EXPLANATORY STATEMENT

GENERAL STATEMENT

The Department of the Interior is composed of a number of bureaus or other units conducting varied programs related to the domestic welfare and the conservation and development of our natural resources. The following are the principal constituent units of the Department:

Bureau of Land Management
Bureau of Indian Affairs
Bureau of Reclamation
Geological Survey
Bureau of Mines
National Park Service
Fish and Wildlife Service

In addition, the Department has supervision over the Bonneville Power Administration, which is responsible for the marketing of electric energy generated at Federal dams in the Pacific Northwest; and the Division of Territories and Island Possessions, which supervises activities in Alaska, Hawaii, Puerto Rico, and the Virgin Islands.

The estimates for general and special appropriations for the Department proposed for 1950 under existing legislation are $666,904,451 as compared with estimated total appropriations for 1949 of $505,180,854, an increase of $161,723,597. Estimates for 1950 for the Bureau of Reclamation, $379,593,500, and Bonneville Power Administration, $33 million, account for $412,593,500, leaving $254,310,951 for all other activities of the Department. In addition, the estimates carry a total of $55,300,000 in new contractual authorizations, of which $22,000,000 is for continuing the rehabilitation of the Alaska Railroad and $7 million is for the construction and surfacing of roads in the Territory.

There are also included the amounts of $15 million for incentive payments for exploration and development of strategic and critical minerals, and $5 million for the rehabilitation and betterment of existing irrigation works, which are included as items under additional appropriations under proposed legislation (forecast).

OFFICE OF THE SECRETARY

Appropriations for the Office of the Secretary and his general staff, the Office of the Solicitor, the Division of Territories and Island Possessions, the Oil and Gas Division, the Board on Geographic Names, and for several administrative divisions serving all units of the Department are carried under this head. Also included are funds for the program of soil conservation on lands under the jurisdiction of the Department, for the sale and distribution of power in the Southeast and Southwest areas, and for contingent expenses of the departmental units.

Annual appropriations recommended for these activities aggregate $9,390,700, of which $2,800,000 is for the soil-conservation program, $4 million is for administration, operation and maintenance, and construction of power facilities in the Southwest, and $85,000 is for the establishment of a power marketing unit to dispose of power produced at dams in the Southeast constructed by the Corps of Engineers. Increases are recommended for strengthening staff and other functions in the Office of the Secretary and its several branches and divisions.

COMMISSION OF FINE ARTS

This Commission renders advice to Congress and to the executive agencies of the Government on questions arising in the fields of architecture, sculpture, painting, and landscape architecture. The amount recommended for 1950 does not contemplate any expansion of activities.

BONNEVILLE POWER ADMINISTRATION

This agency is responsible for marketing of electric power generated at Federal hydroelectric plants in the Pacific Northwest. Due to rapidly increasing demands for electric power, including requirements for the aluminum industry and for the atomic energy development, this area is faced with a power shortage. Accordingly, funds amounting to $33 million have been recommended in fiscal year 1950 to provide for an accelerated construction, operation, and maintenance program. Particular emphasis is given to providing transmission facilities for handling the increased power generation at Grand Coulee Dam and the Hungry Horse Dam, and for furnishing power to shortage areas with preference given to public bodies and cooperatives as provided by law.

BUREAU OF LAND MANAGEMENT

Reorganization Plan No. 3 of 1946, approved by Congress on July 13, 1946, consolidated the functions of the General Land Office and the Grazing Service, assigning such functions to a newly created Bureau of Land Management. The objective of the consolidation was to bring under a single management the resources of more than 400 millions of acres of public lands located principally in 11 Western States and the Territory of Alaska.

Around 154 million acres of public land in the Western States, most of which is embraced in *58* grazing districts established pursuant to the Taylor Grazing Act of 1934, are administered by the Bureau. These lands provide seasonal grazing for some 8,873,000 head of livestock. Fees collected from stockmen for grazing privileges will aggregate approximately $1,464,000 in 1950.

The Bureau is responsible for the survey and resurvey of all public lands, and is charged with the administration of a great number of laws providing for disposal or various methods of use of lands of all types.

Annual appropriations aggregating $6,032,500 are recommended for 1950, an increase of $782,000 above estimated appropriations for 1949. The increase will permit the employment of personnel to bring up to date delinquent accounting records; it will permit an attack on the backlog of work in district land offices, and strengthen the administration of grazing lands and the management of timber resources. For the administration of the revested Oregon & California Railroad and reconveyed Coos Bay Wagon Koad grant lands an increase of $317,000 is recommended. This will provide for increased fire-protection costs, the beginning of a timber inventory, and the negotiation of sustained-yield management contracts with private landholders. In addition, a contract authority of $250,000 is recommended to permit the construction of access roads in the area.

BUREAU OF INDIAN AFFAIRS

More than 350,000 Indians in continental United States and 32,000 Eskimos, Aleuts, and Indians in Alaska come within the jurisdiction of the Bureau of Indian Affairs. The Bureau is responsible for the economic rehabilitation of these wards of the Government. Its objective is to assure to them opportunities enjoyed by other racial

groups in the fields of education, health, cultural freedom, and self-government.

The Bureau's functions are many and varied. It operates approximately 400 day and boarding schools, and supervises the education of Indian pupils attending public and private schools under State or local contracts. It is responsible for the operation of hospitals and sanatoria and the rendition of medical, dental, and public health nursing service to Indians in their homes or at clinics. It arranges for contract medical or hospital services where such services are not available through Federal sources. The Bureau supervises the use of some 46,000,000 acres of forest and grazing lands, including fire protection and fire prevention, selective cutting of timber, and the determination of livestock use to prevent overgrazing. It maintains an extension service and administers a credit system, both designed to assist Indians in adopting better farm practices, and increasing and improving their livestock holdings. The credit system provides for home improvements, and for the establishment of income-producing enterprises. For better land use, irrigation systems are constructed and operated. A construction service builds, maintains, and repairs buildings and other facilities required for educational, health, and general administrative purposes.

Annual appropriations recommended for 1950 aggregate $59,001,520, an increase of $1,727,591 over 1949 estimated appropriations. However, after deducting nonrecurring supplemental appropriations estimated for 1949, the additional sum recommended for 1950 is $11,729,941. A substantial increase is recommended for strengthening administrative services both in the District of Columbia and at field headquarters. Other increases are recommended for plant maintenance, some increase in school attendance, higher costs in the operation of Government schools and in public or private schools educating Indians under contract, and strengthening of the general medical program. An additional $2,400,000 is recommended for the revolving credit fund.

Provision is made for expanding many services or facilities on the Navajo and Hopi Reservations in the Southwest, including the rebuilding of the Shiprock Boarding School and Hospital. Work on the development of irrigable lands on the Colorado River Reservation is provided for to the extent of $3,000,000 so that Navajos can be resettled there. The recommendation also provides for some expansion of services on behalf of the natives of Alaska and for the rebuilding of the White Mountain Boarding School.

BUREAU OF RECLAMATION

The objectives of the Bureau of Reclamation concern the conservation of land and water resources, the transformation through irrigation of desert lands into productive farms, the protection through adequate water supplies of established agricultural economy from the adverse effects of recurring droughts in the semiarid regions, and the stabilization of the livestock industry through providing the means of growing feed and forage crops. In conjunction with these major purposes is the function of creating byproduct facilities for generation of hydroelectric power, land drainage, control of floods, improvement of navigation, silt control, regulation of stream flow, provision of municipal water supplies, and development of recreational areas and wildlife refuges.

The responsibilities of the Bureau include the planning, construction, and operation of these multiple-purpose facilities which must be completely coordinated with facilities already built or planned to be constructed in the future, either by the Bureau of Reclamation or other agencies, so that the water resources may be used most beneficially.

The 1950 Budget provides specifically for surveys; investigations; preparation of reports, plans, and specifications; and economic studies in the amount of $3,600,000 for general investigations, $500,000 for the Colorado River development fund, $250,000 for Alaska investigations, $50,000 for planning of the Yakima project, Washington, Kennewick Division, as well as substantial amounts for general investigations and gathering of basic data in the Missouri River Basin and amounts for examinations, surveys, and preparation of plans and specifications under the various construction appropriations.

The scope of activities of the Bureau has been extended from year to year so that to the present time, 65 irrigation projects or divisions of projects have been completed of which 35 have been turned over to the water users for operation and maintenance. No Federal funds will be required for these latter projects. In the fiscal year 1950, the Bureau will operate and maintain the remaining 30 projects, under the Reclamation fund, special fund. During 1949, 2,564,000 acres are being fully irrigated from Bureau facilities of which 685,000 acres are being irrigated by Bureau forces, and in 1950 it is estimated that these acreages will change to 2,635,000 and 641,000, respectively. This reflects a decrease of about 44,000 acres of land to be irrigated by Bureau forces and the transfer for operation to responsible water-users organizations of about 115,000 acres. In addition to these areas, special and Warren Act contractors received water for 1,832,000 acres from works constructed by the Bureau. Irrigation operation and maintenance estimates of appropriation in fiscal year 1950, under the Reclamation fund, special fund, total $2,533,300 compared to $1,715,587 appropriated in 1949.

Operation and maintenance costs of power systems are financed from power revenues within limitations established in the appropriations for the particular project. Energy sales from power plants, including Boulder Canyon and Fort Peck projects, in fiscal year 1949, will approximate 18.5 billion kilowatt-hours and are estimated at 22 billion kilowatt-hours in fiscal year 1950. Power operation and maintenance estimates and limitations, under the Reclamation fund, special fund, total $9,323,745 for fiscal year 1950 compared to $6,616,042 made available in fiscal year 1949. The increase is due largely to additional generating capacity and transmission-line mileage and to increased purchase of power to supply power deficiencies in Arizona.

The estimates for fiscal year 1950 for construction in the aggregate amount of $350,459,455 contemplate continuing work on 31 projects. These funds plus balances remaining from 1949 will piovide for activity on 46 projects, including 3 great river basins, during fiscal year 1950. Six major projects require over $300 millior of the appropriation estimates for construction.

The estimate for the Davis Dam project, Arizona-Nevada, of $38,739,000 will permit completion of the dam and reservoir by November 1950 as required by the 1944 treaty with Mexico and provides for continuation of construction of power production and main backbone transmission facilities at an economical rate which will meet the demand at the earliest practicable date.

The Central Valley project of California estimate is $63 million. This amount will provide for the completion of

the Tracy pumping plant, the key structure in the irrigation development, in the late fall of calendar year 1950 and the delivery of water in the spring of 1951. It also contemplates the initiation of construction of the 240,000-kikwolt-ampere Delta steam power plant and the two 230-kilovolt west-side transmission lines.

The estimate of $21,500,000 for the Colorado-Big Thompson project, Colorado, is based on an orderly program for completion of the Granby Dam and pumping plants, for continuation of work on related facilities, and for initiation of construction of the Estes Park-Foothills power system.

In view of the importance of the Hungry Horse Dam and power plant for river regulation to increase the energy production of downstream hydroplants and for generation at the site, the estimate of $24 million for this project is based on a construction program providing for initial water storage in the spring of 1952 and operation of the first 75,000-kilovolt-ampere generating unit in the summer of 1952.

The Columbia Basin project, Washington, for which an estimate of $69.5 million is included, is scheduled at a rate to permit the irrigation of approximately 87,000 acres of new land in the spring of 1952, and to meet the urgent needs for additional power in the Pacific Northwest.

The estimate of $87,150,000 for the Missouri River Basin provides for the continuation of work now under way as well as for general investigations and advance planning of additional authorized features not yet under construction. It contemplates further study on the Missouri-Souris unit before initiation of construction of the Missouri River diversion dam.

GEOLOGICAL SURVEY

The United States Geological Survey conducts research in geologic and related chemical and physical problems; investigates the geology of the country; makes topographic, geologic, base, and other maps of the United States, separate States, and special regions; investigates the quantity and quality of our surface and underground water supplies; classifies the public lands as to mineral and water characteristics and provides technical data for public-land law administration; supervises the technical phases of operations on public lands under leases, licenses, and permits; and investigates the mineral resources of Alaska and surveys and maps the geology and topography of the Territory.

For 1950 the amount recommended in annual appropriations is $17,900,000, an increase of $4,146,250 over estimated appropriations for 1949. This increase is assignable in large measure to the programs for topographic mapping in continental United States and the Territory of Alaska, geologic investigations, studies with respect to our surface and ground waters, and printing geologic and topographic maps.

BUREAU OF MINES

This Bureau is engaged in scientific and technical research covering problems in the field of mining. Its principal objectives are (1) the conservation of minerals through increased efficiency in their mining, preparation, and use; (2) the discovery of methods for the economical beneficiation of lower-grade ores; and (3) the conservation of human life through the adoption of safety practices in mines and plants. The Bureau is the custodian of our gas fields containing valuable helium gas and is the sole producer and distributor of such gas. It is also engaged in special research designed to develop synthetic liquid fuels from coal, shale, and other materials to augment our diminishing natural petroleum supplies.

Annual appropriations recommended for this Bureau for 1950 total $23,946,500, as compared with 1949 estimated appropriations aggregating $26,684,370. The reduction below 1949 is due to the completion of demonstration plants now in process of construction. In general the operations of the Bureau will continue in 1950 at about the presently authorized level. Additional funds are recommended for travel and other expenses of the coal-mine inspection force, and some expansion is recommended for metallurgical research, the investigation of domestic mineral deposits, and the compilation and analysis of statistical data relating to mineral industries.

NATIONAL PARK SERVICE

Our national park system is composed of approximately 174 areas scattered throughout the United States and the Territories of Alaska and Hawaii. In addition, 6 other areas are administered by the National Park Service. These areas contain nearly 23 million acres of land. A road system of about 5,175 miles is maintained, along with trails having an aggregate length of 6,868 miles. The physical plant of the Service, valued at more than $110 million, is comprised of 3,800 buildings, utility systems, and other facilities. For the travel year ended in September 1948, more than 29 million persons—the highest in history—visited the areas under the National Park Service jurisdiction.

The amount recommended in annual appropriations for 1950 is $29,485,600, an increase of $15,220,951 over estimated appropriations for 1949. The greater portion of this increase ($13,737,650) is applied to the construction of roads and trails, parkways, and physical improvements.. Other increases recommended will permit some expansion in general administration and in providing services to the steadily increasing number of visitors.

FISH AND WILDLIFE SERVICE

This Service provides leadership in efforts to conserve and develop our fish, bird, game, and other wildlife resources of the country. It maintains and operates fish-cultural stations and wildlife refuges; it enforces Federal conservation laws regarding fisheries and wildlife; it protects the salmon and other fisheries in Alaska and the fur seals on the Pribilof Islands; it conducts technological and economic research designed to aid the fishing industry and the fur trade; and it engages in an extensive cooperative program for the control of predatory animals and rodents whose depredations on livestock and food supplies result in great annual losses. The Service is presently conducting extensive research related to the fisheries of the far Pacific, as authorized by the Act of August 4, 1947.

For 1950 the amount of $11,143,000 is recommended in annual appropriations, an increase of $594,191 above the estimated appropriations for 1949. This increase does not provide for any expansion of general research activities. It will provide for increased costs of operating fish hatcheries, the making of urgent repairs to buildings, fences, water-control structures and other facilities, more adequate patrol work in Alaska, adjustment of wages of some classes of personnel, and the replacement of worn-out equipment. Provision is made for the operation of the Coleman fish-cultural station at Anderson, Calif. This station was erected as one segment of the

Central Valley project of the Bureau of [Reclamation, and has been operated during a 5-year experimental period through funds provided by that Bureau. A considerable portion of the increase will be applied to the Crab Orchard project in Illinois, transferred to this Service by Public Law 361 of the Eightieth Congress.

GOVERNMENT IN THE TERRITORIES

There are under this head a group of appropriations providing for activities in the Territories of Hawaii and Alaska, the Virgin Islands, and Puerto Rico, not covered by other agencies of the Department. Included are salary and expense items for the Governors of Alaska, Hawaii, and the Virgin Islands, and certain expenses of the legislatures of the two Territories.

A total of $53,463,900 is recommended for this group of annual appropriations for 1950. This is almost twice the size of the 1949 appropriations. Two single items account for nearly the entire amount: (1) the rehabilitation of the Alaska Railroad, $25,000,000; and (2) the construction, repair, maintenance, and surfacing of highways in Alaska, $26,692,000. In addition to cash, contractual authorizations of $22 million and $7 million, respectively, are recommended.

An increase is recommended in the amount to defray the deficits in the municipalities of St. Croix and St. Thomas and St. John, V. I., in order to permit the establishment of a municipal merit system, and to provide for the rehabilitation of one airport acquired by the municipality of St. Thomas and St. John when it became surplus to military requirements.

TRUST ACCOUNTS

In addition to the general and special appropriations mentioned above, $18,263,650 in trust accounts are recommended for the Department and its constituents in 1950. Of the trust account total, $13,050,000 represents trust funds received in the Treasury and credited to Indian tribes or bands under numerous acts of Congress. Many of these acts direct the disposition of such moneys in per capita payments to individuals, operation of Indian sawmills or lumber-producing enterprises, payment of attorney fees, and insurance on tribal property. The other large group of trust fund appropriations is that dealing with the Bureau of Reclamation, for which $2,510,900 is recommended for 1950.

Continuing Fund, Power Transmission Facilities—

This is a continuing fund of $100,000 derived from receipts from the transmission and sale of electric power and energy to be used to defray emergency expenses, to insure continuous operation of the facilities, and to cover the cost of the purchase of electric power and energy and the rentals and other costs in connection with the use of transmission lines and appurtenant facilities of other public agencies and private interests. The continuing fund is to be reimbursed from receipts, for such expenditures made therefrom, when necessary. In 1950 it is proposed to increase this continuing fund to $300,000 (act of Dec. 23, 1943, Public Law 216).

Payments From Proceeds of Sales, Motor-Propelled Vehicles, Etc., **Department of the Interior**—

Under the act of August 2, 1946, proceeds of sales of vehicles, equipment, accessories, and other items, the exchange of which is authorized by law, may be applied in whole or in part payment toward the purchase of similar items. Receipts from this source are set up in a special appropriation account available for the fiscal year in which the obligation to purchase the new equipment is incurred; any unobligated balance is subsequently adjusted to miscellaneous receipts (5 U. S. C. 118d-l).

Grand River Dam Project, Southwestern Power Administration—

Executive Order 9373, supplementing Executive Orders 9366 and 8944, authorized and directed the Secretary of the Interior to manage and operate the Grand River Dam project for the purpose of generating and supplying electric power for the manufacture of explosives or munitions of war, and for other purposes involving the safety of the United States. All moneys received as revenues from the sale and distribution of power and from other sources were placed to the credit of this fund to be used for the purposes of administration, construction, litigation, payment of interest on bonded indebtedness, redemption of bonds, etc., and operation of the project. In accordance with the act of July 31, 1946 (Public Law 573), the physical properties of the Grand River Dam project were returned to the jurisdiction of the State of Oklahoma as of midnight, August 31, 1946. Under the terms of the legislation, the Secretary of the Interior was authorized to make such agreements as were necessary to liquidate the Government's functions with regard to the Grand River Dam project, and the funds in this account are available for that purpose.

[1] The receipts placed in special account available for appropriation are presented on an accrued basis. It is anticipated that about $5,000,000 of the receipts estimated to accrue during fiscal 1950 will not be covered until the first quarter of the subsequent fiscal year due to late warrant actions. Consequently this approximate amount will not be available during the appropriative year to support expenditures to be authorized by Congress.

Boulder Canyon project: For operation, maintenance, and replacements of the dam, power plant, and other facilities, of the Boulder Canyon project, **[$1,500,000]** *$1,612,000,* payable from the Colorado River dam fund, including payments to the Boulder City school district in accordance with the provisions of Public Law 528, approved May 12, 1948. Said payments for dependents of those employees of the Bureau of Reclamation directly employed in the construction, operation, and maintenance of the project shall be deemed a part of the cost of operation and maintenance of said project under section 1 (a) of the Boulder Canyon Project Adjustment Act (Act of July 19, 1940, 54 Stat. 774). Other such payments shall be deemed nonproject costs. The Secretary shall submit to the Appropriations Committees annually a justification showing all investments and expenditures made or proposed out of the Colorado River dam fund, for the joint use of the project and of other Federal activities at or near Boulder City. In the proportion that such investments and expenditures were or shall be for the use of such other Federal activities and not related to the construction, operation, or maintenance of the project they shall be deemed nonproject investments and expenditures. The obligation under the provision of section 2 of the said Act to repay to the United States Treasury advances and readvances to the Colorado River dam fund which obligation is made the basis for computation of rates under the provisions of section 1 of said Act, shall be diminished in the amount that nonproject investments or expenditures are or have been made from said fund and the rates computed pursuant to said section 1 of said Act shall reflect such diminution. *{Interior Department Appropriation Act, 1949.)*

No part of any appropriation for the Bureau of Reclamation, contained in this or any prior Act, which represents amounts earned under the terms of a contract but remaining unpaid, shall be obligated for any other purpose, regardless of when such amounts are to be paid: *Provided*, That the incurring of any obligation prohibited by this paragraph shall be deemed a violation of section 665 of title 31 of the United States Code.

[Not exceeding 8 per centum of the construction appropriation for any project under the Bureau of Reclamation contained in this Act shall be available for construction work by force account, or on a hired labor basis, except for projects or items the estimated construction cost of which does not exceed $200,000, and only then in cases where the Bureau of Reclamation finds the lowest bids to be excessive.]

[The War Assets Administration or any other Federal agency having ownership or custody thereof or interest therein is hereby directed to transfer to the Davis Dam project, without exchange of funds, the following described interests and facilities, including spare parts, of the Basic Magnesium project, Henderson, Nevada:]

[(a) The project's interest and equity in the part of Hoover Dam power plant switchyard known as T-7A;]

[(b) Two 230-kilovolt transmission lines between the said Hoover Dam power plant switchyard and the Basic Magnesium project substation, including all two hundred and thirty-kilo volt switching equipment at the terminal of the lines at the Basic Magnesium project, together with appurtenant permits, rights-of-way, or other interest in realty;]

[(c) Three original seventy-five-thousand-kilo volt ampere, 230/13.8-kilovolt transformer banks and associated low voltage switching equipment included within the zone of differential protection for said transformers.]

[Upon transfer of the facilities herein described, the Secretary shall determine the amount of their fair value to the Davis Dam power system, and such amount shall be included in the determination of construction investment and other fixed charges which are required by section 9 of the Reclamation Project Act of 1939, as amended, to be considered in establishing rates for the sale of electric power.]

The Departments of Air Force, Army, and Navy, the Civil Aeronautics Administration, and the War Assets Administration are authorized during the fiscal year [1949] *1950* to transfer to the Bureau of Reclamation aircraft engines, parts, accessories, and other aircraft equipment, materials and supplies, surplus to the needs of such agencies, as may be required by said Bureau of Reclamation, such transfers to be without charge therefor.

[The War Assets Administration or other Federal agencies having ownership or custody thereof or interest therein is hereby directed to transfer to the Bureau of Reclamation, without exchange of funds, the following-described lands, improvements, buildings, facilities, and interest:]

[(a) Government-owned real property, identified by the War Assets Administration as Plancor 587, located at Columbus, Stillwater County, Montana, consisting of approximately one and five-tenths acres of land and two garage-shop and warehouse buildings located thereon containing approximately thirty-four thousand four hundred square feet.]

[(b) Government-owned warehouse situated on land owned by the Northern Pacific Railway Company and leased to the Government, identified by the War Assets Administration as Plancor 133, located at Columbus, Still water County, Montana, containing approximately eight thousand square feet of floor space.]

[The War Assets Administration or other Federal agency having ownership or custody thereof or interest therein is hereby directed to transfer to the Bureau of Reclamation without exchange of funds, the following-described lands, together with improvements, buildings, facilities, equipment, and interest.]

[A parcel of that section of the Grand Island Army Air Field, Grand Island, Nebraska, lying west of First Road West, formerly known as the station hospital area, and described in detail as follows:]

[Approximately forty acres of land generally defined as the northeast quarter southeast quarter section 34, township 12 north, range 9 west. It is the desire to acquire all land abutting against lands presently owned by the city of Grand Island and including such portions of Road One West and right-of-way between Chapel Street and the point one hundred and eighty feet south of the intersection with Second Street South, to give continuous ownership in the east and west direction as between the United States Government (Bureau of Reclamation) and the city of Grand Island. The records show that all of this land was acquired from individual owners by the United States of America during August and September 1943, and the transfers are recorded with the registrar of deeds, Hall County, Nebraska, and the following buildings located in the hospital area numbered as follows: T-1112, T-1113, T-1114, T-1115, T-1116, T-1117, T-1118, T-1122, T-1100, T-1103, T-1104, T-1105, T-1107, T-1101, T-1102, T-1106, T-1108, T-1109, T-1110, T-1111, and T-1120, together with all roads, improvements, electric power lines, heating lines, water lines, sewer systems, Air-Temp units, steam boilers, and other appurtenances to the above-listed buildings, and all other facilities and equipment incident to said hospital area not heretofore disposed of.]

During the *current* fiscal year [1949] the head of any department or independent establishment of the Government having funds available for scientific and technical investigations within the scope of the functions of the Geological Survey may, with the approval of the Secretary, transfer to the Geological Survey such sums as may be necessary therefor, which sums so transferred may be expended for the same objects and in the same manner as sums appropriated herein may be expended: *Provided,* That not to exceed 5 per centum of any of the appropriations for the Geological Survey may be transferred to any other of such appropriations, but no appropriation shall be increased more than 5 per centum thereby. Any such transfer shall be reported to Congress in the annual Budget;

In the event that the Director of the Geological Survey deems it advantageous to the Government, the Geological Survey is authorized to contract for the furnishing of topographic maps made from aerial photographs, or for the making of geophysical or other specialized surveys;

[The Geological Survey may acquire from the Department of National Defense or from any disposal agency of the Government without reimbursement or transfer of funds, one aircraft for replacement only; including engines, parts, accessory, and flying equipment.]

Payments From Proceeds of Sale of Water—

This fund is derived from the proceeds of the sale or other disposition of water from water wells developed by the Secretary of the Interior when permittees and lessees, prospecting under the provisions of sections 221 to 229 of title 30 of the United States Code, strike water instead of oil and gas while drilling. The authority to use such funds to meet the expenses in continuing the program of developing water wells is contained in the act approved June 16, 1934 (48 Stat. 977).

Synthetic Liquid Fuels, Bureau of Mines—

Synthetic liquid fuels: For expenses, without regard to section 3709, Revised Statutes, as amended, necessary to carry into effect the Act authorizing the construction and operation of demonstration plants to produce synthetic liquid fuels from coal, oil shales, agricultural and forestry products, and so forth, approved April 5, 1944 (30 U. S. C. 321-325), *as amended,* including construction and acquirement of camp and laboratory buildings and equipment, personal services in the District of Columbia (not exceeding **[$100,000]** *$175,000);* printing and binding; and purchase in the District of Columbia and elsewhere of items otherwise properly chargeable to the appropriation "Contingent expenses, Department of the Interior"; [$9,750,0003 *$10,000)000, to* remain available until expended: *Provided,* That these funds may be utilized to provide transportation between the [proposed] plants and related facilities and communities that provide adequate living accommodations of persons engaged in the operation and maintenance of these plants; and for transportation to and from schools of pupils who are dependents of such persons: *Provided further,* That pursuant to agreements approved by the Secretary, the transportation equipment available to the Bureau of Mines may be pooled with that of school districts and other local or Federal agencies for use in transporting persons engaged in operation and maintenance of these plants, pupils who are dependents of such persons, and other pupils, and in the interest of economy the expenses of operating such equipment may be shared. *(Interior Department Appropriation Act, 1949.)*

Helium Production, Bureau of Mines—

Helium production and investigations: The sums made available for the *current* fiscal year [1949] in the Acts making appropriations for the Departments of the Air Force, Army, and Navy for the acquisition of helium from the Bureau of Mines shall be transferred to the Bureau of Mines on July 1 [, 1948] *of said fiscal year*, for operation and maintenance of the plants for the production of helium for military and naval purposes, including the purchase in the District of Columbia and elsewhere of items otherwise properly chargeable to the appropriation "Contingent expenses, Department of the Interior" (not exceeding $5,000); printing and binding [of technical papers and reports]; and [$46,500] *$61,800* for personal services in the District of Columbia: *Provided*, That section 3709, Revised Statutes, as amended, shall not be construed to apply to this appropriation, or to the appropriation for development and operation of helium properties (special fund) in section 3 (c) of the Act of September 1, 1937 (50 U. S. C. 164): *Provided further*, That funds available for the production of helium and the development of helium properties may be utilized to provide transportation between helium plants and related facilities and communities that provide adequate living accommodations of persons engaged in the operation and maintenance of helium plants; and for transportation to and from schools of pupils who are dependents of such persons: *Provided further*, That pursuant to agreements approved by the Secretary, the transportation equipment available to the Bureau of Mines may be pooled with that of school districts and other local or Federal agencies for use in transporting persons engaged in operation and maintenance of helium plants, pupils who are dependents

During the *current* fiscal year [1949J the head of any department or independent establishment of the Government having funds available for scientific investigations within the scope of the functions of the Bureau of Mines may, with the approval of the Secretary, transfer to the Bureau such sums as may be necessary therefor, which sums so transferred may be expended for the same objects and in the same manner as sums appropriated herein may be expended.

The Federal Security Administrator may detail medical officers of the Public Health Service for cooperative health, safety, or sanitation work with the Bureau of Mines, and the compensation and expenses of the officers so detailed may be paid from the applicable appropriations made herein for the Bureau of Mines.

The Bureau of Mines is authorized, during the *current* fiscal year [1949J, to sell directly or through any Government agency, including corporations, any metal or mineral product that may be manufactured in pilot plants operated from funds appropriated to the Bureau of Mines, and the proceeds of such sales shall be covered into the Treasury as miscellaneous receipts.

[The following appropriations herein made to the Bureau of Mines shall be available for the maintenance, and operation of aircraft: "Operating rescue cars and stations and investigation of accidents"; "Investigation and development of domestic mineral deposits, except fuels"; and "Metallurgical research and pilot plants".]

Appropriations in this Act to the Bureau of Mines shall be available for the purchase (not to exceed [eighty] *one hundred and fifty-one,* of which [thirty! *one hundred and thirty-seven* shall be for replacement only) and hire of passenger motor vehicles.

[The Department of the Army is authorized to transfer to the Department of the Interior, for the use of the Bureau of Mines, without compensation therefor, full jurisdiction, possession, and

Purchase of Lands and Other Property, Mammoth Cave National Park—

The act of June 5, 1942, authorized the Secretary of the Interior to acquire any lands, interests in lands, and other property within the maximum boundaries of Mammoth Cave National Park, funds for the purpose to be reserved and set aside in the Treasury of the United States as a special fund, and to consist of annual revenues in excess of annual appropriations made for the administration, protection, and maintenance of the park. The act of June 30, 1948 (Public Law 851), authorized an appropriation for purchasing the lands in question, and provided that the special fund be transferred to the general fund of the Treasury as miscellaneous receipts (16 U. S. C. 404c-ll).

Educational Expenses, Children of Employees, Yellowstone National Park—

In accordance with the provisions of the act of June 4, 1948, the Secretary of the Interior is authorized, under such regulations as he may prescribe, to make payments, from any revenues received by the United States from visitors to Yellowstone National Park, to the appropriate school districts serving that park as reimbursement for educational facilities furnished to pupils who are dependents of persons engaged in the administration, operation, and maintenance of the park. Funds for this purpose are reserved and set aside in the Treasury of the United States as a special fund, to be expended upon the certification of the Secretary of the Interior. (Public Law 604, 80th Cong.).

Total, Fish and Wildlife Service, [$9,928,509] *$11,148,000,* and in addition thereto, funds made available under the Migratory Bird Conservation Fund and the fund for Federal Aid in Wildlife Restoration, of which amounts not to exceed [$1,123,000] *$1,196,119* may be expended for departmental personal services, including such services in the District of Columbia. Funds available for the work of the Fish and Wildlife Service shall be available for the purchase of not to exceed [sixty-five] *sixty-six* passenger motor vehicles, *of which sixty-four shall be* for replacement only; purchase (not to exceed three), hire [(in Alaska)], maintenance, and operation of aircraft *including, when purchasing aircraft and parts and accessories thereof, the exchange or sale of similar items and application of the exchange allowances or proceeds of sale in such cases in whole or in part payment therefor;* the installation and operation of telephones in Government-owned residences, apartments, or quarters occupied by employees of the Fish and Wildlife Service; providing by purchase, construction, or otherwise, facilities incident to such public recreational uses of wildlife refuges as are not inconsistent with the primary purposes of such refuges; newspapers (not to exceed $100), plans and specifications for vessels, or for contract personal services for the preparation thereof without regard to section 3709, Revised Statutes, as amended (41 U. S. C. 5); *printing and binding, including the purchase of reprints of scientific and technical articles published in periodicals and journals and the publication of bulletins which shall be adapted to the interests of the people of the different sections of the country, an equal proportion of four-fifths of the bulletins to be delivered to or sent out under addressed franks furnished by the Senators, Representatives, and Delegates in Congress as they may direct;* and rations for officers and crews of vessels or, in lieu thereof, commutation of rations at not to exceed $2.00 per man per day; and for the expenditure from appropriations available for the purchase of lands of not to exceed $1 for each option to purchase any tract of land. Reimbursements for the cost of supplies and materials and the transportation and handling thereof issued from central warehouses authorized to be established by the Act of June 24, 1936 (16 U. S. C. 667), may be credited to the appropriation current at the time supplies and materials are allotted, assigned, or issued, or at the time such reimbursements are received. Not to exceed 5 per centum of the foregoing amounts for expenses of the Fish and Wildlife Service shall be available interchangeably for expenditure on the objects included within the general expenses of said Service, but no more than 5 per centum shall be added to any one item or appropriation. The Departments of the Air Force, Army, and Navy, the Coast Guard, the Civil Aeronautics Administration, and [the War Assets Administration] *disposal agencies* are authorized to transfer to the Fish and Wildlife Service aircraft for replacement purposes only (but not necessarily of the same size or type or at the same locations), and such other equipment, materials, and supplies (with an appraised value of not to exceed $500,000), surplus to the needs of such agencies, as may be required by said Service, such transfers to be without charge therefor; and in addition the Departments of the Army and Navy, the Coast Guard, and the Maritime Commission are authorized to transfer without charge therefor vessels for replacement purposes only (but not necessarily of the same size or type or at the same locations) marine engines, parts and accessories surplus to the needs of such agencies [: *Provided,* That the authorization in this paragraph shall not be construed to deny to veterans the priority accorded to them in obtaining surplus property under the Surplus Property Act of 1944, as amended]. *(Interior Department Appropriation Act, 1949.)*

EXPLANATORY STATEMENT

GENERAL STATEMENT

The Department of Justice represents the Government in legal matters and renders advice and opinions upon request of the President and the heads of executive departments. The work of the Department includes the activities of the United States district attorneys and marshals in the 93 judicial districts, the Federal Bureau of Investigation, the Immigration and Naturalization Service, the Federal Prison System, and the Office of Alien Property.

The Department's requirements for 1950 are estimated as $5,388,155 in excess of requirements for 1949, but this amount includes a tentative estimate of $3,000,000 for claims as explained below. The remainder of the increase is due primarily to direct appropriation to the Federal Bureau of Investigation for investigative activities previously provided for by reimbursement, and strengthening of the internal security program; higher commodity costs affecting Federal prisons; recent legislation affecting the Immigration and Naturalization Service; and the added costs for pay increases (Public Law 900) on a full-year basis.

LEGAL ACTIVITIES AND GENERAL ADMINISTRATION

This section of the estimates consists of the legal and administrative offices and divisions, most of which have relatively stable work loads. The forecast of supplemental estimates for 1949 includes $1,262,245 for pay increases (Public Law 900), $225,000 for increases in volume of work in excess of that provided for by the current appropriation, and $165,500 because of recent legislation. Public Law 772, approved June 25, 1948, increased membership of the Board of Parole to five members, and $15,500 is estimated for this purpose during 1949. For requirements under Public Law 886, approved July 2, 1948, relating to claims of certain persons of Japanese ancestry, a tentative amount of $150,000 is included for 1949. A tentative estimate for 1950 of $3,000,000 is included for administration and for payment of claims, pending the receipt of further information concerning the volume and amount of claims upon which a definite estimate can be based.

The 1950 estimates include provision for continuing the antitrust program at the present level, and exclusive

of the estimate for payment of claims, it is anticipated that legal activities and general administration will continue substantially at or below the current levels.

FEDERAL BUREAU OF INVESTIGATION

The investigative work load of this Bureau is expected to continue at a high level due largely to investigations of personnel required by the Atomic Energy Act and similar provisions in other Acts pertaining to personnel engaged in international activities. The forecast of supplemental estimates includes $2,922,000 for pay increases and $2,630,000 for investigative work load in excess of that provided for in the 1949 appropriation. The further increase for 1950 results principally from direct appropriation to the Bureau for investigative activities previously provided for by reimbursement and the inclusion of additional amounts for strengthening the internal security program.

IMMIGRATION AND NATURALIZATION SERVICE

The enforcement program of the Service, including investigative and deportation activities, will continue to receive greater emphasis during 1950, and administrative efforts will be made to improve existing controls of certain classes of aliens, particularly temporary visitors. The border patrol is confronted with a rising trend of illegal entries, as evidenced by the larger numbers of aliens being apprehended. Substantially all of the estimated increase for 1950 over estimated appropriations for 1949 is for an expected increase, under Public Law 863, approved July 1, 1948, in the number and complexity of suspension of deportation cases, and for essential equipment replacements.

FEDERAL PRISON SYSTEM

Estimates for 1950 reflect an anticipated decline in the inmate population of Federal prisons and the closing of one institution or effecting equivalent savings, which will partially offset an increase in estimated per capita cost of maintaining prisoners. Current appropriations contemplate an average daily inmate population of 17,500; the estimate for 1950 is to provide for a daily average of 17,000. Estimates for public works projects are confined to projects already in progress and certain emergency items affecting the security of the institutions. In the latter category is the beginning of construction of a replacement for the power plant at the Federal penitentiary near Leavenworth, Kans., for which there is included an estimate of appropriation of $280,000, plus contract authority in the amount of $1,000,000.

OFFICE OF ALIEN PROPERTY

This Office operates under a limitation on administrative expenses, with funds derived from vested properties. The Office has absorbed the foreign funds control activity transferred from the Treasury Department as of October 1, 1948. Under the reduced limitation estimated for 1950, the Office will continue its efforts to complete the vesting program. It is also expected that progress will be made in reducing the backlog of title and debt claims on file, and in the liquidation of properties not involved in litigation.

Return of Deposits To Secure Payment of Fines and Passage Money, Immigration and Naturalization Service—

Amounts collected from transportation companies, owners and masters of vessels and agents to cover fines that may be imposed for unlawful entry of aliens and to secure the return of passage money (including head tax if paid by the alien as part of passage money) are deposited in the trust receipt account "Deposits to secure payment of fines and passage money, Immigration and Naturalization Service." The portion of receipts representing fines, penalties, etc., is transferred monthly to miscellaneous-receipt account "Immigration fines and penalties." Such amounts as are required to make refunds to transportation companies and others in cases where no fine is imposed and for payment to aliens of amounts due them are established from time to time in the appropriation account (31 U. S. C. 725r).

Special deposit, trust account:

Administrative Expenses, Office of Alien Property—

Office of Alien Property: The Attorney General, or such officer as he may designate, is hereby authorized to pay out of any funds or other property or interest vested in him or transferred to him pursuant to or with respect to the Trading with the Enemy Act of October 6, 1917, as amended (50 U. S. C. App.), necessary expenses incurred in carrying out the powers and duties conferred on the Attorney General pursuant to said Act: *Provided*, That not to exceed $4,100,000 shall be available [for the entire] *in the current* fiscal year [1949] for the general administrative expenses of the Office of Alien Property, including [the salary of the Director of the Office at $10,000 per annum;] printing and binding; [not to exceed $5,500 for deposit in the Treasury for penalty mail (39 U. S. C. 321d);] rent of private or Government-owned space in the District of Columbia; not to exceed $70,000 for [temporary] services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); personal services in the District of Columbia; a health service program as authorized by law (5 U. S. C. 150), and traveling expenses, including attendance at meetings of organizations concerned with the work of the Office: *Provided further*, That on or before November 1[, 1948] *of the current fiscal year*, the Attorney General shall make a report to the Appropriations Committees of the Senate and the House of Representatives giving detailed information on all administrative and nonadministrative expenses incurred during the *next preceding* fiscal year [1948,] in connection with the activities of the Office of Alien Property: *Provided further*, That of the total amount herein authorized the amount of $50,000 is to be transferred to the Administrative Division, Department of Justice. *(Departments of State, Justice, Commerce, and the Judiciary Appropriation Act, 1949.)*

EXPLANATORY STATEMENT

GENERAL STATEMENT

The Department of Labor was created by the act of March 4, 1913, "to foster, promote, and develop the welfare of the wage earners of the United States, to improve their working conditions, and to advance their opportunities for profitable employment."

Several of the specific programs of the Federal Government which contribute to the accomplishment of this broad objective have been removed from the Department of Labor by action of prior Congresses. It has long been the intention of the President that the Department of Labor be strengthened. For the most part this can be achieved only through legislative action. The reorganization of programs directly affecting the welfare of wage earners in respect to employment opportunities and conditions is one way in which the Department can be made more adequate to its broad purpose. The creation of new functions and careful extension of the statutory base for existing programs is another.

The appropriations for 1949 rendered the Department incapable of carrying out the President's plans with respect to authorized programs of the Department. The amount forecast for supplemental required in 1949 is almost entirely attributable to the Federal employees' pay increase which was authorized by Public Law 900, Eightieth Congress. The estimates submitted in this budget under existing legislation will enable the Department to perform its authorized duties in a way which will permit some progress toward the President's objective. Funds for labor programs which, under existing legislation, are administered by other agencies are provided for elsewhere ia this budget/

Additional appropriations for 1950 are forecast for administration of proposed legislation, authorizing the Department to promote safe working conditions through grants to States for the purpose of strengthening State labor departments which administer industrial safety laws.

OFFICE OF THE SECRETARY

The Office of the Secretary provides general supervision and policy direction over the activities of the Department. In addition to the immediate office of the Secretary of Labor, the activities financed from appropriations under this head include (1) administrative staff functions, such as the budget and personnel offices, the library, Office of Information, and the immediate office of the Solicitor of the Department; (2) the operating programs of the Office of International Labor Affairs, Office of the Solicitor, Bureau of Labor Standards, and Bureau of Veterans' Reemployment Rights. Beginning in 1950 personnel administration for the entire Department will be centralized in the Office of the Secretary at a considerable savings in cost.

The Office of International Labor Affairs is a small coordinating unit in the Office of the Secretary through which the Department discharges its responsibilities in connection with international affairs. These include primary responsibility for United States participation in the International Labor Organization, assistance in United Nations affairs, membership on the Board of the Foreign Service, and advisory services pertaining to economic and social aspects of foreign policy and the administration of occupied territories.

The Office of the Solicitor, in addition to normal staff functions, is responsible for wage-determination work related to Federal construction and for litigation and hearings necessary to carry out the several laws administered by the Department.

The Bureau of Labor Standards assists industry, labor, and the States in improving and developing sound standards for labor laws, regulations, and administration. It sponsors activities aimed at reducing industrial accidents and improving working conditions of employees. The Bureau acts as a clearinghouse of information for State labor departments and in this capacity conducts national and regional conferences at which labor-law administrators, workers, employers, and interested public agencies exchange views for improving labor standards and administrative methods. In addition, the statutory function of administering the union registration provisions of the Labor-Management Relations Act, 1947, is assigned to this Bureau. The increase of $51,000 for this Bureau

is directed almost entirely to strengthening the industrial safety function and providing for training of State factory inspectors at the request of and in cooperation with State labor departments.

The Bureau of Veterans' Reemployment Rights was originally established pursuant to the act of March 21, 1947, which transferred from the expiring Selective Service System to the Secretary of Labor the function of providing assistance to returning veterans of the armed forces and the merchant marine in the exercise of their reemployment rights under the Selective Training and Service Act of 1940 and the act of June 23, 1943. The Selective Service Act of 1948 provides that the Secretary of Labor, through the Bureau of Veterans' Reemployment Rights, shall render aid in the replacement in their former positions of persons who have satisfactorily completed any period of active duty in the armed forces of the United States, the Coast Guard, or the Public Health Service.

The elimination of the penalty mail appropriation, small increases, and some offsetting decreases result in a net reduction of $48,000 in the 1950 estimates for the Office of the Secretary.

BUREAU OF APPRENTICESHIP

The Bureau of Apprenticeship encourages and promotes the establishment and maintenance of employee training programs in apprenticeable trades and occupations through assistance to State apprenticeship councils and directly to management and labor. Since the end of the war, renewed interest in the full training of apprentices has resulted in the expansion of the number of training programs sponsored by employers or groups of employers and in the number of apprentices in training. Program emphasis in 1950 will be directed toward those trades and occupations which are of vital importance to national security. A regrouping of functions has permitted a slight decrease of positions; however, the net increase of $29,000 for 1950 will provide the additional amount needed for within-grade promotions and pay increases authorized by Public Law 900.

BUREAU OF LABOR STATISTICS

The Bureau of Labor Statistics since 1888 has been charged with the statutory duty "to acquire and diffuse among the people of the United States useful information on subjects connected with labor, in the most general and comprehensive sense * * *." It collects, analyzes, and publishes statistical and other relevant information concerning employment, wages, hours of labor, earnings, wholesale and retail prices, cost of living, labor productivity, collective bargaining and labor disputes, industrial accidents, foreign labor conditions, and building construction. The statistical series and economic studies produced by the Bureau are released through the Monthly Labor Review, press releases, Bureau of Labor Statistics bulletins, and other media. The data constitute basic information for legislators and other Government officials concerned with formulation or execution of local, State, and national policies relative to the economic well-being of the Nation. Moreover, the statistical and economic information is of inestimable value for business and community planning and to labor and management in the conduct of industrial relations. The enactment of the Labor-Management Relations Act, 1947, making the Bureau the statutory depository for collective bargaining agreements and related information, lends increased importance to the latter service.

Because of budgetary restrictions many of the Bureau's statistical series have been curtailed during the past 2 years and emphasis has been placed on maintaining national series at the expense of State and local series. The 1950 budget envisages cooperation with State employment security agencies to extend State and area series in the fields of employment, and hours and earnings. Housing statistics are to be developed for additional local areas and studies undertaken to determine elements of construction cost. A start on studies necessary for a major revision of the techniques, structure, and basis for the Consumers' Price Index is to be made in 1950. It is expected that the revision would be completed in 1953. Completion of the first revision of the Comprehensive Wholesale Price Index since 1931 is provided for 1950, however. The increasing significance of measuring worker productivity warrants some expansion of the Bureau's productivity indexes and reports. The recommended appropriation for 1950 represents an increase of $1,065,000 to enable the Bureau of Labor Statistics to perform the additional services.

WOMEN'S BUREAU

The Women's Bureau, under the act of June 5, 1920, formulates standards and policies to promote the welfare of wage-earning women, improve their working conditions, increase their efficiency, and advance their opportunities for profitable employment. Its program is based on its responsibility to approximately 18 million women now in the Nation's labor force. Studies reveal that 84 out of each 100 working women must work to support themselves or others; in other words, economic reasons require large numbers of women to remain in employment. At the present time, as in the past, there is substantial activity concerning legislation affecting women workers, and regulations and administrative practices under any laws enacted. While the Bureau has no responsibility for administering any laws or regulations, it does assist and advise the States and other interested bodies in developing sound legislation to protect women in industry and in promulgating standards and regulations for effective execution of such laws. The 1950 estimates will permit this Bureau to carry on its present activities and in addition to study and report on working conditions in the garment industry and State minimum wage administration and enforcement. The total increase recommended is $44,600.

WAGE AND HOUR DIVISION

The Wage and Hour Division is responsible for the administration of the wage-and-hour and child-labor provisions of the Fair Labor Standards Act of 1938, as amended by the Portal-to-Portal Act of 1947. This law establishes minimum standards for wages and salaries, for hours not subject to overtime pay, for overtime rates of pay, and for employment of minors. The law affords protection to employers from unfair competition derived from substandard working conditions. The law protects employees engaged in interstate commerce or in the production of goods for commerce, to all of whom it is made applicable. This Division also administers the Walsh-Healey Public Contracts Act of 1936, as amended. This law requires the recipients of Government supply contracts in amounts of $10,000 or more to operate upon a 40-hour basic workweek with overtime pay for hours worked beyond that number, to pay wages at least equal to predetermined minimum rates, and to maintain specified standards for employment of child labor and for the safety and health of employees. No increase is included in the 1950 estimates for this Division.

EXPLANATORY STATEMENT

GENERAL STATEMENT

The National Military Establishment consists of the Office of the Secretary of Defense, to which are attached related agencies created under title II of the National Security Act of 1947, the Department of the Army, the Department of the Navy, and the Department of the Air Force. The Budget for fiscal year 1950 is the first which has been formulated for the National Military Establishment under the terms of section 202 (a) of that act which became effective September 18, 1947.

This Budget for the first time presents the separate Air Force requirements for the direct support of its operations. Those activities of the Air Force, exclusive of the procurement, maintenance and operation of aircraft, and related projects, and the salaries of the Secretary of the Air Force and the Air Chief of Staff, were included in fiscal year 1949 in the budget for the Army.

The 1950 program has been developed so as to insure the optimum military effectiveness consistent with giving recognition to the need for maintaining a sound civilian economy. It will provide the United States with armed and trained military forces related to a strategic deployment as well as the defense of the continental area of the United States.

Assignment of strength between the services has been effected with strategic concepts in mind. Plans have been continually reappraised and revised to the extent necessary during the process of budget formulation and review by the Joint Chiefs of Staff and ranking officials of the Establishment, both civilian and military, to assure that required relative readiness is maintained and that highest priority military requirements are determined in the light of conditions as they will probably exist during the period of operation under this budget, from July 1, 1949, until June 30, 1950.

These estimates reflect progress in the formulation of a budget for the National Military Establishment which has been based upon development of a program for the operation of our land, naval, and air forces as a team for defense—a plan developed and evaluated with full advice from the ranking officers of the three services.

The estimates for the National Military Establishment, exclusive of the civil functions of the Department of the Army, total approximately $14.2 billion in new obligational authority for fiscal year 1950. In addition, contract authorizations of $279 million for increased cost of completing naval ship construction programs authorized in 1948 and 1949 is included in fiscal year 1949, and will be available for obligation largely in the fiscal year 1950. Thus the total new obligational authority provided for the National Military Establishment is approximately $14.5 billion.

The sum of $14.2 billion includes specific allocations as follows: Approximately $11 million for the Office of the Secretary of Defense, $4.5 billion for the Army, $4.3 billion for the Navy, and $4.6 billion for the Air Force; and provides a lump-sum item under the head of proposed legislation which, if fully approved by the Congress, would require provision of approximately $830 million additional.

The cash appropriation request detailed in this budget totals $13.2 billion. Of this sum $1.9 billion are required to liquidate obligations authorized in prior years, leaving $11.3 billion of the cash appropriations available for new obligations. In addition to the new obligational authority

Federal Reserve Bank of St. Louis

of $11.3 billion, there is provided also the sum of $2 billion in the form of contract authority for new obligations.

Proposed legislation would require approximately $645 million in cash appropriations and $185 million additional in contract authority.

The budget estimates for civil functions administered by the department of the Army including the Panama Canal total approximately $765 million of annual specific appropriations. In addition, $1 billion is estimated for a proposed supplemental appropriation for "Government and relief in occupied areas/'

The budget programs of the Office of the Secretary of Defense and of the three departments which comprise the National Military Establishment are detailed in statements which follow.

OFFICE OF THE SECKETAEY OF DEFENSE

The Secretary of Defense, under the National Security Act of 1947, sets the objectives, determines the policies and formulates the basic programs of the National Military Establishment and supervises its operation as a whole through exercise of general direction, authority, and control over its component parts. The Joint Chiefs of Staff and Joint Staff, the War Council, the Munitions Board, and the Research and Development Board, created under title II of the National Security Act, perform specific statutory functions and advise and assist the Secretary in the performance of his functions.

(a) Immediate office of the Secretary.—Certain duties must be performed in the immediate office of the Secretary—generally those which cut across all substantive fields or which involve all components of the National Military Establishment and cannot be performed appropriately by one or more of the statutory staff agencies. The Secretary likewise has need for immediate staff assistance in the performance of his duties under the National Security Act of 1947. Included in these duties is the resolution of problems requiring coordination of action among components of the Establishment or decision at the level of the Secretary of Defense. Substantive fields covered include budget, public information, accounting, progress reporting and statistics, personnel, legislative, legal, renegotiation, inspection, and medical. In addition, the Secretary is responsible for determining the interrelationship of various programs and organizations and for guiding agencies within the National Military Establishment in their relations with other Government agencies.

(b) War Council.—The War Council is responsible for advising the Secretary of Defense on matters of broad policy relating to the armed forces and other matters as directed. The Council includes the Secretary of Defense as Chairman, togetherlwith the Secretaries of the Army, the Navy, and the Air Force, the Chiefs of Staff of the Army and the Air Force and the Chief of Naval Operations. Its staff work is performed within the immediate office of the Secretary.

(c) Joint Chiefs of Staff and Joint Staff.—The Joint Chiefs of Staff, as principal military advisers to the President and the Secretary, are responsible for preparing strategic plans; providing strategic direction of the military forces; for preparing joint logistic plans and assigning logistic responsibilities as required. The Joint Chiefs of Staff establish command unification in strategic areas; review major material and personnel requirements; formulate policy for coordinating education and training for the military forces, and perform such other duties as the President and the Secretary of Defense may direct. The Joint Chiefs of Staff provide the United States representatives on the Military Staff Committee of the United Nations.

The Joint Staff is responsible for performance of staff work and other detailed duties as assigned by the Joint Chiefs of Staff.

(d) Munitions Board.—The Munitions Board has statutory responsibility to coordinate all activities of the National Military Establishment relating to industrial matters, including procurement, production, and distribution. It must plan military aspects of industrial mobilization and assign procurement responsibility. The Secretary has directed the Munitions Board also to: plan standardization of specifications; determine relative priorities for procurement programs based upon Joint Chiefs of Staff strategic direction; assist in evaluating logistic feasibility of estimates of procurement, production, and personnel, and coordinate the National Military Establishment cataloging program. The Board has also been assigned other duties including direction of the work of the Standards Agency and the Cataloging Agency and is acting to secure elimination of duplication and overlapping in procurement, supply, transportation, and storage and health services throughout the National Military Establishment.

(e) Research and Development Board.—The Research and Development Board is responsible for advising the Secretary of Defense concerning the status of scientific research relating to the national security, and for assisting him in assuring adequate provision for such research and development. This Board must recommend measures necessary to coordinate research and development within the military departments, and must allocate among them responsibility for specific programs. It is responsible for preparing an integrated program of military research and development, worked out with reference to the technical objectives and strategic concepts of the National Military Establishment. This necessarily involves coordination of programs and plans with agencies outside the Establishment, and considering general trends of scientific research. The Board advises the Joint Chiefs of Staff concerning interaction of research and development and strategy.

The budget of the Office of the Secretary of Defense, including the War Council, the Joint Chiefs of Staff and the Joint Staff, the Munitions Board, with its Cataloging Agency and Standards Agency, and the Research and Development Board, provides for all necessary expenses except the pay and allowances of military personnel. Appropriation requirements for fiscal year 1950 are $11,050,000.

DEPARTMENT OF THE AIR FORCE

The Department of the Air Force was established as an executive department of the National Military Establishment by the National Security Act of 1947, approved July 26, 1947.

The United States Air Force, established under the Department by the same act, is composed of the Regular Air Force, the Air Reserve, the Air National Guard, and the Air Reserve Officers' Training Corps, and includes air combat and service forces. The National Security Act requires the Air Force to be organized, trained, and equipped for prompt and sustained offensive and defensive combat operations in the air. Of the three major services in the National Military Establishment, the Air Force has primary responsibility for defending the United States against air attack; for gaining and maintaining

general air supremacy; for defeating enemy air forces; for formulating joint doctrines and procedures in coordination with other services for the defense of the United States against air attack; for providing the necessary units, equipment, and facilities for strategic air warfare; for providing Air Force forces for joint amphibious and airborne operations; and for furnishing close combat and logistical air support of the Army.

The estimate included herein provides $4,554 billion of new obligational authority to carry out responsibilities of the United States Air Force during the fiscal year 1950. Of this amount, $1,415 billion is in the form of contract authority and the remainder, $3,139 billion in cash. In addition, provision has been made for funds in the amount of $800 million to liquidate prior years' contract authority, and $75 million to liquidate obligations incurred under "Air Corps, Army, 1942-1946." A portion of the amount for proposed legislation for fiscal year 1950 would, if such legislation is enacted, be provided for the Air Force.

This is the first estimate in which all direct costs of the United States Air Force are budgeted for by the Department of the Air Force. Certain indirect costs will remain the responsibility of the Department of the Army, which, consistent with the economy objectives of unification, will render common services like those at general hospitals in the care of Air Force sick and at ports of embarkation in moving Air Force personnel to and from overseas destinations. By the same token, comparable services are rendered by the Department of the Air Force which benefit directly the United States Army, such as training of liaison pilots and furnishing air lift for cargo and personnel.

The establishment of the Department of the Air Force as a separate entity has afforded an opportunity to present its estimates under an appropriation structure designed to portray operational requirements of the United States Air Force on a functional basis. Consequently, costs related to military personnel, construction, maintenance and operation of installations and of aircraft, each of the civilian components, and procurement of aircraft are included under a single appropriation title. These estimates for the several activities are based upon a program for providing the planned Air Force not only in terms of aircraft operations, but also in terms of supporting equipment and manpower necessary to round out a well-balanced force. The importance of this balance cannot be overemphasized because new models of aircraft being introduced into a modern force would prove useless without the other support contemplated in these estimates.

Under the appropriation title "Military personnel requirements" $1,201 million has been estimated for the pay, clothing, and subsistence for an average military strength of 412,273. This strength will be distributed throughout the world at home and abroad. Included within this strength is 28,973 man-years' service of special category Army personnel on duty with the Air Force.

The procurement of aircraft and related equipment has been phased in accordance with established objectives of modernizing the Air Force. Toward this end, $1,480 million in obligational authority for the procurement of 1,669 aircraft have been provided in this estimate.

Funds for the maintenance and operation of an active inventory of 9,217 aircraft will permit the flying of approximately 4.2 million hours, thus assuring the proper training and state of readiness of Air Force flying personnel. Requirements for the complete physical support of aircraft in use have been provided for in terms of maintenance parts, fuel, depot repair facilities, and modifications at current levels.

The estimates for the civilian components contemplate emphasis upon a higher degree of training. The manpower, experience, and interest of the civilian components will be utilized to the fullest degree, in accordance with the President's announced policy. The estimates of funds for the fiscal year 1950 have been increased over those of the current year by nearly 35 percent to insure the build-up of the Air National Guard force; an Air Force Reserve which will provide personnel for any expansion of the Air Force in an emergency; the establishment of a vigorous training program averaging 125 flying hours per year for the pilots in the Air National Guard and 100 hours per year for pilots in the Air Force Reserve; the inactive duty training in drill pay status of 49,500 in the Air National Guard and 67,512 in the Air Force Reserve; an increase to 63,000 Air Reserve Officers' Training Corps students enrolled at 139 universities and colleges; and the formation of efficient support forces to complement a planned force in being.

DEPARTMENT OF THE ARMY

MILITARY ACTIVITIES

Under the National Security Act of 1947, the Department of the Army is charged with the primary responsibility of organizing, equipping, training, and maintaining the Army as well as furnishing indirect support to the Air Force. The Department of the Army consists of the Regular Army, the National Guard of the United States, the National Guard while in the service of the United States, and the Organized Reserves. In fiscal year 1949 the Department of the Army budgeted for all expenses incident to the Air Force, including the Air Reserve and the Air National Guard, except for the procurement, operation, maintenance, design, testing, overhaul, and repair of aircraft and related aeronautical materiel and equipment, salaries in the Office of Secretary of the Air Force, and salaries in the Office of the Chief of Staff, United States Air Force. In fiscal year 1950 the Department of the Army is budgeting for its own requirements and indirect support of the Air Force attributable to certain common and cross-servicing as mutually agreed upon between the two services. All direct costs of the Air Force such as pay, subsistence, clothing, maintenance, operation, education, upkeep of quarters and airfields are now included in the Air Force budget for fiscal year 1950.

The Department of the Army estimates for fiscal year 1950, including indirect support of the Air Force, contemplate the appropriation of $4.5 billion, exclusive of cash required to liquidate prior year contract authorizations. Of the lump-sum item for proposed legislation, a portion, not yet determined in amount, would be available for the Army when appropriated.

More than 40 percent of this total budget will provide for the pay, allowances, subsistence, clothing, and other military personnel costs of a beginning and end strength of 677,000 (of which approximately 270,000 will be overseas) during fiscal year 1950. The funds provided for civilian components, $356 million, will support a National Guard with an end strength of 350,000, an Organized Reserve strength of approximately 230,000 receiving drill pay and the 134,500 students in senior units of Reserve Officers' Training Corps.

The balance of the funds are estimated to cover the requirements for operation, training, maintenance, and

Federal Reserve Bank of St. Louis

equipment of this strength and the facilities related thereto in the United States and overseas.

The operations of the Ordnance Department and the procurement of weapons, vehicles, and other ordnance matériel required to carry forward a modernization program, as well as the rebuilding, rehabilitation, and maintenance of existing equipment, will require nearly $688 million.

Funds provided for transportation of personnel, supplies, and equipment, both within the United States and overseas, are in the amount of $364,000,000. Funds amounting to $157,390,000 are for the operations of the Signal Corps, including maintenance of essential communication systems of the Army in the United States and to and within overseas bases. The estimate of $68,031,000 would provide medical service and hospitalization, procurement of medical supplies, operation of medical facilities for the Army and general hospital facilities for both the Army and the Air Forces. Chemical Corps activities will require $36,301,000.

The sum of $317,595,000 is included to enable the Corps of Engineers to carry out its military operations and provide for maintenance of active facilities and installations of the Army. The amount of $11,737,000 cash appropriation is included to complete construction of some projects for which authorizing legislation has previously been passed by the Congress.

Other varied military functions such as special field exercises, National War College, maintenance and operation of United States Military Academy, contingent expenses, and departmental activities will require the remaining 2.7 percent of the funds requested.

CIVIL FUNCTIONS

The civil functions of the Department of the Army consist of a group of activities indirectly related to the active Military Establishment and are presented under a separate head in the Budget to distinguish them from the strictly military activities of the Army.

Quartermaster Corps,— The Secretary of the Army has the responsibility for acquiring land for and maintaining national cemeteries and marking the graves of veterans. These activities have been delegated to the Quartermaster General and are financed by the appropriation "Cemeterial expenses." The allowance of $5,620,000 for fiscal year 1950 provides for the maintenance and operation of national cemeteries. Funds already available will provide for the continuation and ultimate completion of the return of the dead from the Second World War, including expenses in connection with the return of an unknown American from the Second World War.

Signal Corps.—The Signal Corps maintains a communication system in Alaska and between Alaska and the United States for transmission of long distance commercial and Government communications. The System connects with approximately 300 telephone and radio stations in Alaska. The Alaska Communication System plans to operate 41 stations in Alaska and 1 in Seattle during 1950, the same number as in 1949.

For the first time, all the costs of the System are provided in the appropriation, "Alaska Communication System." A construction program for rehabilitation and modernization of the System initiated in 1949 will be continued during 1950. The amount of $3,114,000 is included for operation and maintenance of the System and $3,561,000 in the form of a proposed supplemental for construction.

Corps of Engineers.—The Corps of Engineers, under the supervision of the Secretary of the Army, is responsible for maintenance and improvement of the rivers, harbors, and waterways of the Nation in the interest of navigation, control of floods, and related hydroelectric power development. The estimates of general and special appropriations in 1950 total $754,423,700, including $20,000,000 for the St. Lawrence seaway and power project under proposed legislation, as compared with actual appropriations in 1949 totaling $580,635,950.

Navigation works.—The amount of $146,934,100 is included in the 1950 Budget for improvement of which $144,934,100 is for construction and $2,000,000 for advance planning. The amount of $75,000,000 is also included for normal maintenance and operation of completed works. In addition, $1,200,000 is included for surveys, $1,600,000 for transfer to the Fish and Wildlife Service, primarily for fish conservation activities in the Columbia River Basin, and $4,440,000 for continuing activities and provisions for the various boards.

Flood control.—In 1917 the Corps of Engineers, in compliance with an act of Congress, extended its work in connection with rivers and harbors to include the undertaking of flood-control works on the lower Mississippi River and the Sacramento River, Calif.

The authorization for appropriation for flood protection and improvement of navigation in the lower Mississippi River is $1,038,309,500 exclusive of maintenance, of which $411,283,972 remains to be provided. The amount of $70,000,000 in the 1950 Budget provides for continuance of the improvement project at the minimum rate consistent with effecting substantial completion thereof in fiscal year 1957, and for maintenance of the navigation channel and flood-control works.

The Federal cost of the Sacramento River flood-control project is $42,600,000, of which $36,195,000 has been appropriated. The amount of $4,000,000 in the 1950 budget provides for continuation of construction on the project with a view to completion thereof in fiscal year 1951.

In 1936 Congress adopted a national flood-control policy and assigned responsibility for Federal investigations and improvements in connection therewith to the Corps of Engineers. The amount of $419,002,600 is included in the 1950 Budget for improvement of which $412,502,600 is for construction, $3,500,000 for planning, $1,000,000 for snagging, $1,000,000 for emergency bank repairs, and $1,000,000 for small unauthorized works of an urgent nature. In addition, $4,000,000 is included for maintenance, operation, and repair of completed works, $5,000,000 for surveys, and $2,285,000 for continuing activities.

Veterans hospitals.—The Veterans Administration has arranged to have the Corps of Engineers, United States Army, assume responsibility for preparation of plans and construction of certain new hospitals. It is estimated that expenditures by the Corps of Engineers for this program will be $179 million in fiscal year 1950.

Government and relief in occupied areas.—The cost of government and relief in occupied areas including economic rehabilitation for Japan and the Ryukyu Islands is estimated at $1,000,000,000. This amount is $300,000,000 less than the amount provided in fiscal year 1949. The reduction is accounted for by the transfer of responsibility for programs in Korea to the Economic Cooperation Administration and also reflects the increased agricultural and manufacturing production in bizonal Germany. The details of this estimated appropriation will be submitted at a later time.

THE PANAMA CANAL

Appropriations for the Panama Canal provide funds for the maintenance and operation of the Panama Canal and for sanitation and government of the Canal Zone. While the summary table shows an increase in appropriations of $2,362,187 for 1950, this does not reflect the actual work load in the Canal Zone. The total gross obligations for 1950 are estimated at $65,285,566 compared with $71,294,409 in 1949, a decrease of $6,008,843. The total reimbursements and receipts (exclusive of tolls and revenues covered directly into the Treasury) are estimated at $43,684,617 in 1950 compared with $44,229,000 in 1949, a drop of $544,383. This leaves a total net obligation for 1950 of $21,600,949 compared with $27,065,409 in 1949, a decrease of $5,464,460. Revenues covered directly into the Treasury are estimated at $23,161,436 in 1950 and $23,597,458 in 1949, a decrease of $436,022.

DEPARTMENT OF THE NAVY

The administration of the fundamental naval policy of the United States is carried out by the Department of the Navy and by other parts of the Naval Establishment.

The Department of the Navy is comprised of the Office of the Secretary, the Office of the Chief of Naval Operations, the Bureaus of Naval Personnel, Aeronautics, Ships, Ordnance, Medicine and Surgery, Yards and Docks, Supplies and Accounts, Office of the Judge Advocate General, and the headquarters of the United States Marine Corps.

The Secretary of the Navy is responsible through the Secretary, of Defense to the President for the supervision and direction of all naval affairs and activities. By virtue of the National Security Act of 1947 he is a member of the National Security Council and of the War Council.

The Secretary is assisted by the Under Secretary, the Assistant Secretary for Air, the Assistant Secretary and the administrative assistant to the Secretary. Each of these civilian executive assistants has been assigned certain specific phases of the Navy Department's activities for which he is responsible, as well as general supervision of certain of the offices which comprise the Executive Office of the Secretary. These are the Office of Budget and Reports, Office of Industrial Relations, General Board, Office of Naval Research, Office of the General Counsel, Office of Public Relations, Office of Naval Material, Office of Industrial Survey, Office of the Fiscal Director, and the Office of the Management Engineer.

In addition to his civilian assistants the Secretary is aided by a staff of military advisers and military administrative assistants including the Chief of Naval Operations, the Vice Chief of Naval Operations and five Deputy Chiefs of Naval Operations, the Director of Budget and Reports, the chiefs of seven bureaus, the Commandant of the Marine Corps, the Chief of Naval Research, the Judge Advocate General, and the chairman of the General Board.

The Chief of Naval Operations exercises military command over all naval operating forces and is responsible for their use in war and for plans and preparations for their readiness for war in peacetime. Under the direction of the Secretary of the Navy, he is charged with the preparation, readiness, and logistic support of the operating forces, and with the coordination and direction of effort to this end of the bureaus and offices of the Department of the Navy. He is a member of the War Council and the Joint Chiefs of Staff.

In carrying out the responsibilities of his office, the Chief of Naval Operations is assisted by the Vice Chief and five Deputy Chiefs of Naval Operations. The Vice Chief of Naval Operations is the assistant and principal adviser to the Chief of Naval Operations and succeeds to command in the absence of the Chief of Naval Operations.

The budget of the Naval Establishment for fiscal year 1950 provides new obligational authority totaling $4,347,352,000, excluding trust and permanent accounts. This obligational authority includes a cash appropriation of $3,703,806,000 and contract authorization for new obligations totaling $643,546,000. The total of general and special appropriations requested, $4,497,523,200, includes $791,000,000 of appropriations to liquidate contract authority granted in prior years. A portion of the item under proposed legislation would, if made available, be provided for the support of the Naval Establishment.

Of the new obligational authority, more than one-third, $1,502,297,000, is for pay, subsistence, transportation, training, education, welfare, and medical care of naval personnel (including personnel of the Naval Reserve). It would provide for an average pay strength of 439,474 (including 14,103 Naval Reservists on full-time active duty with the Naval Reserve program).

For the maintenance and operation of the fleet, including repairs, equipage, supplies, and fuel for vessels, ordnance and ordnance stores, freight charges, and upkeep of the shore establishments supporting the fleet, $1,105,327,000, 25.4 percent of the total is the estimated requirement.

The obligational authority provided directly for naval aviation, exclusive of the support of aviation activities from other funds (such as for pay, maintenance, and construction of facilities, etc.) $1,196,756,000 is 27.5 percent of the budget.

The shipbuilding program is estimated at $52,300,000, 1.2 percent and public-works construction at $38,210,000, or less than 1 percent, respectively, of the total of the new obligational authority.

The Marine Corps estimates account for 7.6 percent of the total budget or $329,345,000. This estimate is based on an assumption of an average Marine Corps pay strength of 85,716. This includes a total of 2,821 Marine Corps Reservists on full-time active duty in connection with the Marine Corps Reserve program.

The funds provided for civilian components will support an end strength of 290,274 receiving drill pay in organized units of the Naval Reserve and Marine Corps Reserve, 14,632 students in the Naval Reserve Officers' Training Corps, and 4,311 other officer candidates in summer training camps.

The remainder of the budget, totaling $123,117,000, or 2.8 percent consists of appropriations for miscellaneous expenses, departmental salaries, and other small appropriations.

AIR NATIONAL GUARD

Air National Guard, Department of the Air Force—

For pay, allowances, clothing, subsistence, transportation (including mileage, actual and necessary expenses, or per diem in lieu thereof), medical and hospital treatment and related expenses, for members of the Air National Guard while on active duty undergoing training or while performing drills or equivalent duty, as authorized by law; travel expenses (other than mileage), on the same basis as authorized by law for Air National Guard personnel on active Federal duty, of Air National Guard commanders while inspecting units in compliance with National Guard regulations when specifically authorized by the Chief, National Guard Bureau; establishment, maintenance, operation, repair, and other necessary expenses of facilities for the training and administration of the Air National Guard, either on Government-owned land or on land made available by lease or loan from any State or political subdivision thereof or any individual, corporation, or organization, for a period of not less than ten years, including construction of facilities, and additions, extensions, alterations, improvements, and rehabilitation of existing facilities; maintenance, operation, and modification of aircraft; personal services at the seat of government and elsewhere; transportation of things; purchase (not to exceed thirty-nine) and hire of passenger motor vehicles; procurement and issue to the Air National Guard of the several States, Territories, and the District of Columbia of supplies, materials, and equipment, as authorized by law; and expenses incident to the maintenance and use of supplies, materials, and equipment furnished from stocks under the control of the Air Force; $115,000,000: Provided, That the number of caretakers authorized to be employed under the provisions of law (82 U. S. C. 1+2) may be such as is deemed necessary by the Secretary of the Air Force: Provided further, That the appropriations in this Act shall not be available for the pay, allowances, or travel of any member of the Air National Guard or Air Force Reserve for periods of active duty, training, drills, instruction, or other duty for which he may be entitled to receive compensation pursuant to any provisions of law, who may be drawing a pension, retirement pay, disability allowance, disability compensation, or retired pay (where retirement has been made on account of physical disability or age) from the Government, but nothing in this proviso shall be so construed as to prevent the application of funds to the pay, allowances, or travel of any member of the Air National Guard or Air Force Reserve who may waive or relinquish said pension, retirement pay, disability allowance, or disability compensation (where such disability is of such degree as not to prevent acceptance for active Federal duty), for the periods of active duty, field training, instruction, other duty, or drill, for which he may be entitled to receive compensation pursuant to law, and adjutants general who may be drawing such emoluments may be continued in a federally recognized status without pay under this Act. GENERAL PROVISIONS, DEPARTMENT OF THE AIR FORCE

*SEC. 1. Appropriations for the Air Force for the current fiscal year shall be available for expenses of temporary duty travel of military personnel and for travel expenses of civilians (other than on permanent change of station) traveling in connection with the activities of the Air Force. **

SEC. 2. During the current fiscal year, the dependents and household goods of such military and civilian personnel (without regard to rank or grade) of the Air Force on duty at stations outside the continental limits of the United States, or in Alaska, as may be determined upon by the Secretary of the Air Force, may, prior or subsequent to the issuance of orders for the relief of such personnel from their stations, or subsequent to the discharge or release of such military personnel from active military service, be moved from such stations outside the continental limits of the United States, or in Alaska, to such locations as may be designated by such personnel, by the use of either Government or commercial means of transportation, and later from such locations to the duty stations to which such personnel may be ordered, the decision of the Secretary of the Air Force to be final as to the dependency of any individual sought to be affected by this provision except as to travel performed subsequent to arrival in the United States.

SEC. 3. Appropriations available for travel of military and civilian personnel of the Air Force which are current on date of relief from duty station of such personnel traveling under orders shall be charged with all expenses in connection with such travel, including transportation of dependents and household goods, regardless of the dates of arrival oi destination of such personnel.

SEC. 4' Appropriations for the Air Force for the current fiscal year s hall be available for carrying out the purposes of Executive Order 9112 of March 26, 1942; printing and binding; payments in advance of expenses, determined by the investigating officer to be necessary and in accord with local custom, for conducting investigations in foreign countries incident to matters relating strictly to the Air Force; insurance of official motor vehicles in foreign countries when required by law of such countries; and health programs as authorized by law (5 U, S. C. 150).

SEC. 5. During the current fiscal year, without deposit to the credit of the Treasurer of the United States and withdrawal on money requisitions, receipts of public moneys from sales or other sources by officers of the Air Force on disbursing duty and charged in their official accounts may be used by them as required for current expenditures, all necessary bookkeeping adjustments of appropriations, funds, and accounts to be made in the settlement of their disbursing accounts.

SEC. 6. During the current fiscal year the Secretary of the Air Force is authorized to procure services in accordance with section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), but at rates for individuals not in excess of $50 per day.

SEC, 7. During the current fiscal year provisions of law prohibiting the payment of compensation to or employment of any person not a citizen of the United States shall not apply to military and civilian personnel of the Air Force.

SEC. 8. Section 8648, Revised Statutes^ shall not apply to payments made from appropriations contained in this Act in compliance with the laws of foreign countries or their ministerial regulations, to payments for rent in such countries for such periods as may be necessary to accord with local custom, or to payments made for tuition.

No part of any appropriation contained in this Act shall be used to pay the salary or wages of any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: Provided, That for the purposes hereof an affidavit shall be considered prima facie evidence that the person making the affidavit has not contrary to the provisions of this section engaged in a strike against the Government of the United States, is not a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or that such person does not advocate, and is not a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: Provided further, That any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence and accepts employment the salary or wages for which are paid from any appropriation in this Act shall be guilty of a felony and, upon conviction, shall be fined not more than $1,000 or imprisoned for not more than one year, or both: Provided further, That the above penalty clause shall be in addition to, and not in substitution for, any other provisions of existing law.

SEC. 10. No part of any money appropriated herein or included under any authority herein granted to enter into contracts or incur obligations shall be expended for the payment of any commission on any land purchase contract in excess of 2 per centum of the purchase price.

SEC. 11. The Secretary of the Air Force is authorized to utilize any appropriation available in this Act for the Air Force, under such regulations as he may prescribe, for expenses incident to the maintenance, pay, and allowances of prisoners of war, other persons in Air Force custody whose status is determined by the Secretary of the Air Force to be similar to prisoners of war, and persons detained in Air Force custody pursuant to Presidential proclamation.

SEC. 12. The appropriations contained in this Act which are available for the procurement or manufacture of supplies, materials, and equipment of special or technical design may be used for the development and procurement of gages, dies, jigs, and other special aids and appliances, production studies, factory plans, and other production data, including specifications and detailed drawings, as authorized by law (50 U. S. C. 78, 80); such appropriations may also be used for the purchase of letters patent, applications for letters patent, and licenses under letters patent and applications for letters patent that pertain to such supplies, equipment, and materials for which the appropriations are made.

SEC. 18. During the current fiscal year, the limitation imposed by section 14 of the Federal Employees' Pay Act of 1946 (5 U. S. C. 947g) shall not apply to the Air Force.

SEC. 14. After June 80, 1949, (1) services, work, supplies, materials, and equipment may be rendered or supplied by one department or organization within the National Military Establishment to another such department or organization without reimbursement or transfer of funds; and (2) the pay and allowances, including transportation of dependents and household goods on a reimbursable or other basis, as authorized by law, of military, naval, or civilian personnel of one department or organization of such establishment detailed or assigned to duty with another such department or organization, may be charged to the appropriations otherwise available for such purposes to the department or organization to which detailed or assigned.

SEC. 15. When personnel of the Air Force are ordered to make any permanent change of station, motor vehicles owned by them for their personal use (not to exceed one vehicle per person), may be transported to their new posts of duty on Government-owned vessels.

SEC. 16. The Secretary of the Air Force is authorized to expend out of Air Force appropriations available for construction or maintenance such amounts as may be required for minor construction (except living quarters), extensions to existing structures, and improvements at Air Force facilities, but the cost of any project authorized under this section which is not otherwise authorized shall not exceed $80,000: Provided, That during the current fiscal year, appropriations for the Air Force shall not be obligated for construction of family quarters for personnel at a cost per family unit in excess of $14,040, except that when such units are constructed outside the continental United States the average cost per unit of all such units shall not exceed $19,660.

SEC. 17. After June 80, 1949, no appropriation contained in this or any other Act shall be available for payment of rental or quarters allowances to personnel of the services mentioned in the title of the Pay Readjustment Act of 1942 for any periods during which they occupy, with their dependents, if any, quarters under the jurisdiction (for rental purposes) of any of such services.

Permanent appropriation, special account:

Payments From Proceeds of Sales, Motor-Propelled Vehicles, Etc., Department of the Army—

Under the act of August 2, 1946, proceeds of sales of vehicles, equipment, accessories and other items, the exchange of which is authorized by law, may be applied in whole or in part payment toward the purchase of similar items. Receipts from this source are set up in a special appropriation account, available for the fiscal year in which the obligation to purchase new equipment is incurred; any unobligated balance is subsequently adjusted to miscellaneous receipts (5 U. S. C. 118d-l).
