Grants for Hospital Construction, Public Health Service—

Grants for hospital construction: For liquidation of contractual obligations authorized by the Congress to be incurred during the fiscal year 1948 or any subsequent fiscal year for construction grants under part C, title VI, of the Act, as amended, [$40,000,000] *$20,000,000*, to remain available until expended. Allotments under such part C to the several States for the *current* fiscal year [1949] shall be made on the basis of $75,000,000, a part of the sum authorized to be appropriated for [the] *that* fiscal year [1949]. Whenever the Surgeon General shall have approved an application for a construction project in accordance with section 625 of the Act, subject to the amount of the allotments available to the States for such purposes, the Federal share of the cost of such project, as provided by the Act, shall constitute a contractual obligation of the Federal Government. (*Labor-Federal Security Appropriation Act, 1949.*)

EXPLANATORY STATEMENT

The Federal Works Agency deals with public works not incidental to the normal work of other executive establishments and administers various Federal grants or loans to State and local governments or other agencies for planning and construction of public works.

Under the general supervision and coordination of the Federal Works Administrator, the Federal Works Agency handles public works through three constituent bureaus: the Public Buildings Administration, the Public Roads Administration, and the Bureau of Community Facilities.

The over-all estimates under existing legislation for the fiscal year 1950 reflect little change from appropriations for 1949.

OFFICE OF THE ADMINISTRATOR

The Office of the Administrator provides general supervision, policy direction, and coordination of all of the activities of the Agency.

Provision is made for assisting the Administrator in the performance of these objectives by a small technical staff with responsibilities covering each of the important programs and administrative functions at the staff level in order to develop, establish, and assure uniformity of policies and procedures throughout the Agency. The estimate for 1950 provides for the same staff as the 1949 appropriation.

PUBLIC BUILDINGS ADMINISTRATION

This constituent bureau performs functions related to Federal public buildings and sites in respect to design and construction; lease, purchase, and custody; survey, planning, and control of space; repair, preservation, maintenance, and management of certain buildings occupied by the Government and properties included in the national industrial reserve; communication services (for various Government agencies); and the administration of surplus real property.

The Commissioner of Public Buildings is authorized to maintain a survey of the use of certain Government-

owned and leased office space in the larger metropolitan centers and the District of Columbia and to study and determine the extent to which consolidation, reassignment, and reallocation of office space would be advantageous to the Government. The Commissioner is also authorized to direct and prescribe the economical use of space in buildings operated by the Public Buildings Administration.

The appropriation for general administrative expenses provides the personnel for performing the functions summarized in the first paragraph.

The appropriation for repair, preservation, and equipment of public buildings outside the District of Columbia, involving some 5,300 buildings, provides for normal items of alteration and repair necessary to keep buildings in usable and efficient operating condition and for accomplishing a portion of the extensive backlog of deferred building maintenance. It provides also for the salaries and expenses of employees engaged in force-account operations and construction engineers engaged in supervision and inspection of project activities.

The appropriation for salaries and expenses for public buildings and grounds in the District of Columbia and adjacent area provides for the administration, management, operation, maintenance, protection, repair, and improvement of public buildings and grounds in the District of Columbia and the area adjacent thereto. The operation includes both Government-owned and leased buildings and, in addition, provides for the management and operation of communications facilities for use of other governmental activities. The estimate contemplates the management of 37,630,000 gross square feet of Government-owned space and 2,267,370 net square feet of leased space under direct appropriations.

The appropriation for salaries and expenses for public buildings and grounds outside the District of Columbia provides for the administration, management, operation, maintenance, and protection of public buildings and grounds outside the District of Columbia. The operation includes both Government-owned and leased buildings and, in addition, provides for the management and operation of communications facilities and space and related service activities serving other governmental agencies. The estimate contemplates the management of 19,620,000 gross square feet of Government-owned space and 7,463,000 net square feet of leased space under direct appropriations. It includes an item for the rent, operation, maintenance, and protection of 3,509,000 square feet of space operated on a reimbursable basis during the fiscal year 1949. It is intended that funds be made available under this appropriation for the item in the 1950 fiscal year. Appropriate adjustments have been made in the appropriation estimates which included these expenses in the 1949 fiscal year.

Under the provisions of Public Law 883, Eightieth Congress, a new program has been assigned to the Public Buildings Administration involving the establishment of a nucleus of Government-owned industrial plants and a national reserve of machine tools and industrial manufacturing equipment to supply essential needs in time of national emergency. The estimate for 1950 contemplates the transfer of 45 plants to the reserve by July 1, 1949, and it is anticipated that an additional 10 plants will be transferred during the 1950 fiscal year. The bulk of machine tools and equipment will probably be placed in the reserve by July 1, 1949.

The total cash estimate of $10,875,000 for construction activities during the 1950 fiscal year is limited to the liquidation of the existing contract authorization for the Geophysical Institute in Alaska and a portion of existing contract authorizations for the General Accounting Office and Federal Courts Buildings in the District of Columbia.

PUBLIC ROADS ADMINISTRATION

This constituent bureau, in cooperation with the highway departments of the States, the District of Columbia, Hawaii, and Puerto Rico, is responsible for the approval and designation of highway systems and for the approval and supervision of programs of construction designed to develop and improve such systems. The postwar highway program is approaching the annual rate authorized by the Congress. The volume of Federal-aid highway construction in the various States is being controlled largely by the availability of highway engineers to supervise the program and the capacity of the available contracting organizations. Priority is given to most urgently needed improvements but unreasonably high bids are rejected.

Estimates of appropriations for the Federal-aid highway programs supervised by the Public Roads Administration represent cash required under the authority of previously approved contract authorizations to reimburse the States for the Federal share of the cost of work that is accomplished. With the exception of small balances of prewar authorizations, the Federal-aid program is being financed from funds authorized by the Federal-Aid Highway Acts of 1944 and 1948. The 1944 act, approved December 20, 1944, authorized for appropriation the sum of $500,000,000 annually for each of the three successive postwar fiscal years. The apportionment for each of the three postwar fiscal years has been made, the third one being made May 12, 1947. The Federal-Aid Highway Act of 1948, approved June 29, 1948, provided for continuing the construction and reconstruction of highways in accordance with the provisions of the Federal-Aid Highway Act of 1944 and authorized to be appropriated for each of the fiscal years 1950 and 1951 the sum of $450,000,000. The sum authorized for the fiscal year 1950 was apportioned among the States on September 1, 1948, as provided by the 1948 act, for three classes of highways, as follows:

Forty-five percent for projects on the Federal-aid highway system.

Thirty percent for projects on a designated system of secondary and feeder roads, including farm-to-market roads, rural free delivery mail and public-school bus routes.

Twenty-five percent for projects on the Federal-aid highway system in urban areas.

The estimate of $400,000,000 provides for the anticipated cash requirements for the fiscal year 1950. This estimate, together with prior appropriations, leaves $250,000,000 to be appropriated in subsequent years under the authorizations made for the first three postwar fiscal years in the Federal-Aid Highway Act of 1944 and $900,000,000 authorized in the Federal Aid Highway Act of 1948.

The active Federal-aid program, as of November 1, 1948, provides for the improvement of 33,259 miles of highway, the construction of 408 highway-railroad grade separations, and the protection of 841 highway-railway crossings. The estimated total cost of this work is $1,830,606,000, of which $926,632,000 is the Federal share. These totals include programed projects for which plans were not yet approved, amounting to $611,908,000 in total cost and $313,228,000 in Federal funds.

The estimate of appropriations for forest highways has been transferred from the budget of the Department of Agriculture to the Public Roads Administration as provided in the Federal-Aid Highway Act of 1948. Authorizations of appropriations for forest highways which are connecting links in the national transportation system have always been provided for in Federal-aid highway authorizing legislation. The Federal-Aid Highway Act of 1944 authorized to be appropriated the sum of $25,000,000 annually for each of the three successive postwar fiscal years. The Federal-Aid Highway Act of 1948, which authorized to be appropriated $20,000,000 for each of the fiscal years 1950 and 1951, canceled the third postwar fiscal year authorization. Current authorizations which have been apportioned among the States amount to $70,000,000. The authorization of contract authority provided for in the Federal-Aid Highway Act of 1948 permits the planning and timing of improvements on the forest highway system in relation to current improvements on the Federal-aid highway systems.

The estimate of $23,500,000 of which $7,500,000 is to liquidate prior contract authority provides for improvements to the forest highway system at approximately the rate authorized by the Congress. This estimate, together with prior appropriations, leaves $3,900,000 to be appropriated under the authorization made in the Federal-Aid Highway Act of 1944 and $40,000,000 authorized in the Federal-Aid Highway Act of 1948.

The highway activities of the Public Roads Administration, in addition to the Federal-aid and forest highway programs, include cooperation with other Federal agencies in the design and construction of main roads in Alaska, in national forests and in and to the national parks, and cooperation with the Central American Republics in the design and construction of the Inter-American Highway. In cooperation with the State Department, the Public Roads Administration is also engaged in cooperative highway programs with the Philippine Republic and with Turkey. The highway program in the Philippine Republic provides for the rehabilitation and restoration of highways and bridges in the Philippine Islands destroyed or damaged during the war. Assistance and advice is being furnished Turkey in establishing a long-range highway improvement program and in establishing a pattern for highway administration on a national scale.

BUREAU OF COMMUNITY FACILITIES

This constituent bureau administers programs assigned to the Agency in the field of public works which are not under the jurisdiction of the other two constituent bureaus.

Currently assigned to this organization are the final payment and repayment incident to a program involving some 7,000 repayable advances of Federal funds to non-Federal public bodies for preparation of plans for locally financed public works; construction of public works in the Virgin Islands under an authorized 5-year program; maintenance and disposal of almost 450 remaining Federal properties constructed or acquired under the war-related community facilities program; assistance, until June 30, 1949, in the maintenance and operation of certain school facilities; provision of equipment, etc., from Federal surpluses, to assist educational institutions furnishing courses of training or education to veterans; loan or transfer of surplus Federal personal property to aid State and local governments to alleviate damage caused by flood or other catastrophe; grants for the restoration of public works in the Territory of Hawaii, which were damaged by the seismic waves of April 1946, and work preliminary to the initiation of the water-pollution-control program under which grants are authorized for the plan preparation of sewage-treatment works for the control of interstate waters and tributaries, and loans for the construction of such works.

The estimate of $500,000 for the fiscal year 1950 provides funds below the authorized rate for the initiation of the program of making grants to States, municipalities, or interstate agencies to aid in financing the cost of work preliminary to the $120,000,000 5-year program authorized to aid construction of sewage-treatment works necessary to abate water pollution; the estimate of $150,000 is for administrative expenses incident to activities arising out of the Water Pollution Control Act. The estimate of $800,000 for the fiscal year 1950 provides funds for the initiation or continuation of high-priority projects under the Virgin Islands public-works program. This latter estimate, together with appropriations heretofore made, provides for 57.5 percent of the $10,028,420 program authorized for this purpose. It is proposed that all other activities of this bureau for the fiscal year 1950 will be financed from available balances of prior-year appropriations or reappropriations.

SUMMARY TABULATION

In the "Comparative Summary of Appropriations and Appropriation Estimates" under the head "Supplementals required (forecast)" opposite Public Buildings Administration the $14,909,000 includes in addition to $4,934,000 for pay increases, $975,000 for increased cost of coal, electricity and rentals in connection with office space requirements in the District of Columbia, $4,000,000 for repairs to the Executive Mansion, and $5,000,000 for the national industrial reserve to liquidate a like amount of contract authorization granted for 1949. Opposite Bureau of Community Facilities the $2,000,000 is in addition to an appropriation of $3,000,000 for maintenance and operation of schools. Opposite "Additional appropriations under proposed legislation (forecast)" the $14,400,000 includes $7,400,000 for the construction of a building at Suitland, Md., primarily to accommodate the Census Bureau, $5,000,000 for disaster relief, and $2,000,000 to initiate a program of public works in Alaska.

The provisions of section 322 of the Act of June 30, 1932, as amended (40 U. S. C. 278a), shall not apply to any lease entered into by, or transferred to, the Public Buildings Administration for the housing of activities specifically exempted from the provisions of the said Act, as amended.

Under the appropriations for salaries and expenses, public buildings and grounds in and outside the District of Columbia, *and for national industrial reserve,* per diem employees may be paid at rates approved by the Commissioner of Public Buildings not exceeding current rates for similar services in the place where such services are employed, and such employees in emergencies may be entered on duty subject to confirmation by the Federal Works Administrator.

The appropriations for salaries and expenses, public buildings and grounds in and outside the District of Columbia, shall be available for [printing and binding and for] communication services serving one or more governmental activities, and for services to motor vehicles, and where such services, together with quarters, maintenance, or other services, are furnished on a reimbursable basis to any governmental activity, such activity shall make payment therefor promptly by check upon the request of the Public Buildings Administration, either in advance or after the service has been furnished, for deposit to the credit of the applicable appropriation, of all or part of the estimated or actual cost thereof, as the case may be, proper adjustment upon the basis of actual cost to be made for services paid for in advance.

Costs of maintenance, upkeep, and repair paid by Government corporations pursuant to section 306 of the Government Corporations Appropriation Act, 1948, shall be credited to the appropriations of the Public Buildings Administration bearing such costs.

Funds available to the Public Buildings Administration shall also be available for health-service programs as authorized by law (5 U. S. C. 150). (*Independent Offices Appropriation Act, 1949.*)

Forest Highways, Public Roads Administration—

Forest highways: For expenses necessary for carrying out the provisions of section 23 of the Federal Highway Act of November 9, 1921, as amended (23 U. S. C., 23, 23a), in accordance with section 3a of the Federal-Aid Highway Act of 1948 (Public Law 834, approved June 28, 1948), to be available immediately and to remain available until expended, $23,500,000, which sum is composed of $2,400,000, the remainder of the amount authorized by section 9 of the Federal-Aid Highway Act of 1944 (58 Stat. 842) to be appropriated for the first postwar fiscal year and $21,100,000, a part of the amount authorized by said section to be appropriated for the second postwar fiscal year; and of which total amount $7,500,000 is for payment of obligations incurred under authority granted in the appropriation for "Forest roads and trails" under the Department of Agriculture in the Second Deficiency Appropriation Act, 1948: Provided, That any unexpended balances of amounts appropriated for forest highways under "Forest roads and trails" under the Department of Agriculture which are transferred to the Public Roads Administration shall be consolidated with this appropriation.

Estimate 1950, [a] **$23,500,000**

[a] Estimate is for activities previously carried under "Forest roads and trails, Department of Agriculture." The amounts obligated in 1948 and 1949 are shown in the schedule as comparative transfers.

EXPLANATORY STATEMENT

FUNCTIONS OF THE DEPARTMENT

The Department of Agriculture is charged with the responsibility of carrying on agricultural activities and programs concerned with rural people and with production, processing, and distribution of food and fiber in the United States and its possessions, and for the relationship of such activities and programs to those of other countries.

The functions performed relate to agricultural research, education, marketing, regulatory work, conservation, and agricultural adjustment. Research is conducted in the fields of plant and livestock breeding and production, agricultural chemistry and engineering, manufacture and industrial uses of farm products, marketing, soils and soil conservation, entomology, human nutrition, and home economics. It makes research results available for practical farm application through extension and experiment station work in cooperation with the States. The Department provides crop reports, commodity standards, Federal meat inspection service, and other marketing services. It seeks to control or eradicate plant and animal diseases and pests. It administers more than 50 regulatory laws designed to protect the farmer and consuming public. It encourages the efficient use of soils and forests and promotes rural rehabilitation. It guarantees farmers a fair price and a stable market through commodity loans and marketing quotas. It also provides agricultural credit, assists tenants to become farm owners, and facilitates the electrification of rural areas.

THE 1950 BUDGET

Total general and special appropriation estimates for the fiscal year 1950 are $102.1 million more than the estimates for 1949. This increase is due chiefly to increases of $126 million for conservation and use of agricultural land resources (AAA program), $5.1 million for the Research and Marketing Act, and $4 million for flood control, offset in part by a transfer of the 1950 estimate for forest highways to the Public Roads Administration, the liquidation of a backlog of sugar payments to Puerto Rican producers, a decrease in permanent appropriation estimates, and the provisions for financing fighting forest fires and the foot-and-mouth-disease control program in Mexico by supplemental appropriations.

The 1950 estimates provide for an absorption of about 45 percent of the approximately $17 million of pay act costs and for full absorption of within-grade salary advancements estimated at $1.8 million.

OFFICE OF THE SECRETARY AND STAFF AGENCIES

The work of the Department is directed and supervised by the Secretary of Agriculture, who is assisted by an under secretary and an assistant secretary. The staff

officers include the chief of the Bureau of Agricultural Economics, the director of finance, the director of foreign agricultural relations, the director of information, the director of personnel, the chief of the office of plant and operations, the solicitor, and the chief hearing examiner, each of whom heads an office which helps coordinate, facilitate, and provide staff services for the activities of the Department. Also included under this head is the Office of the Administrator of the Research and Marketing Act of 1946. The Library provides library facilities for the entire Department, and to other agencies throughout the Federal establishment.

The 1950 estimates provide for an increase of $5.1 million for additional research under the Research and Marketing Act. Printing and binding estimates under the Office of Information have been decentralized for 1950 by including such costs under the various bureaus and offices.

EXTENSION SERVICE

Extension work is conducted on a cooperative basis. The Department and the land-grant colleges in the 48 States, Alaska, Hawaii, and Puerto Rico agree on extension plans of work under which outside-the-classroom educational programs are carried on in rural communities. County agricultural, home-demonstration, and 4–H club agents are located in the Territories and in nearly all of the agricultural counties of the States. These extension agents make available to farmers, farm homemakers, and rural youth the results of research conducted by the Department of Agriculture, the land-grant institutions, and other research agencies, adapted to local farm and home conditions. During the past year, as a direct result of the influence of extension workers, 4,600,000 farm families and 2,000,000 nonfarm families were reported to have made some change in farm or home practices. Enrollment in 4–H clubs increased 9 percent over the preceding year to a total of 1,760,000 rural boys and girls.

Federal funds available for payments to States and Territories in 1949, amounting to $30.7 million, will be matched by $35.2 million of State and local funds. A continuation during 1950 of the 1949 level of activities is contemplated.

AGRICULTURAL RESEARCH ADMINISTRATION

The Agricultural Research Administration comprises six Bureaus, the Office of Experiment Stations and the Agricultural Research Center at Beltsville, Md. The Office of the Administrator is responsible for the coordination of all research in the Department, other than economic research; for the administration of the special research fund; and for the general planning and coordination of the research and regulatory activities of all of the agencies of the Administration. In addition to its research activities, the Administration seeks to control or eradicate animal and plant diseases and insect pests through sound control measures and direct eradication programs, and to prevent the outbreak or spread of destructive diseases and insects by enforcing quarantine regulations. Strict quarantines apparently have prevented the citrus blackfly from invading the country from Mexico and the oriental fruitfly from entering continental United States from Hawaii. By an active control program in Mexico carried on cooperatively by the Administration and the Mexican Government and by rigid quarantine measures the foot-and-mouth disease thus far has been prevented from spreading into the United States. The Administration also provides a Federal meat-inspection service to insure the wholesomeness of meat and meat food products.

Small increases have been provided for additional research work on strategic and critical materials and for general agricultural research in Alaska. A decrease of about $2.4 million is comprised of reductions for nonrecurring items, completed or partially completed projects, deferment of the National Arboretum development program, elimination of the Remount Service, and increased absorption in 1950 of pay act costs. The $15.8 million apparent reduction for the Bureau of Animal Industry will be offset by an estimated $15 million supplemental in 1950 for financing the foot-and-mouth-disease program in Mexico.

CONTROL OF FOREST PESTS

Under this head are the white pine blister rust and gypsy moth control programs and other forest pest control activities provided for under the Forest Pest Control Act of 1947. The importance of controlling forest diseases and insects is indicated by the substantial timber losses caused by these pests, estimated at over $20 million annually. A slight decrease below available funds for 1949 is indicated for 1950.

FOREST SERVICE

The Forest Service administers 152 national forests, comprising over 180 million acres in 40 States and Alaska and Puerto Rico. It improves them, protects them from fire, insects, and disease, and manages their resources for orderly and continuous service and for the maintenance of stable economic conditions of the Nation in national forest communities. Technical methods of forestry are applied to the growing and harvesting of timber. Livestock grazing is regulated to obtain range conservation along with use of the annual growth of forage. Watersheds are managed for the regulation of stream flow; reduction of flood damage and soil erosion; and the protection of sources of water for power, irrigation, navigation, and municipal and domestic supply. Provision is made for popular outdoor recreation. Scientific management is applied to the development and maintenance of wildlife resources. In forest and range experiment stations and in the Forest Products Laboratory at Madison, Wis., the Forest Service conducts investigations in the field of forestry and wild-land management, including the growth, protection, and harvesting of timber, management of range lands, efficient utilization of forest products, and research in forest economics and forest influences. It is conducting a forest survey to determine the Nation's present and potential forest resources. The Forest Service cooperates with States and private owners of forest lands in the application of sound forest-management practices and in the maintenance of organized protection of forest lands against fire.

The Forest Service took action to control 11,225 forest fires during calendar year 1947, of which 6,815 were man-caused and 4,410 were caused by lightning. The total area burned over amounted to 254,413 acres, approximately the average of the past 5 years. Campgrounds and picnic and winter sports areas were visited by 10,506,000 people. During fiscal year 1948 trees were planted on over 33,000 acres of denuded lands, and 50,650 acres of depleted national forest range land were reseeded. Receipts from the sale of timber amounted to $20.6 million, grazing fees amounted to $2.9 million, and other revenues amounted to $743,000.

Excluding supplementals for fighting forest fires and for emergency construction and repairs made necessary by the 1948 floods in the Northwest, the 1950 estimates are approximately the same as for 1949.

FLOOD CONTROL

This program consists of flood control activities on watersheds specifically authorized by the Congress. Surveys are conducted to determine the feasibility of watershed treatment for water-flow retardation and erosion prevention in the interest of flood control. On the basis of these surveys control operations are authorized by Congress. Preliminary examinations and surveys have been completed on 164 watersheds or portions of watersheds out of a total of more than 600 which have been authorized. The Congress has approved programs of watershed improvement work on 11 watersheds which call for a total estimated Federal cost of approximately $120 million. The cumulative Federal obligations through 1949 for improvement work are estimated at approximately $12.2 million. Because of experience with this work since 1946, the stage has now been reached where a well-planned program can be carried out efficiently at a stepped-up rate, and because local cooperation is available proportionately, $10 million is recommended for 1950 as compared to the $6 million appropriated for 1949.

SOIL CONSERVATION SERVICE

The soil conservation program is operating to bring about adjustments in land use that will conserve soil and water, establish a permanent and balanced agriculture, reduce the hazards of floods and sedimentation, and better human welfare. In cooperation with soil conservation districts and other Federal and State agencies, the program includes planning individual farms and ranches, group facilities for the use and disposal of water as it affects the land, and the application of conservation practices on the different kinds of land in accordance with their needs and capabilities as shown by land classification surveys. More than 50 conservation practices have been developed. Among the more common practices are contouring, strip cropping, terracing, farm drainage, and irrigation improvements, crop rotations, and conservation management of range and woodlands. Soil Conservation Service technicians work directly with farmers and ranchers in soil conservation districts, organized under State laws and operated under local farmer direction. As of July 1, 1948, a total of 2,033 districts had been organized, including more than 1 billion acres and approximately 4.5 million farms.

In cooperation with other Federal research agencies, State agricultural experiment stations, and interested organizations, the Service conducts a research program designed to develop and improve soil- and water-conservation practices in support of its field operations.

Submarginal agricultural lands not primarily suitable for cultivation, purchased by the Government in past years, are being improved and managed to bring about needed land-use adjustments. These lands, approximately 7 million acres, are improved primarily for grazing and forestry. Permits are granted to farmers and ranchers to graze or otherwise use the lands under specific use conditions. For the calendar year 1947, the income from these permits amounted to $833,756, 25 percent of which was paid to the counties within which the projects are located. The payments are in lieu of taxes.

No material change in the level of operations of the Soil Conservation Service is contemplated for 1950.

PRODUCTION AND MARKETING ADMINISTRATION

Included under this head are the annual appropriations for conservation and use of agricultural land resources (the AAA program), the Sugar Act, the national school-lunch program, and marketing service activities; and the permanent appropriation for exportation and domestic consumption of agricultural commodities (sec. 32).

The 1949 appropriation act authorized an AAA program for the crop year 1949 of $262.5 million to be financed in 1950. The estimates include that amount, plus $27.5 million for administering additional acreage allotments and marketing quotas. For the crop year 1950, an authorization of $262.5 million is recommended, including administration of acreage allotment and marketing quota work. For the latter work in 1949, a supplemental of $14 million is contemplated. A reduction of $7 million in the estimate for the Sugar Act represents the approximate amount by which the 1949 appropriation was increased to take care of a backlog of payments to Puerto Rican sugar producers. Provision is made for a continuation of a $75 million Federal school-lunch program financed by section 32 funds. Small increases are provided under marketing services to enable the Administration to carry out mandatory provisions of the Packers and Stockyards Act and the Cotton Classing Act.

Section 32 funds (an amount equal to 30 percent of customs receipts of the previous calendar year) amounted to $132.9 million for fiscal year 1949. Due to the reduction in customs receipts, section 32 funds are estimated at $125 million for 1950. In addition to the school-lunch program, these funds finance purchases of agricultural commodities for distribution to authorized agencies, indemnity payments to encourage exports of agricultural commodities, the diversion of commodities to byproducts and new uses, and the administration of agricultural marketing agreements and orders.

COMMODITY EXCHANGE AUTHORITY

The authorized functions under this act are designed to prevent price manipulation and corners affecting agricultural commodities; to prevent dissemination of false and misleading crop and market information influencing prices; to insure trust-fund treatment of margin moneys and prevent the misuse of such funds by brokers; and to provide information to the public regarding trading operations on contract markets. During the past year nearly 9 million transactions took place involving nearly $50 billion. Activities of the Commodity Exchange Authority consist of licensing futures commission merchants and floor brokers, promulgation of rules, supervision of trading, auditing accounts, and compliance investigations.

FARMERS' HOME ADMINISTRATION

The Farmers' Home Administration is authorized to (1) make direct farm ownership loans up to the normal value of a farm and necessary improvements at 4 percent interest, loans to be amortized over 40-year periods; (2) insure 40-year farm ownership loans made by private lenders up to 90 percent of the normal value of the farm and necessary improvements at 3 percent interest plus a 1 percent insurance charge; and (3) make production and subsistence loans up to $3,500 for 1 to 5 years at 5 percent interest for buying livestock, seed, farm equipment, and

other farm needs. Water facilities loans also are made by the Administration in 17 Western States under authority of the Water Facilities Act of 1937.

From the beginning of the direct farm ownership program in fiscal year 1938 through the fiscal year 1948, a total of over 57,000 families, including those purchasing economic resettlement project farms, had received loans amounting to $330 million for the purchase, enlargement and development of family type farms. Since inception of the program, over $138 million of principal and over $34 million of interest have been repaid, and more than 16,000 borrowers have paid their loans in full. About 27,000 active borrowers are ahead of schedule with advance payments aggregating over $23 million. Liquidations since inception of the program are estimated to result in a net loss to the Government of about $103,000 or less than one-fortieth of 1 percent of the total loans made.

The insured mortgage program was started in October 1947. Activity was limited during the 1948 fiscal year partly because private lenders in many areas were reluctant to advance loans due to the relatively long period of the loan, the lack of a secondary market, and the original 2½ percent interest rate. Only 352 farm ownership loans for $2,490,910 were insured during the fiscal year 1948. With passage of Public Law 720, approved June 19, 1948, which increased the interest rate to 3 percent and gave lenders an assured market by authorizing sale of nondelinquent mortgages to the Government after a period of not less than 5 years, these early problems are relieved and substantially more loans should be insured during the fiscal year 1949.

Production and subsistence loans authorized by the Farmers' Home Administration Act of 1946 have been made since November 1, 1946. Through the fiscal year 1948, 250,714 loans aggregating $121,390,080 have been made. During the same period $44,776,000 of principal and $1,893,000 of interest have been repaid. Supervisory assistance in planning and carrying out sound farm and home operations is provided farm ownership and production and subsistence borrower families on the basis of their individual problems and needs. The production and subsistence loans replace the annual emergency crop and feed and rural rehabilitation loans made by predecessor agencies.

From 1935 through October 31, 1946, loans aggregating $1 billion of the rural rehabilitation type were made by the predecessors of Farmers' Home Administration to over 1 million farm families for livestock, equipment, and other farm needs. Farm supervisors helped these families plan their farming and put the plans into practice. Principal repayments on these loans have amounted to approximately 88 percent of maturities. Annual emergency crop and feed loans made by the Farm Credit Administration and predecessor agencies from 1918 through October 31, 1946, amounted to $576 million of which 80 percent has been repaid.

RURAL ELECTRIFICATION ADMINISTRATION

The Rural Electrification Administration is authorized to finance through loans the construction of electric facilities to serve rural people who do not have central station electric service. Loans are made at 2 percent, to be amortized over periods not to exceed 35 years. Through fiscal year 1948, loan funds totaling $1,475 million had been authorized, of which $1,381 million had been allocated to borrowers for the construction of 930,000 miles of rural lines and other facilities to serve approximately 2.8 million consumers. Total repayments of principal and interest had amounted to over $150 million, including $19 million of repayments made ahead of schedule. The continued demand for electricity by unserved rural families is evidenced by the number of applications for loans filed during the past summer involving an average rate exceeding $49 million a month. A new loan authorization of $350 million is recommended which, with an unused 1949 loan authorization estimated at $119 million, will provide a loan program of $469 million for 1950.

FEDERAL CROP INSURANCE CORPORATION

Under the Federal Crop Insurance Act the Corporation was provided with an authorized capital stock of $100 million. All capital stock has been purchased by the Secretary of the Treasury. Public Law 320, approved August 1, 1947, placed the crop-insurance programs on all crops on a restricted, experimental basis. Program improvements and favorable weather conditions enabled the Corporation to show a net profit of $9.3 million for fiscal year 1948. A small increase in the administrative expense appropriation will allow the Corporation to expand its present experimental program in the counties in which it now operates.

COMMODITY CREDIT CORPORATION

An increase in 1950 of $1.2 million in administrative expense limitation is due to an estimated increase in price support activities. The narrative and financial statements reflecting operations of the Corporation are presented under the Department of Agriculture business-type budget, part III of the Budget.

ANTICIPATED SUPPLEMENTALS UNDER EXISTING LEGISLATION

The foot-and-mouth disease control and eradication program in Mexico is currently financed by the Commodity Credit Corporation. Toward the end of each fiscal year a supplemental appropriation estimate is submitted to provide for reimbursing that Corporation, estimated at $15 million for each of the years 1949 and 1950. A 1950 supplemental estimated at $4 million will be submitted to cover the costs of fighting forest fires by the Forest Service.

ADDITIONAL APPROPRIATIONS UNDER PROPOSED LEGISLATION

Provision is made for a 1949 supplemental appropriation for flood control in the amount of $5 million upon approval by the Congress of the flood-control survey report for the Missouri River Basin now in preparation. There are provided in 1950 a supplemental appropriation estimate of $5.2 million for grants and administrative expenses and a loan authorization of $25 million to finance the proposed farm housing program.

There also is provided in 1950 a supplemental appropriation estimate of $225,000 for administrative expenses incident to the proposed international wheat agreement.

Working Capital Fund, Department of Agriculture—

The Department of Agriculture Appropriation Act, 1944, established a working capital fund of $400,000, without fiscal year limitation, for financing, on a reimbursement basis, central duplicating, photographic, tabulating, motor-transport, and supply services for the Department, and such other services as the Secretary, with the approval of the Director of the Bureau of the Budget, determines may be performed more advantageously as central services. Advances are made from this fund for operation of these services, pending reimbursement from applicable funds of bureaus and agencies at rates so computed as to make the services completely self-sustaining and maintain the integrity of the original fund (5 U. S. C. 542–1).

[PRINTING AND BINDING]

Printing and Binding, Department of Agriculture—

[For printing and binding for the Department, including all of its bureaus, offices, institutions, and services, except as otherwise provided, $1,800,000, including the purchase of reprints of scientific and technical articles published in periodicals and journals; the Annual Report of the Secretary, as required by the Acts of January 12, 1895 (44 U. S. C. 111, 212–220, 222, 241, 244), March 4, 1915 (7 U. S. C. 418), and June 20, 1936 (5 U. S. C. 108), and in pursuance of the Act approved March 30, 1906 (44 U. S. C. 214, 224), also including not to exceed $250,000 for farmers' bulletins, which shall be adapted to the interests of the people of the different sections of the country, an equal proportion of four-fifths of which shall be delivered to or sent out under the addressed franks furnished by the Senators, Representatives, and Delegates in Congress, as they shall direct, but not including work done at the field printing plants of the Forest Service authorized by the Joint Committee on Printing, in accordance with the Act approved March 1, 1919 (44 U. S. C. 111, 220); and including not to exceed $207,000 for printing and binding not less than two hundred thirty thousand eight hundred and fifty copies for the use of the Senate and House of Representatives of part 2 of the annual report of the Secretary (known as the Yearbook of Agriculture), as authorized by section 73 of the Act of January 12, 1895 (44 U. S. C. 241): *Provided*, That the Secretary may transfer to this appropriation from the appropriation made for "Conservation and Use of Agricultural Land Resources" such sums as may be necessary for printing and binding in connection with marketing quotas under the Agricultural Adjustment Act of 1938 (7 U. S. C. 1281–1407), from funds appropriated to carry into effect the purposes of the National School Lunch Act approved June 4, 1946 (Public Law 396), such sums as may be necessary for printing and binding in connection with the activities under said Act, and from funds appropriated to carry into effect the terms of section 32 of the Act of August 24, 1935 (7 U. S. C. 612c), as amended, such sums as may be necessary for printing and binding in connection with the activities under section 32: *Provided further*, That the total amount that may be transferred under the authority granted in the preceding proviso shall not exceed $145,000.] (*Department of Agriculture Appropriation Act, 1949.*)

AGRICULTURAL RESEARCH ADMINISTRATION

OFFICE OF ADMINISTRATOR

Salaries and Expenses, Office of Administrator, Agricultural Research Administration—

Salaries and expenses: For necessary expenses of the Office of Administrator, including the salary of the Administrator at [$10,000] *$10,330* per annum, and personal services in the District of Columbia, and for the maintenance, operation, and furnishing of facilities and services at the Agricultural Research Center, [$406,300] *$414,400*: *Provided*, That the appropriation current at the time services are rendered may be reimbursed (by advance credits or reimbursements based on estimated or actual charges) from applicable appropriations, to cover the charges, including handling and other related services, for equipment rentals (including depreciation, maintenance, and repairs); for services, supplies, equipment and materials furnished, stores of which may be maintained at the Center, and for building construction, alteration, and repair performed by the Center in carrying out the purposes of such applicable appropriations and the applicable appropriations may also be charged their proportionate share of the necessary general expenses of the Center not covered by this appropriation: *Provided further, That of the several appropriations of the Agricultural Research Administration, not to exceed $15,000 shall be available for employment pursuant to the second sentence of section 706 (a) of the Organic Act of 1944 (5 U. S. C. 574), as amended by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a): Provided further*, That the several appropriations of the Agricultural Research Administration shall be available for the construction, alteration, and repair of buildings and improvements: *Provided, however*, That unless otherwise provided, the cost of constructing any one building (excepting headhouses connecting greenhouses) shall not exceed $5,000, the total amount for construction of buildings costing more than $2,500 each shall be within the limits of the estimates submitted and approved therefor, and the cost of altering any one building during the fiscal year shall not exceed $2,500 or 2 per centum of the cost of the building as certified by the Research Administrator, whichever is greater. *(5 U. S. C. 511–512, 673; Department of Agriculture Appropriation Act, 1949.)*

Annual specific appropriation:

Appropriated 1949, **$406,300** Estimate 1950, [a] **$414,400**

[a] Includes $5,100 for activities previously carried under "Printing and binding, Department of Agriculture." The amounts obligated in 1948 and 1949 are shown in the schedule as comparative transfers.

ERADICATION OF FOOT-AND-MOUTH AND OTHER CONTAGIOUS DISEASES OF ANIMALS

Eradication of Foot-and-Mouth and Other Contagious Diseases **of Animals and Poultry, Agricultural Research Administration**—

For expenses necessary, including personal services in the District of Columbia, in the arrest and eradication of foot-and-mouth disease, rinderpest, contagious pleuropneumonia, or other contagious or infectious diseases of animals, or European fowl pest and similar diseases in poultry, including the payment of claims growing out of past and future purchases and destruction of animals (including poultry) affected by or exposed to, or of materials contaminated by or exposed to, any such disease, wherever found and irrespective of ownership, under like or substantially similar circumstances, when such owner has complied with all lawful quarantine regulations; and for foot-and-mouth disease and rinderpest programs undertaken pursuant to the provisions of the Act of February 28, 1947 ([Public Law 8, Eightieth Congress] *21 U. S. C. Supp. 1, 114b-114d),* and the Act of May 29, 1884, as amended (7 U. S. C., 391; 21 U. S. C, 111-122), including expenses in accordance with section 2 of said [Public Law 8] *Act of February 28, 1947,* the Secretary may transfer from other appropriations or funds available to the bureaus, corporations, or agencies of the Department such sums as he may deem necessary, to be available only in an emergency which threatens the livestock or poultry industry of the country, and any unexpended balances of funds transferred under this head in the *next preceding* fiscal year [1948] shall be merged with such transferred amounts: *Provided,* That, except for payments made pursuant to said **[Public** Law 8] *Act of February 28, 194-7,* the payment for such animals hereafter purchased may be made on appraisement based on the meat, egg-production, dairy, or breeding value, but in case of appraisement based on breeding value no appraisement of any such animal shall exceed three times its meat, egg-production, or dairy value, and, except in case of an extraordinary emergency, to be determined by the Secretary, the payment by the United States Government for any such animals shall not exceed one-half of any such appraisements: *Provided further,* That poultry may be appraised in groups when the basis for appraisal is the same for each bird.

[Eradication of foot-and-mouth and other contagious diseases of animals: For an additional amount, fiscal year 1948, for "Eradication of foot-and-mouth and other contagious diseases of animals", $25,400,000, to enable the Secretary of Agriculture to make repayment to the Commodity Credit Corporation for amounts transferred pursuant to authority under this head in the Department of Agriculture Appropriation Act, 1948, as amended by the Supplemental Appropriation Act, 1948.] *(21 U. FARM AND OTHER PRIVATE FORESTRY COOPERATION

Farm and Other Private Forestry Cooperation, Department of Agriculture—

To enable the Secretary through the Forest Service to advise timberland owners and associations, wood-using industries or other appropriate agencies in the application of forest management principles to federally owned lands leased to States and to private forest lands, so as to attain sustained-yield management, the conservation of the timber resources, the productivity of forest lands, and the stabilization of employment and economic continuance of forest industries, and to carry into effect, through such agencies of the Department as he may designate, the provisions of the Cooperative Farm Forestry Act, approved May 18, 1937 (16 U. S. C. 568b), (not to exceed [$660,0343 *$665,034)* and the provisions of sections 4 (not to exceed $83,700) and 5 (not to exceed $65,766) of the Act approved June 7, 1924 (16 U. S. C. 567-568), and Acts supplementary thereto; in all, not to exceed [$809,500] *$814,500,* of which not to exceed [$54,636] *$58,953* may be expended for personal services in the District of Columbia [; and not to exceed $30,000 for the construction, alteration, or purchase of necessary buildings, and other improvements]. *(16 U. S. C. 564, 568a, 581; Department of Agriculture Appropriation Act, 1949.)*

Appropriated 1949, **$809,500** Estimate 1950, ° **$814,500**

° Includes $5,000 for activities previously carried under "Printing and binding, Department of Agriculture." The amounts obligated in 1948 and 1949 are shown in the schedule as comparative transfers.

NOTE.—There are available as a credit to this appropriation collections from States of their share of the cost of providing technical timber management services to owners of private forest land.

Permanent appropriation, general account:

Payments to School Funds, Arizona and New Mexico, National Forests Fund—

The act of June 20, 1910, appropriates, out of any money not otherwise appropriated, an amount equal to such proportion of the gross proceeds (during each fiscal year) of all the national forests within the States of Arizona and New Mexico as the area of land granted to the States for school purposes within these forest reserves bears to the total area of all national forests within the two respective States. The appropriation is recorded and paid, in the fiscal year following that in which the money was received, to each such State as income for its common school fund (36 Stat. 562, 573).

Appropriated (estimate) 1949, **$55,000** Estimate 1950, **$55,000**

Obligations: 11 Grants, subsidies, and contributions—1948, $49,218; 1949, $55,000; 1950, $55,000.

Permanent appropriations, special accounts:

Payments to States and Territories From the National Forests Fund—

The act of May 23, 1908, appropriates 25 percent of the net revenues during any fiscal year from each national forest, to be paid at the end of such year to the State or Territory in which the forest is situated, for the benefit of the public schools and public roads of such county or counties, and the act of June 22, 1948 (Public Law 733), appropriates three-fourths of 1 percent of the appraised value of certain designated national forest lands within the boundaries of the Superior National Forest, Minn., to be paid to the State of Minnesota for distribution to the counties in which these lands are located (16 U. S. C. 500).

Appropriated (est.) 1949, **$5,995,000** Estimate 1950, **$5,995,000**

Obligations: 11 Grants, subsidies, and contributions—1948, $4,576,760; 1949, $5,995,000; 1950, $5,995,000.

Cooperative Work, Forest Service—

All moneys received as contributions toward cooperative work in forest investigations, the protection and improvement of the national forests, and the protection, reforestation, and administration of private lands, including deposits received from timber purchasers to cover the cost to the United States of (1) disposing of brush and other debris resulting from cutting operations in sales of national forest timber, (2) sale-area betterment through planting, sowing, and timber stand improvement, and (3) scaling services requested by purchasers in addition to those required by the Forest Service, are covered into the Treasury and constitute a special fund, which is appropriated and made available until expended, as the Secretary of Agriculture may direct, for the payment of such expenses by the Forest Service, and, except for deposits by purchasers of national forest timber under 16 U. S. C. 576b, for refunds to the contributors of amounts paid in by them in excess of their share of the cost of such expenses (16 U. S. C. 490, 498, 572, 572a, 576b, 581; 31 U. S. C. 725s).

SOIL CONSERVATION SERVICE

SALARIES AND EXPENSES

Salaries and Expenses, Soil Conservation Service—

For expenses necessary to carry out the provisions of the Act approved April 27, 1935 (16 U. S. C. 590a-590f), which provides for a national program of erosion control and soil and water conservation, including not to exceed [$856,750] *$958,000* for personal services in the District of Columbia, furnishing of subsistence to employees, operation and maintenance of aircraft, and the purchase and erection or alteration of permanent buildings: *Provided,* That the cost of any building purchased, erected, or as improved, exclusive of the cost of constructing a water supply or sanitary system and connecting the same with any such building, shall not exceed $2,500 except where buildings are acquired in conjunction with land being purchased for other purposes and except for eight buildings to be constructed at a cost not to exceed $15,000 per building: *Provided further,* That no money appropriated in this Act shall be available for the construction of any such building on land not owned by the Government: *Provided further,* That in the State of Missouri where the State has established a central State agency authorized to enter into agreements with the United States or any of its agencies on policies and general programs for the saving of its soil by the extension of Federal aid to any soil conservation district in such State, the agreements made by or on behalf of the United States with any such soil conservation district shall have the prior approval of such central State agency before they shall become effective as to such district, as follows: *(5 U. S. C. 511-512—establishing the Department of Agriculture; 565a; 7 U. S. C. 1387; 16 U. S. C. 590a-590f—establishing the Soil Conservation Service; 590q-l. The foregoing citations apply to all appropriation items under the Soil Conservation Service; Department of Agriculture Appropriation Act, 1949.)*

Soil conservation research: For research and investigations into the character, cause, extent, history, and effects of erosion, soil and moisture depletion and methods of soil and water conservation (including the construction and hydrologic phases of farm irrigation and land drainage, and water regulation to conserve the soil and reduce fire hazards in the Everglades region of Florida, except that expenditures for all work in the Everglades region shall be limited to a sum not in excess of funds made available for such work by the State of Florida, or political subdivisions thereof); and for construction, operation, and maintenance of experimental watersheds,

PRODUCTION AND MARKETING ADMINISTRATION

CONSERVATION AND USE OF AGRICULTURAL LAND RESOURCES

Conservation and Use of Agricultural Land Resources, Department of Agriculture—

For expenses necessary to enable the Secretary to carry into effect the provisions of sections 7 to 17, inclusive, of the Soil Conservation and Domestic Allotment Act, approved February 29, 1936, as amended (16 U. S. C. 590g-590q), and the provisions of the Agricultural Adjustment Act of 1938, as amended (7 U. S. C. 1281-1407) (except the provisions of sections 201, 202, 303, 381, and 383 and the provisions of titles IV and V), including personal services in the District of Columbia; not to exceed $6,000 for the preparation and display of exhibits, including such displays at State, interstate, and international fairs within the United States; [$150,000,000] *and for the replacement of one passenger motor vehicle for use of the Production and Marketing Administration; $290,000,000,* to remain available until December 31 [, 1949,] *of the next succeeding fiscal year* for compliance with programs under said provisions of the Agricultural Adjustment Act of 1938, as amended, and the Act of February 29, 1936, as amended, pursuant to the provisions of the [1948] *1949* programs carried out during the period July 1, [1947] *1948,* to December 31, [1948] *1949,* inclusive: *Provided,* That not to exceed [$24,500,000] *$57,500,000* of the total sum provided under this head shall be available during the current fiscal year, for salaries and other administrative expenses for carrying out [such programs, including the tobacco and peanut-marketing quota programs] *the agricultural conservation program formulated under the provisions of the Act of February 29, 1936, as amended, and other programs with respect to any commodity for which the Secretary may establish acreage allotments or proclaim marketing quotas pursuant to the provisions of the Agricultural Adjustment Act of 1938, as amended,* the cost of aerial photographs, however, not to be charged to such limitation; but not more than [$7,000,000] *$11,000,000* shall be transferred to the appropriation account, "Administrative expenses, section 392, Agricultural Adjustment Act of 1938": *Provided further,* That payments to claimants hereunder may be made upon the certificate of the claimant, which certificate shall be in such form as the Secretary may prescribe, that he has carried out the conservation practice or practices and has complied with all other requirements as conditions for such payments and that the statements and information contained in the application for payment are correct and true, to the best of his knowledge and belief, under the penalties of the Act of March 4, 1909, as amended (18 U. S. C. 80): *Provided further,* That none of the funds herein appropriated or made available for the functions assigned to the Agricultural Adjustment Agency pursuant to the Executive Order Numbered 9069, of February 23, 1942, shall be used to pay the salaries or expenses of any regional information employees or any State or county information employees, but this shall not preclude the answering of inquiries or supplying of information to individual farmers: *Provided further,* That such amount shall be available for salaries and other administrative expenses in connection with the formulation and administration of the [1949] *1950* programs (amounting to $262,500,000, including administration, and formulated on the basis of a distribution of the funds available for payments and grants among the several States in accordance with their conservation needs as determined by the Secretary: *Provided further,* That the proportion allocated to any State shall not be reduced more than 15 per centum from the 1946 distribution and that no participant shall receive more than $750) of soil-building practices and soil- and water-[conservation~*conserving* practices, under the Act of February 29, 1936, as amended, and programs under the Agricultural Adjustment Act of 1938, as amended; but the payments or grants under such program shall be conditioned upon the utilization of land with respect to which such payments or grants are to be made, in conformity with farming practices which—will encourage and provide for soil-building and soil- and-water-conserving practices in the most practical and effective manner and adapted to conditions in the several States, as determined and approved by the State committee appointed pursuant to section 8 (b) of the Soil Conservation and Domestic Allotment Act, as amended for the respective States: *Provided further,* That the Secretary may, in his discretion from time to time transfer to the General Accounting Office such sums as may be necessary to pay administrative expenses of said Office in auditing payments under this item: *Provided further,* That such amounts shall be available for the purchase of seeds, fertilizers, lime, trees, or any other farming materials, or any soil-terracing services, and making grants thereof to agricultural producers to aid them in carrying out farming practices approved by the Secretary under programs provided for herein: *Provided ^further,* That the Secretary is authorized and directed to make payments to farmers who complied with the terms and conditions of the agricultural conservation programs, formulated pursuant to sections 7 to 17, inclusive, of the Soil Conservation and Domestic Allotment Act, as amended, if the Secretary determines that, because of induction into the armed forces of the United States, such farmers failed to file, or were prevented from filing, applications for payment under any such program during the period the applicable appropriation for such program was available for obligation, such payments to be made out of the unobligated balance of the appropriation, "Conservation and use of agricultural land resources", in the Department of Agriculture Appropriation Act, 1946: *Provided further,* That an application for payment on the prescribed form is filed by any such farmer (or the person entitled to payment in case of death, disappearance, or incompetency of the farmer under regulations issued pursuant to section 385 of the Agricultural Adjustment Act of 1938, as amended (7 U. S. C, 1940 edition, 1385)) within one year from the date of his discharge from the armed forces, or by December 31, 1948, whichever is later: *And provided"! further,* That no part of any funds available to the Department, or any bureau, office, corporation, or other agency constituting a part of such Department shall be used in the current fiscal year for the payment of salary or travel expenses of any person who has been convicted of violating the Act entitled "An Act to prevent pernicious political activities", approved August 2, 1939, as amended, or who has been found in accordance with the provisions of section 6 of the Act of July 11, 1919 (18 U. S. C. 201), to have violated or attempted to violate such section which prohibits the use of Federal appropriations for the payment of personal services or other expenses designed to influence in any manner a Member of Congress to favor or oppose any legislation or appropriation by Congress except upon request of any Member or through the proper official channels. *(Public Law 897, approved July 3,1948; Department of Agriculture Appropriation Act, 1949.)*

PRODUCTION AND MARKETING ADMINISTRATION—Con.

EXPORTATION AND DOMESTIC CONSUMPTION OF AGRICULTURAL COMMODITIES

Permanent appropriation:

Exportation and Domestic Consumption of Agricultural Commodities, Department of Agriculture—

NOTE.—The act of August 24,1935, as amended, appropriates out of any moneys in the Treasury not otherwise appropriated an amount equal to 30 percent of the gross receipts from duties collected under the customs laws during the calendar year next preceding the beginning of each fiscal year. The moneys so appropriated are used to (1) encourage the exportation of agricultural commodities and products thereof by the payment of benefits in connection with the exportation thereof or of indemnities for losses incurred in connection with such exportation or by payments to producers in connection with the production of that part of any agricultural commodity required for domestic consumption; (2) encourage the domestic consumption of such commodities or products by diverting them, by the payment of benefits or indemnities or by other means, from the normal channels of trade and commerce or by increasing their utilization through benefits, indemnities, donations, or by other means, among persons in low-income groups as determined by the Secretary of Agriculture; and (3) reestablish farmers' purchasing power by making payments in connection with the normal production of any agricultural commodity for domestic consumption (7U. S. C.612C).

Not to exceed $500,000 of the appropriation made available by section 32 of the Act of August 24, 1935 (7 U. S. C. 612 (c)), shall be used to pay any subsidy, benefit, or indemnity to manufacturers of or dealers in insulation products. *(Sec. 301, Public Law 897, approved July 8, 1948; Department of Agriculture Appropriation Act, 1949.)*

Expenses and Refunds, Inspection and Grading of Farm Products—

Under authority of title II of the Act of August 14, 1946 (7 U. S. C. 1621-1627), the Secretary of Agriculture provides an inspection and grading service for farm products upon the application of an interested party. This service is supported in part by the appropriation "Market inspection of farm products," and in part by fees charged for the service. These fees are covered into the Treasury as a special trust fund and are made available for the payment of refunds and expenses in connection with the work provided for under cooperative agreements (5 U. S. C. 511, 512; 7 U. S. C. 581-589; 21 U. S. C. 94a; Department of Agriculture Appropriation Act, 1949).

Undistributed Cotton Price Adjustment Payments—

The 1935 cotton price adjustment payment for a farm was made to one person in trust for all producers on such farm who were entitled to share in the payment. In the event the trustee could not for any reason make distribution to any person entitled to share in the payment, this person's share was required to be refunded to the United States to be deposited into this trust fund until such time when proper distribution could be made.

Farm Tenant-Mortgage Insurance Fund, Farmers' Home Administration, Department of Agriculture—

NOTE.—This account has been established pursuant to sections 11 (a) and 12 (e) (2) of the Farmers' Home Administration Act of 1946, approved August 14, 1946 (Public Law 731), which authorized the appropriation of not to exceed $25,000,000 for the establishment of such fund. The sum of $1,000,000 was provided in the Department of Agriculture Appropriation Act of 1948 for the establishment of such fund. This amount is to be supplemented by initial and annual charges collected from insured mortgagors and such initial fees for inspection, appraisal and other] charges as the Secretary of Agriculture finds necessary. One-half of the initial and annual charges collected from insured mortgagors as the premium for insurance and such amounts as shall be appropriated under section 11 (a) are available for payments with respect to insured mortgages under sections 12 and 13 of said act. The other one-half of the initial and annual charges shall be administrative expense charges, and together with such initial fees for inspection, appraisal and other charges as the Secretary may determine shall be available for administrative expenses in carrying out the provisions of said act relating to mortgage insurance.

GENERAL PROVISIONS—DEPARTMENT OF AGRICULTURE

SEC. 2. No funds appropriated or made available under this title shall be used to pay the compensation or expenses of any officer or employee of the Department or any bureau, office, agency, or service of the Department, or any corporation, institution, or association supervised thereby, who makes or approves, or directs or authorizes the approval of, any loan or advance by the Regional Agricultural Credit Corporation of Washington, District of Columbia, unless such loan or advance (1) is for the purpose of protecting the security for or assisting in the collection of a loan or advance theretofore made by the Corporation, or (2) is for use in and confined to a specific area or region in which the Secretary of Agriculture shall have found that such loans for specified agricultural purposes and for limited time periods are necessary because of economic emergencies or production disasters. All loans and advances made pursuant to this section will carry the full personal liability of the borrower, shall be secured by crops or livestock and such additional collateral as is deemed necessary to afford reasonable assurance of repayment, and will be accompanied by a certificate of refusal of the loan or advance by a local bank or the production credit association serving the area: *Provided, however,* That the Secretary of Agriculture may authorize the Regional Agricultural Credit Corporation to reenter an area or region where an economic emergency or production disaster has occurred, in conformity with the provisions of section 201 (e) of the Emergency Relief and Construction Act of 1932, as amended (title 12, U. S. C. 1148).

SEC. 3. Within the unit limit of cost fixed by law the lump-sum appropriations *and authorizations* made for the Department under this **[title]** *Act* shall be available for the purchase of passenger motor vehicles, and for the hire of such vehicles, necessary in the conduct of the work of the Department outside the District of Columbia, but the number of such vehicles purchased or otherwise acquired for all the activities of the Department for which appropriations *and authorizations* are made under such **[title]** *Act* shall not exceed the total number indicated for purchase by the Department under the statements of proposed expenditures for purchase and hire of passenger motor vehicles in the Budget.

SEC. 4. Provisions of law prohibiting or restricting the employment of aliens shall not apply to (1) the temporary employment of translators when competent citizen translators are not available; (2) employment in cases of emergency of persons in the field service of the Department for periods of not more than sixty days; and (3) employment under the appropriation for the Office of Foreign Agricultural Relations.

SEC. 5. Appropriations made in this title shall be available for health service programs as authorized by law (5 U. S. C. 150).

SEC. 6. Appropriations and other funds available to the Department during the current fiscal year (except those appropriated or authorized in title II of this Act for such fiscal year) shall be available for the payment of claims pursuant to section 403 of the Federal Tort Claims Act (28 U. S. C. **[921]** *2672).*

SEC. 7. No part of any appropriation contained in this title shall be used to pay the salary or wages of any person who engages in **a** strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided,* That for the purposes hereof an affidavit shall be considered prima facie evidence that the person making the affidavit has not contrary to the provisions of this section engaged in a strike against the Government of the United States, is not a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or that such person does not advocate, and is not a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided further,* That such administrative or supervisory employees of the Department as may be designated for the purpose by the Secretary are hereby authorized to administer the oaths to persons making affidavits required by this section, and they shall charge no fee for so doing: *Provided further,* That any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence and accepts employment the salary or wages for which are paid from any appropriation contained in this title shall be guilty of a felony and, upon conviction, shall be fined not more than $1,000 or imprisoned for not more than one year, or both: *Provided further,* That the above penalty clause shall be in addition to, and not in substitution for, any other provisions of existing law: *Provided further,* That nothing in this section shall be construed to require an affidavit from any person employed for less than sixty days for sudden emergency work involving the loss of human life or destruction of property, and payment of salary or wages may be made to such persons from applicable appropriations for services rendered in such emergency without execution of the affidavit contemplated by this section.

SEC. 8. Limitations on amounts to be expended for personal services under appropriations in this Act shall not apply to lump-sum leave payments pursuant to the Act of December 21, 1944 (5 U. S. C. 61b-e).

SEC. 9. Appropriations, funds, and authorizations available to the Department of Agriculture may be used for printing and binding. {Department of Agriculture Appropriation Act, 1949.)

EXPLANATORY STATEMENT

GENERAL STATEMENT

The functions of the Department of Commerce include: (1) services to aviation, comprising approximately 50 percent of the 1950 appropriation estimates; (2) the seventeenth decennial census, which, together with a companion census of housing for which legislation is proposed, would comprise 28 percent of the 1950 estimates; (3) other statistical and economic programs conducted as aids to business, for which 5 percent of the 1950 total is recommended; and (4) various technical services, which will require approximately 17 percent of the 1950 total.

Appropriation estimates for aviation programs of the Department are approximately 41 percent greater than the 1949 totals. This increase is largely for the liquidation of obligations incurred under construction programs of the Civil Aeronautics Administration for which contract authorization was granted in previous years.

The seventeenth decennial census will be taken during the spring of 1950, and tabulation of the data collected will continue through 1952. Legislation is recommended to provide for a census of housing to be taken in conjunction with the decennial census; this would parallel a similar housing census of 1940.

Other statistical and business programs of the Department include the regular statistical programs of the Bureau of the Census and the Bureau of Foreign and Domestic Commerce, and the export control program administered by the Bureau of Foreign and Domestic Commerce.

Technical programs of the Department, including research, patent examination, chart production, and regular weather services, would continue at approximately their

present operational levels, with programs adjusted to meet high priority work associated with national security.

The Department consists of the following bureaus and offices, discussed separately hereafter in the same order: Office of the Secretary, Bureau of the Census, Civil Aeronautics Administration, Civil Aeronautics Board, Coast and Geodetic Survey, Bureau of Foreign and Domestic Commerce, Patent Office, National Bureau of Standards, and Weather Bureau.

OFFICE OF THE SECRETARY

The Office of the Secretary provides central departmental services in the fields of over-all planning, budget, finance, personnel, information, legal counsel, and administrative services. An Office of Technical Services procures and disseminates technical information accruing from Government research laboratories and from postwar intelligence in Germany and elsewhere. During the current year a program for the voluntary allocation of scarce industrial commodities has been administered by an Office of Industry Cooperation; present legal provision for this program expires, however, on February 28, 1949.

The budget for 1950 provides for approximately the same amount as that available for the current year. Printing and binding costs, previously carried as a central departmental appropriation, have been transferred in the estimates to individual bureaus, and a central appropriation for penalty mail will also be discontinued.

BUREAU OF THE CENSUS

The Bureau collects, compiles, and disseminates to public and private users current statistics on population, business, industrial production, foreign trade, shipping, State and local governments, and agriculture. Funds provided in the 1950 estimate will permit this portion of the Bureau's program to continue at approximately the 1949 level, although provision has been made for continuing the collection of shipping statistics on a more satisfactory basis.

The 1950 estimate includes $70,000,000 for the seventeenth decennial census, an amount which will be made available for obligation until December 31, 1952. The procedure of appropriating in 1950 for all phases of the census will permit coordination of the collection, tabulation, and publication of the data. The cost of the seventeenth decennial census, offset by such nonrecurring items as the census of business, results in a net increase of $54,368,000 over 1949.

Supplemental appropriations will be required in 1949 to cover the costs of Public Law 900 and to permit the Bureau to complete the census of business.

CIVIL AERONAUTICS ADMINISTRATION

The major programs for which the Civil Aeronautics Administration is responsible, under the Civil Aeronautics Act of 1938 and subsequent legislation, are the establishment, maintenance, and operation of aids for the navigation and landing of aircraft, the administration of the Federal-aid airport program, and the enforcement of established safety regulations and standards. In addition, it is charged with carrying on a number of related activities, including programs of developing and service-testing new air navigational and landing aids, the operation of the Washington National Airport, an airport advisory service, and the settlement of airport damage claims.

Safety and regularity of flight are essential factors in the sound development of air transportation and in the fostering of civil aeronautics; and these factors are in large degree dependent on the navigational and landing aids operated as a part of the Federal airways system. In 1948, the Radio Technical Commission for Aeronautics recommended two broad programs for improving the Federal airways system, which have been generally endorsed. One is a long-range research and development program to produce an all-weather navigation and traffic control system for joint use by civil and military aviation. The other is a program to expand and accelerate the already authorized program of implementing the Federal airways with currently available electronic aids. In giving recognition to these recommendations, the estimate provides $10,000,000 (including $4,000,000 in contract authorization) for the long-range research and development program. It also provides $42,150,000 (including $26,500,000 in contract authorization) in new obligational authority for the continuing program of implementing the airways with the latest electronic aids. These two programs account for a major portion of the increase in the budget for the Administration.

Under the Federal Airport Act, the Government is undertaking a long-range program for the development of a system of airports adequate to the needs of air commerce and civil aeronautics. Federal assistance is accomplished through grants to local sponsors of approved airport developments. In 1950, the Administration will place major emphasis on the larger type airports which are of special importance for air commerce and national defense. The estimate provides $40,000,000 (including $36,500,000 in contract authorization) in new obligational authority for this program, which will permit the Administration to make grants for only the most urgent of projects.

Another major responsibility of the Administration is the enforcement of the safety regulations promulgated by the Civil Aeronautics Board. This encompasses all phases of air safety including aircraft airworthiness, competence of airmen, and the conduct of flight operations. The Administration is continuing to delegate detailed inspectional responsibilities to private individuals and companies (over 10,000 are now serving as designees) and anticipates that over the next several years greater inspectional responsibilities can be assumed by the manufacturing and air carrier industries.

In summary, the regular operating programs of the Administration require an increase of 11 percent. The greater part of this increase is required for the maintenance and operation of the Federal airways system in order to place the 1949 program on a full-year basis, to operate new facilities being completed during 1949, and to operate facilities to be completed in 1950. The new obligational authority for the establishment of air-navigation facilities is increased by 88 percent; while that for the Federal-aid airport program remains the same. Of the increase of $43,913,500 in cash requirements, $25,300,000 is for the liquidation of contract authority authorized in 1949. The amount of $3,000,000 is included in the budget as a supplemental for 1950 for the payment of claims under the Federal Airport Act as amended; and the amount of $1,750,000 has also been included for this purpose in the forecast of supplementals for 1949.

CIVIL AERONAUTICS BOARD

The three major functions of the Civil Aeronautics Board are the economic regulation of the air transportation industry, the promulgation of civil air regulations and other safety standards, and the investigation and analysis of civil aircraft accidents.

The rapid growth and development of civil aviation during the last few years has produced a greatly expanded volume of work for the Board in most phases of its activities. One result has been the accumulation of large backlogs of work. While progress is being made in the reduction of these backlogs in certain areas, the Board will carry sizeable backlogs of work over into 1950. Of particular concern, as it was in connection with the 1949 budget, is the situation regarding mail-rate cases. Because of financial reverses and various other unfavorable factors, most of the air carriers have petitioned for changes in their mail rates with the result that a large part of the entire mail-rate structure is now on a temporary rate basis. One of the prime objectives of the Board during 1950 will be to make substantial progress in converting the mail-rate structure to a permanent basis. In addition, the Board is faced with a number of major policy issues affecting the stabilization of the air transportation industry.

Hie estimate provides for an increase of 9 percent over 1949. Of the increase, $100,000 is to be used to augment the staff engaged in mail-rate work; $100,000 is to be applied to air-line cost standards development, tariff work, and international activities; and the remainder of $142,500 is required to continue the Board's 1949 program on an annual basis.

COAST AND GEODETIC SURVEY

Surveying activities of the Coast and Geodetic Survey for purposes of aeronautical and nautical chart production and geodetic control continue to serve as a necessary foundation to the present rapid developments in aviation, shipping, flood control, and conservation. The Survey will face the task in 1950 of stepping up its geodetic and topographic survey work in Alaska because of the increasing importance of that area to our national security. The problems of the Survey have been magnified by increased operating costs.

The 4 percent increase includes printing and binding funds, which are carried in the Survey's estimate for the first time, and reflects also various mandatory salary adjustments.

BUREAU OF FOREIGN AND DOMESTIC COMMERCE

The Bureau of Foreign and Domestic Commerce analyzes production and marketing data for major commodities in the United States and abroad, and makes studies of business trends and of the Nation's economic structure. The Bureau also supplies counsel to businessmen on marketing and transportation problems. These services the Bureau disseminates through its 42 field offices located in the major commercial and industrial centers throughout the country. The Bureau participates in the formulation of basic governmental policies which affect domestic and international trade.

The 1950 estimate represents a decrease from 1949 appropriations of $4,058,500 and some general curtailment of services. However, the principal reduction is related to the expiration of export control legislation. The present authority for the program expires February 28, 1949.

PATENT OFFICE

During the fiscal years 1947 and 1948, the examiner staff of the Patent Office was nearly doubled in order to keep pace with the tremendous influx of postwar patent applications. The effect of this increased staff is reflected in a substantial increase in the rate of application disposals, a trend which is expected to accelerate and continue into 1950.

The backlog of applications accumulated during and immediately after the war will nevertheless constitute a serious problem for several years. The 1950 estimate provides for an appropriation increase of 5 percent, which would meet increased pay and printing costs but would hold staff at its present level. It is believed that a continuation of a staff of this size will make possible reduction of the backlog to normal proportions by about 1954.

NATIONAL BUREAU OF STANDARDS

The laboratories of the National Bureau of Standards are unique in this country for the wide range of scientific specialties covered by the Bureau's activities. The work of the Bureau in these fields typically consists of providing basic standards of measurement; testing services, including the development of testing methods; and the investigation of new materials and processes. The skill of the Bureau in solving scientific problems is indicated, by the fact that over half its work is performed as a service to other Government agencies on a working-fund basis.

One of the most urgent programs of the Bureau is its Central Radio Propagation Laboratory, which serves as a central agency for research and standards in the radio field. The 1950 estimates provide for a 7 percent increase in funds for this laboratory in keeping with the rapid technical developments in radio.

The recommended increase of approximately 6 percent for the remaining activities of the Bureau will partially meet various mandatory salary adjustments and the cost of printing and binding, previously carried under a separate appropriation.

WEATHER BUREAU

Weather forecasts and services play an increasingly important role in the national economy as new methods and techniques are made applicable to the problems of agriculture, aviation, and business. Provision is made in the 1950 estimates for maintenance of these weather services at approximately the level authorized for 1949. The increase of 1.5 percent is required to provide for the cost of printing and binding, heretofore carried under a separate appropriation, and for mandatory salary adjustments.

PROPOSED LEGISLATION

An amount of $15,000,000 is included under this heading for the Bureau of the Census in 1950 to provide for a census of housing in the event that legislation is enacted.

Legislation for the extension of export controls expires February 28, 1949. Amounts of $1,600,000 for 1949 and $5,000,000 for 1950 are included for the Bureau of Foreign and Domestic Commerce in the event that this activity is extended.

An amount of $250,000 is included for the National Bureau of Standards to provide the necessary funds in 1950 for preparation of plans for a radio propagation building.

Expenses, Foreign Students, Civil Aeronautics Administration—

The Civil Aeronautics Administration occasionally receives funds from the Governments of Latin-American countries for the payment of expenses incurred in connection with the training of additional foreign students over and above the number for which appropriations are provided by the Congress for such training work. These funds are credited to this account and the authorized expenditures are made therefrom (22 U. S. C. 501, 502).
