carry the European recovery program forward without interruption. By the end of December, authorizations issued to the European countries for procurement had nearly reached the limit set by the presently available Economic Cooperation Administration funds. The bulk of the commodities involved will be shipped by the end of March. This Budget accordingly anticipates a supplemental appropriation request for 1,250 million dollars for the remainder of the current fiscal year, in addition to the 4.3 billion dollar appropriation requested for the fiscal year 1950.

I recommend that, in extending the Economic Cooperation Act, the Congress eliminate the present legal requirement which in effect charges 3 billion dollars of the fiscal year 1949 expenditures for European aid against the fiscal year 1948 surplus. This wholly artificial bookkeeping shift in no way affects the Government's actual financial operations, but it does result in a distorted picture of the Budget surplus or deficit in these 2 years.

I have already referred to the prospective North Atlantic arrangements, now under discussion. In addition, we are considering furnishing military supplies to certain countries in furtherance of our national security. As with the European recovery program, military aid will call for a large measure of mutual aid and self-help among the participating countries. Because of present uncertainty as to cost and timing, no amounts are included for this program in the Budget.

The scope and magnitude of several of our other current assistance programs cannot be accurately foreseen at this time. These now include aid to Greece, Turkey, China, and Korea. Funds are provided for assistance programs of this character in the Budget under "other proposed aid legislation," with appropriations tentatively estimated at 600 million dollars and expenditures at 355 million dollars for the fiscal year 1950. I shall recommend specific legislation and appropriations to the Congress at a later date.

The Export-Import Bank will continue to make loans in fiscal year 1950 for promoting international trade and economic development, particularly in Latin America. Net expenditures of the Bank in the fiscal year 1950 are expected to be relatively low because of rising collections on earlier loans and because our aid to Europe is now financed almost entirely from ECA funds. Mainly because of a large Canadian repayment, the Bank is expected to show no net expenditures in the current fiscal year.

Federal Reserve Bank of St. Louis

Foreign relief.—Our principal foreign relief activities at the present time are those under the Army's program of government and relief in occupied areas—primarily Germany and Japan. Tentative estimates of about 1 billion dollars of appropriations and expenditures for fiscal year 1950 are included in this Budget—a substantial decline from 1949. These estimates include funds to continue the rehabilitation program now under way in Japan. With these additional sums for rehabilitation and with further ECA recovery aid for Germany in the next fiscal year, progress toward economic recovery in the occupied areas should continue, with a resulting further decline in expenditures in subsequent years.

Foreign relations.—The principal change contemplated in the program of the Department of State is the planned expansion of information and education activities. Expenditures for Foreign Service buildings are expected to decline, so that total expenditures for foreign relations activities are expected to be about the same in the fiscal year 1950 as in 1949. As part of our general program for improved Federal administration, provision is made for increased flexibility in management for the Secretary of State through the consolidation of appropriations. Amounts are included in this Budget to cover the cost of proposed legislation granting Foreign Service personnel pay raises similar to those given most employees under the Federal Employees Salary Act of 1948.

I am requesting legislation authorizing the payment of 17 million dollars in the fiscal year 1949 for payment of war-damage claims of neutral European countries.

Philippine aid.—Our assistance to the Philippine Republic in its recovery from war devastation is now at a peak level. Total expenditures for rehabilitation and for payment of war-damage claims are expected to decline slightly in the fiscal year 1950 and to fall much more sharply in the fiscal year 1951. In our veterans' program we are continuing to give compensation to disabled Philippine veterans who fought in our joint efforts against the Japanese. Provision for financing veterans' hospitals and medical services, authorized by recent legislation, are included in the reserve for contingencies, pending the development with the Philippine Republic of detailed plans for carrying out this program.

International organizations.—Our contribution to the International Refugee Organization is estimated at 70 million dollars in the fiscal year 1950, approximately the same as in 1949. With the expected

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

migration of refugees to the United States and other areas, the IRO program should be substantially completed by June 30, 1950. It is my hope that the present Displaced Persons Act will be speedily stripped of its restrictive and discriminatory provisions in order that we may make a contribution to this program more worthy of our best traditions. A tentative estimate of 16 million dollars for the fiscal year 1949 is also included in this Budget for our contribution to the United Nations' program of relief for Arab and other refugees from Palestine.

Outlays for our participation in other international organizations, including the United Nations, will continue in the fiscal year 1950 at about the same level as in 1949. A 1949 supplemental appropriation of 65 million dollars is included for the loan for the United Nations' headquarters construction. Tentative estimates are included in 1950 for a loan to the Food and Agriculture Organization for construction of a headquarters building, and for our contribution to the International Trade Organization.

NATIONAL DEFENSE

In my Budget Message for the fiscal year 1949 I indicated that in spite of the reduction of our armed services to a small fraction of their wartime strength, national defense still remained the largest single Government program. I further indicated that the funds recommended, about 11 billion dollars, provided for only the minimum national defense requirements.

Before the Congress could complete action on that Budget, the uncertainty of world conditions made it necessary to consider steps to develop additional military strength which would give evidence of continuing firmness in world affairs. Therefore, in an address to the Congress on March 17, 1948, I recommended the prompt enactment of universal training legislation and the temporary enactment of selective service legislation. Shortly thereafter, I recommended additional authorizations for national defense, bringing my total recommendations for fiscal year 1949 to more than 14.7 billion dollars.

Since then I have given continued study to our national security requirements for the present and the future. For the time being it is essential to continue the selective service process. However, this is not the solution to the Nation's long-range military manpower and training problem. Permanent legislation providing for universal training is essential if we are to achieve an acceptable degree of national security.

My Budget recommendations for national defense in the fiscal year 1950 are based on a plan for a national defense position of relative mili-

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

tary readiness, coupled with a higher degree of mobilization preparedness. This type of military planning will permit us continuously to revise our tactics and develop our weapons to meet modern conditions, but is clearly consistent with our traditional concept of military strength for purposes of defense.

In arriving at my recommendations, I have had the benefit of the considered advice of civilian and military leaders best qualified to evaluate the international, strategic, and economic aspects of our national defense requirements. I believe that these recommendations reflect a proper relationship between our security requirements and our economic and financial resources, and envision an Army, Navy, and Air Force in a condition of relative readiness, all functioning as an integrated team. Moreover, I am convinced that we should plan our military structure at this time so as to insure a balanced military program in the foreseeable future at approximately the level recommended in this Budget.

At the same time we must recognize that preparations for defense must be flexible, and not rigid. They must reflect changes in the international situation, changes in technology and in the economic situation. We must be in a position to alter our military programs as circumstances change.

The National Security Act of 1947 established an organizational framework better than we have ever had before and provided for a more flexible control and adjustment of our military program. The establishment of a Weapons Evaluation Board under the Secretary of Defense is an example of the type of development we are continuously making to achieve the best possible assignment of weapons and tasks among the military services. However, we have had enough experience under that act to recognize that further improvements need to be made which cannot be accomplished under existing law. Therefore, I expect to recommend certain changes in the National Security Act which will help to assure readjustments of our defense program as a whole and in all its parts as security requirements change.

The recommendations for the National Military Establishment for the fiscal year 1950 mark a beginning toward a national defense program in which our air, naval, and land forces plan and operate as a team under a unified strategic concept. The 1950 program gives priority to air power and to strengthening the civilian reserve components, and continues to emphasize research and development and industrial mobilization. The Budget provides for maintaining the necessary occupation forces in the former enemy areas for which satisfactory international settlements have not yet been worked out. The Budget

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

also provides substantial amounts to continue the matériel improvement programs for which large authorizations were enacted under the augmented fiscal year 1949 Budget. Continuing expenditures will be necessary for an orderly replacement program in future years as existing inventories are used up and as matériel wears out or becomes obsolete.

[1] In addition, the Budget includes 2,061 million dollars of appropriations recommended to liquidate prior contract authorizations and 75 million dollars to cover other prior year obligations.

[2] In addition, 279 million dollars is being made immediately available in the fiscal year 1949 to cover increased cost of completing authorized naval ship construction program.

Expenditures by the National Military Establishment for defense purposes in the fiscal year 1950 are expected to amount to somewhat over 13.1 billion dollars, including a tentative estimate of 385 million dollars for programs for which new authorizing legislation will later be requested. The stockpiling of strategic materials and other activ-

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

ities supporting defense are expected to require additional expenditures of about 530 million dollars. Furthermore, a tentative estimate of 600 million dollars has been added for the first year cost of universal training. (When in full operation this program may require expenditures of 2 billion dollars annually.) In total, the national defense budget I am recommending will require estimated expenditures of slightly less than 14.3 billion dollars in the fiscal year 1950, an increase of 2.5 billion dollars over the 1949 level. Somewhat higher expenditures are likely in subsequent years.

Net new appropriations and other authorizations specifically recommended in this Budget for the National Military Establishment in the fiscal year 1950 are 13.7 billion dollars. This total, however, includes an upward adjustment of 279 million dollars for increased cost of the naval ship construction programs authorized in 1949 and prior years. In addition, 830 million dollars is provided as a tentative estimate for additional public works, for military pay adjustments, and for other special programs, dependent upon the passage of necessary enabling legislation. In all, 14.5 billion dollars of new obligational authority is provided for the National Military Establishment for use in the fiscal year 1950, an increase of 700 million dollars over amounts enacted for the fiscal year 1949.

Of the 13.7 billion dollars of specific recommendations for new obligational authority for the National Military Establishment, 11 million dollars is requested for the Office of the Secretary of Defense, 4.6 billion dollars for the Air Force, 4.5 billion dollars for the Army, and 4.6 billion dollars for the Navy, counting the upward adjustment for ship construction costs mentioned above.

In addition to the new obligational authority for the National Military Establishment, this Budget includes 525 million dollars of new authority for procurement of critical and strategic materials, 36 million dollars for other defense-supporting activities, and a tentative appropriation estimate of 800 million dollars for the inauguration of universal training.

In all, new obligational authority for national defense programs of nearly 15.9 billion dollars is included in this Budget. This compares with 14.7 billion dollars for the fiscal year 1949, including 2.9 billion dollars made available in 1948, and also including tentative supplemental authorizations of 341 million dollars chiefly for stockpiling.

Of the 15.9 billion dollars, 13.2 billion dollars is requested in the form of appropriations and 2.7 billion dollars in contract authorizations. In addition, appropriations of 2.1 billion dollars are requested to liquidate prior year contract authorizations.

Federal Reserve Bank of St. Louis

Military strength—Summary.—The requirements of the various services have been determined, not separately, but in relation to our total security position and the degree of military readiness which is planned. The basic concept upon which my recommendations are based is that this Nation's military security should rest on a nucleus of highly trained and mobile forces—Army, Navy, and Air—backed by ready reserves of trained men, stand-by equipment and productive facilities, and an integrated mobilization plan which relates our national security requirements to the tremendous productive capacity of American industry. Taken as a whole, the amounts recommended in this Budget will permit the maintenance and operation in the fiscal year 1950 of the augmented defense forces now reached under the increased 1949 Budget program.

MILITARY STRENGTH

[In thousands]

	Regulars and Reserves on full-time active duty			Reserves in regular training status		Other Reserves	
	Apr. 1, 1948	Dec. 1, 1948 (est.)	1950 average (est.)	Dec. 1, 1948 (est.)	1950 average (est.)	Dec. 1, 1948 (est.)	1950 average (est.)
Air Force	368	411	412	58	113	400	400
Army	538	662	677	375	555	650	650
Navy and Marine Corps	488	531	527	222	281	900	1,050
Total	1,394	1,604	1,616	655	949	1,950	2,100

NOTE.—The recommended strengths for all the services include 18-year-old 1-year enlistees and other personnel in training but exclude cadets and midshipmen at the Military and Naval Academies.

Under this Budget, the Air Force in fiscal year 1950 will continue at about the present strength of 412,000 officers and men on active duty. It is contemplated that the Air Force will be organized with a minimum of about 48 combat groups and 10 squadrons, together with 27 groups of the Air National Guard. Within the limit of the funds provided, it is possible that adjustments in unit structure or strategic planning may at any time require changes in the number of active groups. At the end of fiscal year 1950, the Air Force program contemplates an active inventory of 9,200 aircraft of all types from trainers to heavy bombers. Increased funds in the Budget will permit the build-up of supporting forces in the Air National Guard to an average of 45,000 personnel and in the Air Force Reserve to 68,000 personnel in regular training status.

Personnel in the Army will be continued at 677,000 officers and men in order to maintain 10 divisions at increased strengths, together with

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

59 battalions. The active Army will be backed by the National Guard with an average strength of 325,000 personnel, an Organized Reserve of 230,000 in regular training status, as well as by other reserve personnel and equipment. Continuing responsibilities in the occupation of Germany, Austria, and Japan and in manning outlying bases will engage about 40 percent of the Army strength overseas in fiscal year 1950.

In the naval and marine forces a strength of 527,000 officers and men throughout the fiscal year 1950 is provided. The size of the active naval fleet is planned to be 731 ships, including 288 combatant ships. Its composition will be changed somewhat from the present fleet to accord with assigned functions and presently foreseen defense requirements. The active inventory of regular Navy and Marine Corps aircraft is expected to be 7,450 in the fiscal year 1950.

Under the reserve programs of the Navy and Marine Corps, 281,000 officers and men will be trained in 1950. Stand-by ships and matériel to augment the active Navy will remain available if needed.

Although present recruiting rates indicate that only small inductions, if any, will be necessary under Selective Service, it is essential that such authority remain available in the event that voluntary enlistments drop. Moreover, it must be recognized that the existence of the Selective Service Act has in itself been a contributing factor to the current results of the recruiting programs of the services.

Pay and maintenance of military personnel.—The pay and maintenance for the average of 1,616,000 officers and men on active duty in the fiscal year 1950 will require estimated expenditures of 5 billion dollars, 38 percent of all defense expenditures by the National Military Establishment. Expenditures for pay, allowances, subsistence, travel, welfare, training, clothing, and medical care will average about 3,100 dollars per man in the fiscal year 1950.

The increases in rates of military pay and allowances in 1942 and 1946 did not provide a balanced pay structure for the military services. A general overhauling of the military pay, allowance, and benefit structure is overdue. Since it is desirable for remuneration of military personnel to be in line with salaries of Federal civilian employees and other comparable groups, a tentative amount for this adjustment has been included in the Budget, pending later legislative recommendations.

Civilian components.—Our concept of national defense places important reliance upon the readiness of citizen-soldiers. This Budget provides for larger and better-trained reserves for the Air Force, Army,

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

and Navy. Expenditures for civilian components in the fiscal year 1950, exclusive of amounts for construction of facilities, are estimated at 760 million dollars, 30 percent above outlays in the present year and more than twice the amount spent last year. These expenditures cover drill and training pay and maintenance of reservists, operating expenses, and procurement of equipment over and above amounts transferred from wartime stocks.

The Budget recommendations of 795 million dollars of obligational authority for the fiscal year 1950 contemplate expansion of the reserve programs in 1950 and in later years toward the objectives outlined in my recent Executive order. Such expansion is planned at as rapid a rate as is consistent with sound organization, economical operation, and effective integration with the regular forces. The funds recommended for 1950 will permit an average of 949,000 officers and men in regular training status in air, naval, and ground units, as compared to 655,000 now participating.

Research and development.—Scientific and technical advances are vital to a dynamic national defense program. To develop improved weapons and equipment and add to our basic knowledge, new appropriations of 534 million dollars are recommended for direct costs of research and development for the fiscal year 1950. This amount does not include substantial outlays for indirect costs such as the pay and maintenance of military personnel engaged in research and development activities, and the construction and maintenance of facilities.

Direct expenditures for research and development in the fiscal year 1950 are estimated at 505 million dollars. This is somewhat below the estimate for the fiscal year 1949, when payments for programs initiated at the end of the war will be completed. About one-half of the expenditures for research and development will be for aeronautical research and development.

Aircraft and related procurement.—For the fiscal year 1949, 2.8 billion dollars of new obligational authority was provided for aircraft and related procurement, of which 2.0 billion dollars for the Air Force was made available for obligation until the end of 1950 and included some amounts for nonrecurring expenses.

It is estimated that 3.2 billion dollars in unexpended authorizations from 1949 and prior years will be carried forward to the fiscal year 1950. New obligational authority of 2.3 billion dollars is recommended for the fiscal year 1950 to permit contracts for approximately 34 million airframe pounds. This will make a total of 5.5 billion

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

dollars in aircraft and related equipment to be delivered and paid for in 1950 and subsequent years.

Expenditures for aircraft and related procurement in the fiscal year 1950 are estimated at 1.7 billion dollars, about 500 million dollars more than in the present year. Deliveries of 37 million airframe pounds are now scheduled for fiscal year 1950 and are expected to be slightly higher in fiscal year 1951.

Aircraft from wartime reserves will continue to meet a part of the replacement requirements in fiscal year 1950. In subsequent years, when these reserves are depleted, an increase in aircraft procurement may be required if the strength and structure of the Air Force and naval aviation are to be maintained at the level and replacement rates contemplated in this Budget.

Naval ship construction.—Expenditures for naval ship construction in fiscal year 1950 are estimated to be 406 million dollars, an increase of about 100 million dollars over the estimate for 1949.

Including the construction in fiscal year 1949, more than 1 billion dollars of naval ship construction, under present authorizations, will remain to be completed in fiscal year 1950 and later years. I am including in the Budget 279 million dollars to cover increased costs of completing the present construction program, with some readjustment in types of ships to be built. In addition, I am requesting 52 million dollars of new authorizations for certain ships which will be substituted for some of those previously authorized.

Military public works construction.—Expenditures for military public works construction by the Air Force, Army, and Navy in the fiscal year 1950, under existing legislation, are estimated at about the current level of 300 million dollars. This construction is largely for research and development facilities and badly needed housing for troops and dependents, both in the United States and overseas. This Budget recommends new obligational authority for the fiscal year 1950 of 113 million dollars for projects for which legislative authorization exists.

There are, however, additional requirements for family housing, for research and development facilities, and for other military construction which are not yet authorized. A tentative estimate for these additional military public works is included in the Budget, pending the enactment of authorizing legislation.

All other military expenditures.—The remaining expenditures of the National Military Establishment in fiscal year 1950, are estimated at

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

3.9 billion dollars compared with 3.4 billion dollars in 1949. These expenditures cover the procurement of other matériel (in addition to aircraft and ships), supplies, and services. The largest part of these expenditures will be for civilian workers engaged in production, maintenance, and administrative activities, both overseas and in the United States. Of all Federal civilian employees, approximately 865,000, or about 40 percent, will be employed in defense activities by the National Military Establishment.

Expenditures for procurement of equipment (exclusive of aircraft and ships), particularly for the Army, will increase in the fiscal year 1950 as deliveries on 1949 contracts are made, even though new obligations for this purpose in 1950 will be lower. Expenses of maintaining and operating facilities and equipment including aircraft will also increase over the 1949 level, largely in the Army and Air Force.

Increased emphasis has been given to industrial mobilization preparedness in the Budget for the National Military Establishment with the recommendation of appropriations of approximately 129 million dollars for fiscal year 1950 as contrasted with 57 million dollars provided for 1949. In addition to making provisions for the continued maintenance of tools and industrial plants held in stand-by status, the programs for industrial mobilization planning with industry and within the military establishments are being increased. Added emphasis is being given to coordinating the cataloging of supply items among the military services, and a greater integration of current procurement with industrial mobilization plans.

Stockpiling and other defense activities.—The aim of the stockpiling program is to provide a basic reserve of materials in which accessible resources are deficient, thereby permitting a rapid and sustained economic mobilization in the event of emergency. Stockpile procurement continues to be hampered by materials shortages and rising prices, since it must meet the competition of current industrial consumption, including that for military purposes. However, the concentration of procurement on the more urgently required materials should permit us to make substantial progress toward our goal of a reasonably adequate stockpile with minimum effect on current consumption.

Toward the stockpile goal, this Budget recommends 525 million dollars of new obligational authority for the fiscal year 1950 and supplemental authorizations of 310 million dollars for the present fiscal year. Of these amounts 211 million dollars for 1950 and 270 million dollars for 1949 are in contract authorizations to be used primarily for developmental contracts. A total of 800 million dollars in obliga-

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

tional authority has already been enacted in the last 3 years. In addition, by the end of fiscal year 1950, materials valued at about 700 million dollars will have been transferred to the stockpile from war surplus inventories and from Economic Cooperation Administration operations. Of the total stockpile objective of 3.7 billion dollars, materials and authorizations amounting to 2.3 billion dollars will have been provided.

Deliveries and expenditures, of course, will lag behind authorizations. Expenditures in the fiscal year 1950 are estimated at 525 million dollars, an increase of 175 million dollars in outlays over the current year. By the end of the fiscal year 1950, materials valued at about 1.6 billion dollars are expected to be on hand.

The stockpile represents an addition to the supplies obtainable in an emergency from domestic production and imports from protected sources. The recommended authorizations will permit the stockpile to be built up to the point at which, with the aid of prompt and effective allocations, a comparatively high degree of protection will be afforded to our economy in the event of emergency.

Expenditures for all other defense programs, including expenses of the Selective Service System, maintenance of reserve industrial plants by the Federal Works Agency, and by other agencies, are estimated at 46 million dollars in the fiscal year 1950. On the other hand, net receipts of 39 million dollars are estimated in the Reconstruction Finance Corporation defense program.

VETERANS' SERVICES AND BENEFITS

As a nation we have sought to give our veterans opportunities to work, to earn, and to recapture the normal pattern of their lives. In addition to our general programs for full employment, increased health services, improved housing and greater security for all, we have provided an extensive program of special benefits and services to veterans and their dependents.

The extent and scope of constructive measures to assist veterans of our earlier wars to return to useful civilian life were limited. Too often prior to World War I our country belatedly attempted to discharge its obligation to veterans merely by bestowing upon them pensions and gratuities. In contrast, servicemen of World Wars I and II have received more timely and better treatment both in the service and out. Improved medical and hospital care, insurance benefits, vocational rehabilitation, compensation, and other benefits have been provided to disabled servicemen or to the dependents of the deceased. Servicemen of World War I received adjusted compensation, while World War II veterans are receiving readjustment benefits to

800000—49——IV

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

assist them in obtaining education, training, jobs, businesses, and homes.

At the present time our expenditures for veterans' programs are declining as readjustment benefits for World War II servicemen fall off. However, the long-run trend of compensation and pension costs and of hospital and medical care is gradually upward. This means that over-all expenditures under present legislation will remain high even after the completion of the temporary programs under the Servicemen's Readjustment Act.

The program of veterans' services and benefits should reflect the fundamental fact that our primary long-run obligation is to dependents of veterans deceased from service causes and to veterans disabled in the service. In the fulfillment of these obligations we have two basic purposes. The first is to alleviate financial hardship to dependents of veterans deceased from service causes. The second is to help veterans surmount the physical and economic handicaps of their service disabilities. At the same time, we should preserve and stress our basic objective of assisting the recipients of these benefits to be as nearly as possible self-reliant and self-sustaining members of our society.

The necessity for new or extended benefits for veterans without service disabilities should be judged, not solely from the standpoint of service in our armed forces, but in the light of existing social welfare programs available to all, veterans and nonveterans alike. In recent years social security protection, including unemployment and old-age and survivors insurance and old-age assistance, has been made available to a large percentage of our general population. Prior to World War I the lack of such general benefits was, of course, one of the main reasons for the enactment of special benefits to veterans. At the present time we seek to broaden and extend these social security programs and to enact a comprehensive national health and disability insurance program for all our people, including veterans, who with their immediate families will soon constitute 40 percent of the population.

Total expenditures for veterans' benefits and services are expected to be 5.5 billion dollars in the fiscal year 1950, about 1.3 billion dollars below estimates for the current fiscal year. This drop reflects the virtual completion of unemployment and self-employment allowances, an expected sharp decline in educational training programs, and the inclusion in the fiscal year 1949 of a nonrecurrent payment to insurance trust funds. Even at the expected lower level, expenditures for veterans' programs will still comprise more than one-eighth of the total Budget.

Readjustment benefits.—The readjustment program has provided valuable educational and other opportunities to veterans of World

War II. It is estimated that by the end of the fiscal year 1950, 6,000,000 veterans will have used education and training benefits, more than 9,000,000 will have received unemployment and self-employment allowances, and nearly 2,000,000 will have obtained loan guarantees for homes and businesses. By the end of the fiscal year 1950 total outlays under the Servicemen's Readjustment Act since 1945 will have exceeded 13 billion dollars.

Enrollment in school, job, and farm training courses is estimated to decline to 1,575,000 in 1950 from this year's average enrollment of 2,000,000. In 1950 more than two-thirds of the participants in this program will be in on-the-job, on-farm, and below-college-level training, while less than one-third will be in colleges and universities. Total expenditures, estimated at approximately 2 billion dollars in the fiscal year 1950, reflect the increased rates of subsistence allowances enacted in the last session of the Congress.

I am recommending reenactment in its present form of the provision of the 1949 appropriation act prohibiting the use of funds for avocational and recreational training. This constructive action on the part of Congress in eliminating expenditures for courses which are inconsistent with the basic purpose of the Servicemen's Readjustment Act is expected to save more than 50 million dollars this year.

Federal Reserve Bank of St. Louis

Under present law only a small number of veterans will be eligible for unemployment and self-employment benefits after July 25, 1949. The average number of claimants to be paid in these two programs during the fiscal year 1950 is estimated at 74,000 as compared to about 400,000 in the fiscal year 1949. Expenditures decline correspondingly to 78 million dollars. By the end of the fiscal year 1950, aggregate outlays for veterans' unemployment and self-employment benefits, since 1945, will have exceeded 3.5 billion dollars.

Under the loan-guarantee title of the Servicemen's Readjustment Act, veterans obtained loans amounting to 7.4 billion dollars up to June 30, 1948, more than nine-tenths for homes, and the rest for farms and businesses. About 45 percent of this total is guaranteed or insured by the Government. Recent experience has shown a decline in the number of loans guaranteed. The estimates assume 322,000 loans in the fiscal year 1949 and 293,000 in 1950.

Pensions.—It is estimated that an average of 2,968,000 individuals and families will receive compensation and pension payments in the fiscal year 1950, an increase of 52,000 over the number for the present year. About one-fourth of these payments involve non-service-connected death or disability. The 1950 expenditure estimate of 2.1 billion dollars for pensions includes 1.4 billion dollars in compensation for service-connected cases, and 500 million dollars in pensions for non-service-connected cases. It also includes 180 million dollars for subsistence allowances to service-disabled veterans in training, a decline of 70 million dollars from the present year. These expenditures reflect the increased rates of compensation enacted by the last Congress for dependents of veterans deceased or disabled from service causes.

Insurance.—The Government contributes to the veterans' life insurance funds for war hazard claims. Budget expenditures for veterans' insurance, largely for such contributions, are estimated at 62 million dollars in fiscal year 1950. A tentative estimate of 413 million dollars is included for an additional contribution to the national service life insurance fund in the fiscal year 1949. This large nonrecurring item in the present year results from a re-evaluation of the Government's liability for war risk claims.

Hospital and domiciliary construction.—The construction program under which the Veterans Administration has been proceeding was planned and authorized during and immediately after the war. Now that we have the benefit of a period of postwar experience, I have reviewed the veterans' hospital and domiciliary construction program

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

and find that to continue with the construction of the full number of 90 authorized hospitals will result in a serious overbuilding, in terms of beds needed to meet foreseeable requirements. A reduction in the program will still make it possible to provide for all service-connected patients in every geographical area and will provide an even more liberal allowance of beds for non-service-connected patients than at present.

I have therefore directed that the program which I had previously authorized be curtailed by approximately 16,000 beds and asked the Administrator of Veterans Affairs to recommend specific adjustments in the program. I have approved his recommendations for the cancellation of 24 hospital projects, and the reduction in planned capacity of 14 additional hospitals. This will result in a reduction of 279 million dollars in the total of 1.2 billion dollars of construction previously authorized, and will reduce expenditures in the fiscal year 1950 by 115 million dollars. However, hospitals scheduled for completion will cost 42 million dollars more than originally estimated. Therefore, a net rescission of 237 million dollars in contract authorizations is recommended. Under this revised program, expenditures in the fiscal year 1950 for construction of hospital and domiciliary facilities are estimated at 260 million dollars, an increase of 77 million dollars over the fiscal year 1949, due to the progress of construction already under way.

Hospital and other services and administration.—Current expenses for hospital and medical care are estimated at 574 million dollars in the fiscal year 1950, 23 million dollars less than the peak expenditure in 1949. This decline reflects largely a downturn in the out-patient medical care program and increased use of excess supplies now in stock. Expenses of the in-patient care program will increase. The 1950 estimates provide for an average daily patient load of about 140,000, an increase of 4,000 over the current year.

Other current expenses, which are chiefly the costs of administering the nonmedical benefit programs of the Veterans Administration, continue to decline in line with work loads.

Trust accounts.—Veterans of the two World Wars hold 7,500,000 active policies under the Government life and national service life insurance programs. Premiums and earnings, supplemented by Government contributions to cover claims involving war risks, have built up substantial accumulations in these trust funds.

Assets of the national service life insurance fund will reach an estimated 7.7 billion dollars in the current fiscal year. The Government

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

contributions anticipated for the fiscal years 1949 and 1950 will bring total Government contributions to the national service life insurance fund to over 4 billion dollars.

VETERANS' LIFE INSURANCE FUNDS

(*Trust accounts*)

[Fiscal years. In millions]

Item	1948 actual	1949 estimated	1950 estimated
Receipts:			
Transfers from general and special accounts	$145	$482	$56
Premiums, interest, and other	677	712	745
Total	822	1,194	801
Expenditures for benefits, refunds, and other (deduct)	377	381	2,421
Net accumulation	445	813	−1,620

An initial dividend estimated at about 2 billion dollars is scheduled for payment during the fiscal year 1950 to all servicemen who hold or have held national service life insurance. The Veterans Administration is now reviewing insurance records to determine the status of the fund, after which the amount of the dividend and the method of payment can be decided.

SOCIAL WELFARE, HEALTH, AND SECURITY

In the last 15 years the Federal Government has established a basic pattern of activities in the field of social welfare, health, and security. The national system of old-age and survivors insurance, the system of regular grants to States for public assistance payments to the needy aged and blind and to dependent children, the Federal-State system of unemployment insurance, and several grant programs for the promotion of public health and of children's welfare were established by the Social Security Act of 1935. More recent laws established the railroad retirement system and grants to States for the school lunch, hospital construction, and mental health programs. Also included in the Government's social welfare, health, and security programs are the older system of grants to States for vocational rehabilitation, and those Federal services directed toward the prevention of crime and the apprehension and detention of criminals.

Under the Social Security Act, the national policy contemplated that old-age and survivors insurance would be the primary Government measure affording economic protection to the needy aged and dependent children, and that unemployment compensation would

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

provide temporary assistance to the unemployed. Other types of social insurance were to be added later to provide more adequate protection against major economic hazards of our society. Public assistance was designed as a backstop, a second line of defense, eventually to be replaced in large measure by social insurance benefits. We have not made progress toward this objective in the last decade. Individual benefit payments under public assistance now are substantially higher than under old-age and survivors insurance. They are more adequate, in many cases, than under unemployment insurance.

Three principal steps should be taken now to strengthen and complete the system of social insurance, and thereby to make our governmental programs consistent with the basic national policy in this field.

First, old-age and survivors insurance should be extended to nearly all the 25 million gainfully employed persons not now covered; the scale of benefits should be sharply raised; benefits should be provided for women at an earlier age; and higher part-time earnings should be permitted. (In addition, coverage under the unemployment compensation system should be extended and benefits made more adequate, as indicated in the "Labor" section of this Message.)

Second, disability insurance should be provided to protect against loss of earnings during illness or other temporary disability, and to assure continuing annuities to workers who become permanently disabled and therefore unable to earn a livelihood.

Third, a comprehensive national health program should be established, centering in a national system of medical care insurance, accompanied by improved services and facilities for public health and medical care.

These recommendations have had extended public discussion. Action is long overdue. I am confident that the Congress will enact promptly the legislation needed to achieve an integrated, comprehensive system of social insurance. In addition, I repeat my recommendation that the Congress give departmental status to the Federal Security Agency.

The needed legislation includes not only measures to establish administrative procedures and authorize benefit payments, but also provisions for financing them. At present, workers and employers each contribute to the old-age and survivors insurance fund at a rate of 1 percent of the covered pay roll. Under present law, this rate will advance on January 1, 1950, to 1½ percent each for employers and workers. The tax applies only to the first 3,000 dollars of earnings of each employee in any year, and earnings in excess of that amount are not counted in calculating the retirement benefits. My

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

recommendations contemplate raising the tax rate on presently covered employment on July 1, 1949, the date when increased benefits should be made available. In addition, I propose that we raise the ceiling on taxable earnings, as well as extend the pay-roll tax to workers and employers not now covered. The addition of insurance coverage for medical care and disability benefits will also require some additions to the pay-roll tax rates in order that the whole social insurance system will continue to be substantially self-supporting.

The financial impact of these recommendations is mainly in the trust accounts. For the fiscal year 1950, benefit payments and administrative expenses from the major trust accounts in the field of social welfare (other than unemployment insurance) are estimated at 1.3 billion dollars under existing laws. Under the legislation which I recommend, these payments would be doubled. Apart from this new legislation, they would rise by more than 100 million dollars above the total for the current fiscal year.

The total of Budget expenditures for social welfare, health, and security also is expected to rise in the fiscal year 1950, to nearly 2,358 million dollars, exclusive of expenditures from trust accounts. The increase over the fiscal year 1949 is 394 million dollars, of which 147 million dollars is in transfers to the railroad retirement trust account and 86 million dollars is for increased grants to the States for public assistance under present Federal law. Most of the remainder of the increase is divided between present programs for the promotion of public health and proposed new legislation for medical care insurance and public assistance.

Excluding trust-account transactions, new appropriations requested for social welfare, health, and security for the fiscal year 1950 are estimated at 2,271 million dollars. In addition, 92 million dollars of new contract authority will be needed, making a total of 2,363 million dollars of new obligational authority for these programs. This does not include 40 million dollars of appropriations necessary to liquidate contract authority made available in prior years, mainly for hospital construction grants. Of the new appropriations in Budget accounts, 84 million dollars is for proposed legislation. All the rest is for programs under present laws.

Public assistance to the aged and other special groups.—The public assistance programs of the Federal Government are all carried on in cooperation with the States, and the expenditures are almost entirely in the form of grants to State governments.

By far the largest amounts are for assistance to the aged, the blind, and dependent children, for which Federal Government expendi-

[1] In addition, this Budget includes 40 million dollars of appropriations recommended to liquidate prior year contract authorizations.

NOTE.—The Federal-State system of unemployment compensation and the Federal system of railroad unemployment insurance, formerly included in this category, are now reclassified under Labor.

tures under present laws are estimated at 1,064 million dollars in the fiscal year 1950. Each State determines its own scale of benefits to individuals in these public assistance categories, and the Federal Government reimburses the States for from 50 to 75 percent of the payments in each case, up to maximum individual benefit rates specified in the Federal law. The level of these matching payments was raised by action of the last Congress.

Because of this grant arrangement, the amount of Federal expenditure for public assistance in any one year is not directly subject to Federal budgetary control, but is determined by the action of the several States in fixing benefit rates and approving individual claims

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

for assistance. The total amount of Federal expenditures has steadily increased as the rising cost of living has compelled the States to give more assistance and the number of needy aged persons in our population has continued to rise. This increase in public assistance expenditures would be slower, and should ultimately be reversed, if other contributory insurances are made adequate to carry most of the load.

The Budget includes 65 million dollars as the tentative estimate of first-year expenditure under proposed legislation to improve the present public assistance system and to help cover State relief payments to persons not now eligible for assistance from Federal grants.

Railroad retirement insurance.—The expected rise in transfers to the railroad retirement trust account, from 565 million dollars in this fiscal year to 716 million dollars in 1950, reflects mainly a statutory increase in the tax rate, which has just become effective, and the continued rise in railroad pay rolls.

The estimates for 1950 assume favorable legislative action on several proposed changes in the timing of transfers from Budget accounts to the trust accounts. These relate to Federal Government payments for military service credits, administrative expense appropriations, and the transfer of the special railroad taxes to trust accounts. The changes would not affect the benefit rights of any individual or the tax liabilities of any employer.

Good budgeting requires that the law be revised so that payments by the Federal Government to the railroad retirement trust fund on account of military service credits allowed to railroad employees may be made annually in the years ahead on the basis of the actuarial value of claims actually approved as workers retire. As the law now stands, these payments are to be made in advance, without adequate relationship to eventual requirements for actual benefits. We have already advanced 160 million dollars to the trust fund to cover such future claims. Unless the law is amended, a further transfer of about the same amount may be required in the fiscal year 1950, and this would have to be added to the total of Budget expenditures.

Good budgeting requires also that the railroad retirement tax be transferred to the trust fund as it is collected, rather than on the basis of annual specific appropriations in advance of collections, as is the present practice. The estimates assume that an annual indefinite appropriation will be substituted, and also that the administrative expense appropriations will be consolidated and financed directly from the trust account.

Public health.—Federal expenditures for public health purposes comprise substantial grants to State and local governments to help

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

them combat disease and to meet part of the cost of new hospitals, as well as expenditures for direct Federal operations.

For the fiscal year 1950, I am recommending appropriations sufficient to double the general health grants to States, raising them to 22 million dollars, in order that the States in turn may extend and strengthen local health services. These stronger health services are an essential part of our national health program. I recommend that the present statutory limitation on the amount of such general health grants to States be removed from the Public Health Service Act, so as to authorize in later years the provision of larger amounts for the further improvement and expansion of local public health services. It is clearly more desirable to follow this course than to add new and separate grant programs or to continue to expand existing specialized health programs.

The estimates for 1950 provide for continuing at about the 1949 level the grants to States for specialized health programs, such as venereal disease and tuberculosis. Provision is made for new grants under the National Heart Act of 1948 and for grants for initial surveys under the Water Pollution Control Act of 1948. The Federal-aid hospital construction program will require additional contract authority to maintain the current limited volume of new hospital building.

I have included in Budget accounts for the fiscal year 1950 a tentative estimate of 15 million dollars for initial expenditures for inaugurating the system of medical care insurance.

New facilities for medical and related research to be carried on directly by the Public Health Service are in process of construction. As these are completed and staffed, we shall achieve a substantial expansion of specialized types of research which will contribute significantly to the health and longevity of our people.

Crime control and correction.—The work load of the Federal Bureau of Investigation is expected to continue at a high level in the fiscal year 1950, largely because of investigations of personnel employed in atomic energy work and international activities and the strengthening of the internal security program. A decline is expected in the inmate population of Federal prisons, and this will permit some reduction in staff, but the saving will be partly offset by higher per capita costs for care of prisoners.

Federal employees' accident compensation.—Expenditures under the Federal Employees' Compensation Act of 1916, as amended, are estimated for the fiscal year 1950 at 9 million dollars more than in 1949, but the increase is wholly for war claims payments to American citi-

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

zens abroad who were injured or suffered damage from wartime enemy actions. These payments will be covered by some of the proceeds of certain enemy-owned property.

Compensation payments to Government employees injured and to dependents of those killed in line of duty will continue under present law at about 14 million dollars a year. The benefit rates have not been changed since 1927. They are now quite inadequate. I recommend that these benefit rates be liberalized. The Budget includes a tentative estimate of 4 million dollars for this proposed legislation.

Trust accounts.—As I emphasized in a message to the Congress last May, this period of high employment and earnings offers a particularly opportune time for strengthening and broadening our social insurance system. At such a time, our people are best able to begin

providing for protection against the major economic hazards to which everyone is exposed. Although the recommended improvements will mean an immediate large increase in benefit payments, they will also result at the outset in a sizable increase in savings held in the social insurance trust accounts. This will help to reduce inflationary pressures and build a cushion of consumers' purchasing power against possible future recession.

Despite benefit payments of more than 1.3 billion dollars under present laws, the major trust funds for social welfare, health, and security for the year are expected to add 3.0 billion dollars to their assets during the fiscal year 1950. This will bring the aggregate assets of these funds above 19 billion dollars. The legislation I have recommended will add an estimated 460 million dollars to these assets in the fiscal year 1950.

The trust account assets are invested in Government securities, and the interest earnings are added to the principal of each trust fund. Although all benefits are paid directly from these accounts, the handling of contributions varies. Pay-roll tax collections under the railroad retirement system are included in Budget receipts and the transfers to the trust account appear as Budget expenditures. Proceeds of the pay-roll tax for old-age and survivors insurance are transferred to the trust account without affecting expenditures; this transfer is made through a deduction from receipts and an equal credit to the trust account. Amounts withheld from the salaries of those Government employees covered by Federal employees' retirement acts, as their payments to the retirement funds, are credited directly to the trust accounts.

HOUSING AND COMMUNITY FACILITIES

The objective of the Federal housing program is to improve the housing standards of the Nation and, in particular, to help low-income and moderate-income families obtain more adequate housing in a suitable community environment. To this end the Federal Government provides a wide variety of financial aids for both private and public housing construction, as well as research and other assistance on cost reduction.

In the past 3 years, housing construction has risen to the level it took 6 years to reach after World War I. Conversions of older houses have also increased the housing supply, and extensive repairs and modernization have improved housing standards. As a result, many of the most acute emergency needs, especially of veterans, have been met, and the number of families compelled to live with others or to make other temporary arrangements has been reduced.

Despite these encouraging gains, we still have a long way to go. The programs recommended in this Budget, both under existing and proposed legislation, are directed primarily towards improving the housing of low- and moderate-income groups. These programs emphasize lowering of housing costs and production of rental housing, and provide continued preference for veterans' housing requirements.

Research in costs and markets.—Basic to the entire housing program, both private and public, is the use of all available methods to lower construction costs. Technical research on the limited basis authorized by the Housing Act of 1948 has already begun. More extensive technical research, and analysis of housing markets and land-use, which would be authorized in the further legislation which I have recommended, are needed to assure effective use of both private and public funds in meeting our housing needs. The Housing and Home Finance Administrator will take the leadership in bringing potential cost reductions to the attention of industry and of State and local agencies in the form most useful to them.

A census of housing should again be authorized as part of the regular decennial census in 1950. Such a census would provide comprehensive and up-to-date information needed by both private industry and public agencies.

Slum clearance and urban redevelopment.—I have recommended for several years legislation to authorize the Federal assistance needed to permit cities to start clearing their slums and preparing the sites necessary for sound urban development, primarily private housing. We should not delay longer in authorizing initiation of the first installments of this long-term program. I recommend, therefore, that the Housing and Home Finance Administrator be authorized to contract for Federal grants amounting to 100 million dollars a year for 5 years. In addition, I recommend loan authorizations of 25 million dollars for the fiscal year 1950 and larger authorizations in the following 4 years, totaling 1 billion dollars for the 5-year period. The only Federal expenditures likely in the fiscal year 1950 are loans of 10 million dollars for planning the projects.

Private housing.—The great bulk of the housing of the Nation is today and should remain privately owned and privately financed. In addition to the general aids provided for all types of housing, the Federal Government aids private housing through sharing financial risks and providing a supplementary source of funds.

Over one-third of the new housing started in the next fiscal year, it is estimated, will be financed by mortgages insured by the Federal

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Housing Administration. In the years ahead our mortgage insurance system should give increased emphasis to assisting housing cooperatives and production of rental housing and lower-priced sales housing. Amendments are needed for these purposes, as well as to simplify the variety of insurance aids now available. Both the Federal Housing Administration and the Reconstruction Finance Corporation will encourage increased production of lower-priced housing by special financial assistance to producers using efficient large-scale construction methods. In addition, as part of our veterans' program, the Government will continue to guarantee loans made to veterans to help finance construction and purchase of homes.

The Federal National Mortgage Association, a subsidiary of the Reconstruction Finance Corporation, will continue to assist private lenders in certain cases where credit is short by purchasing federally insured and guaranteed mortgages. In the fiscal year 1950 these purchases, under the present authority, will result in estimated net expenditures of 149 million dollars. I am recommending revisions of the present limitations on mortgage purchases, which will result in an estimated 50 million dollars of additional expenditures. In order to prevent inflationary pressures, any such broadening should of course be confined to measures urgently required to finance the most-needed types of housing construction, particularly rental housing and housing cooperatives.

As another credit aid to private housing, the Federal home loan banks provide an important supplementary source of credit for the savings and loan associations which make about one-third of all home-mortgage loans. The Federal Savings and Loan Insurance Corporation insures the share-accounts of its member associations. Both the banks and the Corporation are supervised by the Home Loan Bank Board.

I am recommending basic revisions in the financial structure of these agencies designed to encourage substitution of private capital for Federal investments, to permit them to borrow from the Treasury in the event of any future emergency, and to give the Home Loan Bank Board more specific authority over the borrowing and lending operations of the member associations. Under this legislation, the additional retirement of Federal investment in home loan bank stock in the fiscal year 1950 will increase Budget receipts by an estimated 81 million dollars. The stand-by borrowing authority requested for the home loan banks and the Corporation amounts to 1,750 million dollars. I do not anticipate that any use will be made of this new authority except in time of emergency, but it will provide additional

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

assurance to the millions of shareholders, comparable to the assurance now given to bank depositors.

I am again recommending that the Congress provide for more adequate Federal aids to construction and improvement of privately owned farm housing. The new program would authorize the Secretary of Agriculture to provide loans for farm housing, as well as contributions for housing for farmers on potentially self-supporting farms and limited grants to improve substandard housing of low-income farmers.

Public housing.—Except for 3,000 permanent low-rent units authorized before the war, Federal assistance for new public housing since the war has been limited almost entirely to provision of temporary accommodations under the veterans' re-use program. With every month that passes, legislation to authorize a new and broader program of Federal assistance for low-rent public housing becomes more necessary. Only through such a program can cities make a substantial start in providing permanent housing for the low-income families for whom private enterprise cannot reasonably be expected to provide.

The legislation which I am now recommending would provide the Federal assistance required to permit construction of 1,050,000 low-rent units over a 7-year period. It would authorize the Public Housing Administration to make contracts with local public agencies providing for annual Federal contributions over a 40-year period sufficient to assure acceptable housing for low-income families at rents they can afford to pay. Contracts involving maximum annual contributions of 85 million dollars would be authorized for the fiscal year 1950, rising to a maximum annual amount of 445 million dollars by the end of the fiscal year 1954. In addition, the lending authority of the Public Housing Administration would be increased by 700 million dollars primarily for temporary financing. To minimize the cost of the program, the local housing agencies would meet their long-term financial requirements by selling to the public taxable obligations fully protected by the pledge of annual Federal contributions. Disbursements during the first year will amount to an estimated 129 million dollars, almost entirely for short-term loans.

The Public Housing Administration also has been administering the disposition of permanent and temporary units built under the war housing and veterans' re-use programs. I am recommending legislation to make possible more expeditious sale to private owners of all permanent war housing units, except those transferred to local housing agencies for low-rent housing. Adequate protection would be provided for present occupants. Legislation also is needed to permit

800000—49——V

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

transfer of all Federal ownership and other rights in temporary housing (with limited exceptions) to local communities which apply for such transfer. This step would permit the entire responsibility for such housing to be vested in local authorities, who can most readily determine the continuing emergency need.

Community facilities.—In accordance with the economic stabilization program, the Reconstruction Finance Corporation is limiting its new loans to public agencies to relatively low levels. Other expenditures will be made to complete the Brooklyn-Battery tunnel and to meet other prior commitments.

I again recommend legislation authorizing the Federal Works Agency to provide prompt assistance to communities in rebuilding facilities after floods and other disasters. A tentative appropriation estimate of 5 million dollars is included for this purpose.

Alaska housing and public works.—As part of the program to develop the resources of Alaska, I have recommended special assistance for both private and public housing. Such housing is badly needed, but is hampered by excessive construction costs. This Budget provides for a 10-million-dollar revolving fund to finance loans and construction by the Alaska Housing Authority. I also recommend a 2-million-dollar appropriation to the Federal Works Agency to provide for certain urgently needed public works in Alaska.

Appropriations and other authorizations—Summary.—Most of the expenditures for existing programs in the fiscal year 1950 will be financed from the corporate funds of the Reconstruction Finance Corporation provided in earlier years.

New appropriations of 44 million dollars and other authorizations of 1,987 million dollars would be called for under my legislative recommendations. The proposed stand-by borrowing authority of the Federal Savings and Loan Insurance Corporation and of the Federal home loan banks accounts for 1,750 million dollars. Slum clearance, low-rent public housing and farm housing proposals require contract and loan authorizations of 237 million dollars in the fiscal year 1950. An increase of 700 million dollars in the lending authority of the Public Housing Administration would be provided in the fiscal year 1949. It is estimated that 35 million dollars of the 174 million dollars in permanent appropriations, representing anticipated receipts from war housing and veterans' re-use housing, will be spent for current management and disposition activities. The remaining 139 million dollars will be transferred to the general fund of the Treasury without affecting Budget expenditures.

EDUCATION AND GENERAL RESEARCH

It is important to the continued progress of the Nation that we raise our educational standards and expand our fundamental research. At the present time the Federal Government promotes education by providing professional leadership and advice to educators, and by supporting vocational education and the land-grant colleges through grants-in-aid to the States. It also supports Howard University and educational institutions for the blind and deaf, and provides for the education of Indians. The Government provides library and museum services through the Library of Congress, the Smithsonian Institution, the National Gallery of Art, and the Botanic Gardens, and carries on general research through the National Bureau of Standards, the Bureau of the Census, and the Naval Observatory.

Expenditures in the fiscal year 1950 for education and general research are estimated at 414 million dollars. The increase of 329 million dollars over 1949 is almost entirely for proposed grants to States for education and for the decennial census of population.

In addition to these general programs, many Federal agencies carry on specialized education and research activities which are included in other functional groupings. Some of these are the education benefits for veterans, fellowship and other training programs designed to produce needed specialists, and research for military and other purposes.

Aid to education.—Although the Federal Government is engaged in this broad range of educational activities, we are not yet assuring all the children of our Nation the opportunity of receiving the basic education which is essential to a strong democracy. In many areas, teachers' salaries are low, particularly in the elementary grades. Too many are leaving the profession; too few are entering. Enrollments are rising. As a result, overcrowded classrooms and substandard instruction are common. As the large number of children born during and after the war reach school age, the situation will become even worse.

Many States are finding it difficult, even with high tax rates, to pay adequate salaries or to take other corrective measures. It is therefore urgent that the Congress enact legislation to provide grants to the States in support of a basic minimum program of elementary and secondary education for all our children and youth. This Budget includes a tentative appropriation estimate of 300 million dollars for such grants in the fiscal year 1950.

We know that a shortage of school buildings exists in many parts of the country as a result of wartime deferment of construction and

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

the increase in the school-age population. We do not know the overall extent of the shortage, the particular areas in which it exists, and whether State and local governments can alleviate it without special Federal aid for construction. In order to provide an adequate factual basis for further consideration of the problem, I ask the Congress to authorize a survey of educational building needs and the adequacy of State and local resources available to meet these needs.

[1] Less than one-half million dollars.

[2] In addition, this Budget includes 6 million dollars of appropriations recommended to liquidate prior year contract authorizations.

It has become increasingly obvious that the national welfare demands that higher education be made available to more of our talented young people. We should now determine the soundest and most practicable means of providing additional opportunities for capable

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

young people who could not otherwise afford a college or university education.

The Budget estimates include 1 million dollars as a tentative estimate of appropriations needed for these surveys when authorized by the Congress.

Howard University.—An extensive building program is under way at Howard University to meet part of the need which results from the doubling of student enrollment since 1946. Additional contract authorizations of 6 million dollars are requested in connection with this building program.

National Science Foundation.—The strength and economic welfare of our country in years to come are largely dependent on the advances that can be made in basic scientific research. To maintain and expand the Nation's efforts in scientific research and to help assure an adequate supply of trained scientists in the future, I again urge that the Congress enact legislation creating a National Science Foundation in a form which does not contain the basic administrative defects of the bill passed by the Eightieth Congress. This Budget includes tentative estimates of 2.5 million dollars of appropriations and, in addition, 12.5 million dollars of contract authority to enable the Foundation to establish its organization and initiate its program during the fiscal year 1950.

AGRICULTURE AND AGRICULTURAL RESOURCES

Federal programs for agriculture include a wide variety of services, grants, loans, and other payments designed to promote the conservation and development of agricultural resources and to improve the efficiency of farm production. They include financial and other assistance aimed to assure reasonable stability in farm income. Finally, they include special aids to farmers whose farm resources are limited in order to give them an opportunity to improve their economic status. The common objective is to promote adjustments within the farm economy and between it and other parts of the national economy which will enable agriculture to contribute its part to the economic development of the Nation as a whole and assure farmers a fair share in the fruits of that development.

The calendar year 1948 was another year of high prosperity for American agriculture. Because of the high level of national income and the continuing need abroad for American food and fiber, cash receipts from farm marketings totaled approximately 30.8 billion dollars—slightly larger than the 30.2 billion dollars in 1947. With rising

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

production costs, however, net farm income declined for the first time in 10 years—from 17.8 billion dollars in 1947 to an estimated 17.2 billion dollars in 1948. This compares with 6.4 billion dollars in 1941.

The ratio of prices received by farmers to prices paid has gradually declined from the peak of 133 in October 1946 to 109 in December 1948. A continuation of the downward trend in this ratio will mean smaller net incomes for farmers in 1949 and 1950, an adjustment from the high levels of the immediate postwar years. This adjustment, prevented from becoming excessive by the operation of price supports, will contribute to over-all stabilization of the economy and to a lowering of the cost of living.

[1] Less than one-half million dollars.

The principal factor causing the fluctuation in total agricultural expenditures is the volume of price support outlays by the Commodity Credit Corporation. This program largely accounts for the estimated

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

increase of 1,230 million dollars in expenditures from the fiscal year 1948 to 1949, and the decrease of 143 million dollars from 1949 to 1950. Apart from price support outlays, expenditures in 1950 for agriculture and agricultural resources are expected to be larger than in 1949 because of the higher level of loan disbursements for rural electrification, larger outlays to encourage conservation of agricultural land resources, smaller net repayments on loans made by the Federal Farm Mortgage Corporation, and the proposed International Wheat Agreement.

Price support.—Net outlays of the Commodity Credit Corporation are estimated to be 866 million dollars in 1949 and 538 million dollars in 1950 as compared with net receipts of 200 million dollars in 1948. Because of the very large production of wheat, corn, and cotton in the 1948 crop year, market prices of these commodities have declined to support levels, resulting in loan outlays or the acquisition of considerable stocks in the current fiscal year. Price support expenditures are expected also to be large on potatoes, eggs, and flaxseed.

For the 1949 crop year, production of cotton, wheat, and corn will probably again exceed anticipated domestic and export requirements, even assuming lower yields per acre than in 1948. If 1949 production should equal the magnitude of the 1948 crops, expenditures of the Commodity Credit Corporation would be considerably larger in the fiscal year 1950 than now estimated.

As I said a year ago, price supports should be regarded "chiefly as devices to safeguard farmers against forced selling under unfavorable conditions and economic depression." Their purpose is to bring an element of stability into agriculture. At the same time, they should not place excessive burdens on the Treasury and taxpayers or inhibit shifts in production needed to meet peacetime demands and to promote adequate conservation of our soil resources. The postwar revisions in the price support programs, which take effect largely in the fiscal year 1951, need certain amendments to make the price support mechanism and the quota provisions more workable.

Two major defects were noted at the time I signed the bill granting a Federal charter to the Commodity Credit Corporation. The first, the restriction on the Corporation's authority to acquire storage facilities, has prevented the Government from fulfilling its obligations under the price support program. The second, the provisions removing the Corporation from the direct supervision of the Secretary of Agriculture, divide responsibility and make more difficult the sound administration of our agricultural program. I recommend

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

that the charter of the Commodity Credit Corporation be amended to correct these deficiencies.

Rural electrification.—Despite the extreme shortages of materials and electrical equipment since the war, the rural electrification program has made notable progress. The percentage of total farms electrified has risen from 48 percent on June 30, 1945, to over 68 percent on June 30, 1948. With the carry-over of approximately 120 million dollars from prior-year loan authorizations of the Rural Electrification Administration, I recommend that the new loan authorization be reduced from 400 million dollars to 350 million dollars in 1950. New loan advances to rural cooperatives are estimated to be 360 million dollars in the fiscal year 1950 compared with 310 million dollars in 1949. With the rising percentage of total farms electrified, Rural Electrification Administration loans may be expected to level off in 1951 and decline in later years.

Conservation.—The long-run well-being of both the farmer and the Nation depends on the preservation of our soil resources. To accomplish this objective, the Soil Conservation Service provides technical advice and services to farmers. The ultimate goal as it affects the farmer is a plan of management for his farm which will insure both sustained full production and preservation of the soil. The Federal Government also makes payments to farmers to encourage desirable conservation practices. Expenditures for this program are estimated to increase from 227 million dollars in the fiscal year 1949 to 274 million dollars in 1950. For the 1950 crop-year conservation program (to be reflected in expenditures in the fiscal year 1951), I recommend planning for a 262.5-million-dollar program to include the cost of administering any acreage allotments or marketing quotas which may be adopted as well as payments to farmers and related administrative expenses.

A flood control survey report covering the watershed of the Missouri will soon be presented to the Congress. If this report is approved by the Congress, a 1949 supplemental appropriation of approximately 5 million dollars will be required to initiate needed land-use changes and the construction of terraces and other structures to retard water flow and soil erosion on the lands in the Missouri Basin. These operations are essential supplements to the flood control works of the Corps of Engineers on the downstream channels. Larger appropriations will be required in the years following 1950.

Wheat Agreement.—If the International Wheat Agreement is successfully renegotiated, I shall recommend its ratification and the

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

enactment of the necessary legislation to fulfill its provisions. Under this proposal, the principal exporting and importing countries would guarantee over a period of years an annual trade of a large volume of wheat within an agreed-upon price range. Thus, the Agreement would provide an orderly solution of some of the problems of international trade over the next few years without the demoralizing effect of unilateral action by governments acting independently. Approximately 56 million dollars is allowed in this Budget to cover the probable loss to the Commodity Credit Corporation in bridging the gap between the price of wheat for the farmer under the price support program and the price at which wheat is made available to foreign purchasers under the Agreement. Costs are expected to be less in later years and will be more than balanced by benefits to farmers and to the Nation in terms of greater stabilization of world trade.

Regional Agricultural Credit Corporation.—In order to simplify the Government-lending operations which assist agriculture, I recommend that the Regional Agricultural Credit Corporation be abolished, and that its functions and the capital stock revolving fund be transferred to the Secretary of Agriculture. Under this proposed change the Secretary could direct existing farm credit agencies to draw upon the revolving fund to extend emergency credit to farmers in the event of floods, droughts, or other natural disasters.

NATURAL RESOURCES

The Federal Government has far-reaching responsibilities for the conservation and development of our natural resources. It must necessarily assume responsibility for the development of atomic energy; it must assure the proper utilization of its extensive land holdings which contain valuable forest, grazing, mineral, water, fish, wildlife, and recreational resources; it must provide for the improvement of such public resources as the major streams of the country. In addition, the Government must foster reasonable standards of conservation and development of resources in private ownership in the interest of the national welfare. We should reappraise our plans for using and conserving our resources in the light of the marked changes that have occurred during and since the war.

In this Budget, programs are being restricted to the lowest level consistent with the heavy demands on our natural resources for both civilian and national defense requirements. The estimated expenditures give particular consideration to the serious needs for electric power in certain areas and for critical minerals. They also allow

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

for work made urgent by repeated postponements during and since the war.

Expenditures for the Government's natural resources programs in the fiscal year 1950 are estimated at 1,861 million dollars, an increase of 245 million dollars over 1949. The largest expenditures, 725 million dollars, will be made by the Atomic Energy Commission. Other large expenditures include 481 million dollars for flood control by the Corps of Engineers and 344 million dollars by the Bureau of Reclamation for development of water resources in the West. These activities represent more than four-fifths of the total estimated expenditures in 1950 and largely account for the increase over 1949.

[1] Less than one-half million dollars.

[2] In addition, this Budget includes 391 million dollars of appropriations recommended to liquidate prior year contract authorizations.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

New obligational authority recommended in 1950 consists of 1,549 million dollars in net new appropriations and 482 million dollars in contract and loan authorizations, of which 427 million dollars is in contract authorizations for the Atomic Energy Commission. Appropriations required to liquidate prior-year contract authorizations amount to 391 million dollars.

Atomic energy.—To an increasing extent our national welfare and security are linked to our atomic energy program. We must continue to add to our knowledge of this resource and move ahead with practical development. Special emphasis is given to the development of nuclear reactors as an eventual means for converting atomic energy into electricity and into power for propulsion of ships and airplanes.

The 1950 Budget provides increased funds for the production of fissionable materials and the development of the science and technology of atomic energy. The present high costs of rapidly accomplishing these purposes must be balanced against the ultimate and far greater costs of failure to move ahead vigorously in this field.

Land and water resources.—Present high costs of construction and large competitive demands from various sectors of the economy make it necessary to undertake new river basin projects only where urgency is evident. More than 90 percent of the recommended expenditures for river basin development in the fiscal year 1950 is to continue work started in prior years. Despite this restriction, Federal outlays for these resources will be about 1 billion dollars in 1950.

In view of the magnitude of the investment in these resources and its economic effects, there should be careful surveillance of the programs in order to prevent waste and assure sound development. We should apply the lessons of our Tennessee Valley experience without delay wherever they offer promise of improvement.

An essential first step for the flood control, reclamation, and other development activities is an expansion by the Geological Survey of its water resource investigations and topographic surveys.

The flood control program of the Corps of Engineers, involving the construction of major storage reservoirs, channels, and levees, will be limited in the fiscal year 1950 almost entirely to continuation of work on projects started in prior years. Particular emphasis is now given to the Mississippi River Basin but major projects are under construction in river basins on the Atlantic seaboard and Gulf coast, the Central Valley and Los Angeles areas in California, and the Columbia Basin.

The program of the Bureau of Reclamation is going forward on major projects in the Central Valley of California, the Columbia

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Basin, the Colorado River area, and the Missouri Basin. Because of the great increase in the estimated cost of the Missouri Basin development, the present plan should be reexamined to determine needed changes.

The anticipated shortage of power in some areas of the country makes it urgent that we move forward at a faster rate on certain of the Federal hydroelectric power projects in order to obtain benefits as early as feasible. Two large projects to be constructed by the Corps of Engineers are recommended for initiation in the Columbia Basin in the fiscal year 1950, in order to meet increasing power demands.

The Tennessee Valley, where the Government has broad responsibilities for power supply, faces a power shortage in the near future. Expansion of Tennessee Valley Authority's generating capacity is vital not only for the growing normal power demands, but also for the expanding needs of the atomic energy program. I recommend an immediate appropriation for 1949 to initiate construction of a steam plant to permit more effective utilization of the hydroelectric power resources of the area, and additional funds for 1950 to expedite progress on the project.

Construction by the Government of transmission and distribution facilities is essential in some areas for marketing the power from Government projects in compliance with law, which gives priority to public agencies and cooperatives. Funds have been recommended in the Budget for this purpose.

The Federal lands administered by the Bureau of Land Management contain resources that are both large and diverse in character. A large portion of these lands is in the grazing districts of the West and is an important part of the livestock economy of that area. The Bureau's administration of mineral resources includes not only the resources on the public lands, but also those on several million acres of land where surface rights have passed into private ownership. Aggregate receipts from these Federal land resources greatly exceed the costs of administration.

Mineral resources.—Two World Wars as well as subsequent needs for world recovery have drawn heavily on our mineral resources. The Federal Government has a responsibility for assuring the adequacy of these resources through intensive surveys, investigations, and exploration; fundamental research; and sound conservation practices. Funds recommended for the Bureau of Mines and some activities of the Geological Survey are directed to these purposes. In addition, I recommend legislation which will authorize incentive payments for the exploration and development of strategic and critical minerals.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

The country must face squarely the fact that a major portion of its rapidly increasing energy requirements is being met by oil and gas, which constitute only a small portion of our energy reserve. The prospects are that we shall become increasingly dependent on foreign sources of oil unless appropriate action is taken. I recommend legislation to provide for proper conservation and planned use of the oil reserves under the sea which are vested in the Federal Government. The Federal Government should take steps also to encourage commercial production of synthetic liquid fuels from our abundant reserves of coal, lignite, and oil shale. I recommend legislation to authorize the Government to provide financial assistance for this purpose.

Other resource programs.—Programs for the development of our forest, fish, and wildlife resources will be at about the same level in 1950 as in 1949. The increase in expenditures for forest resource development is explained by the inclusion in this function of forest development roads, previously classified with forest highways under the transportation function. An increase is recommended for the operation and improvement of the national parks. This increase is in recognition of the problems created by severe curtailment of upkeep in recent years, and the increased use of the parks as indicated by a trebling of the number of visitors since the close of the war.

Alaskan resources.—In my Message to the Congress in May 1948, I stressed the need for certain immediate actions to aid in the development of Alaskan resources. I recommend in this Budget funds for housing, community facilities, and transportation in this important area. In addition, the Budget includes increased expenditures for the investigation and development of Alaskan timber, water, land, mineral, fish, and wildlife resources.

TRANSPORTATION AND COMMUNICATION

The Federal Government has a major responsibility in the development and regulation of the vital transportation and communication industries. The Government has, at various times, provided direct or indirect assistance to most segments of these industries. It must continue to do so where necessary. The ultimate objective of such assistance is the balanced development of these industries, to the end that they can eventually provide all necessary services at the minimum cost to the immediate user and to the taxpayer.

A major part of the Federal expenditures for transportation and communication are for basic facilities such as highways, airports,

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

waterway improvements, and navigation aids. As postwar programs have developed, expenditures for such facilities have increased considerably in recent years. By fiscal year 1950, most of these programs will reach a level which is likely to be sustained with relatively little change in the near future.

While expenditures for these programs will increase between fiscal years 1949 and 1950, total expenditures for transportation and communication are estimated to decline from 1.8 billion dollars in fiscal year 1949 to 1.6 billion dollars in 1950. This decline results from an estimated reduction in the postal deficit, in line with my recommendation for postal rate revisions.

Postal service.—The postal deficit for fiscal year 1950, on the basis of current postal rates, would be more than 400 million dollars. A deficit of this size is unsound; it imposes upon the general taxpayer a financial burden which should properly be borne by the users of the service.

Large postal deficits are resulting from a record volume of postal business, most of which is carried at rates which do not cover handling costs. The low rates for parcel post have led to substantial diversion of express traffic from common carriers, with the result that the Post Office Department is now receiving a volume and type of parcel business which it cannot efficiently handle with existing facilities. Present rates for second and third class mail are so low that they make only a small contribution to the costs of handling such mail. While the national interest in disseminating information justifies some preferential treatment for periodicals and other second class matter, there is no sound basis for the extremely low rates now in effect.

In the last 2 years, I have recommended that the Congress raise postal rates to bring them more nearly into line with the increased costs of postal operations. A partial revision in rates was effected by the Eightieth Congress, but this did not offset the cost of the postal pay raise which was concurrently enacted. I therefore strongly urge again that the Congress enact at once an adequate revision of the postal rate structure. I have asked the Postmaster General to submit his recommendations for rate revisions sufficient to reduce the deficit to a reasonable level. The added revenue from such revisions, estimated at 250 million dollars for the fiscal year 1950, is shown in the Budget under proposed legislation. The remaining deficit would represent largely the costs of Government penalty mail, franked mail, air-line subsidies, and other costs not properly chargeable to the users of the postal service. Aside from such costs, postal operations

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

should be conducted on a self-sufficient basis, with rates maintained at a level adequate to accomplish that objective.

Aviation.—Commercial aviation, the newest of our transportation industries, is still in a stage of development that requires subsidy assistance. The program of the Civil Aeronautics Administration for modernizing the Nation's airways will assist the air lines in achieving greater safety and regularity, higher load factors, and thus eventually in reducing their dependence upon Federal financial aid. This program includes principally the installation of landing aids at major airports, and of new airway facilities to permit greater precision and flexibility in air navigation. The present transitional program, utilizing types of equipment currently available, is now getting fully under way, and the 1950 Budget recommendation contemplates its completion within a few years. Research and development work required for a longer-range program will be actively started in the fiscal year 1950, looking toward a complete all-weather air navigation system within a period of about 15 years.

New obligational authority for the Federal aid airport construction program is held to 40 million dollars in this Budget. Within these funds, primary emphasis will be placed upon the construction and improvement of large airports which are required for commercial air transport, and which would also have potential national defense importance.

The basic aeronautical research conducted by the National Advisory Committee for Aeronautics is essential for the design and development of improved aircraft, both military and civilian. The 1950 Budget provides for new facilities, and increased use of existing facilities, primarily for research upon military aircraft requirements.

Water transportation.—Promotion of the merchant marine, through Maritime Commission construction and operating subsidies, will require some increase in expenditures in the fiscal year 1950. The Budget recommendations provide for the construction of new vessels related to the national defense. With minor exceptions, contracts for sale of these vessels to private operators will be required before construction is begun. Within recent months, the Commission has let contracts for the construction of five passenger-cargo vessels, and has received bids on the construction of a large, high-speed passenger liner. Construction activity on these and other merchant vessels will increase Maritime Commission shipbuilding expenditures from 26 million dollars in fiscal year 1949 to 121 million dollars in fiscal year 1950.

By the end of the fiscal year 1949, the Maritime Commission expects to have determined the postwar operating subsidy rates for all essential trade routes. Subsidy expenditures will therefore be on a full-year

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

basis in fiscal year 1950, and are estimated at 22 million dollars, more than twice the 1949 level. The substantial increases in construction and operating subsidy programs will be largely offset by declines in other Maritime Commission expenditures, particularly those for vessel operation and for liquidation of prior-year obligations.

The activities of the Coast Guard in maintaining rescue stations, enforcing maritime laws, and operating navigational aids, are of primary importance to safety at sea of both air and surface transportation. These programs are expected to cost 148 million dollars in fiscal year 1950. This is slightly higher than in 1949 as a result of the full-year operation of ocean weather stations and a higher level of maintenance of other Coast Guard facilities.

River and harbor improvement by the Corps of Engineers is held in the 1950 Budget to the minimum required for navigation and related purposes. Most of the 1950 program will represent work on existing projects. Only 12 new projects, of high urgency, are proposed to be started in 1950.

I again urge the Congress to give early approval to the St. Lawrence waterway and power project. The navigational aspects of this project have recently assumed an increased importance as a result of the prospects for developing high-grade iron ore deposits in Labrador. As our domestic deposits become depleted, the proposed seaway will become an important link between our steel industry and this new potential source of ore. Furthermore, this dual-purpose project is needed as a source of low-cost power.

The Inland Waterways Corporation, which helps bring the advantages of water transportation to shippers, large and small, urgently needs additional capital to modernize its equipment. Such rehabilitation should enable the Corporation to demonstrate the prospects for profitable operation of its services, and permit the sale of the Corporation to a private operator at terms which would safeguard the interests of both the Government and the users of the service. I recommend that the Congress authorize the additional capital funds needed.

Highways.—Federal grants-in-aid for road construction have been increasing substantially in recent years, and in fiscal year 1950 will be close to the level authorized in existing legislation. Even with this high level of Federal aid, our highways are not being improved as fast as they wear out, nor are they being modernized to the extent required by postwar traffic conditions. Nevertheless, present high costs and the limited capacity of the construction industry make it undesirable for expenditures in the fiscal year 1950 to exceed the estimated level of 501 million dollars.

800000—49——VI

Digitized for FRASER

Federal Reserve Bank of St. Louis

Federal regulation.—Although most of the expenditures in this function are accounted for by the services, facilities, and subsidies discussed above, a highly important Federal responsibility is exercised by the regulatory agencies in this field. The regulation of rates and other aspects of transportation and communication services help to assure that the public interest will be adequately and efficiently served. The general economic adjustments within the past few years have substantially increased the normal work loads of these agencies. The Civil Aeronautics Board and the Federal Communications Commission in particular have been faced with major technological and economic developments within their expanding fields. Despite these increased problems, the present budgetary situation makes it desirable to hold these agencies to essentially their present levels.

Appropriations and other authorizations—Summary.—To carry out the above programs, I am recommending 1,593 million dollars in new obligational authority. Of this amount, 648 million dollars represent new contract authorizations, and 945 million dollars represent net new appropriations. Excluded from the total of new obligational authority are additional appropriations of 495 million dollars which will be required for the liquidation of prior-year contract authorizations.

FINANCE, COMMERCE, AND INDUSTRY

Except in times of war or other emergency, the Federal Government's finance, commerce, and industry programs are limited in the main to enforcing effective competition and to providing a wide variety of financial and nonfinancial aids to private industry. The principal agencies administering these programs are the Department of Commerce, Reconstruction Finance Corporation, and the various business regulatory agencies. I have already discussed the more specialized regulation and promotion of particular industries such as transportation and communication.

Total expenditures for finance, commerce, and industry programs are estimated at 107 million dollars in 1950, or slightly above the 1949 level. To carry out these programs, I am including in the Budget appropriations of 82 million dollars for fiscal year 1950, including tentative estimates of 44 million dollars for extension of existing stabilization activities and for new controls under the proposed stand-by authority. Supplemental appropriations of 24 million dollars will also be required for the current fiscal year, chiefly for stabilization activities and for completion of the Census of Business.

Stabilization program.—The major economic problem facing our country is to prevent further inflation and to move on into a stable economic situation without an intervening recession. To provide the necessary legislative authority, I recommend extending and strengthening the existing statutes covering rent, export and transportation controls, materials allocations, control of consumer credit, and bank-reserve requirements. In addition, I am recommending new authority for stand-by price and wage controls and for the allocation of a broader list of commodities, for use if voluntary measures prove inadequate, and for studies of the need for expanding productive capacity in shortage industries. Budget expenditures for this stabilization program are estimated at 41 million dollars in 1950.

Antimonopoly program.—A strong antimonopoly program is essential for the preservation of our free enterprise institutions. It can also provide immediate assistance in the present effort to restrain inflation. By concentrating enforcement activities in major consumer commod-

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

ities, conspiracies responsible for high prices can be broken and the cost of living reduced.

A substantial increase in funds for the Federal Trade Commission and the Department of Justice has been made available for the current fiscal year. I am recommending a small further increase in 1950, which will permit more adequate investigation of the extent of monopoly and monopolistic practices.

Business loans.—To restrain inflationary credit expansion, general loans to business in 1950 by the Reconstruction Finance Corporation will be held to approximately the 1948 level. A somewhat higher level is estimated for 1949 owing to substantial authorizations early in the fiscal year.

Collections on national defense loans and holdings of preferred stock in financial institutions continue but at a declining rate, as liquidation of these large depression and wartime programs is now nearing completion.

LABOR

In our free enterprise system the conditions of employment of the labor force of more than 63 million persons are primarily matters for the joint determination of labor and management. The role of the Federal Government is to assure that acceptable minimum standards of wages and working conditions are maintained and that both individual workers and organized groups of working people have a fair opportunity to improve their economic status. The Federal Government also promotes apprenticeship training and collects and publishes labor statistics and related information which are used widely by business, labor, and the general public. For the fiscal year 1950, the Government's labor programs will require Budget expenditures of 187 million dollars, approximately 3 million dollars more than in 1949.

The Labor Department should be substantially strengthened through reorganization to bring together the units which properly belong in it. Toward this end I shall recommend certain organizational changes essential for more effective administration of the Government's labor program.

Mediation services and regulation of employment conditions.—In my Message on the State of the Union I have already recommended urgently needed legislative action to provide fair laws under which management and labor can develop more fully the opportunities for cooperative production that collective bargaining affords. I have also recommended that the Congress promptly amend existing laws in order to establish up-to-date minimum standards for wages.

Total	183	184	187	187

NOTE.—The Federal-State system of unemployment compensation and the Federal system of railroad unemployment insurance, formerly classified in Social welfare, health, and security, are now included in Labor.

This Budget includes tentative estimates to carry out the legislation which I have proposed to authorize grants to the States to foster safer working conditions, and to authorize establishment of a national commission against discrimination in employment.

Labor information and statistics.—For programs now authorized in the Department of Labor, I am recommending increases to restore the facilities of the Department to meet more adequately the increasing needs for current information on employment, hours and earnings, consumer prices, and other subjects.

Placement services and unemployment compensation administration.—Public employment services and administration of unemployment insurance will require approximately 150 million dollars or about 80 percent of all expenditures for labor programs. Except for 11 million dollars for the Railroad Unemployment Insurance program, these funds are expended principally through grants to States.

Provision has been made, in the reserve for contingencies, for any added costs which may arise because of future statutory increases in

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

State salary rates or because of unexpected increases in State workload.

Trust accounts.—Total unemployment benefit payments are rising above the 1948 level, in large part because of increased labor turnover, the return of prewar seasonal patterns and because many insured workers have exhausted their claims to veterans' unemployment allowances from the Federal Government and collect State benefits when unemployed. Growth of the labor force and liberalization of State laws are also factors. Receipts are below the 1948 level because of changes in the law relating to railroad unemployment.

My proposal to strengthen the unemployment compensation system contemplates that coverage will be extended to workers in small establishments, Federal employees, and other workers not now insured. It contemplates that in some States the level of benefits will be raised and their duration extended.

GENERAL GOVERNMENT

Under "general government" are grouped not only the general management activities of the Government but also legislative and judicial functions, citizenship services, and government of the territories. Most of the expenditures in this category are for collecting the internal revenue, interest on refunds of receipts, the Government contribution to the Federal employees' retirement system, property supply and disposal, and the maintenance and operation of public buildings. The Weather Bureau also is included under general government, because its activities relate to several major functions of the Government. Similarly, the general expenditures of a few departmental offices are classified in this category.

[1] Less than one-half million dollars.

[2] In addition, this Budget includes 26 million dollars of appropriations recommended to liquidate prior year contract authorizations.

Total expenditures for general government functions have declined from a peak in the fiscal year 1948 and are now leveling off at about 1.2 billion dollars. Although the biggest reductions in war-liquidation programs have already occurred, further reductions are expected. Some increases, however, are estimated in the expenditures for permanent programs and services, particularly, in 1950 for tax collections and the employees' retirement system. Total new authorizations

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

requested for general government activities for the fiscal year 1950 are 57 million dollars less than estimated expenditures. I am postponing requests for contract authority for a general public buildings program and requesting only 7 million dollars in contract authority for other construction.

Property management.—Last year I submitted to the Congress proposals for a comprehensive property management program for the Federal Government. The Congress took action to repeal certain of the provisions of the temporary legislation for surplus property disposal and to provide for termination of the War Assets Administration February 28, 1949, but it failed to complete action on permanent property management legislation. Such legislation is urgently needed to achieve economies by modernizing the Government's supply and disposal systems. This legislation should designate a single property management agency. The remaining functions of the War Assets Administration should be transferred directly to this agency.

At the end of February, the War Assets Administration will have residual inventories of surplus property amounting to more than 2.5 billion dollars in terms of original cost. I am recommending a supplemental appropriation of 15 million dollars for the fiscal year 1949 and 21 million dollars for the fiscal year 1950 on the assumption that a single property management agency will be made responsible for these disposal activities upon dissolution of the War Assets Administration.

Revenue collection.—The operations of the Bureau of Internal Revenue have been extensively reviewed by the Congress and also by a special management committee appointed by the Secretary of the Treasury. As a result the Bureau is currently engaged in decentralizing its administration, improving office procedures, expanding its enforcement staff, and training its personnel to do a better job. In addition to nearly 2,000 enforcement personnel to be added this fiscal year, the Budget provides for a further increase of more than 7,000 in the fiscal year 1950. The Government has an obligation to its taxpayers to undertake complete collection of all the taxes that are legally due and to assure equitable treatment to each taxpayer. I am confident that the additional expenditures will represent a sound investment.

Retirement system.—Last February legislation was enacted which liberalized the provisions of the Federal employees' general retirement system by increasing annuity payments and adding survivorship benefits. Higher payments to the retirement fund are required to finance these new provisions. The rate of deductions from em-

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

ployees' salaries for retirement purposes was increased from 5 percent to 6 percent. It is also necessary to increase by over 100 million dollars in the fiscal year 1950 the Government's payment toward the retirement system, based on the revised retirement provisions and the higher Federal pay roll estimated for the fiscal year 1950.

Public buildings.—Because of the present inflationary conditions I am not now recommending a general public buildings program, although in many areas the Government is inadequately housed and such a program cannot be delayed indefinitely. However, I am proposing that work be started immediately on the construction of one building which should be completed in time for use by the Census Bureau in connection with the 1950 decennial census, and will thereafter be available for other needs.

Government Services Corporation.—I recommend that the Congress create a new, self-supporting, Government corporation to provide certain cafeteria and recreational services, primarily for Federal employees, in Government buildings and on Government property. At present, these services are provided by several organizations which do not fall within the normal governmental framework. This is essentially a governmental responsibility, and should be subject to the usual processes of governmental review and control.

Virgin Islands Company.—I renew my recommendation that the Virgin Islands Company be given a permanent Federal charter under comprehensive legislation. This Company is a chief contributor to the economic welfare of the Virgin Islands. The present stop-gap measure, which extended the life of the Company for only 1 year and with narrow powers, contributes little toward making the Virgin Islands economically self-sustaining and raising the standard of living of its citizens.

The National Capital.—The role of the National Capital Park and Planning Commission should be redefined and a stronger statutory basis established for the proper development of the District of Columbia and nearby areas in Maryland and Virginia.

I am not forwarding at this time an estimate of appropriation for the District of Columbia Redevelopment Land Agency to provide for the assembly of property in slum or blighted areas in the District of Columbia. When the redevelopment plans now being prepared by the National Capital Park and Planning Commission are approved, an estimate will be transmitted for consideration by the Congress.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

I recommend pay increases for the employees of the District of Columbia government, including the teachers in the public schools, who were unfairly excluded from the Federal Employees Salary Act of 1948.

INTEREST ON THE PUBLIC DEBT

Expenditures for interest on the public debt in the fiscal year 1950 are estimated at 5,450 million dollars, an increase of 125 million dollars over the fiscal year 1949; and the 1949 estimate is, in turn, higher than actual expenditures in the preceding year by approximately the same amount.

INTEREST ON THE PUBLIC DEBT

[Fiscal years. In millions]

Agency	Expenditures			1950 appropriations
	1948 actual	1949 estimated	1950 estimated	
Treasury Department	$5,188	$5,325	$5,450	$5,450

The continued increase in interest on the public debt arises in several ways. Accruals on the large volume of savings bonds outstanding reach higher brackets each year. There will also be a further increase in the amount of special issues held by Government trust funds, and these issues bear relatively high coupon rates which are, in part, fixed by statute. In addition, the increases in short-term interest rates which were initiated in July 1947 are now beginning to be fully reflected in the cost of the debt. This latter factor, is, to some extent, offset by the interest saving which has been effected by refunding maturing bonds bearing relatively high rates of interest into short-term issues bearing lower rates of interest.

Interest payments on marketable issues—issues which may be bought and sold freely in the market—will account for 55 percent of interest payments on the debt in the fiscal year 1950. The amount of interest paid on marketable issues is falling gradually because of a decline in the total volume of such obligations and the retirement or refunding of bonds bearing relatively high rates of interest. A portion of the interest paid out on marketable issues goes to the Federal Reserve banks, and most of such payments are coming back to the Government as miscellaneous receipts. This is a result of the Federal Reserve policy of paying approximately 90 percent of net Reserve bank earnings into the Treasury. Budget receipts from this source are estimated to rise from 140 million dollars in 1949 to 250 million

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

dollars in 1950, thereby offsetting most of the increase in the total interest cost of the debt.

Interest payments are a fixed obligation of the Federal Government. Their payment is financed by permanent indefinite appropriations not requiring annual congressional action.

PROPOSED LEGISLATION—A SUMMARY

Estimated expenditures, appropriations, and other authorizations included in the Budget total for programs under proposed new legislation are shown in the following table. The items in the table are of such importance as to warrant early enactment and financing in the next fiscal year. Moreover, legislative proposals for these items are sufficiently developed to permit tentative estimates of first year budgetary requirements.

The Budget also contains a general reserve for contingencies. It is designed as a minimum provision both for unforeseen contingencies and for legislative proposals now in the discussion stage, which may require action before the end of the next fiscal year.

PROPOSED LEGISLATION

INTRODUCTION TO PART I

Part I of the Budget contains the President's estimates of receipts, expenditures, and recommended authorizations for the fiscal year ending June 30, 1950, together with information showing the effect thereof on the condition of the Treasury. In addition to the estimates for the fiscal year 1950, there are shown the latest estimates for the fiscal year in progress, 1949, and actual data for the last completed fiscal year 1948.

This part is in three sections: (1) Tables 1 to 9, inclusive, consist of four summary tables on the Budget receipts, expenditures, and authorizations; a table showing the effect of financial operations on the Treasury cash balance and the public debt; and four supporting tables; (2) tables 10 to 12 comprise a summary table on the trust accounts and two supporting tables; and (3) table 13 summarizes receipts from and payments to the public, after consolidating budget and trust accounts and excluding intragovernmental and noncash transactions. This last-named table is explained in the text that accompanies a similar historical table in part IV.

Types of Treasury Accounts

The first 12 tables in part I deal with transactions in several types of Treasury accounts, as follows: (1) Tables 1 to 4 and 6 to 9, inclusive, cover general accounts, special accounts, and checking accounts of wholly owned Government corporations and enterprises; (2) tables 10 to 12 relate to trust accounts and special deposit accounts maintained with the Treasurer of the United States; and (3) table 5 summarizes transactions in the foregoing and in a clearing account for "outstanding checks, etc."

General accounts.—General accounts are credited with taxes and any other receipts not earmarked by law for specific purposes, and are charged with appropriations and expenditures payable "out of any money in the Treasury not otherwise appropriated." Accounts not specified otherwise in the Budget are general accounts.

Special accounts.—Special accounts are credited with receipts belonging to the Government which are earmarked by law for a specific purpose; they are charged with items payable out of such receipts.

Checking accounts of corporations and enterprises.—Most Government corporations and enterprises carry money in checking accounts with the Treasurer of the United States. These accounts appear in the expenditure tables, but not in receipt tables; the expenditures are shown net, after giving effect to collections.

Trust accounts.—Trust accounts are credited with receipts which are held in trust by the Government, usually for the benefit of individuals or classes of individuals. Such money is appropriated and expended for the purposes of the trust. Cash of the larger trust funds, not required for payment during the year, is invested in public debt securities of the United States in accordance with law.

Special deposits.—Mixed-ownership corporations carry certain moneys on special deposit with the Treasurer of the United States. Other agencies also use special deposit accounts, primarily for holding collections in suspense temporarily, pending further disposition. Such accounts appear in the expenditure tables, but not in receipt tables; the expenditures are shown net, after giving effect to collections.

Clearing account for outstanding checks, etc.—Checks are drawn by disbursing officers of the Treasury for expenditures of most civilian noncorporate agencies of the Government. Such expenditures are reported on a checks-issued basis in the daily Treasury statement, but they do not reduce the cash balance of the Treasury or affect the public debt until the checks are subsequently presented for payment. The excess of checks issued over checks paid (or vice versa) is credited (or charged) to a clearing account on the daily Treasury statement. Collections in transit, travel advances, and some other suspense items are also taken up in the clearing account. Checks drawn by non-Treasury disbursing officers do not affect the clearing account.

Basis for Reports and Estimates

Receipts.—Taxes are reported for fiscal year 1948 on the basis of actual collections, adjusted (for items in transit) to the daily Treasury statement reports. Tax receipts for fiscal years 1949 and 1950 are estimated on a collections basis, and are discussed by the Treasury Department in part IV. Miscellaneous receipts for 1948 are on the basis of amounts covered into the official receipt accounts, adjusted to the daily Treasury statement; estimates for 1949 and 1950 are consistent therewith.

Expenditures.—Expenditures in fiscal year 1948 are reported on a checks-issued basis, adjusted in total to the daily Treasury statement (which is partly checks issued and partly checks paid). Expenditures in 1949 and 1950 are estimated on a checks-issued basis. "Checks issued" include, in addition to checks, the issuance or increase of public debt obligations in lieu of checks in certain cases (e. g., armed forces leave bonds), and interfund payments accomplished by transfer and counter warrants. They are net of collections deposited in the expenditure accounts in the case of corporation checking accounts, certain revolving funds, and a few other accounts.

Appropriations and other authorizations.—The budget tables show appropriations and other authorizations becoming available for each year, even though some of the appropriations are made immediately available in a preceding year and a few deficiency appropriations become available in a subsequent year. An appropriation or other authorization is reported only once, even though balances may in some cases remain available from one year to another. Balances of prior year's authorizations which remain available are not reflected in the tables of part I.

Public debt and Treasury cash.—The budget tables show the public debt and treasury cash for June 30, 1947, and June 30, 1948, as reported in the daily Treasury statement, and estimates for 1949 and 1950 on a basis consistent therewith.

Concept of "Budget" Totals

The totals of budget receipts, expenditures, and authorizations stated in tables 1 to 9 generally include taxes and other Treasury receipts, expenditures therefrom, and the related appropriations or other authorizations. There are certain exclusions, however, as follows:

(*a*) Receipts, expenditures, etc., of money held in trust by the Government are excluded here; they are shown separately in tables 10 to 12. Government contributions

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

to trust funds are a budget expenditure, however, except as noted in the next paragraph.

(*b*) The appropriation from the general fund for the Federal old-age-and-survivors-insurance trust fund and similar social welfare items under proposed legislation are shown as deductions from receipts (tables 1 and 6), rather than as appropriations and expenditures. Such appropriations are equal to taxes from a given source.

(*c*) Borrowing and repayment of borrowing are excluded. Corporation debt transactions with the public are included in trust account expenditures in tables 10 and 12; appropriations and expenditures for statutory public debt retirement are in a memorandum section at the end of table 8.

(*d*) Refunds of receipts are shown as deductions from receipts and expenditures and included in the memorandum section at the end of table 8. This is a change from past practice.

(*e*) Receipts placed in revolving funds and in Government corporation checking accounts with the Treasurer of the United States are treated as deductions from expenditures, rather than as budget receipts. Expenditures of such accounts are reported on a net basis.

(*f*) "Capital transfers," representing payments from expenditure accounts of wholly owned Government corporations and enterprises into miscellaneous receipt accounts of the Treasury, for retirement of paid-in capital or disposition of earnings, are excluded and shown as memoranda at the end of tables 6 and 8. This is a change from past practice.

(*g*) Government moneys outside the Treasury are excluded. Among these moneys are the postal accounts and some funds of Government corporations. Postal account receipts and appropriations are stated in part II. The general fund contributes to the postal accounts to make up deficiencies in the postal revenue; the budget totals include this contribution and therefore they reflect the "net" excess of postal expenditures over receipts from postal operations.

Types of Authorizations

Appropriations.—Appropriations authorize employment of personnel, purchase of supplies and equipment, awarding of contracts, the making of grants, or the incurring of other obligations, and the withdrawal of funds from the Treasury for payment of these obligations.

They are of two types, annual and permanent. An annual appropriation is one which is made by current action of Congress, regardless of how long it remains available. It is usually made in an annual, supplemental, or deficiency appropriation act. A permanent appropriation is one which is automatically renewed each year, pursuant to law, without new action by Congress.

Appropriations may be either specific or indefinite in amount. The former names a definite sum of money in the appropriation act. The latter is one where the amount is not named in the act but determined later in accordance with provisions of the act; the amounts usually are not subject to administrative determination.

Appropriations may be available for obligations for a definite or indefinite period of time. One-year appropriations, the most common type, expire for obligation purposes at the end of the fiscal year for which they are made. Multiple-year appropriations expire at some fixed time after the year in which they became available. No-year appropriations do not expire on any particular date, but are available without time limit until expended or until the purpose for which they were made has been accomplished.

Because some time usually occurs between the incurring of an obligation and the payment therefor, appropriations are ordinarily available for expenditure for two fiscal years after they expire for obligation purposes.

Reappropriations.—A reappropriation continues available part or all of the unused balance of an appropriation which would otherwise expire for obligation purposes. Reappropriations are few in number.

Contract authorizations.—A contract authorization is a statutory authorization by the Congress—usually in an appropriation act—empowering the designated agency to enter into contracts and incur obligations for a stated purpose prior to the enactment of an appropriation. Like appropriations, contract authorizations may be 1-year, multiple-year, or no-year. Most such authorizations are specific; sometimes they are indefinite in amount. Past contract authorizations for shipbuilding and related ordnance were often based upon tonnage; their dollar value has been estimated, and such estimates have been adjusted administratively as unit costs change.

A contract authorization does not authorize the payment of the bills arising from the obligations incurred. In order to pay these bills, an appropriation to liquidate the contract authorizations must be enacted by the Congress. Such appropriations to liquidate contract authorizations are included with other appropriations in tables 3, 4, 7, and 8.

Authorizations to expend from public debt receipts.—In lieu of appropriations, the Congress in some instances authorizes expenditures to be made directly from borrowed money. The Treasury's authority to lend money to certain Government-owned corporations and enterprises is technically an authority to make the loan out of moneys which the Treasury in turn has borrowed (i. e., out of public debt transactions). Other withdrawals have been authorized in this manner in a few instances in recent years. Such authorizations may be either specific or indefinite in amount.

Official Estimates and Forecasts

The estimates for appropriations and other authorizations contained in the Budget are of two types: (1) Official or formal estimates, recommended for action at this time, and (2) forecasts of supplemental items which will be submitted to Congress later.

Forecasts of particular items for 1949.—A split column is used in tables 3, 4, 7, and 8—one part for actual authorizations already made and one for anticipated supplementals. For 1950, the official estimates and the forecasts are in the same column of the tables; they are distinguished however, in table 8, where the forecast items appear at the end of each agency or group of agencies, opposite stub-column entries showing whether they are under existing or proposed legislation.

Reserve for contingencies.—In addition to the various specific supplemental items, a forecast of additional needs, not now foreseen in detail, appears opposite the entry "Reserve for contingencies." No reserve fund or lump-sum appropriation is proposed by this item; it is merely to make allowance in the budget totals for possible supplemental appropriations to be submitted later if the need arises.

TABLE 1

BUDGET RÉSUMÉ

Based on existing and proposed legislation

[For the fiscal years 1948, 1949, and 1950]

PART A—BUDGET RECEIPTS AND EXPENDITURES

Description	1948 actual	1949 estimate	1950 estimate
BUDGET RECEIPTS (see table 6 for detail):			
Direct taxes on individuals	$21,895,904,012	$19,327,000,000	$19,788,000,000
Direct taxes on corporations	10,174,409,834	11,709,000,000	12,252,000,000
Excise taxes	7,402,029,924	7,715,000,000	7,900,000,000
Employment taxes:			
Existing legislation	2,395,656,147	2,610,000,000	3,324,000,000
Proposed legislation			1,960,000,000
Customs	421,723,028	407,000,000	407,000,000
Miscellaneous receipts:			
Existing legislation	3,809,084,369	2,275,703,040	1,749,736,347
Proposed legislation			81,000,000
Deduct:			
Appropriation to Federal old-age and survivors insurance trust fund:			
Existing legislation	1,616,162,044	1,754,000,000	2,420,000,000
Proposed legislation (including disability insurance)			1,700,000,000
Appropriation to health insurance trust fund: Proposed legislation			260,000,000
Refunds of receipts (excluding interest)	2,271,874,777	2,709,391,458	2,097,091,000
Total Budget receipts [1]	42,210,770,493	39,580,311,582	40,984,645,347
BUDGET EXPENDITURES (see table 7 for detail):			
National defense	10,923,657,230	11,744,902,018	14,267,500,479
Veterans' services and benefits	6,567,337,653	6,799,125,106	5,495,529,354
International affairs and finance	4,781,711,554	7,218,508,837	6,708,816,067
Social welfare, health, and security	1,852,997,508	1,962,931,365	2,357,882,108
Housing and community facilities	81,504,418	349,222,407	387,800,644
Education and general research	75,318,796	84,835,786	413,994,240
Agriculture and agricultural resources	575,286,458	1,804,919,383	1,661,863,697
Natural resources not primarily agricultural	1,091,334,731	1,615,723,674	1,860,787,569
Transportation and communication	1,266,663,356	1,756,518,429	1,585,905,133
Finance, commerce, and industry	88,367,804	102,331,505	107,303,327
Labor	182,795,127	184,019,686	186,829,951
General government	1,504,485,989	1,186,979,617	1,223,565,300
Interest on the public debt	5,187,849,708	5,325,000,000	5,450,000,000
Reserve for contingencies		45,000,000	150,000,000
Adjustment to daily Treasury statement basis	−388,009,683		
Total Budget expenditures [1]	[2] 33,791,300,649	[2] 40,180,017,813	41,857,777,869
Surplus or deficit (—)	[2] 8,419,469,844	[2]−599,706,231	−873,132,522

PART B—PUBLIC DEBT

Public debt at beginning of year	$258,286,383,109	$252,292,246,513	$251,569,000,000
Reduction through excess of Budget receipts over expenditures	8,419,469,844		
Increase through excess of Budget expenditures over receipts		599,706,231	873,132,522
Other changes in debt	+2,425,333,248	−1,322,952,744	−517,132,522
Public debt at end of year	252,292,246,513	251,569,000,000	251,925,000,000

PART C—BUDGET APPROPRIATIONS AND OTHER AUTHORIZATIONS

Appropriations [3]	$31,214,184,679	$34,273,063,827	$41,572,315,253
Deduct appropriations to liquidate contract authorizations	670,865,000	1,114,857,964	3,035,855,625
Appropriations, excluding appropriations to liquidate contract authorizations	30,543,319,679	33,158,205,863	38,536,459,628
Anticipated supplemental appropriations for 1949 (excluding anticipated supplemental appropriations to liquidate contract authorizations)		2,613,334,279	
New contract authorizations	4,781,319,469	1,912,518,964	3,857,723,300
Anticipated supplemental contract authorizations for 1949		303,063,000	
Authorizations to expend from public debt receipts	3,400,000,000	2,100,000,000	2,180,000,000
Anticipated supplemental authorizations to expend from public debt receipts		700,000,000	
Reappropriations	16,298,272	8,276,853	1,634,322
Anticipated supplemental reappropriations		240,359	
Total Budget appropriations and other authorizations	38,740,937,420	40,795,639,318	44,575,817,250

[1] Excludes capital transfers from expenditure to receipt accounts and refunds of receipts (see memorandum sections at the end of tables 6 and 8 for detail).

[2] Expenditures and surplus in 1948 do not reflect the bookkeeping transfer of $3,000,000,000 of the 1948 surplus to the foreign economic cooperation trust fund for expenditure in 1949; expenditures from this fund in 1949 are shown here as Budget expenditures.

[3] Includes permanent appropriations.

TABLE 2

SUMMARY OF BUDGET EXPENDITURES

BY ORGANIZATION UNIT

Based on existing and proposed legislation

[For the fiscal years 1948, 1949, and 1950]

Description	1948 actual	1949 estimate	1950 estimate
BUDGET EXPENDITURES (see table 8 for detail):			
Legislative branch	$43,126,172	$53,156,036	$64,468,005
The Judiciary	19,673,784	21,021,611	22,760,375
Executive Office of the President	8,326,828	9,353,932	10,578,398
Funds appropriated to the President:			
Economic cooperation: Foreign assistance	154,015,740	4,600,000,000	4,500,000,000
Other foreign aid[1]			355,000,000
Other[1]	9,826,748	2,500,000	14,400,000
Independent offices:			
Atomic Energy Commission	465,586,869	632,200,000	725,200,000
Civil Service Commission	261,403,260	244,115,567	353,144,504
Export-Import Bank of Washington	460,201,412		146,400,000
General Accounting Office	33,984,199	36,661,842	37,391,732
National Advisory Committee for Aeronautics	37,543,270	44,300,000	59,900,000
Philippine War Damage Commission	35,764,444	195,652,965	182,506,011
Railroad Retirement Board	778,363,777	584,100,133	727,259,845
Reconstruction Finance Corporation	155,050,361	298,092,376	183,903,500
Tennessee Valley Authority	33,827,917	28,655,933	48,861,000
United States Maritime Commission	291,678,329	195,244,776	187,440,000
Veterans Administration	6,474,103,038	6,666,573,447	5,313,201,654
War Assets Administration	286,702,020	103,626,450	9,500,000
Other independent offices	77,961,969	343,513,712	778,730,330
Federal Security Agency	1,028,365,478	1,380,227,440	1,908,564,503
Federal Works Agency	488,002,829	590,325,976	686,800,801
Housing and Home Finance Agency	[a] 73,910,704	[a] 40,531,908	105,856,238

TABLE 5

EFFECT OF FINANCIAL OPERATIONS ON THE PUBLIC DEBT

Based on existing and proposed legislation

[For the fiscal years 1948, 1949, and 1950]

Description	1948 actual	1949 estimate	1950 estimate
Net results of financial operations for the year:			
Budget surplus (or deficit −), from table 1	$8,419,469,844	−$599,706,231	−$873,132,522
Excess of trust account receipts over expenditures, from table 10	2,765,632,969	2,709,527,567	2,017,094,758
Increase (or decrease −) in clearing account for outstanding checks, etc.	−507,106,039	400,000,000	
Total, results of financial operations for the year	10,677,996,774	2,509,821,336	1,143,962,236
Trust account investments (—) in the year, from table 10	—3,059,975,630	—2,719,286,643	−1,999,569,968
Change in Treasury cash balance:			
Treasury cash balance at beginning of the year	3,308,136,929	4,932,021,477	3,999,309,657
Treasury cash balance at end of the year (deduct)	4,932,021,477	3,999,309,657	3,499,701,925
Cash available for debt retirement due to change in Treasury balance	−1,623,884,548	+932,711,820	+499,607,732
Net available for debt retirement	5,994,136,596	723,246,513	
Net requirements for additional borrowing			356,000,000
Public debt at beginning of the year	$258,286,383,109	$252,292,246,513	$251,569,000,000
Net debt retirement during the year (−)	−5,994,136,596	−723,246,513	
Net borrowing during the year			356,000,000
Public debt at end of the year	252,292,246,513	251,569,000,000	251,925,000,000

MEMORANDUM—DISTRIBUTION OF PUBLIC DEBT HOLDINGS [1]

Description	June 30, 1947, actual	June 30, 1948, actual	June 30, 1949, estimate	June 30, 1950, estimate
Held by the general public	$203,521,766,354	$195,097,569,838	$217,731,342,736	$216,046,828,428
Held by the Federal Reserve Banks and Postal Savings Systems	25,184,949,290	24,665,536,650		
Held by Federal Deposit Insurance Corporation and Federal Home Loan Banks [2]	1,524,826,215	1,420,745,225		
Held by wholly owned Government corporations [3]	455,259,000	456,877,550	466,853,371	507,797,711
Held by major Government trust funds	27,599,582,250	30,651,517,250	33,370,803,893	35,370,373,861

Adjustment to daily Treasury statement basis	+1,119,089		
Total, customs	421,723,028	407,000,000	407,000,000

[1] Based on the scheduled increase from 1 percent to 1½ percent each on employers and employees effective Jan. 1, 1950. The estimate also assumes change in the method of collection requiring, with certain exceptions, that tax payments be deposited in designated depositaries in the first month following the month of liability. Under present regulations tax payments are due on the last day of the first month following the end of the quarter in which the liabilities accrued.

[2] These estimates assume that tax payments will be deposited in designated depositaries in the first month following the month of liability.

TABLE 10

SUMMARY OF TRUST ACCOUNT RECEIPTS, EXPENDITURES, AND APPROPRIATIONS

Based on existing and proposed legislation

[For the fiscal years 1948, 1949, and 1950]

Description	1948 actual	1949 estimate	1950 estimate
TRUST ACCOUNT RECEIPTS (see table 11 for detail):			
Unemployment trust fund:			
Deposits by States	$1,007,343,720	$982,000,000	$998,000,000
Deposits by Railroad Retirement Board	130,633,530		14,319,000
Interest on investments	165,279,218	181,500,000	184,641,932
Transfers from general and special accounts	9,650,100	8,967,357	5,104,264
Proposed legislation			230,000,000
Federal old-age and survivors insurance trust fund:			
Appropriation from general account receipts	1,616,044,525	1,754,000,000	2,420,000,000
Interest on investments	190,562,313	228,000,000	262,289,440
Transfers from general and special accounts	700,000	3,279,400	3,604,000
Proposed legislation			1,700,000,000
Railroad retirement account:			
Interest on investments	38,875,492	50,700,000	62,000,000
Transfers from general and special accounts	758,488,498	564,570,000	715,889,000
Health insurance trust fund: Proposed legislation			260,000,000
Veterans' life insurance funds:			
Premiums and other receipts	434,299,020	447,264,000	466,830,000
Interest on investments	243,003,836	265,120,000	278,160,000
Transfers from general and special accounts	144,617,154	481,807,500	56,098,000
Federal employees' retirement funds:			
Deductions from employees' salaries and other receipts	238,753,314	338,454,921	361,109,292
Interest and profits on investments	108,206,225	119,890,075	138,796,947
Transfers from general and special accounts	247,479,000	227,544,000	331,794,000
Other trust accounts:			
Transfers from general and special accounts	6,000,000	12,000,000	12,000,000
Miscellaneous trust receipts	420,518,488	292,362,976	298,082,204
Adjustment to daily Treasury statement basis	[1] +754,775,648		
Total, trust account receipts	[2] 6,515,230,081	5,957,460,229	8,798,718,079
TRUST ACCOUNT EXPENDITURES (see table 12 for detail):			
Unemployment trust fund: Withdrawals by States and other expenditures	856,440,214	962,700,000	1,169,754,000
Federal old-age and survivors insurance trust fund: Benefit payments and administrative expenses	559,021,847	655,740,156	2,244,762,842
Railroad retirement account: Benefit payments and other expenditures	222,151,181	288,600,000	316,585,000
Veterans' life insurance funds: Insurance losses and refunds	376,948,679	381,228,000	2,421,200,000
Federal employees' retirement funds: Annuities and refunds	243,757,805	274,108,938	277,137,635
Other trust accounts: Miscellaneous trust expenditures	508,927,071	382,877,119	289,675,094
Checking accounts of Government corporations (not wholly owned) with the Treasurer of the United States (net)	144,705,188	132,750,000	68,250,000
Other special deposit accounts (net)	30,125,429	279,000,000	66,000,000
Sales and redemptions of obligations of Government corporations and credit agencies in the market (net)	[c] 107,387,658	[c] 109,071,551	[c] 71,741,250
Adjustment to daily Treasury statement basis	[1] +914,907,356		
Total, trust account expenditures	3,749,597,112	[2] 3,247,932,662	6,781,623,321
Net accumulations in trust accounts	2,765,632,969	2,709,527,567	2,017,094,758
TRUST ACCOUNT INVESTMENTS IN UNITED STATES SECURITIES (see table 12 for detail):			
Unemployment trust fund	446,398,623	209,182,856	262,311,196
Federal old-age and survivors insurance trust fund	1,194,445,007	1,369,782,896	2,141,149,168
Railroad retirement account	569,000,000	328,259,000	460,962,000
Health insurance trust fund: Proposed legislation			260,000,000
Veterans' life insurance funds	493,500,000	400,904,000	[b] 1,678,615,000
Federal employees' retirement funds	363,082,000	411,857,891	554,562,604
Other trust accounts	[a] 6,450,000	[a] 700,000	[a] 800,000
Total, trust account investments	3,059,975,630	2,719,286,643	1,999,569,968
Total, trust account expenditures and investments	6,809,572,742	5,967,219,305	8,781,193,289
TRUST ACCOUNT APPROPRIATIONS (see table 12 for detail):			
Unemployment trust fund	1,312,906,568	1,172,467,357	1,432,065,196
Federal old-age and survivors insurance trust fund	1,807,306,838	1,985,279,400	4,385,893,440
Railroad retirement account	797,363,990	615,270,000	777,889,000
Health insurance trust fund: Proposed legislation			260,000,000
Veterans' life insurance funds	821,920,010	1,194,191,500	801,088,000
Federal employees' retirement funds	594,438,539	685,888,996	831,700,239
Other trust accounts	479,006,622	296,205,287	292,159,066
Total, trust account appropriations	[2] 5,812,942,567	5,949,302,540	8,780,794,941

[a] Deduct, excess of repayments and collections over expenditures. [b] Deduct, excess of liquidations over purchases. [c] Deduct, excess of sales over redemptions.

[1] Due largely to transfer to Budget receipts of approximately $750,000,000 of proceeds from sale of surplus war-built merchant vessels.

[2] Excludes bookkeeping transfer of $3,000,000,000 from general accounts for 1948. Expenditures for 1949 are included under Budget expenditures for "Economic cooperation: Foreign assistance."

Civil-service retirement and disability fund:			
Deduction from employees' salaries, etc	234,850,130	333,960,864	356,817,575
Interest and profit on investments	107,112,646	118,739,605	137,601,382
Transfers from general and special accounts—United States share	244,000,000	224,000,000	328,393,000
District of Columbia share	1,530,000	2,032,000	1,779,000
Total, civil-service retirement and disability fund	587,492,776	678,732,469	824,590,957
Canal Zone retirement and disability fund:			
Deductions from employees' salaries, etc	1,216,465	1,186,853	1,216,279
Interest on investments	518,052	539,485	565,978
Transfers from general and special accounts—United States share	1,177,000	1,177,000	999,000
Total, Canal Zone retirement and disability fund	2,911,517	2,903,338	2,781,257

[1] Based on the scheduled increase from 1 percent to 1½ percent each on employers and employees effective January 1950. The estimate also assumes change in the method of collection requiring, with certain exemptions, that tax payments be deposited in designated depositaries in the first month following the month of liability. Under present regulations tax payments are due on the last day of the first month following the end of the quarter in which the liabilities accrued.

[2] Includes $28,400 to be received from anticipated supplemental for "Expenses, benefits, deceased veterans, World War II, bureau of old age and survivors insurance, Social Security Administration."

[3] This estimate assumes that tax payments will be deposited in designated depositaries in the first month following the month of liability.

[4] Includes $412,590,000 to be received from anticipated supplemental for "National service life insurance appropriation, Veterans Administration."

Excess of receipts from the public	8,848	2,790	1,475
REPAYMENT OF BORROWING FROM THE PUBLIC			
Excess of receipts from the public	8,848	2,790	1,475
Receipts from exercise of monetary authority [3]	37	36	39
Decrease or increase (−) in Treasury cash balance	−1,624	933	500
Repayment of borrowing from the public (net)	7,260	3,759	2,014

[1] Detail does not necessarily add to totals because of rounding.
[2] Excludes special deposit accounts of mixed-ownership Government corporations.
[3] Consists of seigniorage on silver and increment resulting from reduction in weight of the gold dollar.

Table 13, "Receipts from and payments to the public," presents a picture of the flow of money between the Federal Government as a whole and the public. The public is defined to include individuals; banks (including the Federal Reserve and Postal Savings Systems); businesses; private corporations; State, local, and foreign governments; and international organizations. This table, therefore, is useful in judging the effect of Federal finances on other sectors of the economy.

Table 13 excludes from receipts and payments intragovernmental and noncash transactions which appear in the Budget statements. It includes transactions between the trust accounts and the public which are not included in Budget receipts and expenditures. A more complete description of the terms and concepts used in this table appears on page 1375, part IV, where historical data for the years 1929 to date are also shown.

A supporting schedule showing the derivation of the figures in table 13, and their relation to Budget receipts and expenditures, will be furnished on request to the Bureau of the Budget.

INTRODUCTION TO PART II

Detailed budget estimates are divided between parts II and III of the Budget. Part II covers most of the Government, but it excludes the Government corporations and certain similar agencies for which "business-type" budgets are printed in part III. In contrast to the business-type budgets (explained in the Introduction to part III), the budgets contained herein are sometimes called "Government-type" budgets. They consist of appropriation language and obligation schedules as explained below.

CHAPTER SUMMARIES AND EXPLANATORY STATEMENTS

The contents of part II are arranged in chapters, generally one for each of the larger agencies and establishments; the remainder of the agencies in the executive branch are grouped with the Executive Office of the President in a single chapter.

A summary table at the head of each chapter compares the estimated amounts of appropriations and contract authorizations for 1950 with the amounts for 1949. The 1949 columns show separately the amounts already available and a forecast of the supplemental appropriations required. The 1950 figures are in a single column, but a forecast of supplemental appropriations for general and special accounts—to be requested later—appears in a separate line or lines at the end of the relevant section of the table.

The summary table is accompanied by an explanatory statement which describes briefly the functions and programs which are the basis of the appropriation language and detailed schedules which follow.

APPROPRIATION LANGUAGE

The official "estimates of appropriation" recommended by the President are in the form of the exact language and amounts proposed for enactment.

The language in appropriation acts for the fiscal year 1949 is used as a basis for the 1950 proposals. Brackets are set around material therein which it is proposed be omitted; italicized words and figures show proposed additions. In the case of permanent appropriations, including most trust accounts, an explanatory note is used in lieu of quoting the exact language of the law which makes the appropriation.

Bold-face headings which precede the language and schedules are not a part of the appropriation acts but are the accounting titles assigned to each appropriation or fund. Immediately following the language are citations to relevant laws and the latest appropriation acts, after which the amounts of the 1949 appropriations and 1950 estimates are printed in bold-face type. If the appropriation is indefinite, the amount of the latest estimate is shown.

SCHEDULES OF FUNDS AVAILABLE AND OBLIGATIONS

Schedules of obligational availability and obligations are presented for funds *in* the Treasury which are active for obligation purposes (except those which are in part III of the Budget), but not for special deposits *with* the Treasurer of the United States. The schedules cover the budget year (1950), the fiscal year in progress (1949), and the last completed fiscal year (1948). The schedules do not include supplemental appropriations not yet enacted, except those caused by the pay increase (Public Law 900, 80th Cong.) in fiscal year 1949, as explained below. Obligations represent the estimated cost of services rendered, orders placed, contracts awarded, etc., during the year, regardless of whether or not payment is made in the same year.

Funds available for obligation.—The first section of the schedules shows the appropriations made or required, other sources of obligational availability, the transfers in and out, coming to a "total available for obligation." From this figure there are deducted the balances not used within the year, leaving the amount of "obligations incurred." Where the cost of an activity has been moved from one appropriation title to another for 1950, the schedules will often show a "comparative transfer" of the obligations for that purpose in the years 1948 and 1949, in order that obligations for all 3 years under both appropriation titles will be on a consistent basis.

Obligations by activities and objects.—Where possible obligations of each year are analyzed by activities, projects, or purposes. The classification used for this analysis differs according to the work done under the several appropriations. In addition, obligations are broken down by a uniform object classification, which shows the nature of the services or things purchased, regardless of the purpose for which they are used. Object classes are numbered from 01 to 16, inclusive.

Detail of personal services.—The final section of the schedules gives considerable detail on the number of positions and the amounts required for personal services. Employment in "permanent" positions is separated as to departmental (central office) and field, and is broken by classification grade and in the higher grades by title. A "lapse" line provides a deduction for the savings due to vacancies, leave without pay, etc. Temporary positions and special categories of personnel, and additional compensation for overtime, night work, etc., are added to arrive at a grand total of personal services.

OTHER SCHEDULES

Funds available for appropriation.—The law earmarks certain receipts for specific purposes. In most cases of earmarking, the receipts are permanently appropriated, but in a few instances the earmarked receipts are merely reserved, subject to annual appropriations. A special schedule of "funds available for appropriation" is used in the latter cases to show the amount of earmarked balances and receipts which are available to finance the annual appropriations payable therefrom.

Revolving (working capital) funds.—The usual obligation schedules on revolving (working capital) funds which have a fixed amount of principal are generally supplemented with two special schedules—a statement of condition on June 30, 1948, and a statement of income and expense for the fiscal year 1948.

SPECIAL PRACTICES IN THE 1950 BUDGET

Increases in pay scales resulting from Public Law 900.—The pay of most employees on a per annum basis was increased in the first part of July 1948 by Public Law 900, Eightieth Congress. Comparable increases were granted administratively by some agencies to employees in similar positions not covered by the law. The grade ranges and the salary costs shown opposite the various grades, titles, etc., in the schedules herein are stated at the rates prevailing prior to the increase; the estimated cost of the pay increase for both 1949 and 1950 is stated as a single lump sum in each schedule of obligation. This is often wholly or partly absorbed within the 1949 appropriation. Where it cannot be completely absorbed, a tentative estimate of the supplemental appropriation required therefor in 1949 is shown in the schedule of funds available for obligation.

Reimbursements and reimbursable obligations.—A bureau or office especially qualified to do a certain kind of work is sometimes requested to perform a service for another bureau or office on a reimbursable basis. In such instances, the reimbursements are credited to the appropriation account from which the cost of doing the work has been paid. The schedules of part II this year segregate the reimbursements and the obligations incurred thereunder from the appropriated funds where both occur under a given appropriation title.

Printing and binding.—New regulations of the Joint Committee on Printing issued in 1948 redefine printing to include reproduction by various duplicating-type machines and related services, not heretofore considered printing. During this year of transition, object class 06 is used herein to refer to contractual printing as previously defined. The costs of other reproduction work are included in object class 07 when done on a contractual basis, and in object classes 01, 07, 08, 09, etc., as heretofore, when done by the agency itself.

Total, general and special appropriations	56,654,636	2,161,230	58,815,866	72,719,389	+13,903,523
TRUST APPROPRIATIONS					
Library of Congress	$185,622		$185,622	$98,000	−$87,622
Government Printing Office	2,200,000		2,200,000	2,200,000	
Total, trust appropriations	2,385,622		2,385,622	2,298,000	−87,622

EXPLANATORY STATEMENT

The estimates for the legislative branch provide for the salaries and expenses of the Members and staff of the Senate and the House of Representatives, and for the operation and maintenance of the Capitol, the Senate and the House Office Buildings, the Botanic Garden, the Library of Congress, and the Government Printing Office. The total estimates of the legislative branch for 1950 represent an increase of approximately 24 percent over the total estimates for 1949, of which approximately 20 percent results from major capital repairs, improvements, and construction.

The estimates for the Senate provide salaries and expenses for 96 Members and the regular employees, and for miscellaneous and contingent expenses of the Senate. The 1950 estimates indicate a net decrease of approximately 2 percent under the estimates for 1949.

The estimates for the House of Representatives provide salaries and expenses for 435 Members, Territorial Delegates, and the regular employees. The 1950 estimates indicate an increase of approximately 1 percent over the estimates for the previous fiscal year.

The estimates for miscellaneous activities of the legislative branch cover expenses for Capitol police, office of legislative counsel, education of congressional pages, and preparation of the statement of appropriations. An increase of approximately 3 percent is reflected in the 1950 estimates over the 1949 estimates.

The Architect of the Capitol is responsible for the operation and maintenance of the Capitol, the Senate and House Office Buildings, and the Library of Congress. The net increase of approximately 296 percent in the 1950 estimates compared with the 1949 estimates is attributable to the following items: Capitol Building and repairs, maintenance of the Senate and House Office Buildings, Capitol power plant, Library buildings and grounds, and construction of an additional Senate Office Building.

The Botanic Garden, which is also under the jurisdiction of the Architect of the Capitol, shows an 8 percent increase in its estimates principally due to greater needs for equipment, supplies, and materials.

The Library of Congress provides library and reference services not only to Members of Congress and the entire Federal Government, but also to State and local governments and thousands of private citizens. The 1950 estimates for the Library of Congress are approximately 15 percent greater than the estimates for 1949.

The Government Printing Office serves the entire Federal Government. Costs of printing included under the appropriation for public printing and binding are for the legislative branch only. The 1950 estimates show approximately a 5 percent increase over the 1949 estimates due to increases in legislative printing and some minor increases in the expenses of the Superintendent of Documents.

Salaries and Expenses of Detailed Police, Capitol Police Board, House of Representatives—

Capitol Police Board: To enable the Capitol Police Board to provide additional protection for the Capitol Buildings and Grounds, including the Senate and House Office Buildings and the Capitol Power Plant, $8,600. Such sum shall only be expended for payment for salaries and other expenses of personnel detailed from the Metropolitan Police of the District of Columbia, and the Commissioners of the District of Columbia are authorized and directed to make such details upon the request of the Board. Personnel so detailed shall, during the period of such detail, serve under the direction and instructions of the Board and is authorized to exercise the same authority as members of such Metropolitan Police and members of the Capitol Police and to perform such other duties as may be assigned by the Board. Reimbursement for salaries and and other expenses of such detail personnel shall be made to the government of the District of Columbia, and any sums so reimbursed shall be credited to the appropriation or appropriations from which such salaries and expenses are payable and be available for all the purposes thereof: *Provided*, That any person detailed under the authority of this paragraph or under similar authority in the Legislative Branch Appropriation Act, 1942, and the Second Deficiency Appropriation Act, 1940, from the Metropolitan Police of the District of Columbia shall be deemed a member of such Metropolitan Police during the period or periods of any such detail for all purposes of rank, pay, allowances, privileges, and benefits to the same extent as though such detail had not been made, and at the termination thereof any such person who was a member of such police on July 1, 1940, shall have a status with respect to rank, pay, allowances, privileges, and benefits which is not less than the status of such person in such police at the end of such detail. (*Legislative Branch Appropriation Act, 1949.*)

Appropriated 1949, **$8,600** Estimate 1950, **$8,600**

The foregoing amounts under "Capitol Police" shall be disbursed by the Clerk of the House. (*Legislative Branch Appropriation Act, 1949.*)

OFFICE OF THE LEGISLATIVE COUNSEL

Salaries and Expenses, Legislative Counsel, Senate—
Salaries and Expenses, Legislative Counsel, House of Representatives—

For salaries and expenses of maintenance of the Office of the Legislative Counsel, as authorized by law, including increased and additional compensation as provided by the "Federal Employees Pay Act of 1945", as amended by the "Federal Employees Pay Act of 1946" and the "Postal Rate Revision and Federal Employees Salary Act of 1948", $195,000, of which $105,000 shall be disbursed by the Secretary of the Senate and $90,000 by the Clerk of the House of Representatives. (*Legislative Branch Appropriation Act, 1949.*)

Appropriated 1949, **$180,000** Estimate 1950, **$195,000**

EDUCATION OF SENATE AND HOUSE PAGES

Education of Senate, House and Supreme Court Pages—

For education of congressional pages and pages of the Supreme Court, pursuant to section 243 of the Legislative Reorganization Act of 1946, $30,075, which amount shall, as soon as practicable after June 30, 1949, be credited to the appropriation for "General supervision and instruction, public schools, District of Columbia, 1950"; and the Board of Education of the District of Columbia is hereby authorized to employ such personnel for the education of pages as may be required and to pay compensation for such services in accordance with such rates of compensation as the Board of Education may prescribe. (*Legislative Branch Appropriation Act, 1949.*)

Appropriated 1949, **$29,300** Estimate 1950, **$30,075**

STATEMENT OF APPROPRIATIONS

Statement of Appropriations—

For the preparation, under the direction of the Committees on Appropriations of the Senate and House of Representatives of the statements for the first session of the Eighty-first Congress, showing appropriations made, indefinite appropriations, and contracts authorized, together with a chronological history of the regular appropriation bills as required by law, $4,000, to be paid to the persons designated by the chairmen of such committees to do the work. (*Legislative Branch Appropriation Act, 1949.*)

Appropriated 1949, **$4,000** Estimate 1950, **$4,000**

Total, legislative miscellaneous, annual specific appropriations:

Appropriated 1949, **$239,800** Estimate 1950, **$255,575**

ARCHITECT OF THE CAPITOL

OFFICE OF THE ARCHITECT OF THE CAPITOL

Salaries, Office of Architect of the Capitol—

Salaries: For the Architect of the Capitol, Assistant Architect of the Capitol (whose compensation shall be at the rate of $7,000 per annum), Chief Architectural and Engineering Assistant, and other personal services at rates of pay provided by law; and the Assistant Architect of the Capitol shall act as Architect of the Capitol during the absence or disability of that official or whenever there is no Architect, and, in case of the absence or disability of the Assistant Architect, the Chief Architectural and Engineering Assistant shall so act; [$105,000] *$120,100.* (*40 U. No part of the appropriations contained in this Act for the Botanic Garden shall be used for the distribution, by congressional allotment, of trees, plants, shrubs, or other nursery stock. (*Legislative Branch Appropriation Act, 1949.*)

Total, Botanic Garden, annual specific appropriations:

Appropriated 1949, **$155,000** Estimate 1950, **$188,000**

LIBRARY OF CONGRESS

Salaries, Library Proper, Library of Congress—

Salaries, Library proper: For the Librarian, the Librarian Emeritus, [Chief Assistant Librarian,] and other personal services [including investigations of Library employees with regard to loyalty, and] including special and temporary services and extra special services of regular employees (not exceeding $5,000) at rates to be fixed by the Librarian, [$2,474,571] *services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), and personal services for printing and binding, $3,053,700,* of which so much as may be necessary may be transferred to other agencies of the Government for the purpose of investigating the loyalty of Library employees, and for health service program as authorized by law [(5 U. S. C. 150)]: *Provided, That hereafter the gross salary of any position in the Library which is augmented by payment of an honorarium from other than appropriated funds under terms of 2 U. S. C. 162 shall not exceed an amount, which when combined with such honorarium, will exceed the salary of the Librarian (2 U. S. C. 131–166; 5 U. S. C. 150; 52 Stat. 808; Legislative Branch Appropriation Act, 1949.)*

Appropriated 1949, **$2,474,571** Estimate 1950, **$3,053,700**

Not to exceed ten positions in the Library of Congress may be exempt from the provisions of section 202 of the Independent Offices Appropriation Act, 1949, but the Librarian shall not make any appointment to any such position until he has ascertained that he cannot secure for such appointment a person in any of the three categories specified in such section 202 who possesses the special qualifications for the particular position and also otherwise meets the general requirements for employment in the Library of Congress. (*Legislative Branch Appropriation Act, 1949.*)

GOVERNMENT PRINTING OFFICE

WORKING CAPITAL AND CONGRESSIONAL PRINTING AND BINDING

Public Printing and Binding, Government Printing Office—

To provide the Public Printer with a working capital for the following purposes for the execution of printing, binding, lithographing, mapping, engraving, and other authorized work of the Government Printing Office for the various branches of the Government: For salaries of Public Printer and Deputy Public Printer; for salaries, compensation, or wages of all necessary officers and employees additional to those herein appropriated for, including employees necessary to handle waste paper and condemned material for sale; to enable the Public Printer to comply with the provisions of law granting holidays and half holidays and Executive orders granting holidays and half holidays with pay to employees; to enable the Public Printer to comply with the provisions of law granting leave to employees with pay, such pay to be at the rate for their regular positions at the time the leave is granted; rental of buildings and equipment; fuel, gas, heat, electric current, gas and electric fixtures; bicycles, motor-propelled vehicles for the carriage of printing and printing supplies, and the maintenance, repair, and operation of the same, to be used only for official purposes, including operation, repair, and maintenance of passenger motor vehicles for official use of the officers of the Government Printing Office when in writing ordered by the Public Printer; freight, expressage, telegraph and telephone service, furniture, typewriters, and carpets; traveling expenses, including not to exceed $3,000 for attendance at meetings or conventions when authorized by the Joint Committee on Printing; stationery, postage, and advertising; directories, technical books, newspapers, magazines, and books of reference (not exceeding $1,000); adding and numbering machines, time stamps, and other machines of similar character; purchase of uniforms for guards; rubber boots, coats, and gloves; machinery (not exceeding $300,000); equipment, and for repairs to machinery, implements, and buildings, and for minor alterations to buildings; necessary equipment, maintenance, and supplies for the emergency room for the use of all employees in the Government Printing Office who may be taken suddenly ill or receive injury while on duty; other necessary contingent and miscellaneous items authorized by the Public Printer; for expenses authorized in writing by the Joint Committee on Printing for the inspection of printing and binding equipment, material, and supplies and Government printing plants in the District of Columbia or elsewhere (not exceeding $1,000); payment of claims pursuant to section 403 of the Federal Tort Claims Act (28 U. S. C. 921); for salaries and expenses of preparing the semimonthly and session indexes of the Congressional Record under the direction of the Joint Committee on Printing (chief indexer at $4,951, one cataloger at $4,537, two catalogers at $3,544 each, and one cataloger at $3,047); and for all the necessary labor, paper, materials, and equipment needed in the prosecution and delivery and mailing of the work; in all, [$14,500,000] *$15,200,000*; to which sum shall be charged the printing and binding authorized to be done for Congress, including supplemental and deficiency estimates of appropriations; the printing, binding, and distribution of the Federal Register in accordance with the Act approved July 26, 1935 (44 U. S. C. 301–310) (not exceeding [$450,000] *$400,000*); the printing and binding of [an edition of] *the supplements to* the Code of Federal Regulations [and supplements thereto], as authorized by the Act of July 26, 1935, as amended (44 U. S. C. 311) (not exceeding [$650,000] *$125,000*); the printing and binding for use of the Government Printing Office; the printing and binding (not exceeding $5,000) for official use of the Architect of the Capitol upon requisition of the Secretary of the Senate; in all to an amount not exceeding [$7,000,000] *$7,700,000*: *Provided*, That not less than $7,500,000 of such working capital shall be returned to the Treasury as an unexpended balance not later than six months after the close of the *current* fiscal year [1949]: *Provided further*, That notwithstanding the provisions of section 73 of the Act of January 12, 1895 (44 U. S. C. 241), no part of the foregoing sum of [$7,000,000] *$7,700,000* shall be used for printing and binding part 2 of the annual report of the Secretary of Agriculture (known as the Year-book of Agriculture). Printing and binding for Congress chargeable to the foregoing appropriation, when recommended to be done by the Committee on Printing of either House, shall be so recommended in a report containing an approximate estimate of the cost thereof, together with a statement from the Public Printer of estimated approximate cost of work previously ordered by Congress within the fiscal year for which this appropriation is made.

During the *current* fiscal year [1949] any executive department or independent establishment of the Government ordering printing and binding or blank paper and supplies from the Government Printing Office shall pay promptly by check to the Public Printer upon his written request, either in advance or upon completion of the work, all or part of the estimated or actual cost thereof, as the case may be, and bills rendered by the Public Printer in accordance herewith shall not be subject to audit or certification in advance of payment: *Provided*, That proper adjustments on the basis of the actual cost of delivered work paid for in advance shall be made monthly or quarterly and as may be agreed upon by the Public Printer and the department or establishment concerned. All sums paid to the Public Printer for work that he is authorized by law to do; all sums received from sales of wastepaper, other waste material, and condemned property; and for losses or damage to Government property; shall be deposited to the credit, on the books of the Treasury Department, of the appropriation made for the working capital of the Government Printing Office and be subject to requisition by the Public Printer.

No part of any money appropriated in this Act shall be paid to any person employed in the Government Printing Office while detailed for or performing service in the executive branch of the public service of the United States unless such detail be authorized by law. (*Legislative Branch Appropriation Act, 1949.*)

GENERAL PROVISIONS

SEC. 102. Purchases may be made from the foregoing appropriations under the "Government Printing Office", as provided for in the Printing Act approved January 12, 1895, and without reference to section 4 of the Act approved June 17, 1910 (41 U. S. C. 7), concerning purchases for executive departments.

SEC. 103. In order to keep the expenditures for printing and binding for the *current* fiscal year [1949] within or under the appropriations for such fiscal year, the heads of the various executive departments and independent establishments are authorized to discontinue the printing of annual or special reports under their respective jurisdictions: *Provided*, That where the printing of such reports is discontinued the original copy thereof shall be kept on file in the offices of the heads of the respective departments or independent establishments for public inspection.

SEC. 104. No part of the funds appropriated in this Act shall be used for the maintenance or care of private vehicles.

SEC. 105. Whenever any office or position not specifically established by the Legislative Pay Act of 1929 is appropriated for herein or whenever the rate of compensation or designation of any position appropriated for herein is different from that specifically established for such position by such Act, the rate of compensation and the designation of the position, or either, appropriated for or provided herein, shall be the permanent law with respect thereto: *Provided*, That the provisions relating to positions and salaries thereof carried in House Resolutions 281 and 336 (Eightieth Congress) shall be the permanent law with respect thereto.

SEC. 106. No part of any appropriation contained in this Act shall be paid as compensation to any person appointed after June 30, 1935, as an officer or member of the Capitol Police who does not meet the standards to be prescribed for such appointees by the Capitol Police Board: *Provided*, That the Capitol Police Board is hereby authorized to detail police from the House Office, Senate Office, and Capitol Buildings for police duty on the Capitol Grounds.

SEC. 107. No part of any appropriation contained in this Act shall be used to pay the salary or wages of any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided*, That for the purposes hereof an affidavit shall be considered prima facie evidence that the person making the affidavit has not contrary to the provisions of this section engaged in a strike against the Government of the United States, is not a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or that such person does not advocate, and is not a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided further*, That any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence, and accepts employment the salary or wages for which are paid from any appropriation contained in this Act shall be guilty of a felony and, upon conviction, shall be fined not more than $1,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penalty clause shall be in addition to, and not in substitution for, any other provisions of existing law. (*Legislative Branch Appropriation Act, 1949.*)

Total, legislative branch, general and special appropriations:

Appropriated 1949, **$56,654,636** Estimate 1950, **$72,719,389**

Total, legislative branch, trust appropriations:

Appropriated 1949, **$2,385,622** Estimate 1950, **$2,298,000**

Total, general and special appropriations	20,620,850	967,200	21,588,050	22,997,700	+1,409,650

EXPLANATORY STATEMENT

GENERAL STATEMENT

In accordance with law estimates for The Judiciary are included in the Budget without revision in the amounts approved by the Judicial Conference of the United States, except that estimates for the Supreme Court and the three lower courts of special jurisdiction in customs, patents, and claims litigation are included in the amounts approved by the respective courts.

Appropriations for The Judiciary provide funds for operation of all Federal courts, including salaries of judges, judicial officers, and employees, and other expenses of The Judiciary.

Estimates for the fiscal year 1950 anticipate the employment of additional personnel in various judicial functions, and increased cost of travel and other expenses.

SUPREME COURT OF THE UNITED STATES

The largest single item of increase reflected in the estimates for the Supreme Court is an amount of $170,000 for extending the air-conditioning facilities of the Supreme Court Building to additional areas within the building. Approximately $23,000 in excess of the 1949 appropriation is estimated for pay increases for certain officers and employees of the Court, the addition of two laborers, and within-grade salary advancements. These increases are offset in part by nonrecurring repair and alteration projects to be completed in the current year.

COURT OF CUSTOMS AND PATENT APPEALS

The increase estimated for this court is principally for the employment of an additional messenger, within-grade promotions, and equipment.

CUSTOMS COURT

The increase reflected in the estimates of this court is to permit the creation of 11 additional positions, and to provide for additional telephone service, anticipated increase in travel, and new equipment.

COURT OF CLAIMS

Most of the increase estimated for this court is to provide additional personnel, including additional commissioners, auditors, and stenographic and other assistance. Other increases are estimated for cost of telephone service and printing and binding.

OTHER COURTS AND SERVICES

The principal increase under this heading is an additional amount of $557,000 estimated as necessary to comply with the recent act of Congress increasing the fees and expense allowances of jurors (Public Law 779, approved June 25, 1948). Other increases include $200,135 for within-grade promotions, $134,090 for additional personnel, and $108,500 for other objects of expenditure. There is also an estimated increase of $217,000 for salaries and expenses of referees in bankruptcy, all of which is to be appropriated from the special accounts established from revenues collected by referees, rather than from the general fund of the Treasury. These increases are offset in part by the omission of estimates for penalty mail, for which no estimates are included for 1950.

Permanent appropriation, special account:

Payments From Proceeds of Sales, Motor-Propelled Vehicles, Etc., Judiciary—

Under the act of August 2, 1946, proceeds of sales of vehicles, equipment, accessories, and other items, the exchange of which is authorized by law, may be applied in whole or in part payment toward the purchase of similar items. The receipts from this source are set up in a special appropriation account, available for the fiscal year in which the obligation to purchase the new equipment is incurred; any unobligated balance is subsequently adjusted to miscellaneous receipts (5 U. S. C. 118d–1).

GENERAL PROVISIONS—THE JUDICIARY

SEC. 402. [As used in this title, the term "circuit court of appeals" includes the United States Court of Appeals for the District of Columbia; the term "senior circuit judge" includes the chief justice of the United States Court of Appeals for the District of Columbia; the term "circuit judge" includes associate justice of the United States Court of Appeals for the District of Columbia; and the term "judge" includes justice.] *Sixty per centum of the expenditures for the District Court of the United States for the District of Columbia from all appropriations under this title and 30 per centum of the expenditures for the United States Court of Appeals for the District of Columbia from all appropriations under this title shall be reimbursed to the United States from any funds in the Treasury to the credit of the District of Columbia.*

SEC. 403. The reports of the United States Court of Appeals for the District of Columbia shall not be sold for a price exceeding that approved by the court and for not more than $6.50 per volume[: *Provided,* That all books purchased hereunder for United States judges and other judicial officers shall be marked plainly "The Property of the United States", and such books shall in all cases be transmitted to their successors in office].

GENERAL PROVISIONS

SEC. 501. No part of any appropriation contained in this Act shall be used to pay the salary or wages of any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided,* That for the purposes hereof an affidavit shall be considered prima facie evidence that the person making the affidavit has not contrary to the provisions of this section engaged in a strike against the Government of the United States, is not a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or that such person does not advocate, and is not a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided further,* That any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence and accepts employment the salary or wages for which are paid from any appropriation contained in this Act shall be guilty of a felony and, upon conviction, shall be fined not more than $1,000 or imprisoned for not more than one year, or both: *Provided further,* That the above penalty clause shall be in addition to, and not in substitution for, any other provisions of existing law. (*Departments of State, Justice, Commerce, and the Judiciary Appropriation Act, 1949.*)

[3] Includes payments received from general accounts, above, of $69,217,500 in 1949 and $56,098,000 in 1950.

EXPLANATORY STATEMENT

EXECUTIVE OFFICE OF THE PRESIDENT

The White House

These appropriation estimates provide for the compensation of the President, the salaries and expenses of The White House Office, an emergency contingent fund for the President, and the cost of maintaining the Executive Mansion and Grounds.

The appropriations for the President's immediate office provide for the handling of documents and correspondence, in addition to maintaining communication with Congress, the heads of the executive departments and agencies, the press, the radio, and the general public. The small increase in the estimates for 1950 is largely to provide for within-grade salary advancements, and for the filling of several positions which have been carried vacant during a large part of the current year.

The estimate for the emergency fund for the President has been increased to $1,000,000 and makes provision for the consolidation with this fund of a similar appropriation available during 1948 and 1949 for disaster relief.

Bureau of the Budget

The Bureau of the Budget assists the President in the preparation and administration of the Federal budget, covering the entire fiscal program of the Government. In addition, as a staff agency of the Federal Government, the Bureau makes studies to improve the organization and procedures of Federal agencies; clears departmental recommendations regarding pending legislation, Executive orders, and proclamations; and coordinates Federal statistical services. The increase of $34,000 in the estimates for 1950 is required principally for within-grade salary advancements.

Council of Economic Advisers

The Council of Economic Advisers was established by the Employment Act of 1946 (15 U. S. C. 1021). This act sets forth as goals of national policy the maintenance of "conditions under which there will be afforded useful employment opportunities for those able, willing, and seeking to work," and the promotion of "maximum employment, production, and purchasing power."

Implementation of these goals within the executive branch centers around the Economic Report, submitted by the President to the Congress at the beginning of each session and supplemented by interim reports from time to time. The Council assists the President in the preparation of these reports, analyzes and interprets economic trends, and makes recommendations to the President on national economic policies and programs.

The Council utilizes insofar as possible the services, facilities, and information of other Government agencies

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

and private research agencies; as a result the staff of the Council is and will remain very small. The increase of $29,000 proposed for 1950 would provide a small addition to the staff of the Council in addition to meeting within-grade salary increases.

National Security Council

The establishment of the National Security Council was authorized by section 101 of the National Security Act of 1947, Public Law 253, approved July 26, 1947. Under the provisions of that law, the function of the Council is to advise the President with respect to the integration of domestic, foreign, and military policies relating to the national security, and is to be composed of the President, the Secretary of State, the Secretary of Defense, the Secretary of the Army, the Secretary of the Navy, the Secretary of the Air Force, the Chairman of the National Security Resources Board, and such of the following-named officers as the President may designate: The Secretaries of the other executive departments, the Chairman of the Munitions Board, and the Chairman of the Research and Development Board. The law also provides that the Council shall have a staff, headed by a civilian executive secretary appointed by the President with such other personnel as may be necessary.

The estimate of $217,000 for the fiscal year 1950 provides for the pay of a staff of 31 persons and for other expenses.

National Security Resources Board

The National Security Resources Board was established by the National Security Act of 1947, approved July 26, 1947, to advise the President concerning the coordination of military, industrial, and civilian mobilization to meet the eventualities of modern war. The Board is specifically charged with (1) studying the relationship between potential supplies of, and potential requirements for, manpower, resources, and productive facilities in time of war; (2) developing programs for the effective use in time of war of the Nation's natural and industrial resources for military and civilian needs, for the maintenance and stabilization of the civilian economy in time of war, and for the adjustment of such economy to war needs and conditions; and (3) formulating policies for establishing and maintaining strategic reserves of critical materials. Executive Order 9905, dated November 13, 1947, established the membership of the Board as the Chairman and the Secretaries of the Treasury, Defense, Interior, Agriculture, Commerce, and Labor. Executive Order 9931, dated February 19, 1948, added the Secretary of State to the Board.

During the fiscal year 1949, the Board will have progressed substantially with its basic staffing and organization to meet its statutory responsibilities. Emergency war organization and legislative plans have been drafted and a beginning made in developing mobilization plans for specific industries.

The Board in fiscal year 1950 will continue to utilize the cooperative efforts of representatives from the fields of Government, industry, agriculture, labor, and scientific research. The estimate of $4 million will permit further progress in developing resources and requirement data as a basis of planning mobilization of the Nation's resources in the event of war.

Office for Emergency Management

OFFICE OF DEFENSE TRANSPORTATON

The Office of Defense Transportation was created by Executive Order 8989 on December 18, 1941. Its basic responsibility was to insure maximum utilization of the Nation's domestic transportation system during the war.

A greatly curtailed organization has, since the war, met emergency transportation needs arising from materials and freight-car shortages. Its present functions also include coordination of programs to increase freight-car production; and administration under authority delegated by the Secretary of Commerce, of steel allocation programs for freight-car and barge construction. Much of the work relating to allocation and use of transportation facilities is performed by the Interstate Commerce Commission on a reimbursable basis.

Public Law 606 of June 4, 1948, extended allocation authority over transportation facilities and equipment to June 30, 1949, but the agency's 1949 appropriation contemplated its liquidation by February 28, 1949. A supplemental estimate is included to continue operations through fiscal year 1949. Estimates to continue Office of Defense Transportation programs through fiscal year 1950 are included under the Interstate Commerce Commission's Bureau of Service.

PHILIPPINE ALIEN PROPERTY ADMINISTRATION

This agency operates under a limitation on administrative expenses, with funds derived from property vested in the Philippine Islands. The lower estimate for 1950 is consistent with agency plans to cease operations on or about December 31, 1949. Transfers of assets to the Philippine Government under the Philippine Property Act of 1946 should be completed by that date.

FUNDS APPROPRIATED TO THE PRESIDENT

Foreign Aid

ECONOMIC COOPERATION

Pursuant to the Foreign Assistance Act of 1948, there was inaugurated the European recovery program, having as its objective the promotion of world peace through the establishment of sound economic conditions in the participating countries. The accomplishment of this objective called for a plan of European recovery based on increased production, expansion of foreign trade, creation of internal financial stability, and the development of economic cooperation among the participating nations. In order to plan the necessary program of self-help and to facilitate the solution of their mutual problems, the participating countries created the Organization for European Economic Cooperation. Substantial progress has already been made toward European recovery, and this is reflected in the smaller appropriation anticipated for the second year of the program.

Funds in the amount of $5 billion were provided for the first year's program. A supplemental appropriation estimate for fiscal year 1949 of $1,250 million is included in this budget. In addition, $4.3 billion is estimated to be required for fiscal year 1950. Since legislative authority for the recovery program expires on April 2, 1949, both these estimates are included in this budget under "proposed legislation."

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

OTHER FOREIGN AID

In addition to the European recovery program, there are currently authorized programs to provide military assistance to Greece and Turkey, and economic and other assistance to China. Funds available for these purposes in the current fiscal year total $625 million. There is included in this budget an estimate of $600 million under "proposed legislation" to carry forward a number of the above programs, as well as others.

INDEPENDENT OFFICES

American Battle Monuments Commission

The American Battle Monuments Commission maintains all permanent national cemeteries and monuments in foreign countries. The Commission is also responsible for the design and permanent construction of all such establishments. The appropriation estimate of $758,000 for salaries and expenses provides for the general maintenance of these cemeteries and memorials and the overhead of the Commission in connection with the World War II construction program. The appropriation estimate for construction of $5,276,500, plus $5,000,000 in new contract authority, provides for the liquidation of prior contract authority and a substantial start on permanent World War II construction at 14 cemeteries and approximately 31 large and small monuments at various points around the world.

Atomic Energy Commission

The Atomic Energy Commission was established pursuant to the Atomic Energy Act of 1946. It is charged with the production of fissionable materials and atomic weapons, research on both military and peaceful applications of atomic energy, dissemination of unclassified technical information to broaden scientific knowledge, and the control of scientific and technical data to the extent necessary to safeguard the national security.

The Commission, under the law, owns all facilities for the production of fissionable materials and weapons. However, these facilities together with the large national laboratories are operated by contractors to the Commission.

During the past year, a major test of atomic weapons was held at Eniwetok Atoll in the Marshall Islands. This test, in which the armed services participated, demonstrated important advances in military applications of atomic energy.

The Commission has expanded the distribution of radioisotopes produced by the Commission for research in medicine, biology, and the physical sciences, and for agricultural and industrial research. These isotopes constitute the first great contribution of atomic energy to peacetime welfare.

The development of electrical and propulsive power from atomic energy is a major objective. Before the technical feasibility of power applications can be demonstrated, more research and development will be required in the field of nuclear reactors. Problems of nuclear propulsion of ships and aircraft are a part of this research. The Commission is intensifying its work in this important field.

The technology of atomic energy, including the methods of producing fissionable materials with maximum economy of source materials and funds, will change as new processes are developed. These improvements will require new or expanded operating facilities, and the Commission's expenditures for plant and equipment will remain large.

Research in basic physical science, together with research in medicine and biology, is fundamental to progress in atomic energy. Expenditures for research by the Commission, including commitments for the training of atomic scientists and technicians, have been growing. The Commission is cooperating with the Office of Naval Research in furthering research projects of joint interest and will cooperate with the National Science Foundation when the latter is created by legislation.

The Commission has sought to improve and strengthen its own organization. During the past year, the Commission reorganized to promote the accomplishment of program objectives and to clarify and strengthen lines of responsibility.

The budget estimate for the fiscal year 1950 consists of $740 million of cash appropriation and $427 million of contract authority. Of the increase in appropriation in 1950 over 1949, $100 million is due to a need in 1950 for more cash to liquidate prior year contract authority, while the remaining $103 million, together with the relatively small increase in contract authorization, is related largely to technological improvements in plant and equipment and expanded commitments for research and development in military applications. In terms of obligational authority, the budget would provide $792 million for 1950 as compared to $661.8 million for 1949.

Civil Service Commission

The Civil Service Commission recruits, examines, and certifies persons for employment in the executive branch of the Government. Normally, selections are made as a result of competitive examinations. During the war years the Commission discontinued competitive examinations because of the urgency of filling a large number of vacancies in a scarce labor market. Persons who were appointed during this period received war-service indefinite appointments. The Commission's program of reconversion of the Federal Government from a war-service to probational peacetime basis is scheduled to be virtually completed by the end of fiscal year 1949. By this it is meant that all positions (with a few exceptions) occupied by war-service and temporary-indefinite employees will have been covered by initial examinations and the maximum number possible of conversions and displacements effected from the resulting registers. The exception referred to relates to those positions for which it is uneconomical to announce examinations because of the limited number of nonstatus employees in a certifying area.

The Commission is continuing its policy of decentralizing certain phases of recruitment and placement activities to the agencies and their field establishments. This function is accomplished through committees and boards of examiners, operating under the control of the Civil Service Commission, who are authorized to examine and select personnel for the more technical positions in a particular agency and for the mechanical and trade positions in the field service. The members of the committees and boards are appointed by and composed of employees of the establishments of the respective departments and agencies and operate under the supervision

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

of the Civil Service Commission in accordance with procedures and rules established by it. The selection of personnel involves, particularly with regard to applicants for the more responsible Government positions, investigations of character and suitability.

Through the promulgation of rules and regulations and the issuance of standard procedures, the Commission to a large extent provides direction to all Federal personnel activities. It is responsible for the administration of the Classification Act which requires that the duties and responsibilities assigned Government positions be the basis for equitable salary allocations. It is estimated that by the end of 1949, 90 percent of positions subject to the scope of the Classification Act will be covered by job standards. The program for 1950 involves completion of certain series of positions, establishment of new series, and a review and possible revision of series in the light of later developments in the occupational groups. The development of standards by the Commission will assist considerably in assuring similar pay for similar work for employees of the Government.

Responsibility for the administration of the retirement laws for Federal employees, including the employees of the Panama Canal and the Alaska Railroad, is vested in the Commission. There is a slight decrease in the amount of money provided for this project. The decrease in funds is possible because of the completion of the adjudication of a large number of claims for refunds to wartime employees since separated and simplification in the adjudication of annuity claims resulting from the enactment of Public Law 426.

The Commission during fiscal year 1950 will continue to conduct open competitive examinations to replace vacancies largely resulting from turn-over and to replenish depleted registers by reannouncement of examinations necessary to meet the continuing needs of the service created by turn-over and new positions. It is estimated that approximately 509,000 probational placements will be made by the Commission in 1950 as contrasted with approximately 550,000 in 1949 and 515,000 in 1948. The increase of $996,000 in the estimate for general administrative expenses over the amount available for 1948 provides for a slight increase in the amount of funds for the loyalty program which was established in 1948 for the purpose of assuring that persons employed in the Federal service are loyal to the United States, and to afford protection for loyal employees in the Government from unfounded accusations of disloyalty.

Executive Order 9835 assigned to both the Federal Bureau of Investigation and the Commission specific responsibilities in effectuating the loyalty program. The Commission's responsibilities include, among others, the establishment of a master index file for all loyalty investigations of applicants and employees; investigation of applicants for positions in the Federal service; and the establishment of boards to provide a channel for appeals from employees who are dismissed because of disloyalty. A central review board also is maintained in Washington for the purpose of reviewing decisions of the regional boards and to prescribe necessary regulations for agencies to follow in carrying out provisions of the Executive order.

Retirement and disability funds.—Appropriations are made annually toward the Government share of providing benefits to participants in the retirement and disability funds provided by law for employees of the Federal service. These appropriations and the contributions made by the participating employees provide the trust funds from which benefits are paid.

The 1950 estimate of the Government share of retirement funds and the Panama Canal construction annuity fund represents a net increase of $107,848,202. The additional amount is made up of an increase of $104,393,000 in the estimated amount required for the civil service retirement and disability fund. This increase is a result of Public Law 426, Eightieth Congress, which liberalized considerably the retirement benefits for Federal employees. The law provides for additional contributions from the Federal Government to correspond to an increase in the contribution of employees from 5 to 6 percent. The increase of $3,635,302 for the Panama Canal construction annuity fund is a result of two factors: (*a*) Public Law 696, Eightieth Congress, providing benefits to a greater number of persons than are now on the rolls of the fund, and (*b*) a larger number of claims being filed for a greater average annuity under the amendment of August 7, 1946, to the Canal Zone Construction Act than was contemplated when the 1949 budget estimates were prepared.

Displaced Persons Commission

The Displaced Persons Commission was established pursuant to the Displaced Persons Act of 1948 which authorized the admission into the United States of approximately 205,000 displaced persons as permanent residents.

The administration of the program by the Commission is directed toward the following objectives: (1) The immigration to the United States of the prescribed number of displaced persons; and (2) achieving this immigration in a manner consistent with resettlement opportunities, including housing and employment, found to exist in the United States.

Toward this end, the Commission is assisted by the Department of State, the Department of Justice, and the Federal Security Agency, exercising their statutory responsibilities under existing immigration laws of the United States. The Department of the Army cooperates with the Commission in the security investigation of eligible displaced persons. The International Refugee Organization, a specialized agency of the United Nations, supervises and finances the movement of displaced persons from ports of embarkation in Europe to the United States.

The Commission anticipates that approximately 55,000 displaced persons will be resettled in this country during the fiscal year 1949, and that in the fiscal year 1950 about 150,000 displaced persons will be resettled. To achieve this goal in 1950, it is estimated that $5,200,000 will be required, which is a $1,665,000 increase over 1949, including supplementals. The increase is due to the greatly expanded program in 1950.

It is anticipated that the Congress will be asked to amend the Displaced Persons Act of 1948, to achieve equality of treatment for all eligible displaced persons, to increase the number of DP's to be admitted into the United States, and to extend the period of time during which they may be admitted. It is not believed that this proposed legislation would have any budgetary effect in 1950.

As a result of legislation being proposed by the Department of State, funds have been requested to meet a small increase in the cost of activities performed by that Department in connection with the displaced persons program.

Federal Communications Commission

The Federal Communications Commission regulates interstate and international communications by wire and radio. It administers the Communications Act of 1934,

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

as amended, and international treaties, conventions, and agreements relating to telecommunications. The Commission's statutory objectives are "to make available, so far as possible, to all the people of the United States a rapid, efficient Nation-wide and world-wide wire and radio communication service with adequate facilities at reasonable charges"; to provide for national defense; and to promote safety of life and property. The Commission also handles technical matters for the Interdepartmental Radio Advisory Committee which advises the President on radio-frequency assignments to Government agencies.

Radio regulation embraces allocation of the spectrum, now usable from 10 to 30,000,000 kilocycles, among the several broadcast services (standard, frequency modulation, and television) as well as among police, fire, marine, industrial, transportation, utility, and taxicab types, to name only some of the many types comprising the safety and special services area of the Commission's program. Individual stations are also licensed to operate on specific frequencies in accordance with Commission prescribed engineering standards; operators are licensed; and the spectrum is monitored to prevent interference and illegal activity.

Common carrier regulation extends to interstate and international tariffs, through routes and charges, construction and abandonments, mergers, accounting, valuation, and service.

Spectrum reallocation will continue through 1950 to be at the forefront among Commission problems. Frequency assignments of many United States stations will be changed to implement agreements reached at the 1947 Atlantic City Telecommunications Conference establishing international master frequency allocation tables. Considerable effort will be required, too, for the determination of definitive locations for specific services within the broad channel categories established at Atlantic City, through hearings and continuous participation in international, regional, and industry conferences.

Broadcast activities will center on television and the backlog in standard broadcast station applications. Technological developments in television have created major problems in frequency assignments and application processing which will absorb considerable Commission time and effort to resolve successfully. Declines in applications for new standard broadcasting stations and changes in facilities, on the other hand, will permit increased attention to the large backlog, which at November 30, 1948, numbered 793 applications.

Expansion in the use and variety of nonbroadcast services—police, fire, marine, aviation, industrial, etc.—is expected to continue through 1950. To meet demands for these services revision will be required of present frequency assignments for the several services.

Common carrier regulation presents extraordinary tasks for the Commission posed by technological developments in radio and wire communication that will bear directly on rates, routes, service, and other elements of the Commission's regulatory functions.

The Budget estimate for the fiscal year 1950 is $6,634,000, a decrease of $84,000 under the 1949 estimated appropriations. The increase will partially cover increased costs resulting from Public Law 900.

Federal Mediation and Conciliation Service

The Federal Mediation and Conciliation Service was created as an independent agency by title II of the Labor-Management Relations Act, 1947 (29 U. S. C. 171–180, 182). The Service assumed by transfer all mediation and conciliation functions previously assigned to the United States Conciliation Service or the Secretary of Labor. The Federal Mediation and Conciliation Service has general responsibility for mediation and conciliation except that it does not operate with respect to the rail and air transportation industry. This area is reserved by the Railway Labor Act to the National Mediation Board.

The principal duty of the Service is to assist labor and management to settle their disputes through conciliation and mediation and hence to prevent or minimize interruptions of the free flow of commerce growing out of labor disputes. Commissioners of conciliation are responsible for conciliation efforts in specific disputes. In addition to the traditional function of attempting settlement of specific disputes, the Service has general responsibility for preventing labor-management differences from developing to the critical point where outside help is required.

The Service stresses the necessity for infusing a "preventive approach" into mediation efforts. Commissioners of conciliation are responsible for working continually to prevent labor-management relations from reaching the dispute stage. Thus, mutual understanding and collective bargaining through face-to-face negotiations are encouraged. The effectiveness of the Service is best measured by the absence of strikes and not simply by the number of disputes handled or the speed with which such disputes are settled.

The act authorizes a National Labor-Management Panel. It is the duty of this Panel, at the request of the Director, "to advise in the avoidance of industrial controversies and the manner in which mediation and voluntary adjustment shall be administered, particularly with reference to controversies affecting the general welfare of the country."

The act also authorizes boards of inquiry to be appointed by the President to assist in settlement of disputes involving substantially an entire industry and which he believes will imperil the health or safety of the Nation. A separate appropriation is available to the Service solely for the expenses of such special fact-finding boards as may be created from time to time by the President.

The Service is currently undergoing a reorganization which is expected to result in greater efficiency and in substantial economies.

The estimate for the fiscal year 1950 to provide for the operation of the Service is $200,000 less than the appropriation available for fiscal year 1949, and for expenses of boards of inquiry, $75,000 less.

Federal Power Commission

The Federal Power Commission administers the Federal Power Act of 1935 and the Natural Gas Act of 1938 and has certain duties under the provisions of several other acts relating to Federal power developments such as Tennessee Valley Authority Act, Bonneville Act, Fort Peck Project Act, and the flood-control acts.

Expansion programs begun immediately after the war in both the gas and electric utility industries are still far short of meeting the increased demands for gas and electricity which are now at the highest peak in the history of the country. As a result these industries are attempting to accelerate their expansion programs wherever possible. Pending applications for licensed hydroelectric projects as of November 1948 totaled 3,800,000 kilowatts of new

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

generating capacity or nearly as much as the 4,200,000 kilowatts of capacity licensed during the entire previous 28 years of the Commission's existence. The number of projects under construction has more than doubled since the fiscal year 1948. As an indication of the expansion program in the natural gas pipe line industry, pending applications for certificates of public convenience and necessity for pipe line construction as of December 1, 1948, totaled 46, involving an estimated cost of $1,120,346,000 which will practically double the country's present total investment in interstate pipe line facilities of $1,181,600,000.

This situation has a direct effect upon the Commission's work load. Projects now coming before the Commission under both the Federal Power Act and the Natural Gas Acts have not only increased in number and size but have become more complex. There are more persons involved in each application and the conflicts of interest of those represented has materially increased the Commission's work load in carrying out its function. The extremely tight power situation throughout the United States, as well as the shortages of natural gas due to inability of present natural gas transportation facilities to meet market demands, has thrown additional burdens upon the Commission requiring immediate action to prevent and alleviate shortages of electricity and gas in consuming areas.

In handling its work load the Commission gives the above matters priority, which has necessarily resulted in curtailing other important functions—such as unlicensed projects investigations, the regulation of all wholesale rates and services for electricity and natural gas sold for resale in interstate commerce, enforcement of uniform accounting, and the gathering of basic electric and natural gas data.

The Commission's work load is also directly affected by the expanded river development program of the Federal Government. The number of projects of the Corps of Engineers and the Bureau of Reclamation which the Commission is being called upon to study with respect to their power features in 1948 and 1949 has increased over one-third from 1947 and is expected to increase still further in 1950.

The estimates for the fiscal year 1950 total $4,240,000 as compared with $4,305,450 currently estimated for 1949. The latter includes a 1949 supplemental appropriation of $228,000 to cover in part salary increases under the Federal Employees Salary Act of 1948.

Federal Trade Commission

The Federal Trade Commission is charged with the responsibility of adminstering acts which are designed to accomplish the following purposes: (1) To promote free and fair competition in interstate trade in the interest of the public through prevention of price-fixing agreements, boycotts, combinations in restraint of trade, unlawful price discriminations, and other unfair methods of competition and unfair and deceptive acts and practices; (2) to safeguard life and health of the consuming public by preventing the dissemination of false and fraudulent advertisements of food, drugs, cosmetics, and devices which may be injurious to health; (3) to protect producers, manufacturers, distributors, and consumers from unrevealed presence of substitutes and mixtures in manufactured wool products; (4) to supervise the registration and operation of associations of American exporters engaged solely in export trade; and (5) to gather and make available to the President, the Congress, and the public, factual data concerning economic and business conditions as a basis for remedial legislation where needed, and for the guidance and protection of the public.

The 1950 estimate of $3,739,000 provides for a slight increase of $92,965 or 3 percent above the 1949 estimate, mainly for pay increase adjustments. The estimate provides for the continuation of trade practice conferences and investigations of the economic as well as legal character of monopoly problems arising in various segments of the American economy. It is anticipated that the 1950 Budget will enable the antimonopoly program of the Commission to continue to be concentrated against major types of monopolistic practices as well as unfair trade practices.

General Accounting Office

The General Accounting Office, which was created by the Budget and Accounting Act of 1921, makes independent audits of the Government's receipts and expenditures; prescribes uniform accounting systems; maintains appropriation accounts and accounts with fiscal officers; settles claims, by and against the United States; and construes and interprets laws.

During the fiscal year 1948 there was established the Accounting Systems Division which, in cooperation with the Bureau of the Budget, the Treasury Department, and all other interested departments, is engaged in a program which will result in developing and putting into effect throughout the Government sound basic principles of accounting upon which can be built accounting systems designed to meet the requirements of the Congress, the executive branch of the Government, and the General Accounting Office. This development of accounting procedures and related reporting programs will assist materially in extending, when considered more efficient and economically justifiable, the use of site audits by the General Accounting Office in the various departments and agencies of the Government.

In order that there will be completely localized within one organization the duties of the Office generally as to transportation audit work and the responsibility for its proper performance, the Comptroller General has established a Transportation Division.

The total 1950 estimate of appropriation for the General Accounting Office reflects an increase of $449,958 over the currently revised estimate for 1949. For the most part, the appropriation is required for the performance of prescribed auditing functions including the audit of the accounts of Government corporations.

Despite the continuance of heavy work loads, the work of the General Accounting Office is being conducted on a relatively current basis, the only major exception being with respect to the audit of transportation vouchers.

Housing Expediter

The Office of the Housing Expediter administers the Housing and Rent Act of 1947, as amended. Its primary responsibility is to operate Federal rent control in over 600 defense rental areas throughout the country. Under the provisions of the Housing and Rent Act of 1947, as amended, this Office and its functions terminate this fiscal year. An estimate of $24,000,000 for the fiscal year 1950 is included under proposed legislation in connection with the extension of rent control.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Historically, the Housing Expediter was appointed to develop and carry out a postwar emergency housing program, formalized by the Veterans' Emergency Housing Act of 1946 (Public Law 388, approved May 22, 1946). The rent control functions of the Office of Price Administration were transferred to the Housing Expediter in May 1947, and shortly thereafter, by the Housing and Rent Act of 1947 (Public Law 129, approved June 30, 1947), most of the provisions of the Veterans' Emergency Housing Act of 1946 were repealed.

In addition to administering Federal rent control, the Housing Expediter is carrying on a vigorous campaign to investigate and prosecute violations of law and regulations in effect during the life of the Veterans' Emergency Housing Act of 1946. He is also responsible for enforcing the priority in the purchase or rental of newly constructed housing established for veterans by the Housing and Rent Act of 1947, as amended.

Indian Claims Commission

The act of August 13, 1946, created an independent commission of three members to hear and determine claims, existing before that date, of American Indian tribes, bands, or other identifiable groups of Indians residing within the territorial limits of the United States or Alaska. Claimants are allowed a period of 5 years from August 13, 1946, within which to submit their claims. The Commission is required to complete its work within 10 years after the first meeting of the Commission (April 10, 1947). Appropriations for 1948 and 1949 were $150,000 and $90,000, respectively, and $90,000 is recommended for 1950.

Interstate Commerce Commission

The Interstate Commerce Commission regulates those railroads, motor carriers, pipe lines, water carriers, stockyards, private freight car lines, and freight forwarders operating in interstate commerce. In general, its jurisdiction covers matters of tariffs, finance, operating authority, service, accounting, valuation, and safety. Regulation is performed in accordance with the national transportation policy to recognize the inherent economic advantages of each type of carrier; to promote safe, adequate, economical, and efficient service; to encourage the establishment of reasonable charges; and to encourage fair wages and equitable working conditions.

Rate structure adjustments continue to impose a heavy burden on the Commission. After extensive hearings railroads were granted two general rate increases, effective January 1, 1947, and August 21, 1948. Railroad petitions for further general increases averaging 13 percent are now under consideration. In addition, regional and national proceedings involving the rates, fares, charges, and practices of all types of carriers are pending before the Commission. Settlement of the numerous individual controversies that arise over the application of general decisions in specific situations affects the Commission's entire work load.

Contributing to the complexity of the Commission's tasks at this time, are, on the one hand, increasing numbers of motor carriers and increasing competition between carriers, and on the other hand increasing shipper interest in freight rates produced by the return of strong market competition.

The Budget estimate for the fiscal year 1950 is $11,334,600, an increase of $9,783 over the 1949 estimated appropriations. Public Law 900 costs accruing to the general expenses appropriation will be substantially absorbed. Included in the appropriation for general expenses is an increase of $347,772 for the Bureau of Service to provide for certain functions now the responsibility of the Office of Defense Transportation and also an item of $205,000 for printing and binding formerly carried as a separate appropriation. The estimates for the railroad safety and the locomotive inspection appropriations includes provision for increased costs resulting from Public Law 900.

Interstate Commission on the Potomac River Basin

The Interstate Commission on the Potomac River Basin is an agency concerned with pollution problems in the Potomac River and its tributaries. It was established under a compact between Maryland, West Virginia, Pennsylvania, Virginia, and the District of Columbia, approved by Congress July 11, 1940. The compact provides that the Federal Government shall contribute to the expenses of the Commission.

The $5,000 estimated for 1950 will continue the Federal contribution in the amount provided for 1949.

Motor Carrier Claims Commission

Establishment of the Motor Carrier Claims Commission is required by Public Law 880, approved July 2, 1948, for the purpose of adjudicating claims against the United States arising out of the taking by the Government, through the Office of Defense Transportation, of 103 motor carrier transportation systems. This taking was a war measure under Executive Order 9642, dated August 11, 1944. All the companies have since been returned to their private owners.

Activation of the Commission by appointment of three commissioners awaits the appropriation of funds for administrative expenses. An estimate for this purpose, transmitted to the Congress on July 31, 1948, was not approved by the Congress, but the final date on which the Commission is authorized to receive claims was extended from January 2, 1949, as specified in the original act, to April 2, 1949.

All determinations by the Commission are to be reported to the Congress in form and content as specified in the act. Awards are to be paid in the same manner as provided for a final judgment by the Court of Claims. Appeals may be taken from the determinations of the Commission directly to the Supreme Court. The Commission is to terminate at the end of 2 years after its first meeting, or at such earlier time as it may have completed its work. The Attorney General or his assistants are to represent the United States in all claims presented to the Commission.

It is now planned to submit an estimate for 1949 in the tentative amount of $100,000, and for 1950 in the tentative amount of $300,000.

National Advisory Committee for Aeronautics

The National Advisory Committee for Aeronautics is the agency of the Government responsible for the scientific study of the problems of flight and for the conduct of research and experiments in aeronautics. The Committee, which consists of officials of the Government directly concerned with military and civil aviation and private citizens qualified in aeronautical fields, carries on research mainly at its three laboratories: The Langley Aeronautical Laboratory at Langley Field, Va.; the Ames

800000—49——4

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Aeronautical Laboratory at Moffett Field, Calif.; and the Lewis Flight Propulsion Laboratory at Cleveland, Ohio. It also has flight research stations at Wallops Island, Va.; and at the Air Force's flight test base at Muroc, Calif. The research work performed directly by the staff of the Committee is supplemented through contracts with private institutions having facilities or personnel capable of assisting in the solution of special technical problems.

The research program of the Committee is now devoted almost entirely to the solution of problems of military aviation in support of the expanded air programs of the National Military Establishment. However, it is to be expected that some of the current work of the Committee will also ultimately be reflected in improved aircraft for use in civil aviation. The appropriations recommended for 1950, totaling $63.7 million, represent an increase of about $15 million over the appropriations for 1949 to provide additional personnel, power, supplies, and equipment to accelerate progress in the Committee's research programs. They will also provide, together with the recommended contract authorization of $21.5 million, for the construction of additional research facilities that are required for the work of the Committee.

The National Archives

The National Archives is responsible for preserving and making available for use the permanently valuable records of the Federal Government. It fosters the efficient management of records throughout the United States Government; appraises records of Federal agencies, selecting for preservation in the National Archives a core of their valuable records, and recommending to Congress the prompt disposal of such of their records as are of only temporary usefulness; repairs and otherwise preserves records in its care; arranges the records and prepares guides and other descriptive aids to their use; and makes the records or the information in them and the technical and scholarly services of the National Archives broadly available for use in the business of the Government and the service of the people. The National Archives receives and publishes in the Federal Register the texts and codes of all Presidential proclamations and Executive orders and of rules and regulations issued by Federal agencies that have general applicability and legal effect. It also publishes the United States Government Manual. The Archivist is also responsible for the preservation and administration of collections of historical material in the Franklin D. Roosevelt Library. The estimate for 1950 provides for operation at the same level as fiscal year 1949.

National Capital Housing Authority

The National Capital Housing Authority is the public housing agency for the National Capital and, under title I of the District of Columbia Alley Dwelling Act, operates 112 dwelling units and 5 nonresidential properties located in reclaimed slum areas. All receipts derived from sales, leases, or other sources in connection with the operation of these properties are covered into the Treasury monthly.

The Budget estimate for the fiscal year 1950 is $34,900 which includes $12,460 for major rehabilitation and replacement items necessary to conserve the Government's investment in the title I properties.

Other activities of the National Capital Housing Authority, which are financed from other appropritaions include the operation and management of war and other housing projects in the District and adjoining metropolitan area.

National Capital Park and Planning Commission

The functions of the National Capital Park and Planning Commission are of an advisory and operating character. Its advisory activities, which include preparation and maintenance of plans for the development of the National Capital City and its environs, are financed from District of Columbia revenues, and therefore the details on this appropriation appear in the District chapter of the Budget. The operating function of the Commission includes acquisition of land for the development of the National Capital's park, parkway, and playground system and the George Washington Memorial Parkway on both sides of the Potomac River, and for the extension of the District park system into nearby Maryland and Virginia. Appropriations for these purposes are charged against the United States Treasury but are subsequently repaid either in whole or in part by the jurisdiction benefited: 100 percent by the District of Columbia; 50 percent by Virginia and Maryland for development of the George Washington Memorial Parkway; and 66⅔ percent by Maryland for extension of the park system in territory adjacent to the District. The Commission has the further responsibility of making a comprehensive plan and project area redevelopment plans under the District of Columbia Redevelopment Act, for which appropriations of Federal funds are authorized.

The total estimates of $1,021,700 for 1950 include $198,000 for acquisition of land in the District of Columbia, $750,000 for advances and contributions to the Maryland National Capital Park and Planning Commission for acquisition of land adjacent to the District, and $73,700 for redevelopment planning and surveys.

National Capital Sesqui-Centennial Commission

The National Capital Sesqui-Centennial Commission was established by Senate Joint Resolution 129, approved July 18, 1947 (Public Law 203, 80th Cong.), to provide for the appropriate commemoration of the one hundred and fiftieth anniversary of the establishment of the seat of the Federal Government in the District of Columbia. An initial appropriation in the amount of $15,000 for planning purposes was approved during fiscal year 1948. An estimate in the amount of $1,500,000 to implement the Commission's plans will be submitted to the Eighty-first Congress.

National Commission Against Discrimination in Employment

An appropriation of $600,000 is forecast under proposed legislation for the establishment of a Federal program for the elimination of discriminatory employment practices based on race, religion, color, or national ancestry.

National Labor Relations Board

Since August 22, 1947, the National Labor Relations Board has administered the provisions of the National Labor Relations Act (29 U. S. C. 151–166), as amended by the Labor-Management Relations Act, 1947, (29 U. S. C. 141–167).

Like a court of law, the Board has little or no control over the number of actions brought before it but is under a statutory mandate to process all cases which are properly filed. Moreover, the Board's objective is comparable to that of a court: To resolve as rapidly as possible, consistent with careful investigation of the facts and due process of law, the issues brought before it for determination.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Experience of the agency indicates that a substantial amount of its work continues to be devoted to processing cases of the type common to the National Labor Relations Act and the amended act. These are the provisions which guarantee the right of employees to self-organization; to form, join, or assist labor organizations; and to bargain collectively through representatives of their own choosing. In connection with these guaranties, the agency is responsible for the investigation of questions concerning the representation of employees for bargaining purposes and for the certification of majority representatives of employees in appropriate bargaining units.

The amended law broadened the bases upon which employers may bring petitions on questions of representation to the Board. The law now permits the filing of decertification petitions by employees. The decertification procedure serves as an "escape hatch," giving employees the opportunity to reject a previously certified bargaining agent. Approximately 12 percent of the total petitions concerning questions of representation have been filed under the new provisions of the law.

The agency provides remedies for five specific types of unfair labor practices committed by employers. Remedies are also afforded for six specific types of unfair labor practices committed by labor organizations or their agents. Approximately 22 percent of the total charges of unfair labor practices filed with the agency from August 22, 1947, through November 30, 1948, were filed against labor organizations.

Experience under the amended law indicates that about 13 percent of all unfair labor practice matters result in formal action, i. e., in the issuance of a formal complaint by the agency. This percentage is almost twice what it was during the later years under the original National Labor Relations Act.

A huge volume of cases resulted from the provision of the amended law requiring elections to authorize union shop contracts. Between August 22, 1947, and November 30, 1948, the agency received approximately 38,000 petitions for union shop elections.

The number of matters brought to the agency by labor organizations was diminished because a number of labor organizations, many of whom had repeatedly used the facilities of the agency prior to August 22, 1947, were prevented from filing cases. Such so-called noncomplying unions either could not, or would not, comply with provisions of the amended law which require, as a condition precedent to use of Board machinery by a labor organization for its benefit, the filing of financial and other data and the filing of non-Communist affidavits by union officers.

The 1949 appropriation contained language permitting obligation of the entire $9,400,000 appropriation prior to February 1, 1949, if found necessary by the Bureau of the Budget for effective administration. It now appears that this sum will be sufficient for the entire fiscal year in the absence of an unusual volume of elections under the national emergency provisions of the act.

The estimate is based upon case-load estimates which are consistent with recent agency experience, but which assume that additional labor organizations will come into compliance with the financial and non-Communist affidavit filing requirements of the law and hence increase the work of the agency. It is anticipated, however, that markedly fewer union-security elections will be sought or required. The proposed appropriation for 1950 is $400,000 less than the amount available in 1949.

National Mediation Board

The National Mediation Board and the National Railroad Adjustment Board were created by the Railway Labor Act of 1926, as amended. The purpose of the act is to promote and maintain order in the labor relations of rail and air carriers and the organizations representing their employees.

Under the act, the National Mediation Board has the duty, with respect to rail and air carriers and express and sleeping-car companies, and their employees and employees' representatives: (1) To mediate disputes concerning rates of pay, rules, or working conditions, or any matter not referable to the National Railroad Adjustment Board; (2) to investigate disputes over representation, and to determine through conduct of secret ballots, or other appropriate methods, the freely chosen and authorized representatives of the employees involved; (3) when mediation fails, to persuade the parties to submit unresolved disputes to arbitration; (4) to notify the President whenever an unadjusted dispute threatens substantially to interrupt interstate commerce to a degree which would deprive any section of the country of essential transportation, and to service emergency boards which may be created by the President in such instances; and (5) to perform certain functions in connection with the National Railroad Adjustment Board.

The National Railroad Adjustment Board consists of 36 members equally representative of, and compensated by, the rail carriers and related national labor organizations. The Board operates through four independent, bipartisan divisions, each of which has exclusive jurisdiction over specified crafts of employees. It is the duty of the several divisions of the Board to act on appropriate petitions for adjustment of unresolved disputes between an employee or group of employees and a carrier or carriers, growing out of grievances or out of interpretation or application of agreements concerning rates of pay, rules, or working conditions. Secretaries to the Board members, administrative personnel, and incidental expenses are paid from appropriations authorized by the Railway Labor Act. During the past year there has been a decided upward trend in the number and percentage of Adjustment Board cases which have been decided through the use of referees who are employed on a while-actually-engaged basis to sit with the Board and decide deadlocked cases. The increased requirement for this type of decision during fiscal year 1949 is such that a supplemental appropriation will be required.

The total increase of $21,850 for 1950 will provide mediator trainees for the Mediation Board, for increased utilization of referees by the Adjustment Board, and for necessary within-grade promotion costs.

National Science Foundation

The Budget provides $2,500,000 of cash appropriation and $12,500,000 of contract authority for the proposed National Science Foundation, in the expectation that the Congress will enact legislation to establish the Foundation to provide the necessary Government support for an expansion of fundamental research and the training of scientists. The amounts proposed will enable the Foundation to complete its organization and initiate its program during its first year of existence.

Philippine War Damage Commission

The Philippine Rehabilitation Act of 1946 (Public Law 370, 79th Cong.) authorized the appropriation of $400

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

million for the adjudication and payment of claims for partial restitution of private property losses resulting from the war. Congress thus far has appropriated $175 million to the Philippine War Damage Commission for this work. A $20 million 1949 supplemental appropriation will be required to continue claim payments at the current rate.

At the end of the filing period, February 29, 1948, approximately 1,250,000 claims (300,000 more than estimated in previous budgets) had been recorded. Although a $795,000 increase in administrative expenses resulting from this work load is recommended, the Commission will still remain within the statutory 3-percent limitation.

In order to complete the work of the Commission by April 30, 1951, the date set by law for its dissolution, it is planned to conclude adjudications by June 30, 1950. During fiscal year 1951 there will be a 3-month appeal period followed by another 3-month period for the computation and distribution of final liquidating payments and a final 4-month period for the disposal of the Commission's property and the return of American personnel to the United States. The appropriation of $165 million requested for fiscal 1950 is required to complete first payments on all claims during that year.

Railroad Retirement Board

Extensive changes are recommended in the appropriation structure of the Railroad Retirement Board for 1950. The appropriations for administrative expenses have been consolidated. Heretofore, these appropriations have been treated as general fund appropriations, with offsetting deductions to reimburse the general fund from the taxes collected in support of the railroad retirement program. In 1950, this appropriation will be derived from the railroad retirement account (trust fund).

The railroad retirement appropriated account is changed from an annual specific to an annual indefinite appropriation. This will make available to the railroad retirement account (trust fund) all of the taxes collected in support of this program each year whether or not the amount collected is greater or less than the estimated and reestimated amounts. This change will simplify the handling of funds to be made available to the account (trust fund) and will enable the Treasury to transfer such funds as they are collected rather than in advance of actual tax receipts.

The annual appropriation from general funds for military service credits has been omitted for 1950. It is proposed to defer further appropriations for this purpose until the actual need for additional funds arises. This will in no way impair the actuarial soundness of the trust fund. The subject of military service credits requires careful study in order to avoid multiple contributions from the general funds to different programs by reason of the same military service and to eliminate the ensuing administrative and fiscal complications inherent in the advance payments of the costs of such military service credits on an estimated basis.

These changes will be beneficial in simplifying the financial arrangements between the railroad retirement program and the Treasury and will lessen the immediate demands upon the Treasury for funds which for the most part will not be required for a long time to come.

Public Law 744, Eightieth Congress, which increased the annuities and pensions, but not survivor benefits, for railroad workers by 20 percent has increased the withdrawals from the railroad retirement account (trust fund) to the largest totals ever reached. However, the high level of taxable wages at the combined tax rate of 12 percent currently in effect continues to provide a substantial sum in excess of current payments to retired railroad workers or to the eligible dependents of deceased railroad workers. This excess is held in trust in the railroad retirement account (trust fund) to meet the future liabilities of the program.

Public Law 744, Eightieth Congress, likewise reduced the tax schedule supporting the railroad unemployment insurance system to a sliding-scale basis varying with the aggregate of the funds held in trust, on or before December 31 of each year, for this program. Until the total funds in the trust account fall below $450,000,000 the tax rate will remain at 0.5 percent of taxable compensation. Coincidentally the amount annually made available to the railroad unemployment insurance administration fund was changed from 10 percent of taxes collected to 0.2 percent of taxable compensation. This fund is used for the administrative costs of operating the railroad unemployment insurance system. The unexpended balance of the fund in excess of $6 million at the close of each year, together with 0.3 percent of taxable compensation (i. e., the difference between the new tax rate of a 0.5 percent and the 0.2 percent provided for the fund), goes into the railroad unemployment insurance trust fund where it is used to pay unemployment, sickness (including maternity), or temporary disability benefits. The new tax rate was made retroactive to January 1, 1948. By reason of tax payments at the old rate made prior to the enactment of the new rate, the railroads have anticipated further tax payments well into 1950. Under a continuation of high employment in the railroad industry, the trust fund does not appear likely to require any supplementation through an upward revision in the tax rate for some years.

Securities and Exchange Commission

The functions of the Securities and Exchange Commission include the registration of securities proposed to be sold publicly and the suppression of fraudulent practices in the sale of securities; regulation of transactions in securities, both on the stock exchanges and in the over-the-counter markets; regulation of public utility holding companies and certain financial aspects of their operating subsidiaries and affiliates; registration and regulation of investment companies and investment advisers; examination of the qualifications of bond indentures and indenture trustees; and the preparation of advisory reports on plans for and participation as a party in corporate reorganizations.

The over-all volume of work coming to the Commission in 1948 continued at the increased postwar rate. Corporate financing, as reflected by registrations of securities, remained at a high level with indications that this volume will continue indefinitely. With refinancing at lower interest rates substantially completed, current financing is mostly for plant expansion and for increasing working capital needs. The Commission's work in connection with surveillance of securities markets was performed in 1948 on about the same basis as in the previous year.

In accordance with requirements of the Public Utility Holding Company Act of 1935, progress is being made in the areas of geographic integration, simplification of corporate structures, and more equitable distribution of voting power, of public utility holding company systems. It is expected that further progress will be made during 1949 and 1950. The large volume of construction financing by public utility companies in 1948 results from the industry's extensive plant expansion program which will not be completed for several years.

The $5,970,000 estimated for expenses of the Commission for the fiscal year 1950 constitutes a decrease of 2.1 percent from the amount available in 1949.

Selective Service System

Public Law 759, Eightieth Congress, known as the Selective Service Act of 1948, authorized the reestablishment of the Selective Service System.

Since passage of the authorizing legislation, the System has been engaged primarily in registration and classification activities with only a limited number of inductions. The estimate for 1950 will permit a distribution of staff throughout the country sufficient for anticipated requirements.

Smithsonian Institution

The Smithsonian Institution, founded in 1846 for "the increase and diffusion of knowledge among men," administers the United States National Museum, the Astrophysical Observatory, the National Collection of Fine Arts, the Bureau of American Ethnology, the International Exchange Service, the Canal Zone Biological Area, the National Air Museum, and the National Zoological Park. The Institution carries on background research in the zoological, botanical, and geological sciences, including the establishment of classification standards which are essential to much of the applied research in these fields. It carries on fundamental research in astrophysics, solar radiation, mineralogy, petrology, and crystallography, research in physical and cultural anthropology, historical research in engineering, crafts, and industries, medicine and public health, and the arts, including research relating to objects illustrative of the history of the United States. Much of its research is of immediate benefit to the oil, mining, manufacturing, and fishing industries, to engineering enterprise, and to medical research. The increase in the 1950 estimates is due to increased rates for rental and electricity and within-grade salary advancements for employees.

The National Gallery of Art, a gift by Andrew W. Mellon to the United States for the benefit of the people of this country, is a quasi-independent branch of the Smithsonian Institution. Here are displayed, free to the public, world-famous paintings and other art objects. The increase in the 1950 estimates is primarily for within-grade salary advancements for employees.

Tariff Commission

The Tariff Commission organizes and interprets economic data relating to industry, commodities, and foreign trade for governmental use in formulating and implementing United States tariff policy. The Commission does not determine tariff policy nor does it have regulatory functions. It is currently engaged in studies respecting the position of all commodities in international trade, and in ascertaining through public hearings and investigations the effect of imports on domestic industry.

The additional $79,700 recommended for fiscal year 1950 would enable the Commission to undertake a study for the revision of customs procedure and tariff classification, and would permit it to continue its present activities at a slightly increased rate, as well as provide funds for pay increases.

The Tax Court of the United States

The function of the Tax Court is to review administrative determinations of tax deficiencies made by the Commissioner of Internal Revenue and to finally decide whether there is a deficiency or an overpayment in income, profits, estate, gift, and unjust enrichment taxes, and personal holding company surtaxes; to adjudicate controversies relating to excess profits on Navy contracts and Army aircraft contracts; and to review the action of the Commissioner in deficiency and refund cases founded on claims of abnormalities under excess-profits statutes. The Court also has jurisdiction in cases involving refunds of processing taxes, and in determining the amount of excessive profits on war contracts when contractors appeal determinations made under the Renegotiation Act.

The 1950 estimates for the Tax Court of the United States are $8,278 more than the 1949 estimates. During 1948 a total of 3,973 cases were closed, of which number 807 were closed by trial. A somewhat greater accomplishment is anticipated for 1949 and 1950. At the beginning of fiscal year 1949 there was a backlog of about 6,800 cases including about 500 renegotiation cases.

United States Maritime Commission

Estimates of appropriations for the United States Maritime Commission for fiscal year 1950 total $101.6 million plus $60 million in new contract authorization. In addition, supplemental estimates for ship construction are included in the budget in the amount of $2 million in cash, and $31.5 million in contract authorization for the fiscal year 1949, plus $13 million to liquidate this contract authorization in fiscal year 1950. The estimates reflect increasing emphasis upon new ship construction offsetting a decline in vessel sales, chartering, and operating functions. Since the beginning of the current fiscal year, the Commission has awarded contracts for the construction of five passenger-freight vessels at a cost of $97 million. These vessels will be sold to American operators under terms of title V of the Merchant Marine Act, which provides for construction-differential subsidies. In addition, bids have recently been opened on a 50,000-ton superliner for the North Atlantic trade, a vessel which, if built, will be the largest and finest vessel ever constructed in an American shipyard. Employment in the ship construction industry will expand in fiscal year 1950.

Salaries and expenses.—Long-range promotional activities are provided for in the amount of $94.6 million under this head, an increase of $26.2 million over 1949 appropriations of $68.4 million. Principal items of increase are ship construction ($23 million) and operating-differential subsidies ($4.7 million), offset by small decreases in administrative expenses, reserve fleet expense, maintenance of shipyard facilities, operation of warehouses, maintenance and operation of terminals, and miscellaneous expenses.

Maritime training.—The budget provision of $6.6 million for the training of merchant seamen contemplates continuation of schools at King's Point, N. Y., Sheepshead Bay, N. Y., St. Petersburg, Fla., Pass Christian, Miss., and Alameda, Calif., as well as the furnishing of pay and subsistence for cadets at four State marine schools. The decline of $1.1 million from the 1949 appropriation of $7.7 million reflects elimination of provision for pay of trainees other than cadet midshipmen because the wartime necessity has passed for providing monetary incentives for enrollees. Furthermore, this is now the only civilian Federal education program where students are paid for going to school, in addition to being furnished subsistence, quarters, books, and tuition. No appreciable reduction in trainee enrollments is expected to result from elimination of trainee pay.

Vessel operating functions.—The Commission's authority to sell, charter, and operate surplus war-built vessels expires on February 28, 1949. The need for the extension of these authorities is uncertain because of the rapid

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

decline in requirements for chartered vessels from a 1946 peak of approximately 1,500 vessels to approximately 300 at the present time. Legislation may be proposed, however, to permit the continued charter of vessels engaged in the domestic trades and to permit the Government to meet peak requirements which may develop in the European recovery program.

Veterans Administration

The Veterans Administration furnishes to the veterans of all wars and of the peacetime National Military Establishment services consisting mainly of medical and hospital care under specified conditions, the payment of compensation and pensions, and the administration of Government life insurance. The agency also administers a number of programs for World War II veterans, including vocational rehabilitation for disabled veterans and the programs authorized by the Servicemen's Readjustment Act of 1944. This act provided for the guaranty of loans for the purchase of homes, farms, or business properties; the provision of subsistence allowances, tuition, books, fees, and educational supplies to veterans wishing to obtain additional education, or desiring to undertake vocational training; and the payment of readjustment allowances to veterans seeking employment, or attempting to establish themselves as self-employed, during the period following their discharge from military service.

Congress has previously authorized an extensive hospital construction program consisting of 90 new hospitals and 9 additions to existing hospitals to provide 53,574 beds for the care of the expanded veteran population. This program was planned and authorized during and immediately after the war. Now that a period of postwar experience has accumulated, a restudy of the entire program in relation to total needs and the needs of geographic areas shows that to continue with the construction of the full number of authorized beds would result in a serious overbuilding of beds needed to meet foreseeable needs. Funds estimated for this construction program contemplate the cancellation of 24 hospital projects and the reduction in capacity of 14 additional hospitals thereby curtailing the program by about 16,000 beds. This revised program will make it possible to provide for all service-connected patients and will provide an even more liberal allowance of beds for non-service-connected patients than at present. Expenditures in fiscal year 1950 for construction of hospital and domiciliary facilities are estimated at $260 million. Due to the revised program this represents a saving of $115 million but is an increase of $77 million over fiscal year 1949 due to the amount of construction already underway.

Funds estimated for operating expenses of the medical, hospital, and domiciliary-care program are premised on the care of an average daily member and patient load of 119,586 in Veterans Administration facilities, an increase of 4,127 over the fiscal year 1949 estimate. In addition, an average patient and member load of 20,196 will be cared for in other Federal, State, and private hospitals and homes. The out-patient activities at field stations will provide medical and dental care for an estimated almost 4 million veterans in its own facilities and approximately 1½ million veterans are expected to receive such care on a fee basis through the agency's home-town medical-care program. Funds recommended will permit continuation of the programs for education and training of medical personnel and for medical research in connection with the care of veterans hospitalized in the agency's facilities.

The administration of national service life insurance is complicated by the great number of policies issued, approximately 20 million, and the fact that over 10 million veterans were demobilized in a period of less than a year, necessitating transfers from a deduction-from-pay basis to an individual direct-payment basis. The agency has in the past quite naturally concentrated its efforts on rendering the best possible service to veterans who have maintained their insurance. It is estimated that approximately 5 million veterans have continued their insurance. An additional almost 1,900,000 policies are in effect covering members of the armed forces.

Good progress in getting records on a current basis with respect to veterans continuing their insurance has been made. In August of 1948, the project of determining the period of time each veteran maintained his insurance (whether or not he subsequently allowed it to lapse) was started. This information is essential to the payment of dividends. The project is scheduled for completion in the spring of 1949. Following this step, it will be necessary to prepare schedules reflecting the dividends payable for each month each of the various types and classes of insurance was in force.

Subsequently, applications for payment of the dividend will be invited. The enormous size and complexity of this operation has precluded the inclusion in this chapter at this time of an estimated amount to cover the administrative expenses involved. However, an amount has been included in the reserve for contingencies for this purpose elsewhere in this Budget and an estimate will be submitted when the time schedule and the financial requirements are more precisely known.

Of the benefits provided under the Servicemen's Readjustment Act of 1944, the most extensively used have been those provided under the education and training program. It is estimated that the average number of veterans engaged in this program in the fiscal year 1949 will be approximately 2 million, with approximately 1,575,000 during the 1950 fiscal year. In addition, the number of disabled veterans receiving vocational rehabilitation is estimated at approximately 216,000 in the 1949 fiscal year and 157,000 in the 1950 fiscal year. The estimated decrease in the load for 1950 under 1949 is, of course, accompanied by estimated reductions in the benefit payments and administrative expenses.

The payment of readjustment allowances to veterans while seeking employment, or while attempting to establish themselves as self-employed, has continued to decline. It is now estimated that the average numbers of veterans receiving these allowances in the 1949 fiscal year will be approximately 400,000. Since the program will end on July 25, 1949, for all except those veterans who have been released from service for less than 2 years, it is estimated that the average numbers of veterans receiving these allowances in 1950 will decline to approximately 74,000.

The main administrative work load in the processing of claims for compensation and pension is now that related to periodical or special reviews of cases now on the rolls, and thus the total load in this area is declining. However, the compensation and pension rolls are estimated to increase, as follows: June 30, 1948 (actual), 2,918,329; June 30, 1949 (estimated), 2,932,374; June 30, 1950 (estimated), 3,002,042. The long-range outlook is for continued increases.

The loan-guaranty program has been declining for some time, primarily due to the more complete readjustment of

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

veterans to civilian life, and to the high cost of suitable housing in relation to the average veteran's ability to finance it. Even so, the volume of loans guaranteed represents, for housing-loan guaranties, a sizable portion of the residential building expected. It is now estimated that home loans guaranteed will be 300,000 in fiscal year 1949 and 275,000 in fiscal year 1950. Total guaranties (including home, farm, and business) are estimated at 322,000 in fiscal year 1949 and 293,000 in fiscal year 1950.

The contact program (providing information and referral services to veterans) has been decreasing. As work loads caused by the Servicemen's Readjustment Act decline, and as more efficient operation becomes possible in other programs, a further decrease is anticipated in this program.

The general administrative program of the agency, including the maintenance of the files and the payment of the various types of awards, will be decreased in 1950 from the 1949 level, largely due to the decrease in volume of the various benefit programs, especially those authorized by the Servicemen's Readjustment Act.

While total general and special appropriations reflect an increase of $155,920,000, it is contemplated that $481,475,186 of the appropriations recommended for 1950 will be utilized in fiscal year 1949. Thus, on a usage basis, appropriations for fiscal year 1949 will total $6,024,679,426 and for 1950 will total $5,217,609,054, or a decrease in 1950 from 1949 of $817,969,372. In addition, there will be utilized in fiscal year 1949 unobligated balances from prior appropriations totaling approximately $900,000,000. The major items in the total decreased appropriation usage of $1,600,000,000 are: A nonrecurring 1949 revaluation of national service life insurance war risk losses, $412,590,000; a decline in education and training enrollments estimated to total $585,000,000; a sharp decline in unemployment and self-employment allowances due to the virtual completion of these programs, $360,000,000; and a decrease in administrative costs, $51,000,000. In addition, the transfer of $176,000,000 to the Corps of Engineers in 1949 for expenditures for hospital construction will cover estimated expenditures against contractual authority in both 1949 and 1950.

The decrease in trust appropriations is due to the inclusion in 1949 of the nonrecurring national service life insurance war risk evaluation transfer mentioned above.

Not included in this chapter but included in the budget as contingencies are an estimated appropriation for the administrative expenses of making the initial dividend payment of national service life insurance, as previously discussed and an estimated appropriation for grants to the Republic of the Philippines, authorized by Public Law 865 (80th Cong.). Estimates will be submitted at a later date when actual needs can be determined more exactly.

War Assets Administration

Under the authority of the Surplus Property Act of 1944, as amended, the War Assets Administration handled and disposed of World War II surplus property in the continental United States and the Territories and island possessions. The act, which is scheduled to expire on December 31, 1949, contains certain statutory objectives such as broad and equitable distribution of surplus property, rapid disposal of surpluses without fostering monopoly, and a fair value return for the Government. The act also required the War Assets Administration to dispose of personal property in conformity with purchasing priorities for Federal Government agencies, veterans, small business, State and local governments, and nonprofit institutions. These objectives and preferences necessarily retarded the disposal program and increased disposal costs, particularly as inventories declined and contained a higher proportion of hard-to-sell items.

The Supplemental Independent Offices Appropriation Act for 1949 (Public Law 862) modified the provisions of the Surplus Property Act by (*a*) stopping declaration of surpluses by owning agencies to the War Assets Administration on July 1, 1948, (*b*) discontinuing priorities and preferences on personal property disposals, and (*c*) abolishing the War Assets Administration, effective February 28, 1949. Residual functions and property would be distributed between the Reconstruction Finance Corporation, the Department of the Air Force, and the Treasury Department.

It is anticipated that War Assets Administration personal property surpluses will be liquidated by February 28, 1949, leaving between $400 million and $500 million worth of aircraft components at original cost value and a small number of leased aircraft. The largest segment of residual inventory will be $2.1 billion of real property, of which approximately $750 million will be on lease. Disposal of real property presents many problems, and a number of years will be required to effect complete liquidation.

Over-all property management legislation which would transfer the War Assets Administration to a central property management agency was recommended by the President to the Eightieth Congress. The President's 1950 Budget Message again urges passage of legislation to modernize the Government's supply and disposal systems.

Since this Budget is based upon the proposal that the remaining functions of the War Assets Administration be transferred to a central property management agency, rather than being distributed between several agencies in conformity with the provisions of Public Law 862, an additional appropriation under proposed legislation (forecast) for fiscal year 1949 of $15 million and for fiscal year 1950 of $21 million is included in this chapter under "Surplus Property Disposal."

War Claims Commission

The War Claims Commission was established by the War Claims Act of 1948 (Public Law 896, approved July 3, 1948). The act directs the Commission to inquire into and report to the President on various classes of claims arising out of World War II. Further provision is made for the adjudication and certification by the Commission of certain claims for payment by the Secretary of the Treasury.

Operations of the Commission are to be financed by appropriations from the war claims fund, a trust fund created by the act, into which are to be deposited the net proceeds of certain vested enemy property. The Office of Alien Property of the Department of Justice is prepared to make an initial deposit in the fund.

Activation of the Commission by the appointment of three commissioners awaits the appropriation of funds. An estimate for this purpose, transmitted to the Congress on July 31, 1948, was not acted upon. A revised estimate for 1949, in the tentative amount of $100,000, will be submitted. The tentative estimate included for 1950 is $600,000.

Universal Training

A provisional forecast of the amount required for the first year of the program of universal training, which is contingent upon the approval of authorizing legislation, is included. The costs would represent primarily the initial requirements for facilities and equipment which must be provided before the training of individuals can be undertaken.

ESTIMATES OF APPROPRIATION

EXECUTIVE OFFICE OF THE PRESIDENT

COMPENSATION OF THE PRESIDENT

Salary of the President—

For compensation of the President of the United States, $75,000. *(3 U. S. C. 42; Independent Offices Appropriation Act, 1949.)*

Annual specific appropriation:

Appropriated 1949, **$75,000** Estimate 1950, **$75,000**

THE WHITE HOUSE OFFICE

Salaries and Expenses, The White House Office—

[Salaries and expenses: For expenses necessary for The White House Office, including compensation of the Secretary to the President, the two additional secretaries to the President and the six administrative assistants to the President at $10,000 each, and other personal services in the District of Columbia; not to exceed $3,000 for deposit in the Treasury for penalty mail (39 U. S. C. 321d); automobiles; printing and binding; services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), at rates for individuals not in excess of $35 per diem (unless a higher rate, not exceeding $50, shall be approved by the Director of the Bureau of the Budget); and travel and official entertainment expenses of the President, to be accounted for on his certificate solely; $969,612: *Provided*, That employees of the departments and independent offices of the executive branch of the Government may be detailed from time to time to The White House Office for temporary assistance.]

Salaries and expenses: For expenses necessary for The White House Office, including compensation of the Secretary to the President and the six administrative assistants to the President as authorized by law, and the two additional secretaries to the President at $10,330 each, and other personal services in the District of Columbia; printing and binding; not to exceed $127,000 for services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), at such per diem rates for individuals as the President may specify, and other personal services without regard to the provisions of law regulating the employment and compensation of persons in the Government service; and travel and official entertainment expenses of the President, to be accounted for solely on his certificate; $1,375,140. (3 U. S. C. 43, 45; 31 U. S. C. 588, 60 Stat. 811; Independent Offices Appropriation Act, 1949.)

Appropriated 1949, **$969,612** Estimate 1950, [a] **$1,375,140**

[a] Includes $200,000 for activities previously carried under "Emergency personal services, The White House Office." The amount obligated in 1949 is shown in the schedule as a comparative transfer.

EMERGENCY FUND FOR THE PRESIDENT

Emergency Fund for the President—

[To provide for emergencies affecting the national interest or security, as the President may specify, without regard to such provisions of law regulating the expenditure of Government funds, $200,000: *Provided*, That no part of such fund shall be available for allocation to finance a function or project for which function or project a budget estimate of appropriation was transmitted pursuant to law during the Eightieth Congress or the first session of the Eighty-first Congress and such appropriation denied after consideration thereof by the Senate or House of Representatives or by the Committee on Appropriations of either body.] *To provide for emergencies affecting the national interest or security, without regard to such provisions of law regulating the expenditure of Government funds as the President may specify, and for supplementing the efforts and available resources of State and local governments or other Government agencies in alleviating hardship or suffering caused by flood, fire, hurricane, earthquake, or other catastrophe in any part of the United States under the terms and conditions set forth in the appropriation to the President for disaster relief in the Second Deficiency Appropriation Act, 1948, $1,000,000: Provided, That no part of such fund shall be available for allocation to finance a function or project for which function or project a budget estimate of appropriation was transmitted pursuant to law during the Eighty-first Congress and such appropriation denied after consideration thereof by the Senate or House of Representatives or by the Committee on Appropriations of either body. (Independent Offices Appropriation Act, 1949.)*

Appropriated 1949, **$200,000** Estimate 1950, [a] **$1,000,000**

[a] Includes estimate for activities previously carried under "Disaster relief, Executive Office of the President"; $500,000 made available for this purpose for the period June 25, 1948, to June 30, 1949.

CARE, HANDLING, AND DISPOSAL OF SURPLUS PROPERTY ABROAD

Care, Handling, and Disposal of Surplus Property Abroad, Executive Office of the President—

[Care, handling, and disposal of surplus property abroad: To enable the President, by allocation during the fiscal year 1949 to any department, agency, corporation, or independent establishment in the executive branch of the Government, to provide for expenses necessary for the care, handling, and disposal, pursuant to law, of surplus property located outside the continental United States, Hawaii, Alaska, Puerto Rico, and the Virgin Islands, and for the care and handling of surplus property located in the United States but disposed of to foreign governments, including personal services in the District of Columbia; employment of persons outside the continental limits of the United States without regard to civil-service and classification laws; attendance at meetings of organizations concerned with the activities for which this appropriation is made; services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); payment of rent in foreign countries in advance; printing and binding, including printing and binding outside the continental limits of the United States without regard to section 11 of the Act of March 1, 1919 (44 U. S. C. 111); and hire of passenger motor vehicles; $18,300,000: *Provided*, That none of the funds herein appropriated shall be available for reimbursement for pay and allowances or subsistence of military or naval personnel except cost-of-living allowances for military or naval personnel assigned or detailed to the Department of State: *Provided further*, That $13,850,000 of this appropriation shall be available exclusively for the care and handling of surplus property located in the United States but disposed of to foreign governments.] (*Second Deficiency Appropriation Act, 1948.*)

ECONOMIC COOPERATION

Foreign Assistance, Executive Office of the President—

[For expenses necessary to carry out the provisions of the Economic Cooperation Act of 1948 (title I of Public Law 472, approved April 3, 1948) until June 30, 1949: *Provided*, That the entire amount may be apportioned for obligation or may be obligated and expended, if the President, after recommendation by the Administrator, deems such action necessary to carry out the purposes of said Act, during the period ending April 2, 1949, including expenses of attendance at meetings concerned with the purposes of this appropriation (not to exceed $60,000); purchase (not to exceed fifty including one at not to exceed $3,000) and hire of passenger motor vehicles; hire of aircraft; payment of claims pursuant to section 403 of the Federal Tort Claims Act (28 U. S. C. 921); health service program as authorized by law (5 U. S. C. 150); rents in the District of Columbia; transportation of privately owned automobiles; entertainment (not to exceed $50,000); exchange of funds without regard to section 3651 of the Revised Statutes; and loss by exchange; $4,000,000,000, of which not to exceed $200,000 shall be available for expenditures of a confidential character (other than entertainment) under the direction of the Administrator or the Deputy Administrator, who shall make a certificate of the amount of each such expenditure which he may think it advisable not to specify, and every such certificate shall be deemed a sufficient voucher for the amount therein certified; and of which such amount as may be necessary but not to exceed $20,000,000 shall be available for assistance to the Free Territory of Trieste or either of its zones under the provisions of Public Law 389, Eighteenth Congress, first session, until the Free Territory of Trieste or either of its zones becomes eligible for assistance under the Economic Cooperation Act of 1948, which amount shall be charged with any advances made heretofore by the Reconstruction Finance Corporation pursuant to section 103 (b) of the Economic Cooperation Act of 1948, and the Administrator is hereby authorized to repay the Reconstruction Finance Corporation for advances pursuant to section 103 (b) from the sum available for assistance to Trieste or either of its zones under this section: *Provided further*, That not less than 5 per centum of each special local currency account established pursuant to section 115 (b) (6) of the Economic Cooperation Act of 1948 shall be allocated to the use of the United States Government for expenditure for strategic materials where available or for other local currency requirements of the United States of America: *Provided further*, That allocations of funds provided pursuant to provisions of the Economic Cooperation Act of 1948 for Austria and any country under occupation by forces of the United States shall be made to the United States Military Government of such countries for administrative and other expenses: *Provided*, That where the Economic Cooperation Administrator requests the United States military authorities to perform certain functions under the Act, the Economic Cooperation Administrator shall reimburse the military authorities for administrative expenses incurred in the performance of such functions: *Provided further*, That not to exceed $58,000,000 may be expended for administrative and other expenses including not to exceed $12,000,000 for direct administration and not to exceed $6,000,000 for technical assistance authorized under section 111 (a) (3) of the Economic Cooperation Act of 1948: *Provided further*, That pursuant to section 117 (c) of the Foreign Assistance Act of 1948, the Administrator shall fix and pay a uniform rate per pound for the ocean transportation of all relief packages of food or other general classification of commodities shipped to any participating foreign country, regardless of methods of shipment and higher rates charged by particular agencies of transportation, but this proviso shall not apply to shipments made by individuals to individuals: *Provided further*, That guaranties of investments in enterprises producing or distributing informational media provided for under section 111 (b) (3) of the Economic Cooperation Act of 1948, or otherwise, shall not exceed $10,000,000 in the first year: *Provided further*, That there shall be included within the local currency administrative expenditures of the United States such sums as may be necessary to meet expenditures of members and staff of the Joint Committee on Foreign Economic Cooperation in the course of performance of committee functions within respective participating countries.] (*Foreign Aid Appropriation Act, 1949.*)

Permanent appropriation, special account:

Payments From Proceeds of Sales, Motor-Propelled Vehicles, Etc., Atomic Energy Commission—

Under the act of August 2, 1946, proceeds of sales of vehicles, equipment, accessories, and other items, the exchange of which is authorized by law, may be applied in whole or in part payment toward the purchase of similar items. Receipts from this source are set up in a special appropriation account, available for the fiscal year in which the obligation to purchase the new equipment is incurred; any unobligated balance is subsequently adjusted to miscellaneous receipts (5 U. S. C. 118d–1).

Appropriated (estimate) 1949, **$200,000** Estimate 1950, **$200,000**

CIVIL SERVICE COMMISSION

Salaries and Expenses, Civil Service Commission—

Salaries and expenses: For necessary expenses, including personal services in the District of Columbia; not to exceed [$12,000] *$37,000* for services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); not to exceed $10,000 for medical examinations performed for veterans by private physicians on a fee basis; travel expenses of examiners acting under the direction of the Commission, and expenses of examinations and investigations held in Washington and elsewhere; not to exceed $500 for payment in advance for library membership in societies whose publications are available to members only or to members at a price lower than to the general public; [not to exceed $425,000 for] *purchase of four passenger motor vehicles;* printing and binding; [$15,641,000, of which] not to exceed [$56,000] *$80,000* [shall be available] for performing the duties imposed upon the [Civil Service] Commission by the Act of July 19, 1940 (54 Stat. 767); [not to exceed $500,000 for deposit in the Treasury for penalty mail (39 U. S. C. 321d); for] *not to exceed $1,202,400 for investigation of applicants for certain positions when requested by the head of the department or agency concerned in cases where the department or agency concerned does not maintain its own investigative staff;* a health service program as authorized by law (5 U. S. C. 150); [for] payment of claims pursuant to section 403 of the Federal Tort Claims Act (28 U. S. C. [921] *2672*); and not to exceed $5,000 for actuarial services by contract, without regard to section 3709, Revised Statutes, as amended; *$17,520,000: Provided,* That no details from any executive department or independent establishment in the District of Columbia or elsewhere to the Commission's central office in Washington or to any of its regional offices shall be made during the *current* fiscal year [ending June 30, 1949], but this shall not affect the making of details for service as members of the boards of examiners outside the immediate offices of the Commission in Washington or of the regional directors, nor shall it affect the making of details of persons qualified to serve as expert examiners on special subjects: *Provided further,* That the Civil Service Commission shall have power in case of emergency to transfer or detail any of its employees to or from its office or field force: *Provided further,* That members of the Loyalty Review Board in Washington and of the regional loyalty boards in the field may be paid actual transportation expenses, and not to exceed $10 per diem in lieu of subsistence while traveling on official business away from their homes or regular places of business, and while en route to and from and at the place where their services are to be performed: *Provided further,* That nothing in sections [109 and 113] *281 or 283* of [the Criminal Code (18 U. S. C. 198, 203)] *Title 18, U. S. C.,* or in section 190 of the Revised Statutes (5 U. S. C. 99) shall be deemed to apply to any person because of his appointment for part-time or intermittent service as a member of the Loyalty Review Board or a regional loyalty board in the Civil Service Commission. *(5 U. S. C. ch. 12; 18 U. S. C. 611; 31 U. S. C. 388; Executive Orders 6670, Apr. 7, 1934; 6731, June 5, 1934; 7915 and 7916, June 24, 1938; Independent Offices Appropriation Act, 1949.)*

Salaries and wages in the foregoing schedule are distributed as follows:						
Direct obligations		12,567,498		15,180,498		14,918,600
Reimbursable obligations		64,963		52,670		40,970
Total of foregoing schedule		12,632,461		15,233,168		14,959,570

[No part of the appropriations herein made to the Civil Service Commission shall be available for the salaries and expenses of the Legal Examining Unit in the Examining and Personnel Utilization Division of the Commission, established pursuant to Executive Order Numbered 9358 of July 1, 1943.]

No part of appropriations herein shall be used to pay the compensation of officers and employees of the Civil Service Commission who allocate or reallocate supervisory positions in the classified civil service solely on the size of the group, section, bureau, or other organization unit, or on the number of subordinates supervised. References to size of the group, section, bureau, or other organization unit or the number of subordinates supervised may be given effect only to the extent warranted by the work load of such organization unit and then only in combination with other factors, such as the kind, difficulty, and complexity of work supervised, the degree and scope of responsibility delegated to the supervisor, and the kind, degree, and value of the supervision actually exercised. (*Independent Offices Appropriation Act, 1949.*)

PANAMA CANAL CONSTRUCTION ANNUITY FUND

Panama Canal Construction Annuity Fund, Civil Service Commission—

DISPLACED PERSONS COMMISSION

Displaced Persons Commission—

Displaced Persons Commission: For expenses necessary to [enable the Commission during the fiscal year 1949 to] carry out the provisions of [S. 2242, Eightieth Congress, entitled "A bill to authorize for a limited period of time the admission into the United States of certain European displaced persons for permanent residence, and for other purposes"] *the Displaced Persons Act of 1948 (Public Law 774, approved June 25, 1948)*, including personal services *and rents* in the District of Columbia; travel expenses without regard to the Standardized Government Travel Regulations, as amended, and the rates of per diem allowances under the Subsistence Expense Act of 1926, as amended; expenses of attendance at meetings of organizations concerned with the purposes of this appropriation; [purchase (not to exceed fifteen, including one at not to exceed $3,000) and] hire of passenger motor vehicles; printing and binding, including printing and binding outside the continental limits of the United States without regard to section 11 of the Act of March 1, 1919 (44 U. S. C. 111); services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); payment of claims pursuant to section 403 of the Federal Tort Claims Act (28 U. S. C. [921] *2672*); health service program as authorized by law (5 U. S. C. 150); employment of aliens; payment of rent in foreign countries in advance; and purchases and services abroad without regard to section 3709 of the Revised Statutes; [$2,000,000] *$5,200,000*: *Provided*, That allocations may be made from this appropriation by the Commission upon approval by the Director of the Bureau of the Budget to any department, agency, corporation, or independent establishment of the Government for direct expenditure for the purposes of this appropriation, and any such expenditures may be made under the specific authority herein contained or under the authority governing the activities of the department, agency, corporation, or independent establishment to which amounts are allocated: *Provided further*, That the Commission may enter into agreements with governmental and private agencies and may make payment in advance or by reimbursement for expenses incurred by such agencies in rendering assistance to the Commission in carrying out the purposes of this Act.

[The appropriation of $2,000,000 for the Displaced Persons Commission in the "Second Deficiency Appropriation Act, 1948" (Public Law 785, Eightieth Congress, second session), may be apportioned for obligation and expenditure during the first three quarters of the fiscal year 1949.] (*Second Deficiency Appropriation Act, 1949; Supplemental Appropriation Act, 1949.*)

Total, Federal Communications Commission, annual specific appropriations:

Appropriated 1949, **$6,350,000** Estimate 1950, **$6,633,000**

Permanent appropriation, special account:

Payments From Proceeds of Sales, Motor-Propelled Vehicles, Etc., Federal Communications Commission—

Under the act of August 2, 1946, proceeds of sales of vehicles, equipment, accessories, and other items, the exchange of which is authorized by law, may be applied in whole or in part payment toward the purchase of similar items. Receipts from this source are set up in a special appropriation account, available for the fiscal year in which the obligation to purchase the new equipment is incurred; any unobligated balance is subsequently adjusted to miscellaneous receipts (5 U. S. C. 118d–1).

Appropriated (estimate) 1949, **$1,000** Estimate 1950, **$1,000**

Total, Federal Power Commission, annual specific appropriations:

Appropriated 1949, **$4,049,550** Estimate 1950, **$4,211,200**

Permanent appropriations, special accounts:

Payments to States Under Federal Power Act—

By the act of June 10, 1920, as amended, 37½ percent of the receipts from certain licenses issued by the Federal Power Commission for the occupancy and use of national forests and public lands within the boundaries of any State is appropriated for payment to such State. Payments of the amounts so appropriated are made each year to the States (16 U. S. C. 810).

Appropriated (estimate) 1949, **$26,700** Estimate 1950, **$27,200**

Obligations: 11 Grants, subsidies, and contributions—1948, $24,850; 1949, $26,700; 1950, $27,200.

Payments From Proceeds of Sales, Motor-Propelled Vehicles, Etc., Federal Power Commission—

Under the act of August 2, 1946, proceeds of sales of vehicles, equipment, accessories, and other items, the exchange of which is authorized by law, may be applied in whole or in part payment toward the purchase of similar items. Receipts from this source are set up in a special appropriation account, available for the fiscal year in which the obligation to purchase the new equipment is incurred; any unobligated balance is subsequently adjusted to miscellaneous receipts (5 U. S. C. 118d–1).

Appropriated (estimate) 1949, **$1,200** Estimate 1950, **$1,600**

Obligations: 09 Equipment—1949, $1,200; 1950, $1,600.

Total, Federal Power Commission, permanent specific appropriations:

Appropriated 1949, **$27,900** Estimate 1950, **$28,800**

Total, Federal Power Commission, general and special accounts:

Appropriated 1949, **$4,077,450** Estimate 1950, **$4,240,000**

Statement of proposed obligations for purchase and hire of passenger motor vehicles for the fiscal year 1950

FEDERAL POWER COMMISSION

Appropriation	Motor vehicles to be purchased: Number	Motor vehicles to be purchased: Gross cost	Old vehicles to be exchanged: Number	Old vehicles to be exchanged: Allowance (estimated)	Net cost of vehicles to be purchased	Old vehicles still to be used	Cost of hire of motor vehicles	Public purpose and users
Salaries and expenses, Federal Power Commission.	4	$5,600	4	$1,600	$4,000	11	$500	For use by engineers and other members of the Commission's staff in regional offices for inspection of electric utility and gas plants; also for inspection of hydroelectric projects during construction; and miscellaneous field investigations. 1 car for general administrative use in the District of Columbia. Motor vehicles will be hired only for special field investigations or inspections where official cars are not available.

FEDERAL TRADE COMMISSION

Salaries and Expenses, Federal Trade Commission—

Salaries and expenses: For necessary expenses, including personal services in the District of Columbia; health service program as authorized by law (5 U. S. C. 150); payment of claims pursuant to section 403 of the Federal Tort Claims Act (28 U. S. C. [921] *2672*); contract stenographic reporting services; *printing and binding; and* newspapers not to exceed [$500; and not to exceed $9,000 for deposit in the Treasury for penalty mail (39 U. S. C. 321d); $3,401,510,] *$700; $3,739,000*, of which not less than $228,695 shall be available for the enforcement of the Wool Products Labeling Act; and not less than $207,000 shall be available for the Trade Practice Conference Rule work: *Provided*, That no part of the funds appropriated herein for the Federal Trade Commission shall be expended upon any investigation hereafter provided by concurrent resolution of the Congress until funds are appropriated subsequently to the enactment of such resolution to finance the cost of such investigation. (*Independent Offices Appropriation Act, 1949.*)

Appropriated 1949, **$3,401,510** Estimate 1950, [a] **$3,739,000**

[a] Includes $47,000 for activities previously carried under "Printing and binding, Federal Trade Commission." The amounts obligated in 1948 and 1949 are shown in the schedule as comparative transfers.

Total, Federal Trade Commission, annual specific appropriations:

Appropriated 1949, **$3,448,035** Estimate 1950, **$3,739,000**

Permanent appropriation, special account:

Payments From Proceeds of Sales, Motor-Propelled Vehicles, Etc., Federal Trade Commission—

Under the act of August 2, 1946, proceeds of sales of vehicles, equipment, accessories, and other items, the exchange of which is authorized by law, may be applied in whole or in part payment toward the purchase of similar items. Receipts from this source are set up in a special appropriation account, available for the fiscal year in which the obligation to purchase the new equipment is incurred; any unobligated balance is subsequently adjusted to miscellaneous receipts (5 U. S. C. 118d–1).

	1948 actual	1949 estimate	1950 estimate
FUNDS AVAILABLE FOR OBLIGATION

HOUSING EXPEDITER

Salaries and Expenses, Office of Housing Expediter—

[Salaries and expenses, Office of the Housing Expediter: For expenses necessary to carry out the functions of the Office of the Housing Expediter, including personal services in the District of Columbia; attendance at meetings of organizations concerned with rent control; hire of passenger motor vehicles; printing and binding; services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); not to exceed $5,000 for payment of claims pursuant to section 403 of the Federal Tort Claims Act (28 U. S. C. 921); and health service program as authorized by law (5 U. S. C. 150); $15,172,100: *Provided*, That the foregoing amounts may be obligated during the period ending March 31, 1949: *Provided further*, That any employee of the Office of Housing Expediter is authorized and empowered, when designated for the purpose by the Housing Expediter, to administer to or take from any person an oath, affirmation, or affidavit when such instrument is required in connection with the performance of the functions or activities of the Housing Expediter: *And provided further*, That as to cases involving the functions transferred to the Office of the Housing Expediter by Executive Order 9841, section 204 (e) of the Emergency Price Control Act of 1942, as amended, shall be considered as remaining in full force and effect during fiscal year 1949.] (*The Supplemental Independent Offices Appropriation Act, 1949.*)

Annual specific appropriation:

Appropriated 1949, **$15,172,100**

NOTE.—Activities previously carried under "Salaries and expenses, rent control, Office of Housing Expediter," were consolidated and appropriated for under the above title in the act of May 10, 1948, the First Deficiency Appropriation Act, 1948. Obligations incurred during fiscal year 1948 to the date of consolidation are shown in the schedule as a comparative transfer.

Permanent appropriation, special account:

Payments From Proceeds of Sales, Motor-Propelled Vehicles, Etc., Interstate Commerce Commission—

Under the act of August 2, 1946, proceeds of sales of vehicles, equipment, accessories, and other items, the exchange of which is authorized by law, may be applied in whole or in part payment for the purchase of similar items. The receipts from this source are set up in a special appropriation account, available for the fiscal year in which the obligation to purchase the new equipment is incurred; any unobligated balance is subsequently adjusted to miscellaneous receipts (5 U. S. C. 118d–1).

INTERSTATE COMMISSION ON THE POTOMAC RIVER BASIN

Contribution to Interstate Commission on the Potomac River Basin—

Contribution to Interstate Commission on the Potomac River Basin: To enable the Secretary of the Treasury to pay in advance to the Interstate Commission on the Potomac River Basin the Federal contribution toward the expenses of the Commission during the *current* fiscal year [1949] in the administration of its business in the conservancy district established pursuant to the Act of July 11, 1940 (54 Stat. 748), $5,000. (*Independent Offices Appropriation Act, 1949.*)

Appropriated 1949, **$5,000** Estimate 1950, **$5,000**

Obligations: 11 Grants, subsidies, and contributions—1949, $5,000; 1950, $5,000.

NATIONAL ADVISORY COMMITTEE FOR AERONAUTICS

Salaries and Expenses, National Advisory Committee for Aeronautics—

Salaries and expenses: For necessary expenses of the Committee, including contracts, without regard to section 3709, Revised Statutes, as amended, for the making of special investigations and reports and for engineering [and drafting], *drafting, and computing* services; [traveling expenses of members and for] examination of estimates of appropriations and activities in the field; equipment, maintenance, and operation of the Langley [Memorial] Aeronautical Laboratory, the Ames Aeronautical Laboratory, and the *Lewis* Flight Propulsion [Research] Laboratory [at Cleveland, Ohio]; purchase and maintenance of cafeteria equipment; [purchase of three (not to exceed $25,000) and] maintenance and operation of aircraft; purchase of [seven] *eleven* passenger motor vehicles of which [six] *eight* shall be for replacement; *printing and binding;* personal services in the District of Columbia; [not to exceed $12,000 for deposit in the Treasury for penalty mail (39 U. S. C. 321d); not to exceed $10,000 for] services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a) [at not to exceed $35 per diem for individuals (unless a higher rate, not exceeding $50, shall be approved by the Director of the Bureau of the Budget)]; including $2,500 for payment of claims pursuant to section 403 of the Federal Tort Claims Act (28 U. S. C. [921] *2672*); and a health service program for employees as authorized by law (5 U. S. C. 150); in all, [$37,810,000] *$48,700,000*: *Provided*, That statutory provisions prohibiting the payment of compensation to aliens shall not apply to any person whose employment by the Committee shall be determined by the Chairman thereof to be necessary: *Provided further*, That aircraft and parts, equipment, and supplies may be transferred to the Committee by the Air Force, Army, and Navy without reimbursement.

[The limitation under this head in the Independent Offices Appropriation Act, 1949, on the amount available for services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), is increased from "$10,000" to "$20,000".] (*49 U. S. C. 241–245; Act of May 25, 1948, Public Law 549; Second Deficiency Appropriation Act, 1948; Independent Offices Appropriation Act, 1949.*)

Appropriated 1949, **$37,810,000** Estimate 1950, [a] **$48,700,000**

[a] Includes $100,000 for activities previously carried under "Printing and binding, National Advisory Committee for Aeronautics." The amounts obligated in 1948 and 1949 are shown in the schedule as comparative transfers.

Permanent appropriation, special account:

Payments From Proceeds of Sales, Motor-Propelled Vehicles, Etc., National Advisory Committee for Aeronautics—

Under the act of August 2, 1946, proceeds of sales of vehicles, equipment, accessories, and other items, the exchange of which is authorized by law, may be applied in whole or in part payment toward the purchase of similar items. Receipts from this source are set up in a special appropriation account, available for the fiscal year in which the obligation to purchase the new equipment is incurred; any unobligated balance is subsequently adjusted to miscellaneous receipts (5 U. S. C. 118d–1).

Appropriated (estimate) 1949, **$5,000** Estimate 1950, **$5,000**

Obligations: 09 Equipment—1948, $4,432; 1949, $5,000; 1950, $5,000.

Total, National Advisory Committee for Aeronautics, general and special accounts:

Appropriated 1949, **$47,910,000** Estimate 1950, **$63,705,000**

Statement of proposed obligations for purchase and hire of passenger motor vehicles for the fiscal year 1950

NATIONAL ADVISORY COMMITTEE FOR AERONAUTICS

Appropriation	Motor vehicles to be purchased		Old vehicles to be exchanged		Net cost of vehicles to be purchased	Old vehicles still to be used	Cost of hire of motor vehicles	Public purpose and users
	Number	Gross cost	Number	Allowance (estimated)				
Salaries and expenses, National Advisory Committee for Aeronautics.	[1] 11	$33,100	8	$4,850	$28,250	42		3 cars to be used in the transaction of official business by officials and designated employees of the National Advisory Committee for Aeronautics headquarters office. Remaining vehicles to be used by officials and designated employees of the field stations for official trips in the vicinities and for transporting special research details to remotely located research centers and other points inadequately served by common carrier: 25 at Langley Aeronautical Laboratory, 9 at Ames Aeronautical Laboratory, and 16 at Flight Propulsion Research Laboratory.

[1] Includes 4 station wagons and 3 busses.

Permanent appropriation, special account:

Payments From Proceeds of Sales, Motor-Propelled Vehicles, Etc., National Archives—

Under the act of August 2, 1946, proceeds of sales of vehicles, equipment, accessories, and other items, the exchange of which is authorized by law, may be applied in whole or in part payment toward the purchase of similar items. Receipts from this source are set up in a special appropriation account, available for the fiscal year in which the obligation to purchase the new equipment is incurred; any unobligated balance is subsequently adjusted to miscellaneous receipts (5 U. S. C. 118d–1).

Franklin D. Roosevelt Library, Income Account—

The joint resolution to provide for the establishment and maintenance of the Franklin D. Roosevelt Library (53 Stat. 1062–1066) establishes a Board to be known as the Trustees of the Franklin D. Roosevelt Library and authorizes it to accept gifts and bequests of personal property (sec. 205 (a), (c)). "The income from any trust funds held by the Board . . . shall be deposited with the Treasurer of the United States, who shall enter it in a special account . . . subject to disbursement by the Archivist, except where otherwise restricted by the instrument of gift, in the purchase of equipment for the Franklin D. Roosevelt Library; in the preparation and publication of guides, inventories, calendars, and textual reproduction of material in the said Library; and in the purchase . . . of historical material for the said Library" (sec. 205 (d)). Proceeds from the sale of publications and duplicate printed material and from fees collected from visitors are also paid into the special account and available for disbursement by the Archivist as provided above (secs. 203, 205 (d), 207).

NATIONAL LABOR RELATIONS BOARD

Salaries and Expenses, National Labor Relations Board—

Salaries and expenses: For expenses necessary for the National Labor Relations Board to carry out the functions vested in it by the Labor-Management Relations Act, 1947 ([Public Law 101, approved June 23, 1947] *29 U. S. C. 141–167*), and other laws, including personal services in the District of Columbia; expenses of attendance at meetings concerned with the work of the Board when specifically authorized by the Chairman or the General Counsel; [purchase of not to exceed two passenger motor vehicles;] printing and binding; services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); [deposits in the Treasury for penalty mail (39 U. S. C. 321d); and] payment of claims pursuant to section 403 of the Federal Tort Claims Act (28 U. S. C. [921] *2672*); [$9,400,000: *Provided,* That in making apportionments pursuant to section 3679 of the Revised Statutes, as amended, the entire sum herein appropriated may, if found necessary by the Bureau of the Budget for effective administration, be apportioned for obligation prior to February 1, 1949: *Provided further,* That no part of the funds appropriated in this title shall be available to organize or assist in organizing agricultural laborers or used in connection with investigations, hearings, directives, or orders concerning bargaining units composed of agricultural laborers as referred to in section 2 (3) of the Act of July 5, 1935 (49 Stat. 450), and as amended by the Labor-Management Relations Act, 1947 (Public Law 101, approved June 23, 1947), and as defined in section 3 (f) of the Act of June 25, 1938 (52 Stat. 1060)] *and a health service program as authorized by law (5 U. S. C. 150); $9,000,000. (29 U. S. C. 151–166; 47 U. S. C. 222; Labor-Federal Security Appropriation Act, 1949.)*

Permanent appropriation, special account:

Payments From Proceeds of Sales, Motor-Propelled Vehicles, Etc., National Labor Relations Board—

Under the act of August 2, 1946, proceeds of sales of vehicles, equipment, accessories, and other items, the exchange of which is authorized by law, may be applied in whole or in part payment toward the purchase of similar items. Receipts from this source are set up in a special appropriation account, available for the fiscal year in which the obligation to purchase the new equipment is incurred; any unobligated balance is subsequently adjusted to miscellaneous receipts (5 U. S. C. 118d–1).

Obligations: 09 Equipment—1948, $65.

NATIONAL MEDIATION BOARD

SALARIES AND EXPENSES

Salaries and Expenses, National Mediation Board—

[Salaries and expenses: For three members of the Board, and for other expenditures of the National Mediation Board, including stenographic reporting services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), $332,100 of which amount not to exceed $255,000 may be expended for personal services in the District of Columbia] *For expenses necessary for the National Mediation Board, including personal services in the District of Columbia, printing and binding, and stenographic reporting services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), $360,400. (45 U. S. C. 154; Labor-Federal Security Appropriation Act, 1949.)*

RAILROAD RETIREMENT ACCOUNT

Railroad Retirement Appropriated Account—

[Railroad retirement account: For an amount sufficient as an annual premium for the payments required under the Railroad Retirement Acts of August 29, 1935, and June 24, 1937, and authorized to be appropriated to the railroad retirement account established under section 15 (a) of the latter Act, $637,986,000, of which $73,416,000 shall be immediately available: *Provided,* That such total amount shall be available until expended for making payments required under said retirement Acts, and the amount not required for current payments shall be invested by the Secretary of the Treasury in accordance with the provisions of said Railroad Retirement Act of June 24, 1937: *Provided further,* That for the purposes of the provisions of section 4 of the Act of June 24, 1937 (50 Stat. 307, ch. 382), as amended, the national emergencies proclaimed by the President on September 8, 1939, and May 27, 1941, shall be deemed to be terminated on the date of the approval of this Act.]

For an annual premium to provide for the payment of all annuities, pensions, and death benefits in accordance with the provisions of the Railroad Retirement Acts of 1935 and 1937, as amended (45 U. S. C. 228–228s), and for expenses necessary for the Railroad Retirement Board in the administration of said Acts as specifically provided for under this title, (1) an amount equal to the aggregate of the amounts covered into the Treasury during the fiscal year 1950 as collections under the Railroad Retirement Tax Act (26 U. S. C. 1500–1538), plus (2) an amount equal to the difference between (a) the aggregate of the amounts covered into the Treasury during the fiscal year 1949 and prior years as collections under the Carriers Taxing Act of 1937, as amended, or the Railroad Retirement Tax Act, less the aggregate of the amounts appropriated for administrative expenses of the Railroad Retirement Board for 1949 and prior fiscal years (excluding amounts appropriated for penalty mail for the fiscal years 1945, 1946, and 1947) and (b) the aggregate of the amounts appropriated for 1949 and prior fiscal years under this head (excluding appropriations aggregating $167,577,100 for military service credits as provided under section 4 of the Railroad Retirement Act of 1937, as amended), plus (3) the aggregate of the amounts heretofore or hereafter carried to the surplus fund of the Treasury under the provisions of section 713 of title 31, United States Code, from appropriations for administrative expenses of the Railroad Retirement Board for the fiscal year 1947 and prior years (excluding amounts appropriated for penalty mail for the fiscal

Permanent appropriation, special account:

Railroad Unemployment Insurance Administration Fund, Railroad Retirement Board—

The act of June 25, 1938, as amended, established the Railroad Unemployment Insurance Administration fund, to which there is credited such part of all contributions collected pursuant to section 8 of said act as equals 0.2 per centum of the total compensation on which such contributions are based. All moneys credited to the fund are permanently appropriated for administrative expenses necessary in carrying out that act, except that so much of the balance in the fund as is in excess of $6,000,000 as of June 30 of each year is transferred from this fund and credited to the railroad unemployment insurance account in the unemployment trust fund (45 U. S. C. 361).

Railroad Retirement Account (Trust Fund)—

By authority of act of June 24, 1937, and public resolution of July 1, 1937, there was established a "Railroad retirement account" into which all funds appropriated for annuity and pension payments, together with interest from investments, would be credited and available until expended and the provision made that such amounts not necessary for immediate expenditure would be invested by the Secretary of the Treasury in accordance with the provisions of the Railroad Retirement Act of June 24, 1937 (45 U. S. C. 228a–228r).

Appropriated (est.) 1949, [a] **$615,270,000** Estimate 1950, [b] **$777,889,000**

[a] Includes $564,570,000 transferred from "Railroad retirement appropriated account" (general account) and $50,700,000 interest on investments.
[b] Includes $715,889,000 transferred from "Railroad retirement appropriated account" (general account) and $62,000,000 interest on investments.

Permanent appropriation:

Expenses of Smithsonian Institution, Interest Account—

Under sections 5590 and 5591, Revised Statutes, there is appropriated, out of any money not otherwise appropriated, a sum equal to interest at the rate of 6 percent per annum on a trust fund of $1,000,000 derived from the original bequest of James Smithson and other deposits in the Treasury on the same terms. Moneys so appropriated are paid semiannually to the Board of Regents for the maintenance and support of the Smithsonian Institution (20 U. S. C. 54, 55).

Appropriated 1949, **$60,000** Estimate 1950, **$60,000**

Obligations: 07 Other contractual services—1948, $60,000; 1949, $60,000; 1950, $60,000.

Payments From Proceeds of Sales, Motor-Propelled Vehicles, Etc., Tariff Commission—

Under the act of August 2, 1946, proceeds of sales of vehicles, equipment, accessories, and other items, the exchange of which is authorized by law, may be applied in whole or in part payment toward the purchase of similar items. Receipts from this source are set up in a special appropriation account, available for the fiscal year in which the obligation to purchase the new equipment is incurred; any unobligated balance is subsequently adjusted to miscellaneous receipts (5 U. S. C. 118d–1).

UNITED STATES MARITIME COMMISSION

Salaries and Expenses, United States Maritime Commission—

Salaries and expenses: For expenses necessary for carrying into effect the Merchant Marine Act, 1936, and other laws administered by the United States Maritime Commission, [$68,360,775] *$94,583,390*, within limitations as follows:

Administrative expenses, including personal services in the District of Columbia; printing and binding; not to exceed $2,000 for newspapers and periodicals; not to exceed [$18,750] *$19,200* for services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); and not to exceed $1,125 for entertainment of officials of other countries when specifically authorized by the Chairman; in all, not to exceed [$10,600,000: *Provided*, That during the fiscal year ending June 30, 1949, the salaries of the Commissioners of the United States Maritime Commission with the exception of the Chairman, shall be at the rate of $10,000 each per annum] *$10,879,000*;

New ship construction, including reconditioning and betterment, [$29,000,000] *as authorized by title V of the Merchant Marine Act, 1936 (except for construction of two prototype vessels under title VII of said Act), $52,000,000, of which $12,000,000 is for payment of obligations incurred under authority granted under this head in the Supplemental Independent Offices Appropriation Act, 1949, to enter into contracts for new ship construction in an amount not to exceed $75,000,000*; and, in addition, the Commission is authorized to enter into contracts for new ship construction in an amount not to exceed [$75,000,000: *Provided*, That all authority granted to incur obligations for these purposes during 1948 and prior fiscal years not exercised prior to July 1,1948, is hereby revoked, except that not to exceed $99,000,000 of the funds appropriated for "New ship construction, reconditioning, and betterment" in the Independent Offices Appropriation Act, 1948, shall continue to be available until September 30, 1948: *Provided further*, That the Commission may expend amounts to acquire the vessels Mariposa and Monterey and materials and equipment in conjunction therewith on hand or committed for and expend the amounts necessary to complete the vessels, if required for the development and maintenance of the commerce of the United States and for use of the United States in time of war and national emergency, from any amounts available within this limitation] *$60,000,000*;

Maintenance of shipyard facilities, [$529,000] *$482,000*;

Operation of warehouses, [$792,000] *$543,000*;

Operating-differential subsidies, [$16,691,775] *$21,433,390*: *Provided*, That to the extent that the operating-differential subsidy accrual (computed on the basis of parity) is represented on the operator's books by a contingent accounts receivable item against the Commission as a partial or complete offset to the recapture accrual, the operator (1) shall be excused from making deposits in the Special Reserve Fund and, (2) as to the amount of such earnings the deposit of which is so excused, shall be entitled to the same tax treatment as though it had been deposited in said Special Reserve Fund. To the extent that any amount paid to the operator by the Commission reduces the balance in the operator's contingent receivable account against the Commission, such amount, unless it is forthwith deposited in the fund, shall be considered as withdrawn under Section 607 (h) of the Merchant Marine Act, 1936, as amended;

Reserve fleet expense, [$9,663,000] *$8,253,000*;

Maintenance and operation of terminals, [$585,000] *$543,000*;

Miscellaneous expenses, including payment of claims pursuant to section 403 of the Federal Tort Claims Act (28 U. S. C. [921), $500,000] *2672), $450,000, of which $250,000 shall be available exclusively for liquidation of liens or claims which may take precedence over the Government's preferred mortgage on vessels.*

[Whenever, in connection with any transaction involving the sale, purchase, or requisition of any vessel, the United States shall be or become obligated to pay any sum to the other party to the transaction and said other party shall be or is indebted to the United States on account of any transaction involving the sale, purchase, or requisition of any vessel the amount so owing to the United States shall be deducted from the amount due the other party, and hereafter no officer or employee of the Government shall pay to such other party a sum greater than the net amount owing the other party.] (*The Supplemental Independent Offices Appropriation Act, 1949.*)

Appropriated 1949, **$68,360,775** Estimate 1950, [a] **$94,583,390**

[a] Excludes $83,885 for activities transferred in the estimates to "Maritime training, United States Maritime Commission." The amount obligated in 1949 is shown in the schedule as a comparative transfer.

Vessel Operating Functions, United States Maritime Commission—

[Vessel operating functions: For expenses (other than administrative expenses) necessary for carrying out, until March 1, 1949, the operating functions transferred to the United States Maritime Commission by section 202 of the Naval Appropriation Act, 1947 (60 Stat. 501), $25,483,976: *Provided*, That receipts from such functions during the fiscal year 1949 shall be deposited in the Treasury as miscellaneous receipts.] (*The Supplemental Independent Offices Appropriation Act, 1949.*)

Appropriated 1949, **$25,483,976**

NOTE.—Expenditures of not to exceed $202,459,000 were authorized for the fiscal year 1948 by the Second Supplemental Appropriation Act, 1948. These funds were derived as follows:

Receipts appropriated	$39,608,260
Receipts appropriated to "Salaries and general administrative expenses, liquidation of functions of War Shipping Administration, United States Maritime Commission"	4,650,000
Balance in hands of agents continued available	18,109,024
Unobligated balance on deposit in Treasury continued available	30,608,265
Balance on deposit in Treasury continued available for prior year obligations	44,600,000
Payments received by agents from non-Federal sources	85,088,066
Receipts in excess of limitation upon expenditures (covered into Treasury, miscellaneous receipts, fiscal year 1949)	−20,204,615
Total	202,459,000

Funds available for obligation under this act expired March 1, 1948 (except for administrative funds which were available for the entire fiscal year). The Urgent Deficiency Appropriation Act, 1948, extended the availability of the funds for charter and vessel operating expense to April 1, 1948. Not to exceed $17,600,000 of these funds was again extended to June 30, 1948, by the First Deficiency Appropriation Act, 1948.

Notwithstanding any other provision of this Act, the Commission is authorized to furnish utilities and services and make necessary repairs in connection with any lease, contract, or occupancy involving Government property under control of the Commission, and payments received by the Commission for utilities, services, and repairs so furnished or made shall be credited to the appropriation charged with the cost thereof: *Provided*, That rental payments under any such lease, contract, or occupancy on account of items other than such utilities, services, or repairs shall be covered into the Treasury as miscellaneous receipts.

The United States Maritime Commission shall not incur any obligations during the *current* fiscal year [1949] from the construction fund established by the Merchant Marine Act, 1936, or otherwise, in excess of the appropriations and limitations contained in this Act: *Provided*, That nothing contained herein and in the Independent Offices Appropriation Act, 1948, shall be construed to affect the authority of the Commission pursuant to the provisions of section 603 (a) of the Merchant Marine Act, 1936, as amended, (1) to grant operating differential subsidies on a long-term basis and (2) to obligate the United States to make future payments in accordance with the terms of such operating-differential subsidy contracts, and all receipts which otherwise would be deposited to the credit of said fund shall be covered into the Treasury as miscellaneous receipts[: *Provided further*, That hereafter the Commission may make allowances to purchasers of vessels for cost of putting such vessels in class, such allowances to be determined on the basis of competitive bids, without regard to the provisions of the last paragraph of section 3 (d) of the Merchant Ship Sales Act of 1946]. (*The Supplemental Independent Offices Appropriation Act, 1949.*)

VETERANS ADMINISTRATION

Salaries and Expenses, Veterans Administration—

Administration, medical, hospital, and domiciliary services: For necessary expenses of the Veterans Administration, including maintenance and operation of medical, hospital, and domiciliary services, in carrying out the functions pursuant to all laws for which the Administration is charged with administering, including personal services in the District of Columbia; examination of estimates of appropriations in the field, including actual expenses of subsistence or per diem allowance in lieu thereof; [furnishing and laundering of such wearing apparel as may be prescribed for employees in the performance of their official duties;] health service program as authorized by law (5 U. S. C. 150); purchase of [three hundred and ninety] *one hundred and thirty-one* passenger motor vehicles[, of which two hundred and twenty-eight shall be] for replacement only; [utilization of Government-owned automotive equipment in transporting children of Veterans Administration employees located at isolated stations to and from school under such limitations as the Administrator may by regulation prescribe;] services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); maintenance and operation of farms; recreational articles and facilities at institutions maintained by the Veterans Administration; expenses incidental to securing employment for war veterans; funeral, burial, and other expenses incidental thereto for beneficiaries of the Veterans Administration except burial awards authorized by Veterans Administration Regulation Numbered 9 (a), as amended; [the purchase of tobacco to be furnished, subject to regulations of the Administrator, to veterans receiving hospital treatment or domiciliary care in Veterans Administration hospitals or homes;] aid to State or Territorial homes in conformity with the Act approved August 27, 1888, as amended (24 U. S. C. 134), for the support of veterans eligible for admission to Veterans Administration facilities for hospital or domiciliary care; [the purchase of printed reduced-fare requests for use by veterans when traveling at their own expense from or to Veterans Administration facilities;] not to exceed [$5,765] *$5,600* for newspapers and periodicals; and not to exceed [$57,905] *$56,800* for the preparation, shipment, installation, and display of exhibits, photographic displays, moving pictures, and other visual educational information and descriptive material, including the purchase or rental of equipment; [$936,755,000] *$848,897,000*, from which allotments and transfers may be made to the Federal Security Agency (Public Health Service), the Army, Navy, and Interior Departments, for disbursement by them under the various headings of their applicable appropriations, of such amounts as are necessary for the care and treatment of beneficiaries of the Veterans Administration[, including minor repairs and improvements of existing facilities under their jurisdiction necessary to such care and treatment]: *Provided,* That no part of this appropriation shall be used to pay in excess of one hundred persons engaged in public relations work: *Provided further,* That no part of this appropriation shall be expended for the purchase of any site for or toward the construction of any new hospital or home, or for the purchase of any hospital or home; and not more than [$8,534,800] *$3,254,900* of this appropriation may be used to repair, alter, improve, or provide facilities in the several hospitals and homes under the jurisdiction of the Veterans Administration either by contract or by the hire of temporary employees and the purchase of materials: *Provided further, That hereafter the Administrator shall assign as his representatives, as provided for in the last sentence of section 1100 (a) of the Servicemen's Readjustment Act of 1944 (38 U. S. C. 696f), only such numbers of regional or sectional representatives as he finds necessary to provide for the processing of readjustment allowances in an efficient and economical manner, and any such representative may be assigned to one or more States (without regard to residence in any State to which assigned) as may be necessary to carry out the intent of this proviso. (3 U. S. C. 43; 5 U. S. C. 17a, 22a, 26a–26b, 29–97, 103a, 103b, 118d–1, 118g, 661–733, 823, 902, 912, 921–922, 931–932, 942a–943a, 947, 949–954; 15 U. S. C. ch. 16; 24 U. S. C. 30, 71–154; 28 U. S. Total obligations	473,775	325,354	

No part of the foregoing appropriations shall be available for hospitalization or examination of any persons except beneficiaries entitled under the laws bestowing such benefits to veterans, unless reimbursement of cost is made to the appropriation at such rates as may be fixed by the Administrator of Veterans' Affairs. (*The Supplemental Independent Offices Appropriation Act, 1949.*)

Total, Veterans Administration, annual specific appropriations:

Appropriated 1949, **$5,130,554,000** Estimate 1950, **$5,699,064,000**

Permanent appropriation:

Relief of Mary L. Dickson, Veterans Administration—

Under the act of February 24, 1931, the sum of $20 is appropriated monthly to be paid to Mary L. Dickson, mother of Elizabeth Dickson, in settlement of claims on account of the death of the said Elizabeth Dickson while serving as a nurse in the base hospital at Fort Riley, Kans., during World War I (46 Stat. 2121).

Appropriated (estimate) 1949, **$240** Estimate 1950, **$240**

Obligations: 12 Pensions, annuities, and insurance losses—1948, $240; 1949, $240; 1950, $240.

Permanent appropriations, special accounts:

Military and Naval Insurance, Premiums on Term Insurance, Veterans Administration—

As unpaid premiums for term insurance, held as liens against converted insurance, are collected from the face value of matured converted policies, they are credited to this fund and eventually transferred to the annual no-year appropriation "Military and naval insurance, Veterans Administration" as authorized by law.

Appropriated 1949, **$40,000**

Appropriation or estimate (for detail of obligations, see "Military and naval insurance, Veterans Administration")—1948, $251,833; 1949, $40,000.

Payments From Proceeds of Sales, Motor-Propelled Vehicles, Etc., Veterans Administration—

Under the act of August 2, 1946, proceeds of sales of vehicles, equipment, accessories, and other items, the exchange of which is authorized by law, may be applied in whole or in part payment for the purchase of similar items. Receipts from this source are set up in a special appropriation account, available for the fiscal year in which the obligation to purchase the new equipment is incurred; any unobligated balance is subsequently adjusted to miscellaneous receipts (5 U. S. C. 118d–1).

Appropriated (estimate) 1949, **$20,000** Estimate 1950, **$20,000**

Obligations: 09 Equipment—1948, $4,821; 1949, $20,000; 1950, $20,000.

Total, Veterans Administration, general and special accounts:

Appropriated 1949, **$5,130,614,240** Estimate 1950, **$5,699,084,240**

Account outside the Treasury:

Operation of Canteens, Revolving Fund, Veterans Administration—

NOTE.—In accordance with the provisions of Public Law 636, 79th Cong., funds appropriated for the establishment, maintenance, and operation of the Veterans Canteen Service are administered as a revolving fund and are deposited in a checking account with the Treasurer of the United States or in checking accounts in other depositaries selected by the Administrator of Veterans Affairs.

Trust accounts:

Adjusted Service Certificate Trust Fund, Veterans Administration—

The Secretary of the Treasury is authorized to invest and reinvest the moneys in the fund, or any part thereof, in interest-bearing obligations of the United States and to sell such obligations of the United States for the purposes of the fund. The interest on and the proceeds from the sale of any such obligations shall become a part of the fund.

All amounts in the fund shall be available for payments, by the Administrator, of adjusted service certificates upon their maturity or the prior death of the veteran, for payments under section 896 to banks on account of notes of veterans, and for making loans authorized by section 896, as amended (38 U. S. C. 646–647).

General Post Fund, Veterans Administration—

This fund represents accumulated benefits of operations of stores, hotels, restaurants, and canteens, and rental from concessions; gifts and bequests and proceeds of property left in the care of the homes by former members; unpaid pension money standing to the credit of members of the homes, who die without pensionable heirs, and proceeds from effects of members of the homes who die leaving no heirs or next of kin and without having disposed of their estate by will. Such funds are available upon authorization of the Administrator of Veterans' Affairs for construction of chapels, amusement halls, and for other objects to promote the comfort and welfare of the veterans at the various hospitals and homes in cases where no general appropriation is available (24 U. S. C. 111, 136, 139; 31 U. S. C. 725s; 38 U. S. C. 17–17j; Act of July 16, 1946, Public Law 511).

National Service Life Insurance Trust Fund, Veterans Administration—

SEC. 605. (a) There is hereby created in the Treasury a permanent trust fund to be known as the national service life insurance fund. All premiums paid on account of national service life insurance shall be deposited and covered into the Treasury to the credit of such fund, which, together with interest earned thereon, shall be available for the payment of liabilities under such insurance, including payment of dividends and refunds of unearned premiums. Payments from this fund shall be made upon and in accordance with awards by the Administrator.

(b) The Administrator is authorized to set aside out of such fund such reserve amounts as may be required under accepted actuarial principles to meet all liabilities under such insurance; and the Secretary of the Treasury is hereby authorized to invest and reinvest such funds, or any part thereof, in interest-bearing obligations of the United States or in obligations guaranteed as to principal and interest by the United States, and to sell such obligations for the purposes of such fund.

SEC. 607. (a) The United States shall bear the excess mortality cost and the cost of waiver of premiums on account of total disability traceable to the extra hazard of military or naval service, as such hazard may be determined by the Administrator.

(b) Whenever benefits under such insurance become payable because of the death of the insured as the result of disease or injury traceable to the extra hazard of military or naval service . . . the liability for payment of such benefits shall be borne by the United States. . . . The Administrator is authorized and directed to transfer from time to time from the national service life insurance appropriation to the national service life insurance fund such sums as may be necessary to carry out the provisions of this section (38 U. S. C. 801–818, 805a).

Appropriated (estimate) 1949, [a] **$689,329,500**

Estimate 1950, [b] **$709,353,000**

[a] Includes $408,230,000 from premiums, $214,000,000 from interest on investments, and $67,099,500 transferred from National Service Life Insurance Appropriated Fund, Veterans Administration.

[b] Includes $429,080,000 from premiums, $226,000,000 from interest on investments, and $54,273,000 transferred from National Service Life Insurance Appropriated Fund, Veterans Administration.

Prepaid Hazard Insurance, Taxes, Etc., Veterans' Loans, Veterans Administration—

Title III, Public Law 346, Servicemen's Readjustment Act, 1944, provides for the guaranty by the Administrator of Veterans' Affairs of loans to World War II veterans, subject to certain provisions and limitations set forth in the act. Under the provisions of section 509c of the act, the Administrator is given authority to effect administrative determinations necessary to safeguard the Government's interest in the guaranteeing of loans, the payment of claims arising therefrom and in disposition of properties acquired. It has been administratively determined that on all sales of acquired property for less than full cash consideration, the contract of sale shall provide for periodic collection of tax and insurance accruals (38 U. S. C. 694–694j).

United States Government Life Insurance Fund, Veterans Administration—

SEC. 17. That all premiums paid on account of insurance converted under the provisions of title III hereof shall be deposited and covered into the Treasury to the credit of the United States Government life-insurance fund and shall be available for the payment of losses, dividends, refunds, and other benefits provided for under such insurance, including such liabilities as shall have been or shall hereafter be reduced to judgment in a district court of the United States. Payments from this fund shall be made upon and in accordance with awards by the director.

The Administration is authorized to set aside out of the fund so collected such reserve funds as may be required under accepted actuarial principles, to meet all liabilities under such insurance; and the Secretary of the Treasury is hereby authorized to invest and reinvest the said United States Government life-insurance fund, or any part thereof, in interest-bearing obligations of the United States or bonds of the Federal farm-loan banks and to sell said obligations of the United States or the bonds of the Federal farm-loan banks for the purposes of such fund (31 U. S. C. 725s; 38 U. S. C. 511–518, 805a).

[SALARIES AND EXPENSES, WAR ASSETS ADMINISTRATION, SPECIAL FUND]

Salaries and Expenses, War Assets Administration, Special Fund—

[Salaries and expenses: There is hereby appropriated from the special fund account in the Treasury as provided for in the First Deficiency Appropriation Act, 1946, not to exceed $65,000,000, which may be apportioned for obligation during the period ending February 28, 1949, for necessary expenses of the War Assets Administration established by Reorganization Plan Numbered 1 of 1947; for allocation or reimbursement by the War Assets Administrator to Government agencies designated by the Administrator as disposal agencies by or pursuant to law, and for payment to Government agencies designated by the Administrator for rendering special services in connection with the disposal of surplus property, in such amounts as shall be approved by the Bureau of the Budget; and for allocation or reimbursement to owning agencies for the care and handling (including pay and allowances and subsistence of military and naval personnel) of surplus property subsequent to the filing of a declaration of surplus covering such property with a disposal agency designated by the Administrator, or, if the Administrator prescribes procedures whereby declarations of surplus are made at approximately the time of disposal or removal, subsequent to notice by the owning agency to the disposal agency that property has been determined to be surplus and is subject to such procedures, such funds to be available for personal services in the District of Columbia; fees and mileage of witnesses at rates provided by law for witnesses attending in the United States courts (28 U. S. C. 600c); payment of claims pursuant to section 403 of the Federal Tort Claims Act (28 U. S. C. 921); services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), and other special services and reports by contract without regard to section 3709 of the Revised Statutes, as amended, including real estate brokers and appraisers at rates of pay or fees not to exceed those usual for similar services; health service program as authorized by law (5 U. S. C. 150), (not to exceed $73,000); acceptance and utilization of voluntary and uncompensated services; printing and binding; expenses of attendance at meetings of organizations concerned with the work of the Administration; procurement of supplies, equipment, reports, and services in connection with the care, handling, and disposition of surplus property without regard to the provisions of section 3709 of the Revised Statutes, as amended, upon determination by the Administrator or by any official designated by him for this purpose that such method of procurement is necessary; purchase and procurement of reports of experts or consultants or organizations thereof; advertising, including radio time; maintenance, operation, and repair of aircraft in the Territories and possessions in connection with disposal activities and, in the continental limits of the United States in connection with the disposition of aircraft and airports; acquisition of buildings, lands, leaseholds, and other interests therein, and temporary use thereof for the care, handling, and disposition of surplus property; payments to States or political subdivisions thereof of sums in lieu of taxes accruing against real property declared surplus to the Administration by Government corporations; advance of funds to Administration cashiers and collection officials upon furnishing bond, for the purpose of handling cash transactions and making change at surplus property sales: *Provided*, That any employee of the War Assets Administration is authorized, when designated for the purpose by the Administrator, to administer to or take from any person an oath, affirmation, or affidavit, when such instrument is required in connection with the performance of the functions or activities of the War Assets Administration: *Provided further*, That the Administration may procure by contract or otherwise and furnish to governmental employees and employees of Government contractors at the reasonable value thereof food, meals, subsistence, and medical supplies, emergency medical services, quarters, heat, light, household equipment, laundry service, and sanitation facilities, and erect temporary structures and make alterations in existing structures necessary for these purposes, when such employees are engaged in the disposal of surplus property, or in the preparation for such disposal, at locations where such supplies, services, equipment, or facilities are otherwise unavailable, the proceeds derived therefrom to be credited to this appropriation.] (*The Supplemental Independent Offices Appropriation Act, 1949.*)

Appropriated 1949, **$65,000,000**

NOTE.—Estimates of appropriation for the fiscal year 1950 for this function will be transmitted to the Congress later.

Appropriated 1949, **$11,667,141,648** Estimate 1950, **$7,977,898,870**

Total, Executive Office of the President and independent offices, trust appropriations:

Appropriated 1949, **$2,112,927,721** Estimate 1950, **$2,433,396,989**

INDEPENDENT OFFICES—GENERAL PROVISIONS

SEC. 102. No part of any appropriation contained in this Act shall be used to pay the salary or wages of any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided*, That for the purposes hereof an affidavit shall be considered prima facie evidence that the person making the affidavit has not contrary to the provisions of this section engaged in a strike against the Government of the United States, is not a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or that such person does not advocate, and is not a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided further*, That any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence and accepts employment the salary or wages for which are paid from any appropriation contained in this Act shall be guilty of a felony and, upon conviction, shall be fined not more than $1,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penal clause shall be in addition to, and not in substitution for, any other provisions of existing law.

SEC. 103. No part of any appropriation or authorization in this Act shall be used to pay any part of the salary or expenses of any person whose salary or expenses are prohibited from being paid from any appropriation or authorization in any other Act; but this prohibition shall be effective only during the period for which such prohibition in such other Act is effective.

SEC. 104. Where appropriations in this Act are expendable for travel expenses of employees and no specific limitation has been placed thereon, the expenditures for such travel expenses may not exceed the amount set forth therefor in the budget estimates submitted for the appropriations.

SEC. 105. Where appropriations in this Act are expendable for the purchase of newspapers and periodicals and no specific limitation has been placed thereon, the expenditures therefor under each such appropriation may not exceed the amount of $50: *Provided*, That this limitation shall not apply to the purchase of scientific, technical, trade, or traffic periodicals necessary in connection with the performance of the authorized functions of the agencies for which funds are herein provided.

SEC. 106. No part of any appropriation contained in this Act shall be available to pay the salary of any person filling a position, other than a temporary position, formerly held by an employee who has left to enter the armed forces of the United States and has satisfactorily completed his period of active military or naval service and has within ninety days after his release from such service or from hospitalization continuing after discharge for a period of not more than one year made application for restoration to his former position and has been certified by the Civil Service Commission as still qualified to perform the duties of his former position and has not been restored thereto.

SEC. 107. Appropriations contained in this Act, available for expenses of travel, shall be available, when specifically authorized by the head of the activity or establishment concerned, for expenses of attendance at meetings of organizations concerned with the function or activity for which the appropriation concerned is made.

SEC. 108. No part of any appropriation or fund contained in this Act shall be available for installing or maintaining systems for administrative appropriation, fund, or inventory accounting except such systems as are prescribed or approved by the Comptroller General: *Provided*, That all agencies for whose activities provision is made in this Act shall hereafter maintain fiscal accounting control of all inventories of supplies, materials, or equipment which may be owned by or be in the custody of such agencies. (*Independent Offices Appropriation Act, 1949.*)

TITLE II—GENERAL PROVISIONS

SEC. 201. Unless otherwise specifically provided, the maximum amount allowable *during the current fiscal year*, in accordance with section 16 of the Act of August 2, 1946 ([Public Law 600] *5 U. S. C. 78*), for the purchase of any passenger motor vehicle (exclusive of busses, ambulances, and station wagons), is hereby fixed at $1,400.

SEC. 202. Unless otherwise specified and [until July 1, 1949] *during the current fiscal year*, no part of any appropriation contained in this or any other Act shall be used to pay the compensation of any officer or employee of the Government of the United States (including any agency the majority of the stock of which is owned by the Government of the United States) whose post of duty is in continental United States unless such person (1) is a citizen of the United States, (2) is a person in the service of the United States on the date of enactment of this Act who, being eligible for citizenship, had filed a declaration of intention to become a citizen of the United States prior to such date, or (3) is a person who owes allegiance to the United States: *Provided*, That for the purpose of this section, an affidavit signed by any such person shall be considered prima facie evidence that the requirements of this section with respect to his status have been complied with: *Provided further*, That any person making a false affidavit shall be guilty of a felony and, upon conviction, shall be fined not more than $4,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penal clause shall be in addition to, and not in substitution for, any other provisions of existing law: *Provided further*, That any payment made to any officer or employee contrary to the provisions of this section shall be recoverable in action by the Federal Government. This section shall apply not to citizens of the Republic of the Philippines or to nationals of those countries allied with the United States in the prosecution of the war.

SEC. 203. Appropriations for the executive departments and independent establishments for the *current* fiscal year [1949] available for travel expenses shall be available for the payment of per diem allowances in lieu of subsistence expenses without regard to the Subsistence Expense Act of 1926, as amended (5 U. S. C. 821–833), to civilian officers and employees of such departments and

Federal Reserve Bank of St. Louis

TITLE II—GENERAL PROVISIONS—Continued

establishments while traveling on official business outside the continental limits of the United States and away from their designated posts of duty: *Provided,* That the amount of such allowances shall be determined by the head of the department or independent establishment concerned or by such official as he may designate for the purpose, but shall, in no case, notwithstanding any other provision of law, exceed the maximum established by regulations prescribed by the President for the locality in which the travel is performed.

SEC. 204. Appropriations of the executive departments and independent establishments for the *current* fiscal year [1949], available for expenses of travel or for the expenses of the activity concerned, are hereby made available for living quarters allowances in accordance with the Act of June 26, 1930 (5 U. S. C. 118a), and regulations prescribed thereunder, and cost of living allowances similar to those allowed under section 901 (2) of the Foreign Service Act of 1946, in accordance with and to the extent prescribed by regulations of the President, for all civilian officers and employees of the Government permanently stationed in foreign countries: *Provided,* That the availability of appropriations [of] *made to* the Department of State [under the caption "Foreign Service"] *for carrying out the provisions of the Foreign Service Act of 1946* shall not be affected hereby.

SEC. 205. No part of any appropriation for the *current* fiscal year [1949] contained in this or any other Act shall be paid to any person for the filling of any position for which he or she has been nominated after the Senate has voted not to approve of the nomination of said person.

SEC. 206. No part of any appropriation contained in this or any other Act shall be used to pay in excess of $4 per volume for the current and future volumes of the United States Code Annotated and such volumes shall be purchased on condition and with the understanding that cumulative annual pocket parts shall be furnished free of charge, or in excess of $4.25 per volume for the current or future volumes of the Lifetime Federal Digest.

[SEC. 207. Except as otherwise provided by law, any appropriations or funds available to the executive departments, independent establishments, and corporations for the payment of salaries and compensation to persons employed outside the continental United States or in Alaska shall be available for the payment of such salaries and compensation only in accordance with regulations prescribed by the President at rates of pay equal to those paid for the same or similar services of persons employed by the Government in continental United States, plus not to exceed 25 per centum: *Provided,* That no such salary or compensation shall exceed the maximum provided by the Classification Act of 1923, as amended.]

[SEC. 104. Section 207 of the Independent Offices Appropriation Act, 1949, is hereby amended to read as follows:]

["SEC. 207. Any appropriations or funds available to the executive departments, independent establishments, and wholly owned Government corporations for the payment of salaries and compensation to persons stationed outside the continental United States or in Alaska whose rates of basic compensation are fixed by statute, shall be available for the payment of additional compensation to such persons, based on living costs substantially higher than in the District of Columbia, or conditions of environment which differ substantially from conditions of environment in the States and warrant additional compensation as a recruitment incentive, or both such factors: *Provided,* That such additional compensation, except as otherwise specifically authorized by law, shall be paid only in accordance with regulations prescribed by the President establishing rates of such additional compensation and defining the area, groups of positions, and classes of persons to which each such rate applies: *Provided further,* That no additional compensation based on living costs substantially higher than in the District of Columbia shall be paid under this section to any person who is entitled to receive a cost-of-living allowance under section 901 (2) of the Foreign Service Act of 1946 or section 204 of this Act: *Provided further,* That such additional compensation shall not exceed in any instance 25 per centum of the rate of basic compensation: *Provided further,* That this section shall be effective sixty days after the date of approval of this Act, or on such earlier date as may be specified in regulations issued by the President hereunder, and additional compensation payable under regulations and procedures in effect on the date of approval of this Act may continue to be paid until the effective date of this section."] (*Independent Offices Appropriation Act, 1949; The Supplemental Independent Offices Appropriation Act, 1949.*)

TITLE III—REDUCTIONS IN APPROPRIATIONS

Amounts available [to the Federal Works Agency] from appropriations and other funds, *and contract authority,* are hereby reduced in the sums hereinafter set forth, such sums (*except contract authority*) to be carried to the surplus fund and covered into the Treasury immediately upon the approval of this Act, *except as otherwise indicated*:

[FEDERAL WORKS AGENCY]

[Office of the Administrator: Public works advance planning, under title V of the War Mobilization and Reconversion Act of 1944, $1,036,000.]

[Office of the Administrator: Public Works Administration liquidation: $387,647 of the unexpended balances of the funds heretofore made available to said Administration required to liquidate obligations incurred prior to June 30, 1944.]

[Public Roads Administration: Access roads (national defense), $1,569,111.]

[Bureau of Community Facilities: Emergency relief for the Territory of Hawaii, under section 1 of the Act entitled "An Act to provide emergency relief for the victims of the seismic waves which struck the Territory of Hawaii, and for other purposes", $100,000.]

FUNDS APPROPRIATED TO THE PRESIDENT

Payments, Armed Forces Leave Act, 1946: $135,000,000.

Overtime, leave, and holiday compensation: The balance remaining unobligated on June 30, 1949, such balance to be carried to the surplus fund and covered into the Treasury immediately thereafter.

VETERANS ADMINISTRATION

Administrative facilities: $1,250,000.

Vocational Rehabilitation Revolving Fund: $500,000.

Hospital and domiciliary facilities (unfinanced contract authority): $237,000,000. (*Independent Offices Appropriation Act, 1949.*)

EXPLANATORY STATEMENT

American Printing House for the Blind

The amount recommended for this institution located at Louisville, Ky., has been appropriated annually since 1937. The entire amount is used to manufacture equipment and materials for free distribution to schools for the blind throughout the country. Additional materials produced for the blind are sold direct.

Bureau of Employees' Compensation and Employees' Compensation Board of Appeals

The estimates provide funds for the administration of the Federal Employees' Compensation Act, approved September 7, 1916, as amended; the Longshoremen's and Harbor Workers' Act, approved March 4, 1927, as amended; and the War Risk Hazards Act, approved December 2, 1947, as amended. Supplementing this estimate is a provision which will permit the Bureau to secure $115,000 from the War Claims Fund to perform the duties imposed upon the Federal Security Administrator by the War Claims Act of 1948 (Public Law 896), approved July 3, 1948. In addition, the estimates include funds for the payment of disability and death benefits under the Federal Employees' Compensation Act and claims as authorized by the War Claims Act of 1948, approved July 3, 1948.

The estimates show an apparent increase of $12,220,510 above the estimated requirements for the fiscal year 1949, exclusive of administrative funds needed to carry out the functions of the War Claims Act. However, in anticipation that an additional $3,000,000 may be required in the fiscal year 1949 to supplement the special fund, "Employees' compensation fund," to meet the payment of claims adjudicated under the Federal Employees' Compensation Act and War Claims Act, the increase is actually $9,220,510. Of this amount, an increase of $20,510 is provided for administrative expenses and $9,200,000 for paying benefits from the employees' compensation fund. The small increase for administrative expenses is based on mandatory within-grade promotions and a slight expansion in the examining staff in order to permit the Bureau to expedite its adjudicatory work and thus permit more prompt payment of compensation benefits under the Federal Employees' Compensation Act. The increase of $9,200,000 for the employees' compensation fund occurs exclusively from the claims anticipated under sections 4 (c) and 5 (f) of the War Claims Act which are paid from this fund. The War Claims Act, however, provides that the Secretary of the Treasury shall pay to the general fund of the Treasury from the War Claims Fund the amounts estimated and certified by the Federal Security Administrator to be required to pay all benefits under those sections. Thus the latter increase is offset by the reimbursement contemplated by the act.

Columbia Institution for the Deaf

This institution for instruction of deaf persons includes two schools. Kendall School provides instruction below the college level for students from the District of Columbia and a few private students. Gallaudet College provides for the education of deaf persons from the States and Territories on a basis of congressional scholarships. A slight increase of $22,900 is recommended for fiscal year 1950. The reorganization of this institution and the expansion of its facilities are still being considered by the Federal Security Agency.

Food and Drug Administration

The enforcement of the Federal Food, Drug, and Cosmetic Act, designed to provide for the protection of the American public by promoting the purity, identity, standard quality, and truthful and informative labeling of foods, drugs, cosmetics, and related products entering interstate commerce or imported into this country, has been broadened by the enactment of the Miller bill and by Supreme Court decisions dealing with infestation at terminal points and the resale of dangerous drugs. At the same time, domestic commerce and importations, subject to the act, continue to grow in volume and in variety. While some improvement is to be noted in the reestablishment of standards and controls, high prices and scarcities have led to substitutions and inferior quality, improper storage, and inadequate protection against insanitary conditions. For 1950, under the appropriation "Salaries and expenses," a level of operation equivalent to 1949 has been provided so that there shall be no lessening of the enforcement activities.

The volume of goods, precertified before marketing under the appropriation "Certification and inspection services," continues to grow in volume in almost direct proportion to the growth in the production of penicillin and streptomycin. This appropriation, wholly supported by fee income, does not require Federal funds and may be expanded without further appropriation action to meet any requirements that may arise during the fiscal year.

Freedmen's Hospital

Freedmen's Hospital consists of a general unit of 375 beds (including 36 bassinets), a tuberculosis unit of 146 beds, and an out-patient department. The hospital derives funds from Federal appropriations and direct payment of patients. The Federal Government is reimbursed by the District of Columbia for the care of indigent legal residents of the District. In 1950 the Federal Government's share of the cost of operation will be approximately 75 percent. The estimates for the hospital are based on 86 percent utilization of the general hospital and 92 percent utilization of the tuberculosis annex. Freedmen's Hospital is affiliated with the Howard University School of Medicine and serves as a teaching center for medical trainees. The hospital conducts a school of nurse education and trains other types of hospital personnel.

Howard University

Howard University receives funds from the Federal Government for the partial support of undergraduate, graduate, and specialized education and training in nine schools and colleges. A tenth school, for religious training, is not aided. Veterans' enrollments have crowded the facilities beyond their capacity since 1947. No further expansion of total enrollment is contemplated, but the schools of medicine and dentistry and the graduate school will continue to grow with a corresponding reduction in the Liberal Arts College. To provide a lower teacher-student ratio and increase of the preclinical staff in 1950, an additional $185,000 is recommended for salaries and expenses. An appropriation of $60,000 is recommended for preliminary planning of expansion of medical facilities. To liquidate all existing contract authorizations for four buildings will require appropriation of $4,659,425. The construction of four other buildings including a law

http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

school building, an administration building, a biology building and greenhouse, and men's dormitory units is also recommended with appropriation of $1,000,000 and new contract authorization of $5,882,300.

Office of Education

The Office of Education provides national leadership in education and assists the States and other agencies with the development of more effective educational programs through research, consultation, professional advice, and publications of basic facts and statistics. Since 1945 the appropriation for salaries and expenses has more than doubled to provide for reorganization of the office. The total decrease of $65,800 recommended for 1950 provides for a transfer of certain functions to the office of Administrator. It will support the remaining functions at approximately the 1949 level.

Office of Vocational Rehabilitation

The estimate for payments to States for fiscal year 1950 provides an increase over fiscal year 1949 of approximately $2,000,000 in grants to match additional State funds expected to be provided for the purchase of services for rehabilitation clients plus $500,000 for the portion of the grant covering the cost of administration, counseling and guidance functions. It will be necessary for the States to absorb any increased cost in these functions above this amount through increased efficiency or provide additional State funds for this portion of the program.

During the fiscal year 1948, a total of 53,131 persons were rehabilitated and employed and it is estimated that the number of rehabilitants will be 64,694 and 74,467 for the fiscal years 1949 and 1950, respectively.

The estimate for salaries and expenses provides for a continuation of staff at approximately the same level as 1949 and includes cost of the pay act increase and within-grade promotions.

Public Health Service

The Public Health Service is the principal Federal agency concerned with the protection and improvement of the public health. The estimates of funds required for 1950, which represent an increase of 5.2 percent over the total for 1949, generally contemplate maintenance of programs at 1949 levels. Exceptions are activities related to heart and dental diseases and water pollution control authorized by recently enacted legislation, and general assistance grants to States.

MEDICAL CARE

The Public Health Service operates 21 general medical hospitals, 2 narcotic hospitals, 2 tuberculosis hospitals, and a leprosarium. In addition the Public Health Service operates medical-relief stations, furnishes medical services to the Coast Guard and Maritime Commission, and provides miscellaneous services to other Federal agencies. The marine hospitals and relief stations, operated by the Hospital Division, furnish medical, dental, and hospital care to beneficiaries of the Public Health Service as prescribed by law (42 U. S. C., ch. 6A). Principal beneficiaries are merchant seamen and members of the Coast Guard.

In 1950 it is anticipated that the hospital load will increase slightly over 1949, due to anticipated increases in the members of different groups of beneficiaries to be served. The Hospital Division also furnishes professional personnel on a reimbursable basis for medical programs of other Federal agencies, such as the Office of Indian Affairs and the Bureau of Employees' Compensation.

The two narcotic hospitals, which are the responsibility of the Division of Mental Hygiene, provide care for drug addicts and mental patients. Some of the mental patients are cared for on a reimbursable basis for the Veterans Administration and the armed services. The estimate anticipates practically the same patient loads for 1950 as estimated for 1949.

The 1950 budget represents a decrease of personnel from the number authorized in 1949 for Public Health Service surveys and recommendations as required by law (5 U. S. C. 150) for the employee health programs of other Federal agencies. This decrease anticipates that pending surveys in the District of Columbia and surveys in other cities having large concentrations of Federal employees will be substantially completed in 1949, leaving for 1950 the principal task of appraising going health programs upon request of other Federal agencies.

STATE-AID PROGRAMS

Provision is made for continued assistance to States and local nonprofit groups under the Hospital and Construction Act, approved August 13, 1946. While cash requirements remain relatively small, further development of the program is provided for under new contract authority in the same amount as that granted for 1949.

Other State-aid programs provide health services of various kinds throughout the Nation, in cooperation with State and local health agencies. These programs are supported by an appropriation for general assistance to States, and by appropriations devoted, in whole or in part, to the control of venereal diseases, tuberculosis, other communicable diseases, mental illness, cancer, heart diseases, and dental diseases. Various methods of assistance are utilized, including matched and unmatched money grants; grants of services through assignment of Federal personnel; demonstrations; consultative services; training programs; and direct operations by the Public Health Service, with the approval and cooperation of State and local authorities. In recognition of the view that development and improvement of local health services are essential to effective use of Federal program funds, the estimates provide $22,000,000 for general health, which almost doubles the amount available for that purpose. The remaining established activities are estimated at, or below the 1949 operating levels. Funds are also estimated for State-aid activities under the National Heart Act, approved June 16, 1948, and the Water Pollution Control Act, approved June 30, 1948.

RESEARCH AND TRAINING

The estimates relating to research and training provide for continued activities of the National Institutes of Health, the National Cancer Institute, and the National Institute of Mental Health. They also provide, for the first time in the annual budget, for the National Heart Institute and the National Institute of Dental Research established pursuant to the National Heart Act and the National Dental Research Act. Activities include direct Federal research and grants-in-aid to universities and other institutions, and to individuals for research and training purposes.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Rapid expansion of research and training activities has occurred in the past few years and is continued in the current year. The estimates for 1950 contemplate generally that the established activities will continue at 1949 levels, and provide some increases for the newer heart and dental programs. Limited contract authority for forward financing of research grants extending beyond the fiscal year is included.

Substantial progress will be made during the current year in the early phases of construction of the clinical research hospital begun under funds and contract authority granted in 1948 and 1949 appropriations. The 1950 estimates include cash to liquidate obligations incurred under existing authority, and additional authority to further the first stage and permit a beginning of the second stage of construction.

MISCELLANEOUS ACTIVITIES

Grouped under this heading are the Office of the Surgeon General which includes the central administration of the Service, headquarters offices for the several professional classes of commissioned officers, and several small operating programs; the Office of International Health Relations; and the Foreign Quarantine Service. Except for a reduction in the Office of International Health Relations due to termination of the Public Health Service Mission to Liberia, no substantial change in these activities is contemplated under the estimates for 1950.

Saint Elizabeths Hospital

This Government-operated institution renders medical and hospital care to mental patients of whom approximately 78 percent are residents of the District of Columbia. The hospital is reimbursed for patients received from the District of Columbia, the Veterans Administration, the Indian Service, and the United States Soldiers' Home. Direct beneficiaries for whom no reimbursement is received are principally mental patients of the following categories: Federal prisoners, American citizens adjudged insane in Canada, residents of the Virgin Islands, and Foreign Service officers and employees. The total patient load at Saint Elizabeths Hospital itself, estimated to average 6,668 patients per day for the fiscal year 1950, represents an increase of 268 patients per day over that estimated for fiscal year 1949. An additional daily average of 34 Saint Elizabeths patients will receive care in Public Health Service hospitals. The estimate for 1950 provides for the cost of hospitalization of all patients whether at Saint Elizabeths Hospital or the mental hospitals of the Public Health Service. Increases recommended for fiscal year 1950 of approximately $3.9 million result from the hospital's plan to complete construction of the storeroom and a treatment building, planning for additional construction, and major items of repair and preservation of buildings and grounds.

Social Security Administration

In its action on the 1949 appropriation, Congress drastically reduced the central offices of the Social Security Administration. The Bureau of Accounts and Audits, State Technical Advisory Service, and Regional Offices were moved in large part to the Office of Administrator, and portions were moved down to the operating bureaus. The Commissioner's office now consists of an immediate staff and a central research and statistics group.

BUREAU OF EMPLOYMENT SECURITY

As a result of congressional action which reduced the 1949 budget estimate for grants to States for unemployment compensation and employment service administration the State agencies have been required to reduce personnel substantially during the fiscal year 1949. The States have also authorized substantial salary increases since the 1949 budget was submitted which has tended to add to their financial difficulties. The work load, however, has been lower than had been anticipated and this factor together with certain economies and increased efficiency has enabled a majority of the States to continue an acceptable program.

The estimate for 1950 is based on a very close analysis of estimated work-load requirements and assumes continued full employment at about the current rate. The increase of $5,000,000 for 1950 over 1949 is to cover some expansion of the placement functions of the State employment agencies, within-grade promotions, retroactive retirement contributions to certain States, and the increased cost of rental of office space.

The net decrease in the salaries and expenses estimate for 1950 as compared with 1949 results largely from a reduction in the limitation recommended for the veterans employment service from $2,265,000 in 1949 to $1,350,000 in 1950. The other reductions are based on further savings to be effected by the Bureau as a result of merger of the USES and the Bureau of Employment Security. The budget estimates will require full integration of all joint activities and functions.

BUREAU OF FEDERAL CREDIT UNIONS

The Federal Credit Union Act became effective June 26, 1934, "* * * to establish a further market for securities of the United States and to make more available to people of small means credit for provident purposes through a national system of cooperative credit, thereby helping to stabilize the credit structure of the United States." The act defines a Federal credit union as a cooperative association organized, in accordance with the provisions of the act, for the purpose of promoting thrift among its members and creating a source of credit for provident or productive purposes.

The Federal Credit Union Act originally placed the responsibility for chartering and supervising the Federal credit unions in the Farm Credit Administration. The act provided that funds available to that Agency for administration of other functions administered should also be available for administrative expenses in administering the Federal Credit Union Act. In addition, it provided that fees collected for charter and examination should be available for administration of the law.

By Executive order of April 27, 1942, effective May 16, 1942, the Federal Deposit Insurance Corporation was given temporary responsibility for the supervision of the activities of all Federal credit unions. The temporary transfer of such supervision was made permanent on July 1, 1947, by the President's Reorganization Plan No. 1 of 1947. While in the Federal Deposit Insurance Corporation, all fees collected from Federal credit unions were covered into the corporate funds of the Corporation and all expenses incurred in the supervision of the act were paid from the Corporation's general revenues.

Public Law 813, approved June 29, 1948, which became effective July 29, 1948, transferred the administration of the Federal Credit Union Act from the Federal Deposit

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Insurance Corporation to the Federal Security Agency. Section 4 provided that all unexpended funds allotted in the budget of the Federal Deposit Insurance Corporation for this activity for the fiscal year ending June 30, 1949, be transferred to the Federal Security Agency. The Federal Deposit Insurance Corporation transferred $624,668 of its funds for this activity for the unexpired portion of fiscal year 1949. In addition, the Corporation expended $39,218 for that portion of the fiscal year 1949 in which the administration of the act was under its jurisdiction, thus making a total of $663,886 available for this function in 1949. As a further supplement, the Bureau estimates fee collections amounting to $220,500 in fiscal year 1949.

The estimates for 1950 provide for an appropriation of $200,000 from the general funds of the Treasury, plus the use of $418,500 from fees accumulated during the fiscal years 1949 and 1950, or a total of $618,500. This is a reduction of $45,386 below estimated requirements for 1949, principally due to nonrecurring items of expenditure.

There are about 9,500 credit unions in the United States, whose 3,500,000 members have accumulated about $600,000,000. Of these, 4,100 are under Federal charter with accumulated assets of $250,000,000, members totaling 1,550,000, and doing a business of approximately 950,000 loans a year totaling approximately $200,000,000. In size and amount of business done, credit unions have shown a steady growth each year. Since 1934, Federal credit unions have made 8,300,000 loans totaling $1,040,000,000.

BUREAU OF OLD-AGE AND SURVIVORS INSURANCE

This Bureau carries out a program of social insurance designed to provide a partial replacement of lost earning power to aged workers who retire and to survivors of workers who die.

Its principal activities are the recording of workers' taxable earnings, the development and certification of claims for benefits based upon such earnings, and the continuing payment of benefits each month.

The growth in the number of workers qualifying for benefits is continuous, especially during periods of high industrial activity. The number of claims for benefits made by those retiring likewise grows steadily as the working population ages, but the rate of growth is retarded when business is good as result of the greater opportunity provided aged workers to continue in employment. The number of beneficiaries to whom benefit checks are sent each month increases cumulatively and will continue to increase until the system reaches maturity half a century hence.

Amendment to title II of the Social Security Act provides limited benefits for the survivors of servicemen dying within 3 years of leaving the service. The costs of this special program are borne by the Federal Government. An appropriation for the administrative expense cost of the program is omitted in 1950 but will be picked up in 1951 on an actual experience basis. A separate appropriation of $3,604,000 from the general fund reimburses the trust fund for benefits paid in 1948 wholly because of this amendment.

All of the direct operating expenses of the Bureau, including items of cost formerly appropriated for elsewhere, are now consolidated in this authorization for payment of salaries and expenses from the trust fund.

As to be expected in a growing program, the authorization for payment from the trust fund continues to increase in keeping with the growth in the number of actual and potential claimants and in the number of beneficiaries receiving monthly benefit checks. For 1950, $43,266,000 has been estimated for the requirements of the Bureau, an increase over 1949 requirements of slightly more than 10 percent.

BUREAU OF PUBLIC ASSISTANCE

Under titles I, IV, and X of the Social Security Act, Federal grants are made to States for old-age assistance, aid to dependent children, and aid to the blind. Within limitations established under the Social Security Act and on the basis of plans approved by the Commissioner for Social Security, the Federal Government matches payments made by the States to needy individuals falling within these categories and pays half of the cost of administration of these programs. Until September 30, 1946, this matching was on a 50–50 basis. The 1946 amendments to the Social Security Act increased the Federal share and matching maxima on monthly payments to individuals. The 1948 amendments to the Social Security Act increased still further the Federal share and matching maxima.

The 1949 budget and the appropriation of $797,000,000 for Federal grants were based on the law in effect at the time of submission and enactment. The 1948 amendments, which will be in effect for three-fourths of the current year, make necessary a supplemental appropriation of $151,000,000 for fiscal year 1949.

The $1,058,000,000 recommended for fiscal year 1950 is an increase of $110,000,000 over total 1949 requirements. Of this increase approximately $52 million is due to the fact that the 1948 amendments will be in effect for the entire fiscal year; $58,000,000 is based on increasing case loads and average payments to individuals.

In administering this expanding and changing program the Bureau of Public Assistance is meeting difficult problems and handling heavy work loads in 1949. It is anticipated that administrative problems will level off in 1950, making it possible for the Bureau to operate effectively with less staff and money than required in the current year.

CHILDREN'S BUREAU

The basic legislative charter of the Children's Bureau requires it to investigate and report to the Nation upon matters pertaining to child life and the welfare of children. Its activities include the conduct of research and the provision of information and advisory services to Federal, State, and private agencies, and to the public generally.

Title V of the Social Security Act, as amended in 1946, authorizes appropriations totaling $22,000,000 annually for grants to States for maternal and child-health services, services for crippled children, and child-welfare services. These grant programs are administered by the Children's Bureau.

The small increase included in the estimates for administrative expenses will enable the Children's Bureau to administer its grant programs more effectively and to deal with some of the most urgent needs in the field of child health and welfare.

OFFICE OF ADMINISTRATOR

In its action on the 1949 appropriation Congress transferred to the Office of Administrator the State-grant portion of the Bureau of Accounts and Audits and the State Technical Advisory Service of the Social Security Ad-

Digitized for FRASER

Federal Reserve Bank of St. Louis

ministration. Federal Security Agency regional offices were established.

In pursuance of the congressional directive to make further changes along these lines, the Agency has eliminated the regional offices of all constitutents and moved regional operations into the new Agency regional offices. Informational activities have been reorganized looking to simplification, economy, and better operation.

In 1950 the Agency plans still further reorganizational changes although not extensive in scope or character. An important element in the estimates is a strengthening of the over-all program planning and coordinating staff of the Office of Administrator.

Additional Appropriations Under Proposed Legislation

BUREAU OF EMPLOYEES' COMPENSATION

Compensation rates for injury and death provided for in the Federal Employees' Compensation Act have not changed since 1927. Proposed legislation, which liberalizes these rates and includes expanded coverage, will increase the compensation rolls by approximately $4,000,000 annually, for which an item is included in the estimate.

OFFICE OF EDUCATION

It is estimated that $300,000,000 will be needed in 1950 for Federal aid for education. Such a bill passed the Senate last year and will be reintroduced this year. It is also estimated that $250,000 will be needed to administer this Federal-aid program and $1,000,000 to plan a scholarship and fellowship program and survey educational construction requirements. Grants to States for these latter purposes are not anticipated before fiscal year 1951.

PUBLIC HEALTH SERVICE

An item of $15,000,000 is included in the budget for appropriation in 1950 to cover expenses related to the administrative development of a program of medical care insurance.

SOCIAL SECURITY ADMINISTRATION

An item of $65,000,000 is included under proposed legislation to cover the broadening of public assistance to match State expenditures for the most needy general relief cases and to provide for a variable grant formula so that the low-income States receive a larger share.

ESTIMATES OF APPROPRIATION

AMERICAN PRINTING HOUSE FOR THE BLIND

To Promote the Education of the Blind, Federal Security Agency—

Education of the blind: For carrying out the Act of August 4, 1919, as amended (20 U. S. C. 101), $115,000. (*Labor-Federal Security Appropriation Act, 1949.*)

Annual specific appropriation:

Appropriated 1949, **$115,000** Estimate 1950, **$115,000**

Obligations: 11 Grants, subsidies, and contributions—1948, $115,000; 1949, $115,000; 1950, $115,000.

Permanent appropriation:

Education of the Blind, Interest Fund—

The act of June 25, 1906, appropriates, out of any money not otherwise appropriated, an amount equal to interest at 4 percent per annum on a fund of $250,000 held in trust in the Treasury for the purpose of aiding the education of the blind in the United States through the American Printing House for the Blind. Moneys so appropriated are paid into a trust account for subsequent payment to the trustees of the American Printing House for the Blind (20 U. S. C. 101, 102; 31 U. S. C. 725s (82)).

Appropriated 1949, **$10,000** Estimate 1950, **$10,000**

Obligations: 14 Interest—1948, $10,000; 1949, $10,000; 1950, $10,000.

Total, American Printing House for the Blind, general appropriations:

Appropriated 1949, **$125,000** Estimate 1950, **$125,000**

Trust account:

To Promote the Education of the Blind, Interest—

There is received from the general fund each year an amount equivalent to interest at 4 percent per annum on a fund of $250,000 held in trust. These moneys are appropriated for payment semiannually to the American Printing House for the Blind (20 U. S. C. 101, 102; 31 U. S. C. 725s (82)).

Appropriated 1949, **$10,000** Estimate 1950, **$10,000**

Obligations: 11 Grants, subsidies, and contributions—1948, $10,000; 1949, $10,000; 1950, $10,000.

BUREAU OF EMPLOYEES' COMPENSATION

Salaries and Expenses, Bureau of Employees' Compensation, Federal Security Agency—

Salaries and expenses: For necessary administrative expenses, including personal services in the District of Columbia; services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); and not to exceed $41,000 for the Employees' Compensation Board of Appeals; [$1,400,000: *Provided,*] *$1,536,000, together with $115,000 to be derived from the War Claims Fund created by section 13a of the War Claims Act of 1948 (Public Law 896, approved July 3, 1948) and to be available exclusively for performing the duties imposed upon the Federal Security Administrator by that Act: Provided, That not to exceed $70,000 of this appropriation shall be available for transfer to the appropriation "Salaries, Office of General Counsel": Provided further,* That section 3709, Revised Statutes, as amended, shall not apply to any purchase or service outside continental United States when the aggregate amount involved does not exceed $500. (*5 U. S. C. 751–800; 33 U. S. C. 901–950; 42 U. S. C. 1651–1659, 1701–1717; 45 Stat. 600; Act of July 3, 1948, Public Law 896; Labor-Federal Security Appropriation Act, 1949.*)

Appropriated 1949, **$1,400,000** Estimate 1950, [a] **$1,536,000**

[a] Excludes $7,941 for activities transferred in the estimates to "Salaries and expenses, division of service operations, Federal Security Agency." The amounts obligated in 1948 and 1949 are shown in the schedule as comparative transfers.

Employees' Compensation Fund, Bureau of Employees' Compensation, Federal Security Agency—

Employees' compensation fund: For the payment of compensation and other benefits and expenses (except administrative expenses) authorized by law and accruing during the current or any prior fiscal year, including payments to other Federal agencies for medical and hospital services pursuant to agreement approved by the Bureau of Employees' Compensation; *continuation of payment of benefits as provided for under the head "Civilian War Benefits" in the Federal Security Agency Appropriation Act, 1947;* the advancement of costs for enforcement of recoveries in third-party cases; the furnishing of medical and hospital services and supplies, treatment, and funeral and burial expenses, including transportation and other expenses incidental to such services, treatment, and burial, for such enrollees of the Civilian Conservation Corps as were certified by the Director of such Corps as receiving hospital services and treatment at Government expense on June 30, 1943, and who are not otherwise entitled thereto as civilian employees of the United States, and the limitations and authority of the Act of September 7, 1916, as amended (5 U. S. C. 796), shall apply in providing such services, treatment, and expenses in such cases; **[**$10,800,000**]** *$23,000,000. (5 U. S. C. 785; 42 U. S. C. 1701; Act of July 3, 1948, Public Law 896; Labor-Federal Security Appropriation Act, 1949.)*

Appropriated 1949, **$10,800,000** Estimate 1950, [a] **$23,000,000**

[a] Includes $85,000 for activities previously carried under "Civilian war benefits, Federal Security Agency," Office of the Administrator. The amounts obligated in 1948 and 1949 are shown in the schedule as comparative transfers.

FOOD AND DRUG ADMINISTRATION—Continued

Special account—Continued

Salaries and Expenses, Certification and Inspection Services, Food and Drug Administration, Federal Security Agency—Continued

ucts in accordance with sections 406, 504, 506, 507, 604, 702A, and 706 of the Federal Food, Drug, and Cosmetic Act, as amended (21 U. S. C. 346, 354, 356, 357, 364, 372a, and 376), the aggregate of the advance deposits during the *current* fiscal year [1949] to cover payment of fees by applicants for certification or inspection of such products, to remain available until expended[; and in addition thereto, the aggregate of advance deposits made prior to July 1, 1948, and remaining to the credit of depositors for certification or inspection of such products during the fiscal year 1949, which shall also remain available until expended]. The total amount herein appropriated shall be available for personal services in the District of Columbia; purchase of not to exceed [twelve] *five* passenger motor vehicles [(of which three shall be for replacement only)]; services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); *purchase of chemicals, apparatus, and scientific equipment;* and the refund of advance deposits for which no service has been rendered: *Provided*, That in the *current* fiscal year [1949] not to exceed [$20,500] *$22,150* of such total amount shall be available for transfer to the appropriation "Salaries, Office of the General Counsel". (*Labor-Federal Security Appropriation Act, 1949.*)

Appropriated 1949, **$5,442,400** Estimate 1950, **$6,085,000**

Trust accounts:

Coal-Tar Colors Certification Fees, Food and Drug Administration—

Obligations: 13 Refunds, awards, and indemnities (refunds to depositors)—1948, $6.

Sea-Food Inspections, Food and Drug Administration—

This service, in 1948, is wholly supported by fees paid by packers of sea-food products for the inspection of these products. Advance deposits are made by each packer against which are charged the inspection fees as provided by regulation. The unused deposits are annually refunded. In 1949, this service will be included in the special account appropriation "Certification and inspection services, Food and Drug Administration." Provision is made for the transfer to the special account of advance deposits received in 1948 but applicable to 1949 inspection service (21 U. S. C. 372a).

Appropriated 1949, **$2,146**

FREEDMEN'S HOSPITAL

Salaries and Expenses, Freedmen's Hospital, Federal Security Agency—

Salaries and expenses: For expenses necessary for operation and maintenance, including repairs; [purchase of one ten-passenger motor vehicle (carry-all type) at a cost not to exceed $3,000;] furnishing, repairing, and cleaning of wearing apparel used by employees in the performance of their official duties; transfer of funds to the appropriation "Salaries and expenses, Howard University" for salaries of technical and professional personnel detailed to the hospital; payments to the appropriation of Howard University for instruction of nurses and actual cost of heat, light, and power furnished by such university; [$2,194,000] *$2,443,000: Provided,* That no intern or resident physician receiving compensation from this appropriation on a full-time basis shall receive compensation in the form of wages or salary from any other appropriation in this Act. (*32 D. C. Code 317–320; Labor-Federal Security Appropriation Act, 1949.*)

Annual specific appropriation:

Appropriated 1949, **$2,194,000** Estimate 1950, **$2,443,000**

NOTE.—There are available, as a credit to this appropriation, receipts from patients (32 D. C. Code 318).

HOWARD UNIVERSITY—Continued

Construction of Buildings, Howard University, Federal Security Agency—

Construction of buildings: [For alterations to and installations in the existing power plant and science hall on the grounds of Howard University, including engineering and architectural services, printing, and travel, to remain available until expended, $507,240, which amount, except such part as may be necessary for the incidental expenses of the university, may be transferred to the Public Buildings Administration, Federal Works Agency, for the purposes of this appropriation; and in addition the authority contained in the Federal Security Agency Appropriation Act, 1948, to enter into contracts for construction of a dental school building and an auditorium-fine arts building on the grounds of Howard University is hereby increased from $2,087,675 to $2,953,425: *Provided*, That any contracts for construction of the dental school building and the auditorium-fine arts building shall be in accordance with the terms of said Act and shall provide for completion at a total cost to the Federal Government not in excess of $2,242,520 for the dental school building and $2,732,985 for the auditorium-fine arts building: *Provided further*, That the limitations on contract authority and total cost may be exceeded or shall be reduced by an amount equal to the percentage increase or decrease, if any, in construction costs generally dating from January 1, 1948, as determined by the Federal Works Administrator.] *For construction of buildings on the grounds of Howard University, under the supervision of the Public Buildings Administration, Federal Works Agency, to remain available until expended, as follows:*

For beginning construction of a law school building, an administration building, a biology building and greenhouse, and men's dormitory units, together with alterations and installations in connection with such construction, including engineering and architectural services, printing and binding, and travel, $1,000,000, which amount, except such part as may be necessary for the incidental expenses of the University, may be transferred to the Public Buildings Administration, Federal Works Agency, for the purposes of this appropriation; and in addition the Public Buildings Administration is authorized to enter into contracts for construction of such buildings, which shall provide for completion at a total cost to the Federal Government not in excess of $1,950,000 for the law school building, $1,625,000 for the administration building, $1,872,000 for the biology building and greenhouse, and $1,837,000 for the men's dormitory units: Provided, That the limitations on contract authority and total cost may be exceeded or shall be reduced by an amount equal to the percentage increase or decrease, if any, in construction costs generally, dating from July 1, 1948, as determined by the Federal Works Administrator;

For payment of obligations incurred under authority provided under this head in the Federal Security Agency Appropriation Act, 1948, and the Federal Security Agency Appropriation Act, 1949, to enter into contracts for construction of a dental school building and an auditorium building, $2,953,425;

For payment of obligations incurred under authority provided under this head in the First Deficiency Appropriation Act, 1948, to enter into contracts for construction of an engineering building and women's dormitory units, $1,706,000. OFFICE OF EDUCATION—Continued

Special account:

Salaries and Expenses, War Assets Administration, Special Fund (Allotment to Federal Security Agency, Office of Education)—

	1948 actual	1949 estimate	1950 estimate
FUNDS AVAILABLE FOR OBLIGATION			
Transferred from "Salaries and expenses, War Assets Administration, special fund"	$425,360	$145,000	
Unobligated balance, estimated savings	−1,550		
Total obligations (see consolidated schedules under War Assets Administration)	423,810	145,000	

Total, Office of Education, annual specific appropriations:

Appropriated 1949, **$24,357,760** Estimate 1950, **$24,391,960**

Permanent appropriations:

Colleges for Agriculture and the Mechanic Arts—

Permanent specific appropriation to pay each State and Territory for the more complete endowment and maintenance of colleges for the benefit of agriculture and the mechanic arts now established, or which may be hereafter established, in accordance with an act of Congress approved July 2, 1862.

That there shall be, and hereby is, annually appropriated, out of any money in the Treasury, not otherwise appropriated, to be paid as hereinafter provided, to each State and Territory for the more complete endowment and maintenance of agricultural colleges now established, or which may hereafter be established, in accordance with the act of Congress approved July 2, 1862 (U. S. C., title 7, secs. 301–308), and the act of Congress approved August 30, 1890 (U. S. C., title 7, secs. 321–328), the sum of $5,000 in addition to the sums named in the said act, for the fiscal year ending June 30, 1908, and an annual increase of the amount of such appropriation thereafter for 4 years by an additional sum of $5,000 over the preceding year, and the annual sum to be paid thereafter to each State and Territory shall be $50,000, to be applied only for the purposes of the agricultural colleges, as defined and limited in the act of Congress approved July 2, 1862, and the act of Congress approved August 30, 1890.

That the sum hereby appropriated to the States and Territories for the further endowment and support of the colleges shall be paid by, to, and in the manner prescribed by the act of Congress approved August 30, 1890, entitled "An Act to apply a portion of the proceeds of the public lands to the more complete endowment and support of the colleges for the benefit of agriculture and the mechanic arts established under the provisions of the act of Congress approved July 2, 1862," and the expenditure of the said money shall be governed in all respects by the provisions of the said act of Congress approved July 2, 1862, and the said act of Congress approved August 30, 1890: *Provided*, That said colleges may use a portion of this money for providing courses for the special preparation of instructors for teaching the elements of agriculture and the mechanic arts (7 U. S. C. 301–308, 321–328).

Appropriated 1949, **$2,550,000** Estimate 1950, **$2,550,000**

Obligations: 11 Grants, subsidies, and contributions—1948, $2,550,000; 1949, $2,550,000; 1950, $2,550,000.

Promotion of Vocational Education, Act Feb. 23, 1917, Office of Education—

That there is hereby annually appropriated, out of any money in the Treasury not otherwise appropriated, the sums provided in sections 2, 3, and 4 of the act entitled "An Act to provide for the promotion of vocational education, etc.," approved February 23, 1917 (20 U. S. C. 11–14), to be paid to the respective States for the purpose of cooperating with the States in paying the salaries of teachers, supervisors, and directors of agricultural subjects, and teachers of trade, home economics, and industrial subjects; and in the preparation of teachers of agricultural, trade, industrial and home economics subjects (20 U. S. C. 11–14).

OFFICE OF VOCATIONAL REHABILITATION

Payments to States, Vocational Rehabilitation Act, as Amended, Office of Vocational Rehabilitation, Federal Security Agency—

Payments to States (including Alaska, Hawaii, and Puerto Rico): For payments to States (including Alaska, Hawaii, and Puerto Rico) in accordance with the Vocational Rehabilitation Act, as amended (29 U. S. C. ch. 4), including payments, in accordance with regulations of the Administrator, for one-half of necessary expenditures for the acquisition of vending stands or other equipment in accordance with section 3 (a) (3) (C) of said Act for the use of blind persons, such stands or other equipment to be controlled by the State agency, [$18,000,000] *$20,500,000*, of which not to exceed [$200,000] *$225,000* shall be available to the Federal Security Administrator for providing rehabilitation services to disabled residents of the District of Columbia, as authorized by section 6 of said Act, which latter amount shall be available for administrative expenses in connection with providing such services in the District of Columbia, printing and binding, including the purchase of reprints, and travel: *Provided*, That not to exceed 15 per centum of the appropriation shall be used for administrative purposes: *And provided further*, That section 3709 of the Revised Statutes, as amended, shall not apply to any purchase made or service rendered when the aggregate amount involved does not exceed $400.

Payments to States (including Alaska, Hawaii, and Puerto Rico), *next succeeding* fiscal year [1950]: For making, after May 31[, 1949] *of the current fiscal year*, payments to States in accordance with the Vocational Rehabilitation Act, as amended (including the objects specified in the preceding paragraph), for the first quarter of the *next succeeding* fiscal year [1950] such sums as may be necessary, the obligations incurred and the expenditures made thereunder to be charged to the appropriation therefor for [the] *that* fiscal year [1950]: *Provided*, That the payments made pursuant to this paragraph shall not exceed the amount paid to the States for the first quarter of the *current* fiscal year [1949]. (*Labor-Federal Security Appropriation Act, 1949.*)

Appropriated 1949, **$18,648,850** Estimate 1950, **$21,185,000**

PUBLIC HEALTH SERVICE

For necessary expenses in carrying out the Public Health Service Act, as amended (42 U. S. C. ch. 6A) (hereinafter referred to as the Act), and other Acts, including (with the exception of the appropriation "Pay, and so forth, commissioned officers, Public Health Service") personal services in the District of Columbia; purchase of reports, documents, and other material for publication; services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); preparation and display of posters and exhibits by contract or otherwise; packing, unpacking, crating, uncrating, drayage, and transportation of personal effects of commissioned officers and transportation of their dependents on change of station; *and* increased allowances to Reserve Officers for foreign service; [furnishing, repairing, and cleaning of wearing apparel prescribed by the Surgeon General for use by employees in the performance of their official duties; and transporting in Government-owned automotive equipment, to and from school, children of personnel who have quarters for themselves and their families at isolated stations;] as follows: (*Labor-Federal Security Appropriation Act, 1949.*)

Control of Venereal Diseases, Public Health Service—

Venereal diseases: To carry out the purposes of sections 314 (a) and 363 of the Act with respect to venereal diseases, including the operation and maintenance of centers for the diagnosis, treatment, support, and clothing of persons afflicted with venereal diseases; transportation and subsistence of such persons and their attendants to and from the place of treatment or allowance in lieu thereof; diagnosis and treatment (including emergency treatment for other illnesses) of such persons through contracts with physicians and hospitals and other appropriate institutions without regard to section 3709 of the Revised Statutes, as amended; fees for case finding and referral to such centers of voluntary patients; reasonable expenses of preparing remains or burial of deceased patients; recreational supplies and equipment; leasing of facilities and repair and alteration of leased facilities; the purchase of not to exceed [eight] *sixty* passenger motor vehicles for replacement only, and for grants of money, services, supplies, equipment, and use of facilities to States, as defined in the Act, and with the approval of the respective State health authorities, to counties, health districts, and other political subdivisions of the States, for the foregoing purposes, in such amounts and upon such terms and conditions as the Surgeon General may determine; [$17,230,000] *$16,000,000.* (*Labor-Federal Security Appropriation Act, 1949.*)

Appropriated 1949, **$17,230,000** Estimate 1950, [a] **$16,000,000**

[a] Excludes $19,841 for activities transferred in the estimates to:

"Salaries, Office of Administrator, Federal Security Agency"	$16,786
"Salaries and expenses, division of service operations, Federal Security Agency"	3,055

The amounts obligated in 1948 and 1949 are shown in the schedule as comparative transfers.
