All motor-propelled passenger-carrying vehicles (including watereraft) owned by the District of Columbia shall be operated and utilized in conformity with section [5 (c)] *16* of the Act of August 2, 1946 (5 U. S. C. **[78c]** *77, 78),* and shall be under the direction and control of the Commissioners, who may from time to time alter or change the assignment for use thereof, or direct the alteration or interchangeable use of any of the same by officers and employees of the District, except as otherwise provided in this Act: *Provided,* That "official purposes" shall not apply to the Commissioners of the District of Columbia and in cases of officers and employees, the character of whose duties make such transportation necessary, and then only as to such latter cases when the same is approved by the Commissioners. No motor vehicles shall be transferred from the police or fire departments to any other branch of the government of the District of Columbia. *(District of Columbia Appropriation Adt, 1949.)*

Operating Expenses, Street and Bridge Divisions, Highway Fund, District of Columbia—

Operating expenses, Street and Bridge Divisions (payable from highway fund): For operating expenses of the Street and Bridge Divisions, including operation, minor construction, maintenance, and repair of bridges; repairs to streets, avenues, roads, sidewalks, and alleys; reconditioning existing gravel streets and roads; and cleaning snow and ice from streets, sidewalks, cross walks, and gutters, in the discretion of the Commissioners; such expenses to include purchase of passenger motor vehicles, surveying instruments, implements, and equipment used in this work: **[$1,904,000]** *$1,972,000,* of which amount $70,000 shall be exclusively for snow removal purposes: *Provided,* That the Commissioners are hereby authorized to purchase and install a municipal asphalt plant including all auxiliary plant equipment to be paid for from this appropriation at a cost not to exceed $150,000. *(District of Columbia Appropriation Act, 1949.)*

Capital Outlay, Street and Bridge Divisions, Highway Fund, District of Columbia—

Capital outlay, Street and Bridge Divisions (payable from highway fund): For expenses necessary for the grading, surfacing, paving, repaving, widening, altering, and otherwise improving streets, avenues, roads, and alleys, including curbing and gutters, directional and pedestrian islands at various intersections to permit of proper traffic-light control and channelization of traffic, drainage structures, culverts, suitable connections to storm-water sewer system, retaining walls, replacement and relocation of sewers, water mains, fire hydrants, traffic lights, street lights, fire-alarm boxes, police-patrol boxes, and curb-line trees, when necessary, Federal-aid highway projects under section 1 (b) of the Federal Aid Highway Act of 1938, and highway structure projects financed wholly from the highway fund upon the approval of plans for such structures by the Commissioners; for carrying out the provisions of existing laws which authorize the Commissioners to open, extend, straighten, or widen streets, avenues, roads, or highways, in accordance with the plan of the permanent system of highways for the District of Columbia, and alleys and minor streets, and for the establishment of building lines in the District of Columbia, including the procurement of chains of title; and for assessment and permit work, paving of roadways under the permit system, and construction of sidewalks and curbs around public reservations and municipal and United States buildings, including purchase or condemnation of streets, roads, and alleys, and of areas less than two hundred and fifty square feet at the intersection of streets, avenues, or roads in the District of Columbia, to be selected by the Commissioners, **[$5,250,000]** *$5,125,000,* to remain available until June 30, **[1950]** *1951: Provided,* That appropriations contained in this Act for highways, sewers, **[city** refuse] *Division of Sanitation,* and the Water Division shall be available for snow removal when ordered by the Commissioners in writing: *Provided further.* That in connection with the purchase and installation of a municipal asphalt plant on District owned property the Commissioners are authorized to make expenditures from this appropriation in an amount not exceeding $150,000 for the preparation of the site, including the construction of sea walls, dock facilities, and a railroad siding: *Provided further,* That in connection with the highway planning survey, involving surveys, plans, engineering, and economic investigations of projects for future construction in the District of Columbia, as provided for under section 10 of the Federal Aid Highway Act of 1938, and in connection with the construction of Federal-aid highway projects under section 1 (b) of said Act, and highway structure projects financed wholly from the highway fund, this appropriation shall be available for the employment of engineering or other professional services by contract or otherwise, and without regard to section 3709 of the Revised Statutes and the civil-service and classification laws, and section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), and for engineering and incidental expenses: *Provided further,* That this appropriation *and the appropriation "Operating expenses, Street and Bridge Division, highway fund,"* shall be available for the construction and repair of pavements of street railways in accordance with the provisions of the Merger Act (47 Stat. 752), and the proportion of the amount thus expended which under the terms of the said Act is required to be paid by the street-railway company shall be collected, upon the neglect or the refusal of such street-railway company to make such payment, from the said street-railway company in the manner provided by section 5 of the Act of June 11, 1878, and shall be deposited to the credit of the appropriation for the fiscal year in which it is collected: *Provided further,* That assessments in accordance with existing law shall be made for paving and repaving roadways, alleys, and sidewalks where such roadways, alleys, and sidewalks are paved or repaved with funds herein appropriated: *Provided further,* That in connection with projects to be undertaken as Federal-aid projects under the provisions of the Federal Aid Highway Act of December 20, 1944, the Commissioners **are** authorized to enter into contract or contracts for those projects in such amounts as shall be approved by the Public Roads Administration, Federal Works Agency: *Provided further,* That this appropriation may be used for payment to contractors and for other expenses in connection with the expense of design, construction, and inspection of grade-crossing elimination and other construction projects authorized under section 8 of the Act of June 16, 1936 (49 Stat. 1521), and section 1 (b) of the Federal Aid Highway Act of 1938, pending reimbursement to the District of Columbia by the Public Roads Administration, Federal Works Agency, reimbursement to be credited to fund from which payment was made: *Provided further,* That the Commissioners are authorized to fix or alter the respective widths of sidewalks and roadways (including tree spaces and parking) of all highways that may be improved under appropriations contained in this Act: *Provided further,* That no appropriation in this Act shall be available for repairing, resurfacing, or paving any street, avenue, or roadway by private contract unless the specifications for such work shall be so prepared as to permit of fair and open competition in paving materials as well as in price: *Provided further,* That in addition to the provision of existing law requiring contractors to keep new pavements in repair for a period of one year from the date of the completion of the work, the Commissioners shall further require that where repairs are necessary during the four years following the said one-year period, due to inferior work or defective materials, such repairs shall be made at the expense of the contractor, and the bond furnished by the contractor shall be liable for such expense. *(District of Columbia Appropriation Act, 1949.)*

NATIONAL ZOOLOGICAL PARK

National Zoological Park, District of Columbia—

For expenses necessary for the National Zoological Park, including erecting and repairing buildings; care and improvement of grounds; travel, including travel for the procurement of live specimens; purchase, care, and transportation of specimens; purchase of motorcycles; revolvers and ammunition; purchase of uniforms and equipment for police, and uniforms for keepers and assistant keepers; [$492,600] *$544,700: Provided, That funds appropriated under this head shall be expended by expenditure warrant as an advance to the National Zoological Park and shall be credited as a repayment and maintained in a special account. The amounts so advanced will be available for the objects herein specified, any unexpended balance to be returned to this appropriation not later than two full fiscal years after the close of the current fiscal year. (District of Columbia Appropriation Act, 1949.)*

Payments From Proceeds of Sales, Motor-Propelled Vehicles, Etc., District of Columbia—

Under the act of August 2, 1946, proceeds of sales of vehicles, equipment, accessories, and other items, the exchange of which is authorized by law, may be applied in whole or in part payment for the purchase of similar items. Receipts from this source are set up in a special appropriation account, available for the fiscal year in which the obligation to purchase the new equipment is incurred; any unobligated balance is subsequently adjusted to miscellaneous receipts (5 U. S. C. 118d-l).

Salaries and Expenses, Alcoholic Rehabilitation Program, District of Columbia—

This fund is derived from a 10-percent increase in the license fees for the manufacture or sale of alcoholic beverages, except for retailer's license, class E, imposed by section 11 of the District of Columbia Alcoholic Beverage Control Act, as amended. The fund is used to establish and maintain a program for the rehabilitation of alcoholics, promote temperance, and provide for the medical and scientific treatment of persons found to be alcoholics by the courts of the District of Columbia (61 Stat. 764).

GENERAL PROVISIONS

SEC. 2. Except as otherwise provided herein, all vouchers covering expenditures of appropriations contained in this Act shall be audited before payment by or under the jurisdiction only of the Auditor for the District of Columbia and the vouchers as approved shall be paid by checks issued by the Disbursing Officer without countersignature.

SEC. 3. No part of any appropriation contained in this Act or authorized hereby to be expended shall be used to pay the compensation of any officer or employee of the Government of the United States, or of the District of Columbia unless such person is a citizen of the United States, or a person in the service of the United States or the District of Columbia on the date of the approval of this Act who being eligible for citizenship had theretofore filed a declaration of intention to become a citizen or who owes allegiance to the United States. This section shall not apply to citizens of the Commonwealth of the Philippines or nationals of those countries allied with the United States in the prosecution of the war effort.

SEC. 4. No part of any appropriation contained in this Act shall be used to pay the salary or wages of any person who engages in a strike against the Government of the United States or the government of the District of Columbia, or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States or the government of the District of Columbia, or who advocates, or is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided*, That for the purposes hereof an affidavit shall be considered prima facie evidence that the person making the affidavit has not contrary to the provisions of this section engaged in a strike against the Government of the United States or the government of the District of Columbia, is not a member of an organization of Government employees that asserts the right to strike against the Government of the United States or the government of the District of Columbia, or that such person does not advocate, and is not a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided further*, That any person who engages in a strike against the Government of the United States or the government of the District of Columbia or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States or the government of the District of Columbia, or who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence, and accepts employment the salary or wages for which are paid from any appropriation contained in this Act shall be guilty of a felony and, upon conviction, shall be fined not more than $1,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penalty clause shall be in addition to, and not in substitution for, any other provisions of existing law.

SEC. 5. Whenever in this Act an amount is specified within an appropriation for particular purposes or object of expenditure, such amount, unless otherwise specified, shall be considered as the maximum amount which may be expended for said purpose or object rather than an amount set apart exclusively therefor.

SEC. 6. Work performed for repairs and improvements under appropriations contained in this Act may be by contract or otherwise, as determined by the Commissioners.

SEC. 7. Appropriations in this Act shall be available, when authorized by the Commissioners, for allowances for privately owned automobiles used for the performance of official duties at not to exceed $264 per annum for each automobile, unless otherwise therein specifically provided: *Provided*, That the total expenditures for this purpose shall not exceed **[$42,000]** *$48,100*, excluding the automobile allowances for the deportation of nonresident insane, the transportation of indigent persons, and the placing of children by the Board of Public Welfare.

SEC. 8. Appropriations in this Act shall be available for the payment of dues and expenses of attendance at meetings of organizations concerned with the work of the District of Columbia government, when authorized by the Commissioners: *Provided*, That the total expenditures for this purpose shall not exceed [$8,500] *$13,700.*

SEC. 9. The Commissioners are hereby authorized in their discretion to invest and reinvest at any time in United States Government securities, with the approval of the Secretary of the Treasury, any part of the general fund, highway fund, water fund, or trust funds, of the District of Columbia, not needed to meet current expenses during the fiscal year, to deposit the interest accruing from such investments to the credit of the fund from which the investment was made, and the Secretary of the Treasury is authorized to sell or exchange such securities for other Government securities, and deposit the proceeds to the credit of the appropriate fund.

SEC. 10. Appropriations for necessary expenses shall be available for personal services and printing and binding and, when authorized by the Commissioners or by the purchasing officer and the auditor, acting for the Commissioners, printing and binding may be performed by the District of Columbia Division of Printing *and* Publications without reference to fiscal-year limitations.

SEC. 11. Appropriations in this Act shall be available, when authorized by the Commissioners, for stenographic reporting service as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a).

[SEC. 12. Notwithstanding the provisions of the Treasury and Post Office Departments Appropriation Act, 1949, the District of Columbia is authorized to purchase typewriters for educational instruction purposes at not to exceed the lowest price paid for typewriters for such purposes by schools in the States of Maryland or Virginia.] *(District of Columbia Appropriation Act, 1949.)*

Trust accounts:

Miscellaneous Trust-Fund Deposits, District of Columbia—

This fund is derived from deposits made by property owners, corporations, and others on account of work to be performed by the District in connection with cuts in streets, special sewers, and various engineering projects, the whole cost of which is payable by the depositor. There are also carried in this account several bequests for the benefit of certain charitable and religious institutions, and as a fund to provide awards for prizes for excellence in school work (33 Stat. 368).

INTRODUCTION TO PART III

Part III contains business-type budget estimates for the wholly owned Government corporations and for certain other corporate-type operations (the Federal Housing Administration and the noncorporate activities of the Public Housing Administration). It also contains Government-type budget estimates, similar to those included in part II of the Budget, for the appropriated funds of the foregoing agencies and for the administrative offices of two corporation-supervising agencies—the Housing and Home Finance Agency and the Farm Credit Administration, Department of Agriculture. A summary for the entire part III precedes the detailed material, which appears in a separate chapter for each agency or corporation.

FEATURES OF CORPORATION-TYPE OPERATIONS

Accrual accounting.—The Government corporations and enterprises usually keep their accounts on an *accrual* basis, rather than the *obligation* basis in general Government use. Under the accrual system, income is recorded on the basis of sales made, services rendered and other earnings of a period,even though collections are made later; and expenses are recorded on the basis of goods and services used in a given period, even though ordered in an earlier period or paid for in a later period. The accrual method further requires that the cost of buildings and equipment acquired be charged to expense (by means of depreciation charges) over the expected useful life of the asset, instead of in a single year.

Use of checking accounts.—Most of the Government corporations use the Treasurer of the United States as they would a commercial bank; some of them use commercial banks too. Instead of placing the receipts *in the Treasury* where they would be subject to appropriation, most corporations put their collections in checking accounts *with the United States Treasurer,* subject to withdrawal by the corporation without appropriation action. Some corporations have appropriated funds (in general or special accounts of the Treasury) also.

Borrowing.—A number of the Government corporations have authority to borrow funds, usually from the Treasury, sometimes from the public. The Treasury usually advances the money out of an "authorization to expend from public debt receipts" (that is, money derived from Treasury borrowing), rather than out of an appropriation.

Effect on the Budget of the Government.—The corporations ' effect on the Budget of the Government is equal to: (1) the *net* excess of expenditures over collections in the checking accounts with the Treasurer (or vice versa) plus (2) the expenditures from Treasury general and special accounts, if any, less (3) the receipts paid into Treasury general and special accounts from the corporations. For purposes of this computation, borrowing is not counted as a collection and repayment of borrowing is not counted as an expenditure. Also, beginning with this Budget, receipt totals and expenditure totals exclude the transfer payments from checking accounts (to miscellaneous receipts) which represent the return of paid-in capital or the disposition of corporation surplus. The net effect on the Budget of the Government as a whole would be the same whether these were included or excluded from the totals.

FORM OF BUSINESS-TYPE BUDGETS

Narrative statements.—A significant feature of the business-type budget is the narrative statement which presents the major details of each agency's programs. Such statements also discuss the results of operations for the years 1948 (actual) and 1949 and 1950 (estimated), and the financial condition at the end of those years. In this Budget, a few of the more important "program highlights" are listed at the beginning of each narrative.

Financial statements.—The financial statements present the following main aspects of the business-type budget programs: (1) statement A is a "balanced" presentation of the expenditures and accruals requiring the application of funds each year and the source of the funds becoming available in the year; (2) appended to statement A is a summary of the net effect of the enterprise's operations on the Budget of the Government as a whole; (3) statement B sets forth in some detail the accrued income and expenses applicable to each fiscal year, regardless of whether or not cash is received or paid therefor in the same year; (4) appended to statement B is an analysis of the changes in unreserved surplus during each year; and (5) statement C is a balance sheet showing the type and amount of assets owned, the liabilities owed, and the net financial equity of the Government at the end of each fiscal year. These statements are frequently supported by additional detail in supplementary schedules. Such schedules are keyed to the primary statement by letter and number (thus, schedule B-1, B-2, etc.).

Authorizations to use appropriated funds.—The necessity of flexibility in the carrying out of business-type budgets is recognized in the method of congressional approval, which takes the form of general authorizing language as printed on page 1051, together with specific limitations on administrative expenses and occasionally on some other feature of the Budget. The authorizing or limiting language is printed in this part in the same style as appropriation language in part II; schedules of administrative expenses are printed below the limiting language, generally in the style of the obligation schedules of part II.

Increases in pay scales resulting from Public Law 900.—The cost of pay scale increases made in July 1948 by Public Law 900, Eightieth Congress, or of comparable administrative increases in pay, are set forth in separate lines in the financial statements and also in the schedules of administrative expenses for the fiscal years 1949 and 1950.

APPROPRIATION ESTIMATES AND SCHEDULES

Estimates of appropriation and schedules of obligations for appropriated funds contained in part III follow, as nearly, as possible, the format of Government-type budgets in part II. The uniform object schedule is not available in all cases, however, because some business enterprises shown herein do not keep accounts on that basis.

MIXED-OWNERSHIP CORPORATIONS

Brief narrative material is presented on the four corporations or groups of corporations not wholly owned by the Federal Government, but in which the United States owns part of the capital stock, has contingent liabilities, or otherwise has fiscal responsibilities. Schedules of administrative expenses of the Federal Deposit Insurance Corporation, and of appropriated funds relating to the Federal land banks are included.

SUMMARY NARRATIVE

SOURCES AND APPLICATION OF FUNDS

The activities of the wholly owned Government corporations and unincorporated establishments which have submitted business-type budgets cover a wide range; they include lending, insurance, operation of a barge line and a railroad, purchase and sale of agricultural commodities, construction and operation of public-housing projects, and other related programs.

The largest activity of the corporations in fiscal year 1950, measured in dollar volume, will be the making of new loans. These are estimated at $4,326 million. Loans of the Commodity Credit Corporation including loans through commercial banks are expected to total $1,863 million. The next largest item occurs in the Federal intermediate credit banks, the lending of which is expected to amount to $1,790 million. The greater part of this activity is represented by the discounting of agricultural loans made by production credit associations. The Reconstruction Finance Corporation is expected to lend $368 million, approximately half for the benefit of home owners. A fourth major lending program, that of the Export-Import Bank, is expected to decrease somewhat from recent years but will amount to $301 million of new loans, according to the Budget estimates.

A substantial source of funds is the repayment of loans. These are expected to amount to $4,191 million in fiscal year 1950, compared to $3,593 in fiscal year 1949 and $3,329 in fiscal year 1948. Substantial repayments will occur in the Commodity Credit Corporation, the Federal intermediate credit banks, and the Reconstruction Finance Corporation. Comparatively smaller amounts of repayments are expected by the Export-Import Bank and by the Home Owners' Loan Corporation, which has been in liquidation since 1936.

Another large part of the fund requirements arises from the purchase of agricultural commodities by the Commodity Credit Corporation. Both the purchase and the sale of commodities by the Corporation are expected to decrease somewhat from fiscal year 1949, which in turn is running at a slightly lower level than in fiscal year 1948.

SOURCES AND APPLICATION OF FUNDS

BY FISCAL YEARS

[In millions]

	1948 actual	1949 estimate	1950 estimate
FUNDS APPLIED			
To acquisition of assets:			
To make loans	$3,711	$4,698	$4,326
To purchase investments	138	91	75
To add to fixed assets	136	79	77
To acquire other assets	57	25	23
To operating costs:			
To pay cost of commodities sold	2,286	2,211	1, 650
To pay other operating expenses	295	271	279

Total	20, 785	11, 459	9,837

i Less than $500,000.

Additional fund activity is represented in borrowing and repayment of corporation obligations. Some of these are issued to the public, chiefly obligations of the Federal intermediate credit banks. Several corporations also borrow from the United States Treasury. New borrowings during the year are expected to be $3,344 million, and retirements are estimated at $2,519 million.

New capital in the form of appropriations during the fiscal year 1950 is estimated at $72 million. By way of contrast, the corporations will return more than double this amount, $172 million in capital retirement and dividends^

During 1948, the United States Treasury canceled notes in the total amount of $10,177 million for the Reconstruction Finance Corporation and for the Home Owners' Loan Corporation. These transactions, while not representing "funds" in the ordinary sense, are nevertheless reflected in the accompanying statement as both sources and application of funds. The cancellation for the Reconstruction Finance Corporation, in the amount of $10,049 million, compensates it for its losses on national defense, war, and reconversion activities, and for its office building and some interagency loans which were taken over by the Treasury. The balance of the note cancellation compensates the Home Owners' Loan Corporation for its investment in the Federal Savings and Loan Insurance Corporation and for its office building, which were acquired by the United States Treasury and the Federal Works Agency, respectively.

EFFECT ON THE GOVERNMENT BUDGET

The Government Budget is affected in several ways by transactions described in the statement of sources and application of funds. Decreases in cash balances with the Treasury represent budget expenditures, while increases have the opposite effect. Other funds received from the Treasury in the form of borrowings or appropriations also represent budget expenditures when used. Repayments of paid-in capital, or the payment of dividends from Treasury checking accounts, on the other hand, have no net effect on the Budget, and are considered as neither a budget receipt nor a budget expenditure.

800000—49——66

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

There are several other types of payments to the Treasury which are considered as budget receipts. The principal item included in this total is composed of interest payments on funds borrowed. Other items include renegotiation proceeds paid by the Eeconstruction Finance Corporation, and the proceeds of sales of Government property.

EFFECT ON THE GOVEKNMENT BUDGET

BY FISCAL YEARS

[In millions]

	1948	1949	1950
Net budget expenditures in checking accounts	$165	$973	$710
Net budget expenditures from general and special accounts	127	96	96
Total budget expenditures	292	1,069	806
Deduct: General and special account receipts:			
Interest payments to U. S. Treasury	110	28	42
Other	134	140	185
Total budget receipts	244	168	227
Net effect on Government Budget	48	901	579

As indicated in the above table, and in statement D, the operations of the business-type enterprises will represent a net charge to the Government Budget of $579 million in fiscal year 1950. This compares with $901 million in fiscal year 1949 and $48 million in fiscal year 1948.

The Commodity Credit Corporation will have expenditures in excess of receipts amounting to $535 million, according to the estimates. The Export-Import Bank shows a net charge on the Government Budget of $130 million, the Reconstruction Finance Corporation estimates a net charge of $119 million, while the public war housing program of the Public Housing Administration will result in receipts exceeding expenditures by $131 million. The other corporations and enterprises have a relatively smaller effect on the Government Budget.

INCOME AND EXPENSES

The consolidated statement of income and expenses shows that the establishments for which business-type budgets are submitted expect a net loss of $23 million in the budget year. This compares with a $60 million loss in the fiscal year 1948, and with a net gain of $26 million that is expected to materialize in the current year. The loss shown on the consolidated statement is more than accounted for by a charge-off of $138 million in connection with the liquidation of public war housing projects. To offset this there is a net gain of $57 million estimated for the Export-Import Bank operations, and smaller gains (and losses) for the other corporations.

INCOME AND EXPENSES

BY FISCAL YEARS

[In millions]

	1948 actual	1949 estimate	1950 estimate
INCOME			
Sales of commodities and supplies	$2, 218	$2,034	$1,528

Adjustments for reserves	46	166	102
Net loss (—) carried to surplus	-60	26	-23

RETURN ON TREASURY INVESTMENT

The expense figures included in the preceding tabulation reflect the rates which the corporations actually pay in the cases where they have borrowed money from the Treasury. Most of the corporations pay an interest rate which is fixed by the Treasury after giving consideration to the rate which the Treasury pays to holders of its own marketable obligations. The Commodity Credit Corporation obtains the benefit of a rate which takes account of the current short-term Treasury borrowing. Four corporations, however, have some Treasury loans at only 1 percent interest; these were entered into some years ago. The current cost of money to the Treasury was approximately *1%* percent in fiscal year 1948, and is estimated at *1%* percent in fiscal year 1949 and 2 percent in fiscal year 1950. If the corporations were charged interest equivalent to Treasury costs it would add approximately $6 million to $8 million a year to their expenses as shown in the table below.

IMPUTED INTEREST ON BORROWING FROM THE TREASURY

[In millions]

	1948 actual	1949 estimate	1950 estimate
Interest cost to the Treasury on loans to corporations	$14.4	$30.6	$40.3
Interest charged to the corporations	6.7	23.6	34.2
Net imputed interest on loans	7.7	7.0	6.1

The Government is sole owner of each enterprise for which a business-type budget is here presented. As owner, the Government has invested in each enterprise some capital. Like the common stockholders of a private corporation, the Government does not receive a fixed rate of return on its investment (with few exceptions). Such a return might be unsatisfactorily small in a year in which an enterprise had a substantial net income; any return at all would be too large (and would contribute to the impairment of capital) in a year in which an enterprise had a net loss.

The Government as owner has sole interest in any earned surplus of the corporations and those enterprises which make a profit may be required to pay dividends to the Treasury from time to time. These dividends may be more than or less than the cost of money to the Treasury.

Some of the programs for which business-type budgets are submitted have paid-in capital which does not produce

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

income for the corporation. A prime example is the Public Housing Administration, capital of which was largely invested during the war in public housing projects, some of which are now being liquidated. The State Department corporations are used for making certain Government expenditures, but cannot be described as income producing. The Tennessee Valley Authority's nonpower activities are nonincome producing. Altogether paid-in capital of nonincome producing enterprises is from 44 percent to 49 percent of the total paid-in capital shown in the business-type budgets.

IMPUTED INTEREST ON CAPITAL AND SURPLUS

[In millions]

	1948 actual	1949 estimate	1950 estimate
Interest at current Treasury rates on paid-in capital	$87-	$90	$94
Interest at current Treasury rates on earned surplus	3	- 2	- 7
Interest at current Treasury rates on net capital and surplus	90	88	87

Even though interest is not properly to be charged on the capital and surplus of the business-type enterprises, it can be imputed for purposes of information. The table immediately above shows the result of such imputation. The effect of such imputation on net income of the enterprises is shown below, in contrast to the dividends paid,

EFFECT OF IMPUTED INTEREST ON NET INCOME

[In millions]

	1948 actual	1949 estimate	1950 estimate
Net income for the year	-$60	$26	-$23
Imputed interest:			
On borrowing from Treasury	8	7	6
On capital and surplus	90	88	87
Net income for the year after adjustment for imputed interest	-158	-69	-116
Dividends and other payments from surplus	31	426	30

FINANCIAL CONDITION

Assets of the business-type enterprises are increasing during the current year and during the budget year. Agricultural commodities held for sale by the Commodity Credit Corporation represent the major item of change. Loans also show an upward trend, while the item of land, structures, and equipment is decreasing as public housing projects are sold or otherwise disposed of.

The only notable change in the liabilities section of this statement appears in connection with notes, bonds, and debentures outstanding. The increase in loans from the United States Treasury results from the expansion of the price support program, the foreign trade loan program, and the secondary housing mortgage program. The increase in loans from the public is the result of an expansion in agricultural production loans which are discounted by the Federal Intermediate Credit Banks and are financed by the issuance of debentures.

The capital section of the consolidated statement of financial condition represents the proprietorship investment of the United States in the wholly owned Government corporations and enterprises submitting business-type budgets. This total investment is composed of the original paid-in capital, such as capital stock, paid-in surplus, and appropriations, together with the surplus or deficit resulting from operations and any part of such surplus which is reserved for unforeseen contingencies.

FINANCIAL CONDITION AS OF JUNE 30, 1947, 1948, 1949, AND 1950

[In millions]

	1947 actual	1948 actual	1949 estimate	1950 estimate
ASSETS				
Cash	$946	$950	$356	$262

Paid-in capital and surplus	5,157	5,089	4,714	4,634
Earned surplus (or deficit (—))	-6,185	219	-175	-228
Total liabilities and capital	13,085	9,310	9,867	10, 260

The capital investment of the Government continues to decrease as in recent years. In fiscal year 1948 the capital stock of the Federal Farm Mortgage Corporation was cut from $1 million to $10,000. In fiscal year 1949 the Reconstruction Finance Corporation capital stock is being reduced from $325 million to $100 million. Net expended appropriations are also decreasing, due to the return of appropriated funds to the Treasury pursuant to the liquidation of public housing projects. The apparent increase of $100 million in capital stock during 1948 was due to the acquisition of the capital stock equity of the Federal Savings and Loan Insurance Corporation by the United States Treasury. Prior to such acquisition, the capital stock of this corporation had been held by the Home Owners' Loan Corporation, and had been carried among its assets as an investment.

Retained surplus will be reduced in fiscal year 1950 by the $23 million loss for the year and $30 million distribution of dividends. In the earlier years shown on this statement, the changes in earned surplus were due principally to the write-off in fiscal year 1948 of the Reconstruction Finance Corporation deficit which had resulted from national defense, war, and reconversion activities, and to the payment of $307 million and $68 million dividends in fiscal year 1949 from the Reconstruction Finance Corporation and the Federal Farm Mortgage Corporation, respectively.

PROPOSED LEGISLATION

The foregoing discussion and the business-type statements presented in this section of the Budget are based upon existing legislation. The enactment of additional proposed legislation will result in additional expenditures, borrowing from the Treasury, and other activities not here reflected. Such legislation would affect the budgets of the Housing and Home Finance Agency, the Reconstruction Finance Corporation, the Commodity Credit Corporation, and, to a lesser extent, the Inland Waterways Corporation. A further item of proposed legislation would create a new business-type enterprise for the commercial production of synthetic fuels.

Net profit	44.9	50.2	57

[1] Excludes activity in connection with $1,000,000,000 of borrowings from the Treasury in the fiscal year 1949 for loans to foreign governments under the Foreign Assistance Act of 1948 (62 Stat. 137). Details with regard to these loans and obligation schedules are shown under the Economic Cooperation Administration, part II of the Budget.

[2] These disbursement figures refer to the form of credit rather than to the classification of disbursements by program object, as presented in statement A.

PURPOSE AND FINANCIAL ORGANIZATION

The Export-Import Bank of Washington is authorized by the Export-Import Bank Act of 1945 (12 U. S. C. 635), as amended, to extend loans and guaranties not in excess at any one time of $3.5 billion "to aid in financing and to facilitate exports and imports and the exchange of commodities between the United States or any of its Territories or insular possessions and any foreign country or the agencies or nationals thereof." Total loans, guaranties, and undisbursed credit authorizations outstanding on June 30, 1948, amounted to approximately $2,872,076,000. As of June 30, 1948, the borrowings of the Bank from the Treasury amounted to $970,600,000. Earned surplus reserved for future contingencies as of June 30, 1948, amounted to approximately $106,960,000.

The management of the Bank is vested in a Board of Directors consisting of the Secretary of State, ex officio, and four full-time members appointed by the President by and with the advice and consent of the Senate. One of the members of the Board is designated by the President to serve as chairman. Not more than three of the five Directors may be members of any one political party.

ANALYSIS OF BUDGET PROGRAM

The Bank estimates a continued increase of loan disbursements against the project-type credits from $193.8 million in 1948, to $229.3 million in 1949, to $299.5 million in 1950. Disbursements under general-purpose balance-of-payments loans are declining, however, from $404.9 million in 1948, to $40.5 million in 1949, and $1.8 million in 1950. This change in form of credits results not alone from the gradual completion of the early postwar lend-lease and emergency reconstruction credits. It stems, also, from the policy of the Bank to establish more of its credits, regardless of their program type, in a manner which restricts the use of the Bank's funds to specific projects which can be expected to have the effect of increasing exports or decreasing imports in the borrowing country and thus improving the balance-of-payments position between the borrowing countries and the United States. The Bank has found that it is usually difficult, if not impossible, to restrict the effects of general-purpose balance-of-payment loans to such objects.

Loan balances outstanding at the close of 1950 are estimated at $2,445 million and undisbursed credit authorizations at $525 million, thus making a total of $2,970 million of the Bank's lending authority fully committed at the end of 1950. Loan repayments and interest income are estimated together to total $189 million in 1950. The Bank is thus becoming increasingly able to provide, itself, a considerable portion of its new loan requirements without drain on the Government Budget. The net effect on the Government Budget in 1950 is estimated at $130.4 million compared with —$15.2 million in 1949, $450 million in 1948, $746 million in 1947, and $775 million in 1946. The credit to the Government Budget in 1949 results from a large repayment in 1949 of $140 million from Canada in anticipation of maturity. Net profits for 1950 are estimated at $57 million compared with $50.2 million in 1949, and $44.9 million in 1948. Administrative expenses in 1950 are estimated at $950,000.

LEND-LEASE TERMINATION CREDITS

Disbursement of $655 million against these credits was completed in 1946. Repayments and interest in 1948 amounted to $34.8 million and are estimated at $36.6 million in 1949 and $35.8 million in 1950.

EMERGENCY RECONSTRUCTION CREDITS FOR UNITED STATES EXPORTS

The total outstanding balance on these credits, authorized prior to the beginning of loan operations by the International Bank, totaled $1,022.2 million on June 30, 1948. Disbursements in 1948 were $304.1 million and are estimated at $40.5 million in 1949 and $1.8 million in 1950. Repayments and interest in 1948 were $35.9 million, and are estimated at $31.5 million in 1949 and $31.8 million in 1950. The terms of most of these loans do not call for commencement of principal repayments until 1950 and 1951.

GENERAL FOREIGN-TRADE CREDITS

The Bank offers facilities for financing the export or import of goods and services which private capital is unwilling to undertake, either because the terms of repayment are longer than is customary in commercial bank practice, the risk is too great, or because of other impediments.

In undertaking credits under this program, the Bank lays major emphasis on its policy that the projects, goods, and services to be financed should improve the foreign trading position of the United States and borrowing countries by assisting the borrowing country to earn or save dollar and other hard currency exchange, either by increasing its exports or decreasing its imports to or from dollar or hard currency areas. This policy is followed not only to establish credits which are self-liquidating from an over-all dollar exchange viewpoint, but because a sound and enduring foreign trade of the United States must be based on a better balance of international dollar payments. In the long run the level of export trade of the United States will depend upon the amount of dollars or dollar exchangeable currencies, which can be earned by countries with whom the United States trades. The Bank selects and restricts its credits under this program

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

primarily to those transactions which meet this test. The program is usually confined to shorter term financing, running from approximately 1 to 10 years.

Most all credits under this general foreign-trade program are expected to be of the project-type loan, rather than general purpose balance of payments type of loan which have composed the principal part of the Bank's loan disbursements in the recent postwar years. A project-type loan usually necessitates much more preliminary investigation of an engineering, economic, credit, and legal nature. The legal work of negotiating, drafting, and amending contracts is extensive. Engineering and economic work, involving not only appraisal of proposed credits but constant study, both in Washington and in the field, of technical progress during the entire life of a credit, must be comprehensive and detailed if such credits are to accomplish their objective. Constant and detailed examination must be carried on to see that the borrower is complying with all features of a loan contract. By contrast the administration of the general purpose balance of payment loans is relatively simple. The costs of administering project-type loans is many times the cost of administering general purpose balance of payment loans, as is explained in more detail under "Administrative Expenses" below.

During 1948, credits and advance commitments were extended under this program for transactions with Austria, Belgium, Brazil, Canada, Colombia, Ecuador, Egypt, Finland, Germany, Italy, Japan, Mexico, Norway, Sweden, Turkey, United Kingdom, and Venezuela.

Loan balances outstanding under this program at the end of 1948 were $616.3 million and are estimated at $628.3 million in 1949 and $834.9 million in 1950. Disbursements in 1948 were $294.2 million and are estimated at $228.9 million in 1949 and $299.1 million in 1950. Repayments and interest were $103.5 million in 1948 and are estimated at $244.8 million in 1949 and $120.8 million in 1950.

REVOLVING CREDITS FOR SMALL EXPORTERS AND IMPORTERS

In addition to the general foreign-trade program described above, the Bank makes its facilities available to small United States exporters and importers who are unable to secure necessary assistance from commercial banks. Sometimes, large commercial banks which specialize in foreign-trade financing find it difficult to give adequate service to small concerns. Smaller banks which might perform this service frequently do not have the facilities for foreign-trade financing. To provide for these small exporters and importers, the Bank has authorized a revolving credit of $1 million to which such concerns may have access.

Although the average amount outstanding per account at any one time is small, approximately $5,000, the total disbursements under these revolving credits in 1948 were approximately $344,000. Estimated disbursements in 1949 are $400,000 and $400,000 in 1950. Repayments and interest in 1948 were $368,000 and are estimated at $404,000 in 1949 and $404,000 in 1950.

TYPES OF GOODS AND SERVICES FINANCED BY BANK CREDITS

All credits for financing exports are carefully examined as to the type of goods to be exported. To provide against unwarranted inclusion of goods in domestic short supply, the Bank discusses such proposals with the Department of Commerce. The accompanying table indicates the value of exports financed during the fiscal year 1948 based on the classifications of the Department of Commerce:

Summary of goods and services financed for the fiscal year 1948

Commodity Classification	Amount
Animals and animal products, inedible	$25,532
Vegetable products, inedible, except fibers and wood	4,033,514
Vegetable food products and beverages	2, 009, 628
Raw cotton	25, 926,135
Other textile fibers and manufactures	2,077,169
Tobacco	5,057, 910
Wood and paper	2,420, 280
Coal	86,361, 400
Other nonmetallic minerals	31,422,191
Metals and manufactures, except machinery and vehicles	51,390,837
Agricultural equipment	19, 929, 524
Aircraft	4, 527,419
Automotive equipment	25,165, 054
Construction and handling equipment	8, 690,961
Electrical equipment	28,665,905
Machine tools	9,955, 798
Metallurgical mills equipment	7,864,445
Mining equipment	7,642,834
Railway equipment	46,682, 856
Ships and vessels	27, 230, 490
Other machinery and vehicles	83, 961, 515
Fertilizers	376,179
Chemicals	14, 532, 697
Miscellaneous commodities	3, 529,360
Freight, forwarding charges, etc	73, 548, 558
Engineering and other services	3, 213, 240
Equipment and materials purchased in foreign countries	403,076
Unallocated balance	21, 994, 748
Total disbursements	598,639,255

Frequently the Bank can arrange with applicants for substitution of products in greater supply and may suggest to the applicants in some cases that such goods should be purchased in other countries and eliminated from the proposed credit from the Bank. Whenever the export products are of a technical nature, the Bank's engineering staff reviews them as to their suitability for the project being financed.

ACTIVITIES UNDER THE FOREIGN ASSISTANCE ACT OF 1948

By provisions of the Foreign Assistance Act of 1948, when it is determined by the Administrator for Economic Cooperation that assistance should be extended to a participating country on credit terms, the Bank makes and administers the credit on terms specified by the Administrator in consultation with the National Advisory Council on International and Fiscal Problems, of which the Chairman of the Board of Directors of the Bank is a member. The Administrator and the Chairman of the Board of Directors of the Bank have entered into an agreement providing that the Bank will issue as agent for and upon terms specified by the Administrator the guaranties of foreign investments which are extended under section 3(b) (3) of title I of the Foreign Assistance Act of 1948.

Operations of the Bank under the Foreign Assistance Act of 1948 are carried on the books of the Bank independently of operations under the Export-Import Bank Act of 1945 as amended. Activity in this connection is shown under the Economic Cooperation Administration in the Budget.

IMPORT ACTIVITIES

An increasing amount of imports into the United States as a factor in the international balance of payments is of great concern to the Bank from the viewpoint of assuring future repayment of its loans, as well as providing a means of payment of exports from the United States.

Most United States imports do not currently require direct financing by the Bank. This is being provided adequately, for the most part, by commercial banks.

The Bank is placing great emphasis, however, on its policy of selecting those types of exports for credit assist-

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

ance which will enable the borrowing country to increase its exports or to decrease its imports to and from dollar areas. The Bank's loans frequently enable the borrowing country to increase or conserve its dollar exchange by an annual amount considerably in excess of the total annual service charges on the loan.

The Bank is giving increasing study to types of credits which will directly assist in increasing production and lowering production costs, in dollar-deficient countries of materials short in supply in the United States, thus increasing United States imports and providing a higher base for a sound level of exports. In this way the Bank, in its sphere, and within the limited exportable supply of steel and other capital goods, in effect gives preference to exports for which the United States would receive in return increased quantities of vital imported materials in short supply.

The Bank stands ready to facilitate imports into the United States of such a character and in such a manner as will not dislocate American producers by any means consistent with its statute and policies in cooperation with importers or others interested in the import problem.

PRIVATE CAPITAL PARTICIPATION

The Export-Import Bank Act of 1945 requires the Bank to supplement and encourage and not compete with private capital. In accordance with this provision, the Bank makes no loans whenever private capital is available on a reasonable basis. Each credit application is studied from this standpoint and inquiries are made as to the availability of private capital. While under current international conditions, the availability of private capital is limited, nevertheless, the Bank has been able to encourage private-capital investment and participation in many instances. This takes place in several ways.

The Bank usually requires that adequate working capital be provided by the borrower as a condition to the Bank's credit. While we cannot measure the amount of foreign or domestic private equity capital that has been invested directly as a result of the Bank's credits, the sum is appreciable. For example, in connection with a recent credit application, the Bank negotiated terms of a credit requiring the investment of an additional $3.5 million of private equity capital. Private capital has been invested in numerous La tin-American enterprises which would not have been available without Export-Import Bank credit assistance.

On credit applications from American exporters, the Bank endeavors to secure pari-passu participation of the American exporter at its own risk to the extent of 25 to 33 percent of the loan. The Bank has approximately 75 credits on its books of this general character at the present time.

The Bank also encourages the participation of commercial banks at their own risk in Export-Import Bank loans. Such participation has been arranged in a number of exporter credits in addition to the exporter's participation and has also been arranged in a number of Government or quasi-Government loans. For example, commercial banks participate to the extent of $18 million out of a $50 million loan to Belgium, to the extent of approximately $97 million out of a $200 million loan to the Netherlands, and to the extent of $34 million out of approximately $60 million for a revolving credit for the export of cotton to Japan.

The Bank maintains a special division in its organization to provide close contact with the private capital market and to assist in stimulating private capital participation.

ADMINISTRATIVE EXPENSES

The Board of Directors and the President's office, assisted by the office of the executive vice president, exercise supervision over all affairs of the Bank. Staff functions are performed by eight divisions: (1) office of the secretary; (2) office of the general counsel and legal division; (3) office of the treasurer and accounts division; (4) engineering division; (5) economics division; (6) examining division; (7) private capital participation division; (8) administrative division.

The change in type of work and increased work load resulting from the transition from general-purpose balance-of-payments loans to foreign-trade project-type loans began to reach significant proportions at the general staff level in the latter half of 1948 and is making satisfactory operations under the original 1949 administrative expense limitation impossible. This increase in work load plus the general increase in prices in all objects of expenditure, especially rent, has necessitated a request for a supplemental increase in the expense limitation for 1949 by $44,000, in addition to the pay increase which became effective in July 1948 on a basis comparable with Public Law 900.

The Bank's work load is in no way directly related to the size of its loans or the amount of its disbursements. It is proportional only, in the case of each individual loan, to the time of lawyers required for negotiation and preparation of resolutions, contracts, and amendments, the study and appraisal of foreign legal opinions, liens, guaranties, and other forms of security; to the time of engineers for review of technical aspects of loans involving engineering feasibility, adequacy of outside engineering investigations, suitability of project sites, availability of raw materials and transportation, careful field inspection of projects throughout the life of a loan and the checking of the adequacy of the work of contractors engaged in projects; to the time of economists for constantly appraising the future prospects of over-all balance of payments of borrowing countries and for the study of economic aspects, both present and future, of specific projects; to the time of examiners for negotiation and determination of compliance of borrowers with all provisions of a loan contract; to time involved in investigating the availability of private capital and frequently negotiating in this respect; to the time of accounting and record-keeping in regard to disbursements; collection of principal and interest; and to the time of directors, officers, and administrative division, the sum of all of which equals roughly the direct man-day loan costs.

This recent serious impact of additional work load, and increased administrative expense made necessary thereby, led the Bank to make a careful accounting study of administrative costs by loan types. This study reveals that it costs from 1 to over 100 times as much per annum to administer project-type credits as compared with general-purpose balance-of-payments credits per dollar of credit authorized. In 1948, about 68 percent of the Bank's disbursements were on general-purpose balance-of-payments credits. In 1949, however, the project-type credits are estimated to involve approximately *85* percent of the Bank's work and in 1950 over 99 percent.

The following tabulation gives examples of the comparative cost of administering project-type and general-purpose credits, including the investigation of credits which were denied.

Comparative cost of administering project-type and general-purpose balance-of-payments credits

	Amount of credit (millions)	Cost of administration	Period	Cost per annum per million dollars of credit
Project-type:				
Bolivia development	$18.8	$20,150	1948	$1,060
Peru, denial application	0	10,153	1948	
Brazil, mine, steel, and railroad	64.5	68, 465	1948	1,060
Chile, steel mill	28.0	21,534	1948	770
Venezuela, breakwater	1.1	8,487	1948	7,710
Austria, industry	13.0	27, 977	Nov.-June	3,230
Italy, industry	97.3	31, 203	Feb.-June	7,750
Turkey, exporter	7.4	11, 791	1948	1,590
General-purpose, balance-of-payments type:				
Canada	300.0	2,313	Nov.-June	8
Belgium, with private capital participation	32.0	8,301	1948	260

Total administrative expense for 1950 is estimated at $950,000, less than 2 percent of net profits and less than 1 percent of the Bank's net effect on the Government Budget.

EFFECT ON GOVERNMENT BUDGET

It is expected that the net effect on the Government Budget will be a net credit to the Budget in 1949 of $15.2 million and a charge against the Budget in 1950 of $130.4 million, as compared with $450.2 million in 1948. The reduction in the effect on the Government Budget for 1949 and 1950 results in considerable measure from the generally increasing level of repayments on loans of the Export-Import Bank which is accentuated in 1949 by the repayment prior to maturity of the large loan to the Canadian Government.

OPERATING RESULTS

Operations for the fiscal year ending June 30, 1948, showed a net income of approximately $45 million as compared with $30 million for the fiscal year 1947. The entire net earnings for the year were transferred to earned surplus reserved for future contingencies which amounted on June 30, 1948, to approximately $107 million. No dividends were declared, it being the judgment of the Board of Directors that until a larger and reasonable reserve has been established for possible future losses, earnings should be used to reduce borrowings from Treasury. All receipts of interest and principal are used to repay the Bank's borrowings to the Treasury as soon as they are collected. Net income in 1949 is estimated at $50 million and in 1950 at $57 million.

The net earnings of the Bank do not in themselves directly measure the financial results of the Bank from the viewpoint of the United States Government as a whole, since $1 billion is invested by the Treasury in the Bank in the form of capital stock upon which dividends will be paid only after reasonable provision has been made for possible future losses. As of June 30, 1948, the Secretary of the Treasury determined that the rate of interest to be charged to the Bank on its borrowings was *V/%* percent. In accordance with the Export-Import Bank Act of 1945 this rate takes into consideration the current average rate on outstanding marketable obligations of the United States as of the last day of the month preceding the issuance of the obligations of the Bank. Had the Bank paid a rate of interest so determined throughout the fiscal year 1948, on all public funds used by the Bank including its capital stock, its net earnings for the fiscal year would have been $21 million. This sum represents the amount earned by the Bank for the United States Government in the fiscal year 1948, after all administrative costs, losses, and interest on all public funds used by the Bank, including its capital stock.

FINANCIAL CONDITION

LOAN ACCOUNT

As of June 30,1948, total loans outstanding less deposits by participants amounted to $2,229 million. Undisbursed credit authorizations amounted to $643 million, making total outstanding credit authorizations in the form of loans or credits remaining to be disbursed $2,872 million. The uncommitted lending authority of the Bank as of June 30, 1948, was therefore $628 million.

Of the total loans outstanding on June 30, 1948, $175 million was advanced by private commercial banks under guaranty of the Export-Import Bank to assume the loans on demand.

Of the total loans outstanding, six were in default, amounting in total to $265,000, all of which have been reported in the Bank's semiannual reports to Congress. These loans are reserved in full and have been charged off against earnings. During the year approximately $38,000 was collected on these accounts and further collections are expected.

CAPITAL STOCK

Capital stock issued and outstanding as of June 30, 1948, all held by the Secretary of the Treasury, was $1 billion.

BORROWING AUTHORITY

The present borrowing authority of the Bank is $2.5 billion, which together with the total authorized stock of $1 billion, equals the total lending limitation of $3.5 billion.

As of June 30, 1948, the Bank had borrowed from the United States Treasury $970.6 million. Programs herein contemplated are expected to require no net borrowings from the Treasury in 1949, and approximately $146 million in 1950.

SCHEDULE C-1

POSITION WITH RESPECT TO BORROWING AUTHORITY

[Fiscal years ending June 30,1948, 1949, and 1950]

	1948 actual	1949 estimate	1950 estimate
Outstanding notes payable at end of year (statement C)	$970, 600,000	$970,600,000	$1,117,000,000
Balance of borrowing authority available to meet unforeseen program requirements	1, 529, 400,000	1, 529,400,000	1,383,000,000
Authorized borrowings	2, 500,000,000	2, 500,000,000	2, 500,000,000

ESTIMATES OF AUTHORIZATION RELATING TO CORPORATE FUNDS

NOTE.—The text of general authorizing language, as incorporated in The Government Corporations Appropriation Act, 1949, and as proposed for 1950, will be found immediately following the summary statements at the beginning of part III of this Budget.

Administrative Expenses, Export-Import Bank of Washington—

Export-Import Bank of Washington: Not to exceed **[$800,000]** *$950,000* (to be on an accrual basis) of the funds of the Export-Import Bank of Washington shall be available during the *current* fiscal year **[1949]** for all administrative expenses of the bank, including not to exceed **$300** for periodicals, $300 for newspapers, and $500 for maps; health-service program as authorized by law (5 U. S. C. 150), and not to exceed **[$2,000]** *$5,000* for temporary services, as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a): *Provided*, That necessary expenses (including special services performed on a contract or fee basis, but not including other personal services) in connection with the acquisition, operation, maintenance, improvement, or disposition of any real or personal property belonging to the bank or in which it has an interest, including expenses of collections of pledged collateral, or the investigation or appraisal of any property in respect to which an application for a loan has been made, shall be considered as non-administrative expenses for the purposes hereof. *{12 U. S. C. 635—635K, Sup. 635i; The Government Corporations Appropriation Act, 1949.)*

FEDERAL DEPOSIT INSURANCE CORPORATION

The Federal Deposit Insurance Corporation, defined as a mixed-ownership corporation by the Government Corporation Control Act, was organized under authority of the Banking Act of 1933 to insure the deposits of all banks that apply and qualify for insurance under the law. On June 30, 1948, there were only 1,159 uninsured banks in the United States and its possessions. On the same date there were 13,613 insured banks, and the contingent liability of the Corporation with respect to insured deposits aggregated about $75 billion. The insurance provided by the Corporation protects the accounts of depositors up to a maximum of $5,000 each.

To protect some 95 million depositors in the 13,613 insured banks the Corporation requires each such bank to maintain certain standards of banking practice. In carrying out its program it examines annually 6,684 insured banks not examined by any other Federal agency and reviews the reports of examination of 6,929 banks which are examined either by the Office of the Comptroller of the Currency or the Board of Governors of the Federal Reserve System. The Corporation in certain instances also conducts special examinations of the latter group.

Two methods have been utilized by the Corporation to protect depositors of insured banks: (1) By making a loan on, or the purchase of, substandard assets of a bank in an unsound condition in order to facilitate its merger with another insured bank; (2) by paying deposits of a closed insured bank up to $5,000 for each depositor. During the fiscal year 1948 no insured banks were placed in receivership and only three such banks required financial aid from the Corporation.

All insured banks pay assessments at an annual rate of one-twelfth of 1 percent of their deposit liabilities. During the past 14 years the return from its capital investment and assessments has been sufficient to cover all insurance losses and expenses of the Corporation and provide for the accumulation of a surplus which, on June 30, 1948, amounted to $994.8 million. The administrative expenses of the Corporation are provided for through an authorization approving the use of a specified amount of the Corporation's income for this purpose and do not require the appropriation of funds from the United States Treasury.

By Executive order of April 27, 1942, the Corporation was given temporary responsibility for supervision of the activities of all Federal credit unions which prior to that time had been under the jurisdiction of the Farm Credit Administration. The temporary transfer of these activities was made permanent by Reorganization Plan No. 1 of 1947 (effective June 29, 1947). However, pursuant to Public Law 813, approved June 29, 1948, responsibility for the administration of the Federal Credit Union Act (12 U. S. C. 1751-1772) was transferred to the Federal Security Agency, effective July 29, 1948. Share balances in Federal credit unions are not insured by the Corporation.

The original amount of the Corporation's paid-in capital stock was $289 million, of which the Federal Reserve banks paid $139 million and the Treasury paid $150 million. This stock was without nominal or par value, was nonvoting, and was not entitled to the payment of dividends. Public Law 363, approved August 5, 1947, directed the Corporation to retire its capital stock by paying the amount received therefor to the Secretary of the Treasury. Public Law 813, approved June 29, 1948, provided that the Corporation be reimbursed for the net cost it had incurred in the administration of the Federal Credit Union Act through July 28, 1948, plus all funds allocated in the 1949 budget for that activity, which were unexpended as of that date, by deducting such amounts from the first moneys payable to the Secretary of the Treasury on account of the retirement of the stock of the Federal Deposit Insurance Corporation owned by the United States. The capital stock of the Corporation has accordingly been retired and canceled as follows:

Payments into miscellaneous receipts of the Treasury, fiscal year 1948, pursuant to Public Law 363	$266, 695, 250. 41
Payments into miscellaneous receipts of the Treasury, fiscal year 1949, pursuant to Public Law 363	20, 677, 589. 31
Credit allowed (cancellation of stock), fiscal year 1949, pursuant to Public Law 813	1, 926, **717. 27**
Total, capital stock originally issued	289, 299, 556. 99

The $6,085,000 included for administrative expenses for the fiscal year 1950 is approximately 2 percent less than the $6,210,000 provided for 1949. However, it must be pointed out that after giving consideration to the transfer of funds and functions of the Federal Credit Union activities as prescribed by Public Law 813, and the salary increase granted by the Board of Directors effective with the Postal Rate Revision and Federal Employee Salary Act of 1948, there is an increase of $132,904, or about 2.4 percent, in 1950 over 1949, all of which is attributable to the strengthening and enlargement of the field examination staff.

During the 4-year period ended June 30, 1948, the total of loans and discounts in all banks insured by the Corporation increased about 80 percent to an all time high of $43.2 billion. Total resources of such banks on June 30, 1948 were approximately $161.2 billion.

HOUSING AND HOME FINANCE AGENCY

INTRODUCTORY STATEMENT

The major housing activities of the Federal Government were permanently grouped in the Housing and Home Finance Agency by Reorganization Plan No. 3 of 1947. The Agency includes three major constituents:

Home Loan Bank Board including:
  Federal Savings and Loan Insurance Corporation
  Home Owners' Loan Corporation
Federal Housing Administration
Public Housing Administration

The Administrator is responsible for the general supervision and coordination of the functions of these constituents and serves as chairman of the National Housing Council. He has primary responsibility for the administration and liquidation of the war and emergency housing programs conducted under the Lanham and related acts. Under the Housing Act of 1948 (Public Law 901, 80th Cong.), he is responsible for a new program of research and promotion in connection with standardization of building codes and of dimensions and methods of assembly of building materials. The Office of the Administrator serves as a principal point of contact, information, and advice with respect to housing policies and programs for the President, the Congress, and the public.

The Home Loan Bank Board formulates policies and supervises operations of the 11 Federal home loan banks, the Federal Savings and Loan Insurance Corporation, and the Home Owners' Loan Corporation. Although these subordinate units are grouped under and administered by the Board, separate budget estimates are presented for each except for the Federal home loan banks, which are mixed-ownership corporations. The Federal home loan banks provide a central credit reserve for their member thrift and home financing institutions. The Insurance Corporation insures share accounts (up to $5,000 for each investor) in those savings and loan associations which apply and are approved for insurance. The Home Owners' Loan Corporation, which refinanced the mortgages of more than 1 million distressed urban home owners, has been in liquidation since 1936 when its lending authority expired.

The Federal Housing Administration carries out the provisions of titles I, II, and VI of the National Housing Act in insuring notes and mortgages for the repair, improvement, modernization, construction, and purchase of residential property. It is also engaged in carrying out a new title VII of that act, added by the Housing Act of 1948, providing for encouragement to equity investment in the moderate range of rental housing by guaranteeing a minimum return on such investment. Its operations are financed by collection of fees and premiums for the services and protection provided.

The Public Housing Administration administers the low-rent housing and slum-clearance program authorized by the United States Housing Act of 1937, in addition to operating all of the federally owned nonmilitary, nonfarm housing. Under a delegation from the Administrator of the Housing and Home Finance Agency, and under his supervision, the Public Housing Administration is engaged in liquidating the public war housing and other programs. By similar delegation, it supervises management of temporary housing for veterans and their families under the authority of title V of the Lanham Act, and the disposition of such housing in accordance with the McGregor Act (62 Stat. 1062).

Appropriations are requested in the estimates of the Agency only for the Office of the Administrator and for annual contributions to local housing authorities for maintenance of the low-rent character of public housing projects developed under the United States Housing Act of 1937. All other activities are financed from corporate and other funds available from operations of the constituent units of the Agency.

The budget programs and estimates submitted provide only for presently authorized functions. Legislation is being proposed which includes programs of low-rent public housing, slum clearance, housing construction in Alaska, an expanded housing research program, and certain legislation relating to (1) disposition of federally owned housing, (2) revisions of presently available aids to private housing, and (3) retirement of Federal investments in the Federal home-loan banks and the Federal Savings and Loan Insurance Corporation together with authority for these institutions to borrow from the Treasury during periods of financial stress. These proposals would require additional appropriations of $170,000 in 1949 and $16,500,000 in 1950, including $10 million for Alaska housing, with expenditures amounting to $140,000 and $10,530,000 for the respective fiscal years. The legislation would increase by $700 million in 1949 the loan authorization in connection with low-rent housing and add $25 million in 1950 for slum clearance, resulting in expenditures of $15 million in 1949 and $135 million in 1950. Required contract authorizations of $100 million for capital grants in connection with slum clearance, and $85 million for annual contributions under the low-rent housing program, would not be expected to result in expenditures until after 1950. Treasury receipts, it is estimated, would be increased under the legislation proposed by approximately $81 million in 1950, due to accelerated retirement of the Federal investment in the Federal home loan banks. These banks would be authorized to borrow $1 billion, and the Federal Savings and Loan Insurance Corporation $750 million, from the Treasury.

OFFICE OF THE ADMINISTRATOR

The Office of the Administrator provides the staff assistance through which the Administrator discharges his responsibility for the general supervision and coordination of the functions of the constituent units of the Housing and Home Finance Agency. Through the grouping of housing functions within this Agency, this Office provides for the President and the Congress a primary source of information relating to housing.

In connection with this responsibility, the activities of the Office include the analysis of technical, financial, and economic programs, developing new methods and techniques, appraising needs, and formulating proposals for Federal action, consistent with national policy, to assist private enterprise, labor, the public, and all levels of government in solving the Nation's housing problems.

In addition to these general responsibilities arising out of the Agency's field of operations, there are three principal functions of the Office of the Administrator.

The first is that of providing staff assistance and consultation for the National Housing Council. The Council,

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

of which the Administrator is chairman, includes (in addition to the heads of the constituent units of the Agency) the Veterans' Administrator, the Chairman of the Board of the Reconstruction Finance Corporation, the Secretary of Agriculture, and the Secretary of Commerce. The Council serves as a medium for developing plans for the fullest and most effective use of the housing functions and activities of the agencies represented on the Council in the furtherance of housing policies and objectives established by law; for facilitating consistency between such housing functions and activities and the general economic and fiscal policies of the Government; and for avoiding overlapping or duplication of such housing functions and activities.

The second of these functions, added by the Housing Act of 1948, is technical research and studies to develop and promote the acceptance and application of improved and standardized building codes, and standardized dimensions and methods for the assembly of home building materials and equipment.

The third of these additional functions is in the discharge of the Administrator's responsibility for the development, management, and disposition of publicly financed war and veterans' housing, operation of which has been delegated to the Public Housing Administration.

Actual expenses of the Office of the Administrator for fiscal year 1948 are compared with the revised estimates for 1949 containing provision for a new technical research function authorized in August 1948, and with 1950 estimates providing for the first full year of activity under this function.

ESTIMATES OF APPROPRIATION

HOUSING AND HOME FINANCE AGENCY

OFFICE OF THE ADMINISTRATOR

Salaries and Expenses, Office of Administrator, Housing and Home Finance Agency—

Salaries and expenses[, Office of the Administrator, $750,000, to be available **for]:** *For* necessary expenses of the Office of the Administrator, including [the preparation, mounting, shipping, and installation of exhibits; expenses of attendance at meetings of organizations concerned with the work of the Agency when specifically authorized by the Administrator] *purchase of one passenger motor vehicle at not to exceed $3,000, for replacement only; dissemination of the results of research and studies undertaken pursuant to title III of the Housing Act of 1948, notwithstanding the provisions of section 306 of the Penalty Mail Act of 1948;* and health service program as authorized by law (5 U. S'. C. 150); *$1,600,000. (5 U. S. C. 133y; 61 Stat. 954; Act of Aug. 10, 1948, Public Law 901; The Government Corporations Appropriation Act, 1949.)*

Annual specific appropriation:

Appropriated 1949, [a] **$1,050,000** Estimate 1950, **$1,600,000**

[a] Includes $300,000 appropriated in the Supplemental Appropriation Act, 1949.

INTRODUCTORY STATEMENT

The Home Loan Bank Board, a bipartisan three-man board created by Reorganization Plan No. 3 of 1947, formulates policies and supervises operations of the Federal Home Loan Bank System, the Federal Savings and Loan Insurance Corporation, and the Home Owners' Loan Corporation. Budget estimates for fiscal year 1950 are submitted separately for the Home Loan Bank Board, the Federal Savings and Loan Insurance Corporation, and the Home Owners' Loan Corporation, together with estimates of nonadministrative expenses for the Board's Examining Division.

The estimated gross administrative expense requirements of the Home Loan Bank Board are offset in part by reimbursements for services rendered to the subordinate units; the respective amounts of these reimbursements are shown as additions to the estimates of those units and as deductions from the gross estimates of the Board. The balance is defrayed from assessments against the 11 Federal home-loan banks in accordance with section 18 (b) of the Federal Home Loan Bank Act. It is this net amount that appears in the proposed authorizing language for the Home Loan Bank Board for the fiscal year 1950.

The Government Corporations Appropriation Act, 1948, provided a single authorization for administrative expenses of the Home Loan Bank Board, which included the administrative expenses of the Board's Examining Division. The language of the Government Corporations Appropriation Act, 1949, also provided a single authorization, but added a specific sublimitation for the Examining Division. Subsequent to the approval of the 1949 act, however, section 2 of Public Law 895, Eightieth Congress, was passed, providing that all necessary expenses of the Examining Division shall be considered as nonadministrative expenses. For ready comparison, the actual and estimated obligations for all 3 years have been separately presented for the Board and the Examining Division. No appropriation or authorization for the Examining Division is required since its expenses are defrayed from fees collected from the institutions examined.

ESTIMATES OF AUTHORIZATION RELATING TO CORPORATE FUNDS

NOTE.—The text of general authorizing language, as incorporated in The Government Corporations Appropriation Act, 1949, and as proposed for 1950, will be found immediately following the summary statements at the beginning of part III of this Budget.

Administrative Expenses, Housing and Home Finance Agency, Home Loan Bank Board—

Home Loan Bank Board: Not to exceed a total of **[$1,800,000,** of which $1,340,000 shall be available exclusively for necessary expenses in connection with the making of supervisory or other examinations (except examinations of Federal home loan banks) including the provision of services and facilities therefor,] *$450,000* to be derived from the special deposit account established under the provisions under the head "Federal Home Loan Bank Administration" in the Independent Offices Appropriation Act, 1944, and from receipts of the Federal Home Loan Bank Administration, the Federal Home Loan Bank Board, or the Home Loan Bank Board for the *current* fiscal year **[1949]** and prior fiscal years, shall be available during the *current* fiscal year **[1949]** for administrative expenses of the Home Loan Bank Board, including health-service program as authorized by law (5 U. S. C. 150), and the Board may utilize and may make payment for services and facilities of the Federal home-loan banks, the Federal Reserve banks, the Federal Savings and Loan Insurance Corporation, the Home Owners' Loan Corporation, and other agencies of the Government: *Provided,* That all necessary expenses in connection with the conservatorship of institutions insured by the Federal Savings and Loan Insurance Corporation and all necessary expenses (including services performed on a contract or fee basis, but not including other personal services) in connection with the handling, including the purchase, sale, and exchange, of securities on behalf of Federal home-loan banks, and the sale, issuance, and retirement of, or payment of interest on, debentures or bonds, under the Federal Home Loan Bank Act, as amended, shall be considered as nonadministrative expenses for the purposes hereof: *Provided further,* That notwithstanding any other provisions of this Act, except for the limitation in amount hereinbefore specified, the administrative expenses and other obligations of the Board shall be incurred, allowed, and paid in accordance with the provisions of the Federal Home Loan Bank Act of July 22, 1932, as amended (12 U. S. C. 1421-1449). *(The Government Corporations Appropriation Act, 1949.)*

EXAMINING DIVISION, HOME LOAN BANK BOARD

The Examining Division, organized as a staff unit of the Home Loan Bank Board, is responsible for conducting annual and special supervisory examinations of all Federal savings and loan associations, of State-chartered savings and loan associations which are insured by the Federal Savings and Loan Insurance Corporation, and of such noninsured member institutions of the Federal Home Loan Bank System as are not subject to State supervision. The Division also examines and analyzes the financial condition of savings and loan associations which apply for membership in the Bank System, for insurance of accounts, or for conversion from State to Federal charter.

The institutions examined bear the costs of examination, and the fees charged are calculated to meet all operating expenses of the Division. These expenses were subject to annual authorization of the Congress until the current fiscal year when Public Law 895, Eightieth Congress, approved July 3, 1948, provided that "all necessary expenses in connection with the making of supervisory or other examinations (except examinations of Federal home-loan banks), including the provision of services and facilities therefor, shall be considered as nonadministrative expenses. " The actual expenditures for the fiscal year 1948 listed below were authorized for that year under the head, Federal Home Loan. Bank Administration.

As a staff unit of the Board, the Division reimburses the Board for its proportionate share of the Board's administrative expenses.

It is the responsibility of the Examining Division to examine all insured savings and loan associations annually. During the past several years, insufficient funds and inability to recruit and retain an adequate staff of experienced examiners resulted in a substantial number of examinations becoming overdue. As of June 30, 1948, a total of 746 savings and loan associations insured by the Federal Savings and Loan Insurance Corporation had not been examined for periods in excess of 1 year. Approximately a third of this number, however, was in the 13-to-14-month tolerance category.

The staff of field examiners approved for the fiscal year 1949 is now substantially recruited and the total number of past due examinations had been reduced to 611 by November 30, 1948. Again one-third of this number was in the tolerance category. It is anticipated that examinations will be on a current basis by June 30, 1949, and be kept current during fiscal year 1950.

The following table shows, for the fiscal years indicated, data regarding factors principally influencing the Division's work program and staff requirements:

	1948	1949	1950
Examinations completed or to be completed	2,573	2,646	2,720
Average assets of insured institutions (start of year)	$3,126,000	$3,585,000	$3,863,000
New mortgage loans made by average insured institution	1,169,000	1,286,000	1,286,000

Federal Reserve Bank of St. Louis

Under the provisions of the Federal Home Loan Bank Act, approved July 22, 1932 (47 Stat. 725), Congress created a reservoir of credit by authorizing the Federal Home Loan Bank Board to establish Federal home loan banks throughout the country from which home-financing institutions might secure funds to meet the reasonable withdrawal requests of their investors and supplement the savings ordinarily received from individual citizens to meet the home-financing needs of their communities. The Federal home loan banks created under the act, and the building and loan associations and similar institutions which are members of these banks, constitute the Federal Home Loan Bank System. It was designed to stabilize and strengthen institutions promoting private thrift and individual home ownership. It performs substantially the same function in the field of home mortgage credit as the Federal Reserve System performs as a credit reserve for commercial banks, and the Federal land banks perform in the field of farm finance.

The Federal home loan banks, defined as mixed-ownership corporations by the Government Corporation Control Act of 1945 (Public Law 248, 79th Cong.), obtain their funds from subscriptions to capital stock, the issuance of their own obligations, and deposits of member institutions. The capital stock of the banks consists of subscriptions of the United States Government and of member institutions. The Secretary of the Treasury was authorized by the Congress to subscribe to the capital stock of the Federal home loan banks up to the total amount of $125 million. The amount thus subscribed and paid in full aggregated $124,741,000 of which $4,949,800 had been retired as of June 30, 1948, leaving a Government interest in the banks of $119,791,200. Ownership of stock was transferred as of July 1, 1947, from the Reconstruction Finance Corporation to the Secretary of the Treasury, under the provisions of Public Law 132, Eightieth Congress. Further retirements of Government stock are estimated at $14 million during fiscal year 1949 and $3 million during 1950. These retirements are reflected as miscellaneous receipts of the Treasury. Legislation being proposed to provide authority for the banks to borrow from the Treasury in time of stress and to accelerate retirement of Government stock, would result in estimated additional retirements in 1950 of approximately $81 million.

There follows a condensed consolidated statement of the financial condition of the banks as of June 30, 1948.

ASSETS

Cash:	
On deposit with Treasurer of the United States	$6, 632, 109
On hand and in banks	19, 057, 470

Reserves and undivided profits of insured institutions	$585,000	$675,000	$770,000
Corporation's reserves for insurance losses	$90,956	$105,104	$120,668
Gross income	$13,044	$14,765	$16,219

PURPOSE AND FINANCIAL ORGANIZATION

The Federal Savings and Loan Insurance Corporation, a wholly owned Government corporation, was created pursuant to title IV of the National Housing Act, as amended. The purpose of the Corporation is to insure savings accounts up to a maximum of $5,000 in all Federal savings and loan associations and in those State-chartered institutions of the savings and loan type which apply and are approved for insurance. An objective of equal importance was the provision of a reliable source of funds for the private financing of homes. Savings and loan associations, operating largely under a mutual form of organization, are found in every State and constitute the only type of institution which specializes in the financing of homes. Practically all residential areas of any size are serviced by an insured savings and loan association.

During the 14 years of the Corporation's existence, member institutions have accumulated loss reserves and undivided profits of $585,000,000, while the Insurance Corporation has reserves of $90,956,266, after providing for losses. Since its inception, the Insurance Corporation has had only 35 loss cases with a net aggregate loss of approximately $5,200,000. Losses for the entire period of operation are thus less than the annual premiums of approximately $9,000,000 currently being collected from member institutions.

The Corporation is authorized to take measures, described in detail below, to prevent default of insured institutions. When, however, a Federal savings and loan association is declared in default, the Home Loan Bank Board, in accordance with the procedure prescribed by law, appoints the Corporation as receiver for the purpose of liquidation. When a State-chartered institution is declared to be in default, the Corporation may be appointed by the appropriate public authority to act as receiver for purposes of liquidation.

The Corporation operates under the supervision and direction of the Home Loan Bank Board which provides certain staff services for the Corporation as well as facilities for the examination and supervision of insured institutions. The costs of examination are borne by the institutions examined, while all other services rendered by the Board, including a fair proportion of the Board's general administrative budget, are subject to reimbursement by the Corporation. The capital stock of the Corporation amounting to $100,000,000 was transferred on June 30, 1948, from the Home Owners' Loan Corporation to the Secretary of the Treasury, in accordance with the provisions of The Government Corporations Appropriation Act, 1949.

The projected program for 1950 does not include the issuance of any obligations although the Corporation has authority to borrow money and to issue notes, bonds, debentures, and other obligations. In the event of economic stress, it would be necessary for the Corporation to issue obligations to secure any funds beyond its accumulated reserves and capital required to meet its insurance liability. Under existing authority, securities must be sold in the open market which, during a period of economic stress, may not offer favorable sale conditions. Recognizing the importance to the public interest of the Corporation's capacity to meet insurance claims promptly, it would seem desirable to give the Corporation the right to sell debentures to the Treasury in times of emergency.

ANALYSIS OF BUDGET PROGRAMS

The budget program of the Corporation comprises the three following broad operating functions:

1. Underwriting.
2. Prevention of default.
3. Payment of insurance.

Underwriting.—During the war period, abnormal economic conditions and the emphasis placed on the importance of savings resulted in a more or less automatic flow of funds into financial institutions. However, in the last year or so, money and credit conditions have tightened and savings and loan associations now generally regard insurance as an essential feature in the attraction of savings. Also, the public has become increasingly security conscious and generally inquires as to the existence of insurance coverage. As a consequence, the Corporation has received more inquiries from the public and from uninsured institutions during the past few months than in any comparable period since 1940.

As of June 30, 1948, there were 2,566 insured institutions with assets of $9,198,397,500, an increase of 16.36 percent since the beginning of the fiscal year. In 1950 it is anticipated that the presently insured associations may increase another $1 billion in size. In addition, applications are expected from approximately 125 uninsured institutions.

The anticipated increases in insured liability, which constitutes the base on which premiums are collected, result in estimated increases in income and in investment by the Corporation in United States Government securities. In fiscal year 1949 income from premiums and admission fees is estimated to increase from the 1948 level of $8,779,981 to $10,223,000 (statement A). This income, together with an estimated $4,542,100 of interest earned on United States Government securities, will permit the Corporation, after meeting its operating expenses, to increase its holdings of United States Government securities by an estimated $14.5 million. In 1950, income from premiums and fees is estimated at $11,372,000 and interest earnings at $4,847,100, which income will permit the Corporation to increase United States Government security holdings further by an estimated $16 million (statement A).

Prevention of default.—Consistent with extension of

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

insurance on a soimd basis is reasonable prevention of default of existing insured institutions. Such prevention avoids the spreading influence of financial failure, thus holding losses to a minimum. The Corporation is authorized to make loans, to purchase part or all of the assets, or to make a cash grant, whenever it appears judicious to use these measures to eliminate conditions which would result in default of an institution.

During the Corporation's experience to date, the threatened impairment of capital has been removed in 28 insured institutions—3 accompanied by voluntary liquidation, 6 to facilitate merger, and 19 to permit continued independent operation on a sound basis. Communities in which these institutions were located were saved from the harmful effects of financial failure, and in addition, 54,873 investors were protected from, the losses they would have experienced if the institutions had not been insured. Total disbursements for prevention of default have aggregated $5,374,125, of which $475,796 has been recovered, leaving a net loss of $4,898,329 or 4.7 percent of total income to June 30, 1948.

To keep abreast of developments in the home financing field, the Corporation follows a policy of making careful analyses of applicants for insurance, and compiling and interpreting data regarding insured institutions. Through these means, many of the conditions, which in the past might have led to an impairment of capital and threatened default, are discovered and corrected.

Payment of insurance.—If, because prevention of default is neither prudent nor economical, an insured institution is placed in liquidation, the Corporation fulfills its insurance contract by making available to each insured investor, at his option, either (1) a new insured account in an insured institution not in default, or (2) 10 percent of his insured account in cash and the balance of 90 percent in negotiable non-interest-bearing debentures, one-half due within 1 year and one-half within 3 years from the date of default.

Since 1934 the Corporation has provided for liquidation of only seven institutions with aggregate assets of $9,209,816. Of the 7,705 investors' accounts amounting to $7,557,214, over 93 percent had been settled by June 30, 1948.

When an insured institution declared in default is a Federal savings and loan association, the Corporation is appointed as receiver for the purpose of liquidation. Payment of insurance takes place in a relatively short period of time—most of the accounts being presented for payment within the first few months and approximately 90 percent in the first year. However, liquidation of the assets requires a longer period of time in order to avoid undue disturbance of the real estate market, as well as to obtain the maximum recovery from assets of the receivership.

Liquidation of receiverships involves the organization and direction of field staffs; analysis of loan portfolios; appraisal of real estate and loan security; collections; foreclosures; tax studies; insurance coverage; real estate conditioning; property management and sale; and the final sale of assets and termination of the liquidation.

The number of insured institutions which may fail in any particular year is unpredictable. No loss cases of any type have occurred during the last 4 years, but failures may occur at any time.

Financial effects.—Since expenditure requirements for payment of insurance to share account investors and prevention of default are unpredictable, estimates thereof are omitted from the financial statements herein. Statement A does, however, reflect the financial effect during fiscal years 1948 and 1949 of liquidation of institutions in connection with which insurance payments were previously made and of certain specific assets of institutions assisted by previous default prevention measures. These effects are reflected in statement A as residual insurance payments from old receiverships, liquidation and other expenses, and recoveries on prior contributions to prevent default.

Administrative expenses.—The authorization of $650,000 requested for the fiscal year 1950 is based upon the assumption of continued prosperity in the general economy. As a result, the estimate does not provide for additional expenses such as would be involved during a period of stress. The budget program of the Corporation is designed to preserve the present nucleus of competent and experienced administrative personnel, without which the Corporation would be unable to meet adequately its responsibility of taking preventive action to avoid unfavorable developments and would be unable to meet the emergency situations which may arise. The payment of insurance, expenses of liquidating insured institutions, and expenditures for the avoidance, termination, or minimizing of losses are not considered as administrative expenses.

EFFECT ON THE GOVERNMENT BUDGET

For the fiscal year 1949, the net effect on the Government Budget is estimated to be a net credit of $134,383, and in fiscal year 1950, a net expenditure of $20,400 representing changes in each of these years in the Corporation's checking account balances on deposit with the U. S. Treasury. No deposits to miscellaneous receipts or appropriations from the general fund of the Treasury are anticipated in either of these years.

OPERATING RESULTS

Revenues of the Corporation are derived primarily from insurance premiums collected from insured institutions at an annual rate of one-eighth of 1 percent of insured accounts and creditor obligations, and from income on investments. After deduction of operating costs and provision for losses, earnings are credited to reserves. All expenses and losses have amounted to 9.52 percent of corporate income and no appropriations from the Treasury have been required.

During the fiscal year 1948, the Corporation had a net income of $12,501,288. It is estimated that during the fiscal year 1949 net income will be $14,147,900, and in 1950, $15,563,800 (statement B). In the absence of insurance losses or the payment of insurance all of these funds will be invested in accordance with law in United States Government obligations or obligations guaranteed as to principal and interest by the United States.

FINANCIAL CONDITION

Assets.—Total assets of the Corporation amounted to $195,503,344 as of June 30, 1948, an increase of $13,102,974 since the beginning of the fiscal year. Investment in Government obligations represented 98 percent or $191,-479,972 of corporate assets. By June 30, 1950, it is estimated that Government obligations held by the Corporation may amount to approximately $221,978,172. (See statement C.)

Liabilities.—The Corporation has no outstanding obligations except current liabilities. Deferred income repre-

Federal Reserve Bank of St. Louis

sents premiums billed for insurance of accounts to be taken into earnings over the insured year of each insured institution. (See statement C.)

Capital and reserves.—All right, title, and interest of the Home Owners' Loan Corporation in the capital stock of the Insurance Corporation was transferred to the Secretary of the Treasury as of June 30, 1948, pursuant to Public Law 860, Eightieth Congress, which authorized the Secretary of the Treasury to cancel bonds of the Home Owners' Loan Corporation in an amount equal to the par value of the stock so transferred, plus accrued dividends to be computed at a rate approximating the average interest cost incurred by the Home Owners' Loan Corporation on its total borrowings during each respective fiscal year. Section 402 (b) of the National Housing Act provides for payment of dividends on capital stock at the rate of interest paid by the Home Owners' Loan Corporation on its bonds issued in payment for such capital stock, or 3 percent. Public Law 860 left undetermined whether the Corporation is liable to the Secretary of the Treasury, present sole stockholder, for accrued dividends of $25,181,749.98 to June 30, 1948, determined pursuant to the provisions of that law. The future liability of the Corporation for dividends or any other form of return to the Treasury on its capital investment also remains unsettled pending further legislation.

Section 404 (a) of the National Housing Act, as amended, requires accumulation of a reserve of 5 percent of all insured accounts and creditor obligations of insured institutions before collection of premiums may be discontinued. On June 30, 1948, such a reserve would have amounted to $388,310,500. As of the same date, accumulated reserves of the Corporation actually amounted to $90,956,266 or 1.17 percent of the base just described. It is anticipated that reserves will total $105,104,166 on June 30, 1949, and $120,667,966 on June 30, 1950. Since the share accounts and creditor obligations of insured institutions are expected to advance from $8,650 million to $9,300 million by June 30, 1950, the ratio of reserves to the foregoing base will not increase appreciably (statement C).

SCHEDULE **C-1**

POSITION WITH RESPECT TO BORROWING AUTHORITY

NOTE.—The Corporation has authority to borrow money and to issue notes, bonds, debentures, or other such obligations upon such terms and conditions as the Corporation may determine. As of June 30,1948, there were no securities of these types outstanding, and none are expected to be outstanding as of June 30,1949, and June 30,1950.

ESTIMATES OF AUTHORIZATION RELATING TO CORPORATE FUNDS

NOTE.—The text of general authorizing language, as incorporated in The Government Corporations Appropriation Act, 1949, and as proposed for 1950, will be found immediately following the summary statements at the beginning of part III of this Budget.

Administrative Expenses, Federal Savings and Loan Insurance Corporation—

Federal Savings and Loan Insurance Corporation: Not to exceed **[$600,000]** *$650,000* shall be available for administrative expenses, including health-service program as authorized by law (5 U. S. C. 150), which shall be on an accrual basis and shall be exclusive of interest paid, depreciation, properly capitalized expenditures, expenses in connection with liquidation of insured institutions, liquidation or handling of assets of or derived from insured institutions, payment of insurance, and action for or toward the avoidance, termination, or minimizing of losses in the case of specific insured institutions, and legal fees and expenses, and said Corporation may utilize and may make payment for services and facilities of the Federal home-loan banks, the Federal Reserve banks, the Home Loan Bank Board, the Home Owners' Loan Corporation, and other agencies of the Government: *Provided,* That notwithstanding any other provisions of this Act, except for the limitation in amount hereinbefore specified, the administrative expenses and other obligations of said Corporation shall be incurred, allowed, and paid in accordance with title IV of the Act of June 27, 1934, as amended (12 U. S. C. 1724-1730).

PROGRAM HIGHLIGHTS

[As of June 30, 1948, 1949,1950]

	1948	1949	1950
Loan and vendee accounts:			
Terminated during year	72,938	73,189	73,000
Number outstanding	278,189	205, 000	132, 000
Dollar value	$423, 613,977	$315,383, 977	$231, 659,977
Property accounts:			
Owned and in process	42	4	7
Dollar value	$89, 066	$8,066	$14,066
Outstanding bond liability, U. S. Treasury	$244, 000, CCO	$120,000, 000	$24, 000,000
Net operating income (fiscal year)	$15, 338, 783	$12, 459,000	$9, 421, CCC
Deficit (—) or surplus	-$11, 035, 345	$1, 423, 655	$10, 844, 655

PURPOSE AND FINANCIAL ORGANIZATION

The Home Owners[7] Loan Corporation is a wholly owned Government corporation, organized under the Home Owners' Loan Act of 1933, as amended, as an emergency instrumentality to refinance the mortgages of distressed urban home owners. Since the Corporation's lending authority expired on June 12, 1936, the efforts of the Corporation have been devoted to the orderly liquidation of its accounts and other assets.

The capital stock of the Corporation, amounting to $200 million, was subscribed and paid for and is held by the Secretary of the Treasury. The Corporation operates under the supervision and direction of the Home Loan Bank Board. The Corporation reimburses the Board for its proportionate share of the administrative expenses of the Board and its staff units.

The Corporation was authorized by law to issue $4,750 million of bonds, exclusive of certain refunding issues. As a matter of policy the Corporation has sold all bonds to the Treasury since June 1, 1945. Of the total bond authorization, $2,688,215,850 was exchanged for mortgages, $223,856,710 was invested in the shares of savings and loan associations, $100 million was invested in the capital stock of the Federal Savings and Loan Insurance Corporation, and $477,380,990 was sold to provide capital. Thus, on June 30, 1948, a total of $3,489,453,550 of bonds had been issued for value and a balance of $1,260,546,450 of borrowing authority remained available. The Corporation does not foresee any further charges against this borrowing authority.

ANALYSIS OF BUDGET PROGRAM

The progress of liquidation of the Corporation's affairs reflected in the statement of sources and application of funds (statement A) for the fiscal years 1949 and 1950 is predicated upon the assumption of continued prosperity in the national economy. In recent years of high income, the Corporation has actively encouraged its borrowers to pay off their indebtedness in advance of their contractual obligations. Also, the Corporation has throughout its existence conducted a loan servicing program designed to reduce delinquent accounts to a minimum. Both of these efforts have produced effective results. These objectives will be pursued during the fiscal years 1949 and 1950, as well as a special program designed to speed the orderly liquidation of the Corporation's investments.

The special program for accelerating liquidation has been developed for application in those States in which the aggregate loan balances owing to the Corporation are $1 million or less. The Corporation's mortgagors in those States have been circularized by letter requesting that they refinance or pay their accounts in full. A substantial volume of repayments has been secured by this method. Following up on this first step, field representatives contact financial institutions in an effort to dispose, on a State-wide basis, of those accounts which the borrowers have been unable to pay in full or to refinance locally. This plan will continue to be actively pursued in fiscal year 1950. The following tabulation reflects the progress of this program through October 31, 1948:

State	Program initiated	Loans outstanding			
		At initiation of special program		As of Oct. 31, 1948	
		Number	Amount	Number	Amount
Nevada	Mar. 17,1948	166	$110,722	3	$6,145
Wyoming	Apr. 15,1948	428	282, 480	90	92, 424
Montana	May 14,1948	644	457, 723	189	175, 763
Idaho	June 15,1948	688	456, 318	294	243,327
Vermont	Aug. 25,1948	358	408, 785	217	257, 359
New Mexico	Aug. 25,1948	368	211, 276	248	157, 892
New Hampshire	Sept. 15,1948	358	440, 807	282	333,402
Total		3,010	2, 368, 111	1,323	1, 266,312

The second phase of the accelerated liquidation program applies to the remaining States and has as its objective the removal from the Corporation's books of accounts with small balances and bringing current all slow and delinquent accounts. Borrowers in this category will be contacted by circular letter and encouraged to pay small* loans in full, to refinance their mortgages with local financial institutions, or to increase their principal payments so that their loans will be completely amortized by 1951.

As these programs proceed, valuable experience will be obtained on the basis of which the Board will determine policy to govern the final liquidation of the Corporation. As the small loans which are uneconomical and expensive to service are removed from the Corporation's portfolio, the operating results should improve on a relative basis. Income from the remaining earning accounts would then more substantially exceed the servicing costs and administrative expenses of the Corporation.

The following table shows the recent status of borrowers' accounts:

	June 30,1948	Oct. 31,1948
Total outstanding	278,189	253,637
Paid on schedule and less than 3 months in arrears	268,478	244,187
Accounts in default:		
3 to 7 installments	8,750	8,503
7 to 12 installments	585	623
12 or more installments	72	82
Authorized for foreclosure	301	242
Condemnation pending	3

During the fiscal year 1948, extraordinary reductions of the Corporation's outstanding bonds held by the Treasury, in the total amount of $128,154,109, were occasioned by congressional action. These reductions of debt were accomplished by cancellation of bonds by the Secretary of the Treasury incident to the transfer to the Secretary of the Treasury of the Corporation's investment of $100,000,000 in the Federal Savings and Loan Insurance Corporation; the settlement of dividends accrued on such investment to June 30, 1948, in the amount of $25,181,750; and the transfer of the Corporation's home office building in the District of Columbia to the Public Buildings Administration at a determined value of $2,972,359, including an allowance of $590,888 for accumulated depreciation (statement A). On statement A, the total bond cancellations appear as funds applied, $128,154,109, which sum is also included in funds provided as follows: Disposition of investment in Federal Savings and Loan Insurance Corporation, $100,000,000; dividends received on such investment, $25,181,750; disposition of home office building, $2,381,471; and recovery of depreciation on building, $590,888.

In fiscal year 1949, the Corporation anticipates that $114,507,000 of funds will be provided by realization of assets, principally from loan principal repayments by its borrowers ($110,020,000), and that $17,082,000 will be provided by operating income (statement A). Of these funds it is estimated that $124,600,000 will be applied to retirement of Corporation bonds, the remainder being applied to operating expenses, acquisition of assets, and an increase in working capital items other than cash. In fiscal year 1950, realization of assets is expected to provide $89,048,000, of which $85,006,000 represents loan principal repayments by its borrowers, and operating income is estimated at $12,516,000; $96,450,000 is expected to be applied to bond retirement, and $3,093,000 to operating expenses (statement A).

The personnel of the Corporation has declined steadily from a high of 21,000 in 1935 to an estimated 525 by the end of the current fiscal year. The budget estimate of $2,145,000 for administrative expenses for the fiscal year 1950 contemplates an average employment of 450.

EFFECT ON THE GOVERNMENT BUDGET

For the fiscal year 1949, it is estimated that cash in United States Treasury accounts will be reduced by $1,603,307. During that fiscal year, it is estimated that $124,600,000 of bonds will be retired, of which $124,000,000 will be for repayment of borrowings from the Treasury and $600,000 for repayment of bonds held by the public. In addition, there will be paid into the Treasury $2,290,000 representing interest due. The total effect of these fund movements will be to reduce the Government's Budget by $125,286,693.

For the fiscal year 1950, it is estimated that cash in United States Treasury accounts will be reduced by $1,029,000; that $96,450,000 of bonds will be retired, of which $96,000,000 will be for repayment of borrowings from the Treasury and $450,000 for repayment of bonds held by the public. In addition, there will be paid into the Treasury $925,000 representing interest due, producing a total reduction of the Government's Budget of $96,346,000 (statement A).

OPERATING RESULTS

For the fiscal year 1948, net operating income after losses and adjustments of valuation reserves amounted to $15,338,783 (statement B). During the year two substantial nonoperating items were taken into income: Adjustment of depreciation in connection with the sale of the Washington home office building, amounting to $590,888 which had been previously charged to expenses; and an item of $25,181,750, representing a settlement with the Treasury in accordance with the provisions of the Government Corporations Appropriation Act, 1949, in lieu of accrued dividends upon the Corporation's investment in the capital stock of the Federal Savings and Loan Insurance Corporation. These items, together with net operating income, resulted in net income for the fiscal year 1948 of $41,111,421 (statement B). For the fiscal year 1949, it is estimated that the operations of the Corporation will result in a net income of $12,459,000, and for 1950 a net income of $9,421,000 is estimated. These estimates of income will entirely eliminate the Corporation's deficit, which stood at $11,035,345 on June 30, 1948. The estimated surplus is $1,423,655 at June 30, 1949, and $10,844,655 at June 30, 1950.

FINANCIAL CONDITION

Assets.—On June 30, 1948, there were 278,189 mortgage loan and vendee accounts outstanding, amounting to $423,613,977 (statement C). It is estimated that during the current fiscal year 73,189 accounts will be removed from the Corporation's books by payment in full or through refinancing, reducing the total outstanding on June 30, 1949, to 205,000 accounts valued at $315,383,977. By the end of the fiscal year 1950, a further reduction of 73,000 accounts is anticipated, leaving an estimated 132,000 accounts amounting to $231,659,977. These estimates represent the value of outstanding accounts before the application of the reserve for losses.

On June 30, 1948, the Corporation owned or was in process of acquiring title on 42 properties, valued at $89,066. It is estimated that by the end of the current fiscal year only 4 property accounts with a value of $8,066 will remain on the books of the Corporation. By June 30, 1950, it is estimated that 7 properties, valued at $14,066, will be owned or in process of acquisition by the Corporation.

Investments of the Corporation in the share accounts of savings and loan associations have declined rapidly and special efforts are being made to encourage the institutions involved to repay these investments in advance of their call dates. Investments which total $6,704,650 on June 30, 1948, are estimated to decline by $2 million during both the current year and the budget year.

Liabilities.—Of the total of $3,489,453,550 of bonds issued for value, there remained outstanding on June 30, 1948, the sum of $247,050,775. The United States Treasury held $244 million of the total outstanding, and the balance of $3,050,775 represented matured issues held by the public but not yet presented for payment. The total amount of bonds outstanding is estimated to decline to $122,450,775 by June 30, 1949, and to $26,000,775 by June 30, 1950 (statement C).

Capital and surplus.—The Corporation's deficit of $11,035,345 on June 30, 1948, will be eliminated during the current fiscal year, and an estimated unreserved surplus of $1,423,655 will be accrued by June 30, 1949. It is estimated that this surplus will increase to $10,844,655 by June 30, 1950.

ESTIMATES OF AUTHORIZATION RELATING TO CORPORATE FUNDS

NOTE.—The text of general authorizing language, as incorporated in The Government Corporations Appropriation Act, 1949, and as proposed for 1950, will be found immediately following the summary statements at the beginning of part **III** of this Budget.

Administrative Expenses, **Home Owners' Loan Corporation**—

Home Owners' Loan Corporation: Not to exceed **[$2,300,000]** *$2,145,000* shall be available for administrative expenses, including health-service program as authorized by law (5 U. S. C. 150), which shall be on an accrual basis and shall be exclusive of interest paid, depreciation, properly capitalized expenditures, expenses (including services performed on a force account, contract, or fee basis, but not including other personal services) in connection with the acquisition, protection, operation, maintenance, improvement, or disposition of real or personal property belonging to said Corporation or in which it has an interest, and legal fees and expenses, and said Corporation may utilize and may make payment for services and facilities of the Federal home-loan banks, the Federal Reserve banks, the Home Loan Bank Board, the Federal Savings and Loan Insurance Corporation, and other agencies of the Government: *Provided,* That, notwithstanding any other provisions of this Act, except for the limitation in amount hereinbefore specified, the administrative expenses and other obligations of said Corporation shall be incurred, allowed, and paid in accordance with the Home Owners' Loan Act of 1933, as amended (12 U. S. C. 1461-1468) [: *Provided,* That all right, title, and interest of the Home Owners' Loan Corporation in the capital stock of the Federal Savings and Loan Insurance Corporation is hereby transferred to the Secretary of the Treasury and the Secretary of the Treasury is authorized and directed to cancel bonds of the Home Owners' Loan Corporation in an amount equal to the par value of the stock of the Federal Savings and Loan Insurance Corporation so transferred, plus accrued dividends thereon which, notwithstanding any other provision of law, shall be computed at a rate approximating the average interest cost incurred by the Home Owners' Loan Corporation on its total borrowings during each respective fiscal year: *Provided further,* That not to exceed $5,000 of the funds of said Corporation shall be available until June 30, 1952, for the payment of such expenses as the Chairman of the Home Loan Bank Board or his designee or designees may find necessary for winding up the affairs and effecting the dissolution of the United States Housing Corporation and the United States Housing Corporation of Pennsylvania].

PROGRAM HIGHLIGHTS

[Dollars in millions]

	1948	1949	1950
Mortgage and yield insurance applied for (number of dwelling units):			
New construction	460,318	333,500	339,000
Existing construction	185,831	207,500	221,000
Mortgage and yield insurance written:			
Number of dwelling units	323,067	462,205	391,855
Mortgage amounts insured	$2,171	$2,802	$2, 242
Improvement loans insured:			
Number of notes	1,412, 753	1,243,300	----------
Net proceeds	$625	$560	----------
Estimated outstanding balance of insurance in force, end of fiscal year:			
Improvement loans	$732	$722	$278
Mortgage insurance	$5,349	$7,183	$8,388
Acquired security or collateral:			
On hand, end of year:			
Defaulted improvement loan notes	$18.5	$27.9	$32.8
Foreclosed properties:			
Number	1,002	1,585	1,895
Amount	$4.3	$8.3	$10.5
Fee and premium income	$57.3	$66.5	$60.0

PURPOSE AND FINANCIAL ORGANIZATION

Creation and organization.—The Federal Housing Administration was created by the National Housing Act approved June 27, 1934. Although the Federal Housing Administration does not have a corporate form of organization, it was made subject to the provisions of the Government Corporation Control Act by the Housing Act of 1948 (Public Law 901, 80th Cong.).

Purposes and functions.—The purposes of the Federal Housing Administration are to stabilize the mortgage market, to improve home-financing practices, and to improve housing standards and conditions through a system of insurance of loans to finance the production, purchase, modernization, and repair of residential structures. As of June 30, 1948, a total of $9.9 billion of mortgages and $2.9 billion of property-improvement loans had been insured.

Since the passage of the Housing Act of 1948, the Federal Housing Administration is responsible for eight insurance programs, as well as some insurance of loans for refinancing of existing mortgages under section 603 which, insofar as new business is concerned, has expired. These eight are as follows:

1. *Title I.*—Insurance of loans for the alteration, repair, and improvement and, within certain limitations, construction of both residential and nonresidential properties.
2. *Section 208.*—Insurance of mortgages up to 80, 90, or 95 percent of appraised value on new and existing one-to-four-family homes.
3. *Section 207.*—Insurance of mortgages up to 80, 90, or 95 percent of value on multifamily residential rental projects.
4. *Section 608.*—Insurance of mortgages on multifamily residential rental projects on special terms designed to stimulate production of rental housing under present economic conditions.
5. *Section 609.*—Insurance of loans for the manufacture of housing by industrial processes, and short-term notes incident to sale of such housing.
6. *Section 610.*—Insurance of mortgages executed in connection with the sale by the Government of certain federally owned housing.
7. *Section 611.*—Insurance of construction loans on groups of 25 or more single-family dwellings constructed by modernized, large-scale site-construction methods.
8. *Title VII,*—Yield insurance for investors in large-scale rental housing projects.

Financial organization.—The Federal Housing Administration maintains five insurance funds: (1) the title I insurance fund, (2) the mutual mortgage insurance fund covering mortgage insurance under section 203, (3) the housing insurance fund covering insurance of mortgages under section 207, (4) the war housing insurance fund covering all title VI insuring operations, and (5) the housing investment insurance fund for operations under title VII.

All income is credited and alFexpense charged to these funds. Income is derived from insurance premiums, appraisal and miscellaneous fees, interest on investments in United States Government securities, and from the management and disposition of properties which have been acquired by the Commissioner as the result of foreclosures of insured mortgages. Expenses include: (1) insurance claims; (2) costs in connection with the acquisition, management, and disposition of foreclosed properties; and (3) administrative expenses.

Premiums have been charged for insurance on title I loans only since July 1, 1939. All other insurance programs have been income-producing since their inception.

The mutual mortgage insurance fund differs from other funds in that, in accordance with section 205, mortgages insured are grouped together with others having a like risk character and maturity date and the mortgagors in the group receive in the form of dividends any excess of fees and premiums paid over losses and expenses allocable to the group.

Insurance limitations fixed by law for the various insurance programs, and the charges against these limitations, are shown in the table below:

POSITION WITH RESPECT TO INSURANCE AUTHORITY, OCTOBER 31, 1948

[Dollars in millions]

	Authorization	Charges	Balance available
Title I:			
Outstanding insurance liability plus excess of cumulative claims paid over collections from premiums and other sources deposited with the U. S. Treasury	$200	$166.0	$34.0
Title II:			
Outstanding balance of insurance in force (charges include outstanding commitments to insure)	i 4,000	3,871.6	128.4
Title VI:			
Insurance of mortgages executed in connection with sale of war and certain other federally owned housing:			
Cumulative mortgages insured (charges include outstanding commitments to insure)	750	6.5	743.5
Insurance of war housing mortgages, veterans' emergency housing mortgages including builders' loans for modernized site-construction projects, and prefabricated housing loans:			
Cumulative mortgages and loans insured, excluding reinsurance (charges include outstanding commitments to insure)	2 5,750	5,133.2	616.8
Title VII:			
Yield insurance for investors in large-scale rental housing projects: Outstanding contingent liability	1,000	----------	1,000.0

1 Subsequently increased by the President to $5 billion.
« May be increased by the President to $6,150,000,000.

ANALYSIS OF BUDGET PROGRAMS

The over-all effect of the Housing Act of 1948 was a marked increase in the volume of insurance business. This increased volume as projected in the budget is reflected in the following table:

UNIT APPLICATIONS (TITLES II, VI, AND VII)

	1949 original estimate (excluding Housing Act of 1948)	1949 revised estimate (including Housing Act of 1948)	1950 estimate
New construction:			
Sec. 203	154,000	240,000	275,000
Sec. 207	10,000	5,000	24,000
Sec. 608		70,000	
Sec. 609		5,000	10, 000
Sec. 611		12, 000	25, 000
Title VII		1,500	5,000
Total new construction	164,000	333, 500	339, 000
Existing construction:			
Sec. 203	132, 000	190,000	190, 000
Sec. 603	10, 000	6,000	6,000
Sees. 603-610	4,000	1,500	5,000
Sees. 608-610	31, 500	10, 000	20, 000
Total existing construction	177, 500	207, 500	221,000
Total new and existing construction	341, 500	541, 000	560, 000

It is estimated that during the fiscal year 1949,1,250,000 notes will be insured under title I. The provision of the Housing Act of 1948 which increases the maximum insurable loan under title I for the construction of small homes to $4,500 may be expected to facilitate the production of low-cost housing during fiscal year 1949. Authority for new insurance under title I expires June 30, 1949; however, it is anticipated that insurance claims under this program will continue at a substantial volume in both fiscal years 1949 and 1950.

Largest single source of Federal Housing Administration funds is the fees and initial premiums on new insurance and continuing renewal premiums on insurance in force. Fees and premiums provided $57,265,029 of funds during fiscal year 1948 and provisions from this source in fiscal years 1949 and 1950 are estimated at $66,486,078 and $59,981,634, respectively (statement A). In fiscal year 1949, it is estimated that $7,290,589 of funds will be provided by recoveries on and sale of acquired security, while $11,472,000 is expected to be derived from borrowings in the form of debentures issued in exchange for properties acquired as the result of foreclosures of insured mortgages. Correspondingly it is estimated that in fiscal year 1950 $7,027,090 will be provided by recoveries on and sale of acquired security, and $11,472,000 will be provided by issuance of debentures. Of the remainder of total funds estimated to be provided from all sources in fiscal years 1949 and 1950, the major portion will be derived from investment income and by decrease of cash balances on deposit with the Treasurer of the United States (statement A).

Funds are currently being applied largely to investment in United States Government securities, acquisition of security or collateral, administrative expenses, and to the retirement of outstanding debentures. Investment in United States Government securities is estimated at $28 million in fiscal year 1949 and $27.5 million in 1950. For acquisition of security or collateral, the estimates for the 2 fiscal years, respectively, are $25,083,280 and $22,944,600. Administrative expenses are estimated at $23,675,000 in 1949 and $22,395,000 in 1950, and debenture retirements at $13,767,100 and $11,496,750, respectively. All of these amounts, together with comparable actual figures for fiscal year 1948, appear in the statement of sources and application of funds (statement A).

ADMINISTRATIVE EXPENSES

The administrative expenses of the Federal Housing Administration consist 87 percent of personal services and 13 percent of other objects of expenditure. Of the total personal services expense approximately 30 percent is for the departmental staff and the remaining 70 percent is for the staff of the 68 field insuring offices, 12 service offices, and 40 valuation stations.

The departmental staff is engaged in the administration of the insurance programs; in the maintenance of architectural, valuation, mortgage credit, and other technical standards; in the supervision of field office insuring operations; and in legal, fiscal, budget, personnel, procurement, and other service functions. The field staff is engaged almost entirely in examination of new mortgage insurance applications, the inspection of properties offered as security for the mortgages, and the actual insurance of the mortgages. Field personnel requirements are thus directly affected by the volume of insurance applications which constitutes the major portion of Federal Housing Administration's work load. For 1949 it is estimated that insurance applications covering 536,000 dwelling units will be processed in the field. Inspection of properties constructed as a result of these applications is augmented by inspection during the current fiscal year of a large number of properties being constructed under insurance commitments issued under title VI during fiscal year 1948. The result is an unusually heavy inspection work load during the current fiscal year. The financial outcome of the Administration's insurance activities in the long run is critically dependent upon the care and thoroughness with which properties constituting the underlying security for its insurance risks are inspected.

As has been noted above, the approval on August 10, 1948, of the Housing Act of 1948 added new programs and amended old programs creating a work load not provided for in the 1949 administrative expense authorization. The Congress gave timely recognition to the increased administrative expense requirements of the Federal Housing Administration resulting from this new legislation and provided temporary relief through the passage of Public Law 904 which authorized the use of $2,100,000 of Federal Housing Administration's fourth quarter funds during the first three quarters of the current fiscal year. This action did not increase the administrative expense authorization for fiscal year 1949, but did permit necessary increases in staff during the first three quarters of the year at the expense of a deficiency in the fourth quarter. Since the actual authorization was not increased, Federal Housing Administration, following the usual practice in submitting the budget, has limited fiscal 1949 expenses in the administrative expense schedules to the amount actually authorized plus the proposed supplemental cost of the pay increase authorized by Public Law 900. The actual number of positions required to carry the full work load is shown in the administrative expense tables but the "lapse" figure has been increased to the extent necessary to scale down administrative expenses to $20,430,000 of which $19 million was actually authorized and $1,430,000 is for the pay increase. In reality, however, budget requirements for administrative expenses for fiscal 1949 amount to $23,-800,000 of which $1,688,000 is for the pay increases pursuant to Public Law 900. These budget requirements are included in statements A and B,

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

In fiscal year 1950 an estimated 550,000 unit applications will be processed in the field. Although a slightly larger work load is projected for 1950 than for 1949, it is assumed that increased productivity will permit it to be processed under an administrative expense budget somewhat smaller than estimated administrative expenses for fiscal 1949. The total administrative expenses for fiscal 1950 are estimated at $22,500,000, of which $1,623,520 is for the pay increase. Of the remaining $20,876,480, $17,918,030 is for personal services and the remaining $2,958,450 is for other objects of expenditure. Because capitalized furniture and equipment purchases are included in the administrative expenses limited by the annual authorization language, authorization amounts differ somewhat from administrative expense amounts shown in statements A and B.

EFFECT ON GOVERNMENT BUDGET

For the fiscal year 1949, net checking account expenditures are estimated at $3,998,654 and general and special account expenditures at $1 million, while repayments to the United States Treasury (recoveries on title I claims) are.expected to amount to $201,205, resulting in a net effect of increasing the Government Budget by $4,797,449. For the fiscal year 1950, net expenditures from checking accounts are estimated at $6,786,302 and repayments to the United States Treasury are estimated at $105,300, with the net effect of increasing the Government Budget by $6,681,002 (statement A).

OPERATING RESULTS

Income and expenses.—As shown in statement B, net income from all insurance programs during the fiscal year 1948, before adjustment of valuation and operating reserves, was $39,316,622. For the fiscal year 1949 it is estimated that net income will be $45,177,705, due mostly to an increase in fees and premiums from, a larger volume of insurance to be underwritten, and that for the fiscal year 1950 it will amount to $40,648,747. The reduction in net income for 1950 results mainly from the loss of fee and premium income under titles I and VI because of the expiration of authority to insure new loans under title I after June 30, 1949, and under section 608 of title VI after March 31, 1949.

As of June 30, 1948, as shown in statement C, $136,660,776 was available as the reserve for future insurance losses and expenses in connection with the insurance contracts in force. (Funds available for this purpose had formerly been included under the classification "surplus." The classification "reserves for contingent losses, expenses, and other charges" reflected on statement C was adopted as more descriptive of the purpose for which the funds are available, and the 1947 statement adjusted for comparability.) The net increases in valuation and operating reserves for the fiscal year 1948 amounted to $33,905,977; and are estimated at $44,172,420 and $35,770,446 for 1949 and 1950, respectively. The major portion of these increases is in the reserve for contingent losses, expenses, and other charges (statements B and C).

FINANCIAL CONDITION

The comparative statement of financial condition, statement C, is a combined balance sheet of all Federal Housing Administration funds.

Assets.—As of June 30, 1948, the assets of all funds totaled $216,972,562 and are estimated to reach $249,727,544 and $280,133,374 at the end of the fiscal years 1949 and 1950, respectively. The principal assets consist of cash, investments, loans receivable, and acquired security or collateral.

Liabilities.—Of the $169,977,192 total liabilities at June 30, 1948, $136,660,776 represent operating reserves for contingent losses, expenses, and other charges; $27,149,286, debentures payable in connection with the settlement of claims for insurance; and $6,167,130, current liabilities. It is estimated that by the end of the fiscal year 1949 total liabilities will amount to $200,928,094, of which $169,820,547 will represent operating reserves; $24,854,186, debentures payable; and $6,253,361, current liabilities. By the end of the fiscal year 1950 total liabilities are expected to reach $226,560,923, consisting of $195,376,187 operating reserves, $24,829,436 debentures payable, and $6,355,300 current liabilities.

Paid-in surplus.—The paid-in surplus of $15 million shown as of June 30, 1948, 1949, and 1950, consists of the original allocations by the Reconstruction Finance Corporation of $10 million to establish the mutual mortgage insurance fund and $5 million to establish the war housing insurance fund, as provided by the National Housing Act, as amended.

Expended appropriations.—Net expended appropriations as shown in statement C, amounted to $64,811,400 at June 30, 1948, and are estimated at $65,610,300 and $65,505,000 at the close of the next 2 fiscal years. These amounts represent funds advanced by the Reconstruction Finance Corporation to meet salaries and expenses of the Administration in the early years and to pay claims on title I notes, pursuant to the provisions of the National Housing Act of June 27, 1934, as amended, and subsequent appropriation acts. At June 30, 1949 and 1950, they also include $1 million appropriated from general funds in the United States Treasury to initiate the housing investment insurance fund established by the Housing Act of 1948.

Obligations of the Reconstruction Finance Corporation have been canceled by the Secretary of the Treasury in amounts equivalent to the Corporation's advances to the Federal Housing Administration.

Earned surplus (deficit).—The general reinsurance account was established in the mutual mortgage insurance fund by the National Housing Act to absorb any losses or expenses of group accounts which lack sufficient funds of their own, and to meet any general expenses with respect to mutual mortgage insurance not charged against group accounts. Although the general reinsurance account is shown on statement C with a deficit of $13,797,551 at June 30, 1948, $12,667,689 and $7,716,318 at June 30, 1949 and 1950, respectively; when the paid-in surplus of $10 million and the net expended appropriations of $31,990,813 pertaining to the general reinsurance account are added, this account had a credit balance of $28,193,262 at June 30, 1948, which balance is estimated to increase to $29,323,124 by June 30, 1949, and $34,274,495 by June 30, 1950.

The unreserved deficit of $19,018,584 at June 30, 1948, $19,143,161 at June 30, 1949, and $19,216,231 at June 30, 1950, respectively, is attributable to title I operations from July 1, 1934, to June 30, 1939, during which time the Administration was not authorized to collect insurance premiums on loans insured under this title.

Capital.—Total capital of all Administration funds amounted to $46,995,370 at June 30,1948, and is estimated to increase to $48,799,450 by the end of the fiscal year 1949, and to $53,572,451 by the end of the fiscal year 1950 (statement C),

[1] In the absence of sufficient experience to permit accurate estimation of insurance losses the amount shown represents accumulations available for losses, expenses, and other charges.

SCHEDULE C-1

POSITION WITH RESPECT TO BORROWING AUTHORITY

	1948 actual	1949 estimate	1950 estimate
Outstanding debentures payable at end of year (statement C)	$27,064,586	$24, 586,186	$24,277,436
Balance of borrowing authority available	0)	0)	(0
Authorized borrowings	(1)	(1)	(1)

[1] The Federal Housing Administration has no authority to borrow cash. It is authorized by law to issue debentures in exchange for mortgages or properties acquired as a result of default by mortgagors. The amount of debentures so issued is not specifically limited by law, but is indirectly restricted by limitations of insurance authority which, by limiting potential insurance liability, have the effect of restricting potential debenture issues.

OBLIGATIONS BY OBJECTS			
07 Other contractual services	$2,929	$6,158	

ESTIMATES OF AUTHORIZATION RELATING TO CORPORATE FUNDS

NOTE.—The text of general authorizing language, as incorporated in The Government Corporations Appropriation Act, 1949, and as proposed for 1950, will be found immediately following the summary statements at the beginning of part III of this Budget.

Salaries and Expenses, Federal Housing Administration, Housing and Home Finance Agency—

Federal Housing Administration: In addition to the amounts available by or pursuant to law (which shall be transferred to this authorization) for the administrative expenses of the Federal Housing Administration in carrying out duties imposed by or pursuant to law, not to exceed [$19,000,000] *$22,500,000* of the various funds of the Federal Housing Administration as follows: (1) The mutual mortgage insurance fund; (2) the housing insurance fund; (3) the account in the Treasury comprised of funds derived from premiums collected under authority of section 2 (f), title I of the National Housing Act, as amended (12 U. S. C. 1701); [and] (4) the war housing insurance fund; *and (5) the housing investment insurance fund* shall be available for expenditure, in accordance with the provisions of said Act for the administrative expenses of the Federal Housing Administration, including *purchase of not to exceed one passenger motor vehicle, for replacement only;* not to exceed $1,500 for periodicals and newspapers; not to exceed $1,500 for contract actuarial services; and health-service program as authorized by law (5 U. S. C. 150): *Provided*, That necessary expenses of the Administration (including services performed on a contract or fee basis, but not including other personal services) in connection with the acquisition, protection, completion, operation, maintenance, improvement, or disposition of real or personal property of the Administration acquired under authority of titles I, II, [and] VI, *and VII* of said National Housing Act, shall be considered as nonadministrative for the purposes hereof: *Provided further*, That, except as herein otherwise provided, the administrative expenses and other obligations, including nonadministrative expenses, of the Administration shall be incurred, allowed, and paid in accordance with the provisions of said Act of June 27, 1934, as amended (12 U. S. C. 1701).

[Funds made available by the Government Corporations Appropriation Act, 1949, for administrative expenses of the Federal Housing Administration for the fiscal year 1949, shall be available for administrative expenses of the Federal Housing Administration in connection with the Housing Act of 1948 in such amounts as may be approved by the Director of the Bureau of the Budget (but not exceeding in the aggregate $2,100,000) and the amounts so approved by the Director of the Budget may be transferred from funds available within such limitations as may be affected hereby for the last quarter of the fiscal year 1949 and obligated during the first three quarters of such fiscal year; and the sources of funds for such administrative expenses shall include the Housing Investment Insurance Fund created by the Housing Act of 1948.] *(The Government Corporations Appropriation Act, 1949; Supplemental Appropriation Act, 1949.)*

PUBLIC HOUSING ADMINISTRATION

INTRODUCTORY STATEMENT

The Public Housing Administration is one of the constituents of the Housing and Home Finance Agency established by Reorganization Plan No. 3 of 1947, effective July 27, 1947. The responsibilities of the Administration may be classified into two groups and business-type budgets are submitted for each of the five programs involved:

1. Housing programs transferred directly by Reorganization Plan No. 3 of 1947 are:

a. *United States housing program.*—This consists of: (1) The federally aided low-rent housing program under the United States Housing Act of 1937 (42 U. S. C. 1401); (2) the slum-clearance projects developed by the Public Works Administration under the National Industrial Recovery Act; and (3) the war housing developed under the defense amendment to the United States Housing Act, Public Law 671 (42 U. S. C. 1501), which authorized the use of low-rent funds to provide housing for defense workers. Financial and other operations are shown in the Budget for the United States Housing Act program. The Budget contains the annual appropriation request to Congress to cover contractual payments of annual contributions to assist in maintaining the low-rent character of locally owned low-rent projects.

b. *Subsistence homestead and greentown program.*—The three greentowns and the residual subsistence homestead projects remaining under the jurisdiction of the former National Housing Agency pursuant to section 2 (a) (3) of the Farmers' Home Administration Act of 1946 (Public Law 731, 79th Cong., approved Aug. 14, 1946) constitute this program which is in liquidation.

c. *Defense Homes Corporation.*—Disposition of housing properties was completed during fiscal year 1948 and all remaining assets, liabilities, and records were transferred to the Reconstruction Finance Corporation in accordance with the Government Corporations Appropriation Act of 1949.

2. Execution of delegated operations under functions transferred to the Administrator under section 5 (c) of Reorganization Plan No. 3 of 1947, under the supervision of the Housing and Home Finance Administrator:

a. *Public war housing program.*—This program involves final settlement of development contracts and management and disposition of public war housing projects under the Lanham and related acts (54 Stat. 1125, 54 Stat. 872, and 55 Stat. 14, 197, 810).

b. *Homes conversion program.*—This consists of management and disposition of properties leased by the Government, and remodeled to produce additional dwelling units for war workers, under the Lanham Act (54 Stat. 1125).

c. *Veterans' re-use housing program.*—This program involves the supervision over local management of temporary dwellings for veterans, produced under title V of the Lanham Act (54 Stat. 1125).

In addition to the five program budgets outlined above, there is also a sixth budget covering in consolidated form the administrative expenses of the Public Housing Administration in carrying out all of these programs. Such expenses are met from a single administrative expense fund authorized by the Housing Act of 1948, and are distributed to the various programs on the basis of work load.

PROGRAM HIGHLIGHTS

	1948 actual	1949 estimate	1950 estimate
Average number of dwelling units in program	384,611	335,401	278,137
Total income from management	$74,830,202	$61,243,800	$48,820,200
Total expense of management before losses and charge-offs	$39,106,188	$34,390,800	$26, 692, 600
Net operating income from management	$16,175,361	$26,822,150	$22,096, 750
Proceeds from disposition of property	$15,686, 529	$44,689,050	$107, 521,500

PURPOSE AND FINANCIAL ORGANIZATION

The public war housing program was carried out during the defense and war periods as one means of providing necessary accommodations for workers in essential war industries. The housing still in use serves the needs of veterans, servicemen and their families, and certain defense workers pending disposition in accordance with the basic legislation. No new projects have been authorized since 1945.

This housing was constructed with funds appropriated under the act of October 14, 1940 (42 U. S. C. 1521), (Lanham Act) and related acts. Expenses of operation, maintenance, and disposition or removal are paid from rental and other project income.

ANALYSIS OF BUDGET PROGRAMS

The scope of the program is shown in the following table:

	Actual, June 30, 1948		Estimated, June 1949		Estimated, June 30,3950	
	Projects	Units	Projects	Units	Projects	Units
Management:						
Active	1,319	331,917	1,113	289,861	868	231,614
Inactive and in process of disposition	100	27,476	77	21,532	34	13,279
Total under management	1,419	359,393	1,190	311,393	902	244,893
Disposed of during year:						
Permanent	--------	15,902	--------	23,000	--------	51, 500
Temporary	--------	42,284	--------	25,000	--------	15,000
Total disposition	--------	58,186	--------	48,000	--------	66,500

In fiscal year 1948, approximately 19,000 temporary housing units were disposed of by ransfer to other Federal agencies and to the veterans' re-use program. Similar transfers; - are not contemplated in fiscal years 1949 and 1950.

MANAGEMENT

Two principal types of project management are involved: (1) direct operations, covering projects managed by the Public Housing Administration with Federal employees; (2) leased operations, pertaining to projects managed by local housing authorities under lease agreements which provide for return to the Government of net income after payment of approved operating costs. As of June 30, 1948, approximately 36 percent of active projects were directly managed and 64 percent were under lease agreements.

Requirements per unit for project operation and maintenance are estimated at the same level as in the 1948 fiscal year except for two items:

1. *Repairs, maintenance, and replacements, and public services.*—Many temporary projects are now over their expected 5-year span of life and will continue in operation at least until January 1, 1950, and possibly longer. This prolonged use and previous deferral of major maintenance work will cause repairs, maintenance, and replacement to increase substantially in volume and cost, and expenditures during fiscal years 1949 and 1950 are expected to exceed those in fiscal year 1948 by approximately 30 percent for these items. A comparable rise is expected in the cost of public services, most of which is due to necessary road repairs.

While the increase in repairs, maintenance, and replacements in permanent projects is not expected to be as large as in temporary projects, replacements of short-life substitute materials incorporated in buildings constructed during the war is becoming a problem. These replacements are necessary in order to maintain projects in a habitable condition and will be made at a greater replacement cost for materials and labor. It is expected, therefore, that these expenditures will increase by 20 percent in fiscal years 1949 and 1950 over 1948.

2. *Utility costs.*—Utility costs are estimated to increase approximately 5 percent in fiscal year 1949 over 1948, and an additional 5 percent in fiscal year 1950, due to increases in rates and in consumption.

Estimated project operating income and expense decrease with the anticipated reduction in number of active units remaining in the program:

	Fiscal year 1949	Fiscal year; 1950
Operating income	$61,243,800	$48,820,200
Operating expenses (including administrative but before losses and charge-offs)	34,390,800	26,692,600
Net operating income before losses and charge-offs	26,853,000	22,127,600

EMERGENCY SHELTER—VANPORT FLOOD AREA

As a result of floods in the vicinity of Portland, Oreg., and Vanport, Wash., a wide area was devastated late in fiscal year 1948. Five thousand three hundred families were forced to evacuate the Federal housing project at Vanport. Approximately one-half found housing accommodations elsewhere or left the area. A special joint resolution (Public Law 624, 80th Cong.) authorized the use of war housing funds for the provision of stop-gap shelter in this emergency. Of those applying for emergency housing, 1,206 were housed in existing housing projects and 1,450 in stop-gap units, provided through the rehabilitation of inactive projects, relocation and repair of surplus trailers, and the purchase of new trailers. As of June 30, 1948, funds amounting to $1,836,450 had been obligated for the purpose of rehousing flood victims and it is estimated that the final cost will reach approximately $3,000,000.

DISPOSITION

Circumstances arising from the continued acute shortage of dwelling accommodations have delayed the removal of temporary housing and complicated the sale of permanent projects. These conditions have led to widespread

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

difficulties in connection, with such problems as obtaining local consent to disposition plans, applying preferential rights to purchase, and arranging necessary financing, even with the aid of Federal Housing Administration mortgage loan insurance commitments or GI loan guaranties. An accelerated rate of disposition is assumed for the budget year, since a great deal of the necessary preliminary work, community consultation, appraisals, etc., has or will have been completed.

The estimated disposition program for war housing is shown in the following table:

	Inventory as of June 30, 1948	Estimated, fiscal year 1949	Estimated, fiscal year 1950
Permanent dwelling units	149,746	126,746	75,246
Permanent units sold		20,000	50,000
Asset value written off		$87, 111, 800	$217,728.800
Proceeds from sale (gross)		$43,554,550	$106,828,000
Sales expense		$570,000	$1,425,000
Units transferred to other Federal agencies		3,000	1,500
Asset values of units transferred to other Federal agencies		$13,518,000	$6,759,000
Temporary housing:			
Family dwelling units	176,473	163,973	161,473
Dormitory units	23,146	15,646	8,146
Stop-gap units	10,028	5,028	28
Units disposed of or demolished:			
Family dwelling units		12,500	2,500
Dormitory units		7,500	7,500
Stop-gap units		5,000	5,000
Asset values written off		$49,837,500	$22,387,500
Proceeds from sale (gross)		$1,134, 500	$693, 500
Disposition expense		145,400	32,900

Permanent and demountable projects.—The budget program assumes that 50,000 permanent-type units, having an original book value of $217.7 million, will be sold with an estimated realization of $106.8 million. A number of factors contribute to this heavy write-down: Abnormal depreciation due to wartime use of substitute materials; expense of remedying deficiencies under local building codes; costs to purchaser of moving demountable units, etc.

It is contemplated that all sales will be for cash except where definite commitments were made prior to the issuance of Public Regulation 1 as amended March 16, 1948. Sales of this latter type are estimated to involve 2,684 units valued at $7,535,000 in fiscal year 1949, on which principal payments will amount to $994,169.

Utilities and community facilities serving dwellings to remain on site will be dedicated to the local government if no sale is possible. Such dedications of water and sewer systems, electric lines and gas mains, streets, playgrounds, and public spaces are estimated at $5,143,900 in fiscal year 1949 and $12,904,100 in fiscal year 1950.

Temporary projects.—The Lanham Act (sec. 313) provides that temporary structures are to be removed from their present sites as soon as the emergency need for them has been met. Although January 1, 1950, is the date when removal must be accomplished, there will apparently be need for continued operation of a substantial number of temporary projects beyond that date.^ Under the law, and after consultation with the communities involved the Housing and Home Finance Administrator must make an annual reexamination and report to the Congress on any exceptions. The budgetary program assumes disposition of 25,000 units in 1949 and a further 15,000 units in 1950, and continued operation of the 169,647 units remaining on June 30, 1950.

Disposition of temporary units is accomplished by demolition or removal for nonresidential use. Government-owned land is sold, and leased land returned to private owners. It is anticipated that 70 percent of the leased land can be returned at no cost to the Government, the owners accepting the site improvements in lieu of a site restoration settlement. The balance of the land will involve land restoration costs.

ADMINISTRATIVE EXPENSES

Estimated administrative expenses for fiscal year 1949 consist of $6,048,000 for management and disposition operations (including $409,000 for pay increase authorized by Public Law 900). A total of $5,359,000 is estimated for management and disposition operations in fiscal year 1950.

The basis for distributing these costs is explained in the separate budget estimate of administrative expenses.

EFFECT ON GOVERNMENT BUDGET

All receipts of the Administration are deposited in special accounts in the Treasury from which its expenditures for operations are made. The unobligated balance at the end of each quarter is paid into miscellaneous receipts. The net excess of receipts over expenditures in the fiscal year 1949 is estimated at $62,972,227 and in fiscal year 1950, at $131,302,100.

OPERATING KESULTS

Net income from management operations, which amounted to $16,175,361 in fiscal year 1948, is estimated to be $26,822,150 and $22,096,750 in fiscal years 1949 and 1950, respectively. Substantial casualty losses at Vanport, Oreg., and other areas are the primary cause for the lower net income in fiscal year 1948. The reduced net income in fiscal year 1950 is accounted for by the lesser number of dwelling units in management as a result of disposition activities.

Proceeds from disposition are estimated at $44,689,050 in fiscal year 1949 and $107,521,500 in fiscal year 1950. The cost of property written off and disposition expenses to be charged against this income will result in net losses of $101,658,550 and $150,365,800 for fiscal years 1949 and 1950, respectively (statement B).

FINANCIAL CONDITION

Reference to the comparative statement of financial condition shows a continued decrease in assets and capital from June 30, 1948, through June 30, 1950, as a result of disposition of war housing by sale or demolition and by transfers to other Government agencies.

Appropriated junds.—The estimated appropriated fund balance of $50,786,328 at June 30, 1950, includes the unobligated balance from operations in the last quarter of fiscal year 1950 which will be returned to the Treasury in the first quarter of fiscal year 1951. The remainder consists of funds held to liquidate obligations, and the disposition reserve.

Land, structures, and equipment.—The balance in fixed assets shows a net decrease of $151,052,753 at the close of fiscal year 1949 over 1948 and a further net decrease of $259,779,400 in the following fiscal year.

Earned surplus (or deficit).—The deficit of $93,053,094 as of June 30, 1948, increases to $166,163,748 on June 30,

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

1949, and to $294,432,798 on June 30, 1950, as unrecoverable property costs are written off after disposition.

Total capital.—The book value of Government capital in this program is anticipated to be $1,117,503,839 as of June 30, 1949, and $871,656,430 as of June 30, 1950 (statement C).

Disposition reserve.—A special $25 million reserve for expenses of operation and disposition has been maintained under authority contained in section 303 of the Lanham Act. This reserve would expire under present law on July 25, 1949. However, the financial statements for fiscal years 1949 and 1950 are projected on the basis that the reserve accumulation of $25 million will be reduced to $5 million by deposits of $20 million with the Treasury Department as miscellaneous receipts in fiscal year 1949. Authority is requested and language proposed to authorize a reserve of not to exceed $15 million in fiscal year 1950. It is anticipated that the reserve will have to be built up to $15 million in subsequent years when proceeds of operation and disposition may become insufficient to meet final liquidation costs.

Permanent appropriations, special accounts:

Disposition or Removal, War Housing Program, Public Housing Administration, Housing and Home Finance Agency—

This item consists of appropriations made by the act of October 14, 1940, as amended, of moneys derived from the rental or operation of housing property and of moneys derived from the disposition or removal of such property. Moneys derived from rental and operation are available for expenses of operation and maintenance and of disposition or removal, and moneys derived from disposition or removal are available for expenses of disposition or removal, including the establishment of necessary reserves therefor and administrative expenses in connection therewith. The unobligated balances of these moneys remaining at the end *of each quarter* of the fiscal year, except for authorized reserves, are covered into miscellaneous receipts (60 Stat. 9).

Appropriated (est.) **1949, $38,892,670** Estimate 1950, **$108,575,500**

Management:			
Net income per unit month before amortization, depreciation, losses, and charge-offs	$8.20	$7.07	$6.75
Number of active units at end of year	29,067	18,317	5,887
Number of active properties at end of year	4,590	2,890	790
Disposition:			
Number of properties terminated during year:			
Expiration leasehold period			903
Cancellation prior to lease expiration	1,666	1,700	1,197
Unamortized value of properties to be terminated	$6,455,707	$4,677,000	$2,885,700
Proceeds of disposition	$2,768,748	$2,006,000	$1,238,000
Percent of unamortized value recaptured	42.9	42.9	42.9

PURPOSE AND FINANCIAL ORGANIZATION

The homes conversion program, which reaches an advanced stage of liquidation in this budget period, originated under the provisions of the Lanham Act (42 U. S. C. 1521) to provide housing for war workers by remodeling existing structures held under lease agreements. Section 303 of the act authorizes the use of operating income for property operation, disposition and administrative costs, and necessary reserves. Operating income is adequate to meet all operating costs and permit a substantial return to the United States Treasury.

ANALYSIS OF BUDGET PROGRAMS

MANAGEMENT

Properties in this program are managed by real-estate management brokers who operate and maintain the properties and collect rents from which they pay operating and maintenance costs and retain a commission stipulated by contract. The net revenue is remitted to the Public Housing Administration and payments for rentals to lessors and mortgagees and for taxes and insurance are made directly by the Administration.

DISPOSITION

As of June 30, 1948, 48.1 percent of the leaseholds originally held by the Government had been canceled, and this is expected to reach 91 percent by June 30, 1950, as liquidation of the program is accelerated. Leasehold rights are sold to the owners of the property whenever a satisfactory price can be obtained, or otherwise automatically terminated at the expiration of the leasehold period.

A number of problems may arise in connection with the expiration of 903 leaseholds in fiscal year 1950, chiefly claims against the Government for restoration and redecoration as required by lease terms. It is estimated that such work will be required for 43 vacant units, and about $4,000 is being provided.

The 2,897 leases which will be canceled during fiscal years 1949 and 1950 are expected to yield $2,006,000 in fiscal year 1949 and $1,238,000 in fiscal year 1950, or approximately 43 percent of the unamortized value of leaseholds and undepreciated value of equipment and furniture in such properties.

ADMINISTRATIVE EXPENSES

Administrative expense requirements for this program are estimated at $535,000 (including $34,000 for pay increases authorized by Public Law 900) for fiscal year 1949 and $417,000 for fiscal year 1950c

EFFECT ON GOVERNMENT BUDGET

Budgetary receipts are expected to exceed expenditures by $4,449,126 in fiscal year 1949 and $2,498,500 in fiscal year 1950 (statement A).

OPERATING RESULTS

The net loss from management operations, which amounted to $6,229,186 in fiscal year 1948, is estimated at $4,452,194 and $2,330,000 in fiscal years 1949 and 1950, respectively. The reduction in the amount of loss is accounted for by the lesser number of leaseholds under management as a result of disposition activities.

Proceeds from disposition are estimated at $2,006,000 in fiscal year 1949 and $1,238,000 in fiscal year 1950. The cost of property written off and disposition expenses to be charged against this income will result in net disposition losses of $2,961,000 and $1,964,000 in fiscal years 1949 and 1950, respectively (statement B).

FINANCIAL CONDITION

Appropriated fund balances at the end of fiscal years 1949 and 1950 consist of the $1 million disposition reserve held for possible claims on expiration of leaseholds and unobligated funds derived from the last quarter's operations, in the amount of $1,168,728 and $716,738 respectively, which will be deposited in the Treasury in the first quarter of the subsequent fiscal year (statement C).

Remaining assets (principally capitalized leasehold improvements) continue to decline as liquidation approaches its conclusion. A parallel decline in the book value of Government capital occurs as unrecoverable costs are charged off.

ESTIMATES OF APPROPRIATION

Permanent appropriations, special accounts:

Disposition or Removal, Homes Conversion Program, Public Housing Administration, Housing and Home Finance Agency—

This item consists of appropriations made by the act of October 14, 1940, as amended, of moneys derived from the rental or operation of housing property, and of moneys derived from the disposition or removal of such property. Moneys derived from rental and operation are available for expenses of operation and maintenance and of disposition or removal, and moneys derived from disposition or removal are available for expenses of disposition or removal, including the establishment of necessary reserves therefor and administrative expenses in connection therewith. The unobligated balances of these moneys remaining at the end of the fiscal year, except for authorized reserves, are covered into miscellaneous receipts (60 Stat.9).

Appropriated (est.) 1949, **$2,044,249** Estimate 1950, **$1,247,000**

PROGRAM HIGHLIGHTS

	1948 actual	1949 estimate	1950 estimate
Number of federally financed accommodations at year end	181,321	97,551	97,551
Transfers to educational institutions		83,770	
Total income	$14,792,921	$12,174,400	$10,182,400

PURPOSE AND FINANCIAL ORGANIZATION

The Veterans' re-use housing program was undertaken to alleviate the housing difficulties of servicemen, veterans and their families, including veterans attending educational institutions, by the relocation and re-use of surplus Federal structures as temporary housing. The program is conducted under authority of title V of the Lanham Act as amended, and approximately $455 million was allotted to the Public Housing Administration for development purposes.

ANALYSIS OF BUDGET PROGRAMS

DEVELOPMENT OPERATIONS

Completion of construction and final settlement of all contractors' claims which do not involve litigation, are anticipated during fiscal year 1949.

MANAGEMENT OPERATIONS

Housing projects are managed by the participating local bodies. The management functions of the Public Housing Administration are of an advisory nature with the exception of the annual audit to ascertain compliance with the contracts which provide for return of net operating income to the Government.

The per unit month net return to the Public Housing Administration is shown in the following table, by type of accommodation, for fiscal years 1948, 1949, and 1950:

Type of accommodation	Net return per unit month		
	1948 actual	1949 estimate	1950 estimate
Family dwellings	$9.52	$9.25	$9.15
Dormitories	1.00	.90	.85
Trailers	2.02	1.80	1.70

The anticipated slight reduction in net return per unit month for fiscal years 1949 and 1950 is due to the temporary type of construction resulting in increased operating and maintenance costs each year.

DISPOSITION OPERATIONS

The Lanham Act as amended requires that all temporary housing be removed by January 1, 1950, except where specifically extended by the Housing and Home Finance Administrator because of continuing need. The budget program assumes such extensions since present indications are that these accommodations will continue to be required for veterans' use.

The McGregor Act (62 Stat. 1062) authorized colleges and universities operating veterans' projects on lands owned or controlled by them, to acquire complete ownership and control without monetary consideration. Requests for transfers were required to be made by October 26, 1948. Under the Act, the right of the Government to the net operating income ceases in the month following that in which the transfer of a project takes place.

Of 135,473 eligible accommodations, it is estimated that 121,930 will be transferred to educational institutions. The latter figure includes 38,160 accommodations which were erected without the use of Federal funds.

ADMINISTRATIVE EXPENSES

Estimated administrative expenses for fiscal year 1949 consist of $634,000 for management and disposition operations (including $40,000 for pay increases authorized by Public Law 900) and $119,000 for development (including $7,000 for pay increase). A total of $317,000 is estimated for management and disposition operations in fiscal year 1950.

EFFECT ON GOVERNMENT BUDGET

The excess of receipts over expenditures in fiscal year 1949 is estimated at $4,546,152, and in fiscal year 1950, at $11,567,300 (statement A).

OPERATING RESULTS

Results of operations during fiscal years 1949 and 1950 indicate an estimated total income of $12,174,400 in fiscal year 1949 and $10,182,400 in fiscal year 1950. An estimated program net loss of $6,597,434 for fiscal year 1949 und an estimated program net income of $9,271,300 for fiscal year 1950 is also indicated. The loss in fiscal year 1949 is attributable to the anticipated write-off of real property with a book value of $17,551,334 transferred to educational institutions and local bodies (statement B).

Return of funds to the Treasury in the form of general fund receipts is estimated in the amount of $14,238,134 for fiscal year 1949, representing primarily income earned by local bodies in fiscal year 1948 and paid to the Public Housing Administration after the close of the fiscal year. Likewise, the estimated general fund receipts in the amount of $11,263,300 for fiscal year 1950 represents the proceeds from fiscal year 1949 operations (statement A).

FINANCIAL CONDITION

Accounts receivable (due from local bodies).—In accordance with the terms of contracts with local bodies, net income is payable to the Public Housing Administration after the close of each fiscal year. The estimated amounts of $15,015,272 at June 30, 1948, $11,503,835 at June 30, 1949, and $9,522,000 at June 30, 1950, will be collected in fiscal years 1949, 1950, and 1951 respectively (statement C).

Landj structures, and equipment.—This item represents the re-utilization cost of housing (exclusive of the original cost of structures transferred from other programs) which has not been transferred to local bodies. The amount of $11,444,735 shown as of June 30, 1948, includes $8,665,637 representing the asset value of directly managed accommodations. After transfer of projects still under construction on that date, this balance remains on the books at the end of the 1949 and 1950 fiscal years (statement C).

Permanent appropriation, special account:

Disposition or Removal, Veterans' Housing Program, Public Housing Administration, Housing and Home Finance Agency—

This item consists of appropriations made by the act of October 14, 1940, as amended, of moneys derived from the rental or operation of housing property, and of moneys derived from the disposition or removal of such property. Moneys derived from rental and operation are available for expenses of operation and maintenance and of disposition or removal, and moneys derived from disposition or removal are available for expenses of disposition or removal, including the establishment of necessary reserves therefor and administrative expenses in connection therewith. The unobligated balances of these moneys remaining at the end of the fiscal year, except for authorized reserves, are covered into miscellaneous receipts (60 Stat. 9).

PROGRAM HIGHLIGHTS

[Dollars in thousands]

	1948 actual	1949 estimate	1950 estimate
Active housing units in program	191,815	192,615	192,115
Annual contribution requirements	$3,431	$4,300	$5,700
Financing:			
Borrowings from Treasury outstanding at end of fiscal year	$362,000	$352,000	$358,000
Loans to local housing authorities, outstanding at end of fiscal year	280,671	286,824	292,754

PURPOSE AND FINANCIAL ORGANIZATION

The United States Housing Authority was created in 1937 by Public Law 412 *(42* U. S. C. 1401) to assist local communities in the provision of low-rent housing for families of low income who could not otherwise afford decent, safe, and sanitary dwellings. The basic act authorized the Authority to make loans to local public housing agencies to aid in financing slum clearance and the development of low-rent housing projects. The act also authorized the payment of annual contributions to local housing authorities to maintain the low-rent character of the projects. In addition, the act authorized the transfer to the Authority of the public housing projects started by Public Works Administration housing division.

Public Law 671 (42 U. S. C. 1501) made the unused portion of the borrowing authorization available for the construction of permanent housing to be used primarily for housing war workers, but subject to conversion to low-rent use after the war emergency.

Public Law 301 (42 U. S. C. 1415), approved July 1, 1947, amended the United States Housing Act to permit construction where costs exceeded legal limitations, upon condition that the difference be paid by the local housing authority.

The United States Housing Authority was created as a body corporate of perpetual duration with $1 million in capital stock subscribed by the Treasury. The Authority was authorized to borrow up to $800 million and to enter into annual contribution contracts up to a maximum of $28 million per year.

ANALYSIS OF BUDGET PROGKAMS

Activities under the United States Housing Act program consist of two major phases: *(a)* those connected with the development and capital financing of low-rent projects; and (6) those concerned with the management of projects and the payment of annual contributions. Locally owned and federally owned projects are discussed separately as they present different types of problems.

The following table shows the number of active developments and units in the United States Housing Act program as of June 30, 1948, and contains a forecast of additions and progress in the program as of June 30, 1949 and 1950;

	June 30, 1948, actual		June 30, 1949, estimated		June 30, 1950, estimated	
	Developments	Units	Developments	Units	Developments	Units
Total program	635	191,815	636	192,615	634	192,115
Urban, total	627	191,324	628	192,124	626	191,624
Locally owned, total	524	149,750	525	150,550	525	150,550
Preconstruction	1	200				
Construction	4	1,846	2	1,000		
Management	519	147,704	523	149,550	525	150,550
Federally owned: Management, total	103	41,574	103	41,574	101	41,074
Leased	96	39,093	96	39,093	94	38,593
Directly operated	7	2,481	7	2,481	7	2,481
Rural—management	8	491	8	491	8	491

In addition, as of June 30, 1948, there were 155 developments of 24,496 units for which commitments had been made but construction deferred, generally on account of present high costs. Construction of one of these projects is scheduled to be undertaken during the current fiscal year under authority contained in Public Law 301; sale of two federally owned projects is also contemplated.

DEVELOPMENT AND CAPITAL FINANCING OPERATIONS

Locally owned projects.—Four developments totaling 1,846 dwelling units were under construction as of June 30, 1948. Two additional developments totaling 1,000 dwelling units are scheduled to enter construction during fiscal year 1949; no further reactivation is anticipated in fiscal year 1950.

Corrections of war caused construction deficiencies and supplemental construction required to bring projects up to proper physical standards are expected to increase in fiscal years 1949 and 1950, due to completion of work delayed in the past by shortages of materials, labor, and equipment. All supplemental work is expected to be under contract by June 30, 1949, and completed by June 30, 1950. Replacement of inferior materials will be undertaken only where necessary for safety or livability, or because of failure in operation.

Financing this construction work is expected to increase net holdings of local housing authority bonds by $7,948,000 in the 1949 fiscal year, and by an additional $5,930,000 in the following year.

Federally owned projects.—No new project development by the Public Housing Administration is contemplated. Expenditures of $1.5 million in fiscal year 1949 and $2.5 million in fiscal year 1950 are estimated for the liquidation of outstanding obligations, for final contract settlements, and for correction of war caused deficiencies.

MANAGEMENT OPERATIONS

Locally owned projects,—Locally owned projects are not the property of the Public Housing Administration, and

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

hence operations are reflected in financial statements of this program only to the extent of loans made to local housing authorities and the amount of annual contributions paid. The Federal annual contribution actually paid equals the net operating deficit of a locally owned project, after giving effect to the local subsidy in the form of tax remissions or exemptions. Total expenses consist of operating expenses, any amounts deposited in the operating reserve (or less withdrawals from such reserves), and amounts expended for debt service and payments in lieu of taxes.

The fiscal years of low-rent projects do not coincide with the Federal fiscal year, but may end with any calendar quarter and the contribution payment is made in the first or second quarter after the close of the project fiscal year. The annual contribution requirements in the Federal fiscal year 1950 are determined by the operating experience of projects with fiscal years ending either March 31, June 30, September 30, December 31, 1949, or March 31, 1950, depending on the annual contribution date of the particular project.

In fiscal year 1950 it is anticipated that there will be 274 locally owned projects, consisting of 518 developments and 146,750 dwelling units, which will be eligible for annual contribution payments. The appropriation request of $5,700,000 covers all estimated contribution requirements in fiscal year 1950.

The following table shows the major items making up the annual contribution requirements:

	1948 actual	1949 estimate	1950 estimate
Total expense (including payments in lieu of taxes)	$52,197,864	$54,645,812	$54,946,157
Total income	51,304,784	53,871,244	52,057,329
Expense less income	893,080	1,574,568	2,888,828
Accounting adjustments	[1] 28,749		
Operating gain	2,232,013	2,235,886	2,173,040
Operating contributions	[2] 8,096,344	3,810,454	5,061,868
Noncontinental contributions	252,138	278,472	298,602
Nonrecurring contributions	82,764	211,074	339,530
Total contributions	[3] 3,431,246	4,300,000	5,700,000

[1] Deduct.
[2] Operating gain represents excess of income over expense at those projects which do not require annual contributions. Since contributions are payable on a statutory project basis, operating gain on one project is not available for reducing contributions on another.
[3] Contains $95,591 in contributions which was paid after June 30,1948, but which apply to 1948 appropriation. Financial statements as of June 30, 1948, therefore reflect 1948 actual expenditures of $3,335,655 rather than $3,431,246.

Several factors are responsible for the anticipated $1,400,000 increase in annual contribution requirements during fiscal year 1950 over those for 1949.

A. *Operating income.*—A decline of $1 million in project operating income at locally owned projects is expected. Policies require the removal of tenants receiving incomes above established maximum limits and replacement with eligible low-income families, with preference given to veterans. The Housing Act of 1948, approved August 10, 1948, removed the legal restrictions which formerly prevented the Public Housing Administration and local housing authorities from removing ineligible tenants from low-rent housing projects. This act, coupled with the recent increases in residential construction, should accelerate the removal rate of over-income families.

B. *Operating expense.*—An increase of 7 percent in project operating expenses in fiscal year 1950 reflects rising costs of dwelling utilities and repairs, maintenance, and replacements, while other costs are estimated to continue at the 1949 level during fiscal year 1950. The increase in expenditures for dwelling utilities is estimated at $0.6 million, or 5 percent. In the case of repairs, maintenance, and replacement expenses, an increase of 15 percent, or $1.8 million, is estimated in fiscal year 1950 which is based on the aging of the projects and the fact that some of the older projects will be entering the period when substantially more replacements of existing equipment will have to be made. A tabular presentation of the changes in operating expenses before reserves, debt service, and payments in lieu of taxes for locally owned projects follows:

	Fiscal year 1949	Fiscal year 1950	Increase
Operating expenses	$33,091,579	$35,504,756	$2,413,177
Repairs, maintenance, and replacements	11,641,499	13,414,031	1,772,532
Dwelling utilities	12,079,888	12,705,739	625,851
All other operating expenses	9,370,192	9,384,986	14,794

The decrease of $1 million in income and the $2.4 million increase in expenses would require a total increase of about $3.4 million in annual contribution requirements. This gross increase will be partially offset, however, by a $1.8 million increase in withdrawals from reserve accumulations, decreased payments in lieu of taxes in view of the decline in project income, and smaller nonoperating expenses. The net effect of all the above factors produces the anticipated increase of $1,400,000 in annual contribution requirements, from $4,300,000 in 1949 to $5,700,000 in 1950.

Revised policies governing reserve accumulations which became effective during fiscal year 1948, will affect about 60 percent of the fiscal year 1950 experience. Reduction in reserve funds will continue under the new policy for the next several years, levelling off in 1953 with an operating reserve balance of $16.9 million for locally owned projects as compared with an estimated $29.9 million in 1948.

Federally owned projects.—During fiscal year 1950 there will be under management 101 federally owned projects consisting of 41,074 units, as shown in the program table. With the exception of 7 Public Works Administration projects of 2,481 dwelling units, all of these projects will be leased to local housing authorities and only the net operating income before reserve charges will be received by the Public Housing Administration.

Interest is charged on the unamortized cost of federally owned United States Housing Act projects at the rate currently paid by Public Housing Administration to the Treasury (recently 1.75 percent, but rising to 1.875 percent for the 1949 and 1950 fiscal years). Depreciation is charged at the rate of 1.75 percent per annum on the depreciable assets (which are approximately equal to the total development cost less the cost of site acquisition). Since no funds were disbursed by Public Housing Administration for construction of Public Works Administration projects, the only charge is for depreciation of assets.

A decrease in operating income of federally owned projects is also expected as high income tenants are removed. Unlike the locally owned projects where there is in effect a lag of approximately a year between operating experience and payment of annual contributions shown in this budget program, the removal policy will be reflected in accounts of federally owned projects during both fiscal years 1949 and 1950. The deficit in fiscal year 1950 is also due to increased operating expenses over fiscal year 1949, particularly for repairs, maintenance, and replacements as these projects become older, and the increased cost of dwelling and commercial utilities.

The comparative statement of income and expense also indicates a reduction of $2,368,900 in reserve funds during fiscal year 1949 at federally owned projects in accordance with the new reserve policy.

Federal Reserve Bank of St. Louis

ADMINISTRATIVE EXPENSES

Estimated administrative expenses for fiscal year 1949 amount to $2,617,000 for management and development operations (including $117,000 for pay increase authorized by Public Law 900). A total of $2,564,000 is estimated for management and development operations in fiscal year 1950.

EFFECT ON GOVERNMENT BUDGET

A net excess of receipts over expenditures in the amount of $9,686,791 is estimated for fiscal year 1949 due primarily to a $10,000,000 repayment of borrowings. An excess of expenditures over receipts in the amount of $2,267,000 is estimated for fiscal year 1950 due principally to additional borrowings of $6,000,000 and an increased expenditure for annual contributions amounting to $1,304,409.

OPERATING KESULTS

The comparative statement of income and expense before annual contribution payments shows an estimated net income of $819,800 in fiscal year 1949 as compared with an estimated net loss of $2,673,000 in fiscal year 1950. After payment of annual contributions, the statement reflects net losses of $3,480,200 and $8,373,000 for fiscal years 1949 and 1950 respectively (statement B).

The new reserve policy, as discussed under analysis of budget programs, will result in an estimated withdrawal of $2,368,900 of reserve funds at federally owned projects during fiscal year 1949. In addition, the policy of removing over-income tenants from projects, together with an anticipated increase in operating expenses results in reducing income by $1,239,300.

FINANCIAL CONDITION

The comparative statement of financial condition reflects an increase of $6 million in total liabilities during fiscal year 1950. A similar increase is reflected in total loans receivable, and is due to the increase in local housing authority obligations, as discussed under development and capital financing operations.

An increase in the estimated deficit is also expected during fiscal year 1950 in conformity with decreased rental income and cumulative increase in subsidies through annual contribution payments (statement C).

Dwelling units in program at year end	2,333	1,528	887
Book value of property sold	$4,033,130	$10,423,577	$9,037,981

PURPOSE AND FINANCIAL ORGANIZATION

The subsistence homestead and greentowns program, originally consisting of assets with a book value of $62,-468,467 transferred to the Public Housing Administration, is carried on under the terms of the Bankhead-Black Act of 1936 (40 U. S. C. 431).

The subsistence homestead portion of the program is already substantially liquidated, and it is expected that two of the three resettlement or green town projects, comprising the balance of the program will be disposed of to private interests by June 1950, and the remaining project shortly thereafter. Operating revenues have, by special authorization of Congress, been made available in small amounts from year to year for certain expenses in connection with disposition. A continuation of this authority is being requested in this Budget. The Bankhead-Black Act authorizes the use of operating income for operation and maintenance expense.

ANALYSIS OF BUDGET PROGRAMS

MANAGEMENT OPERATIONS

Management income and expense of subsistence homesteads projects ceases to be a material factor as disposition approaches completion. The operating income from the greentown projects is expected to increase to $1,539,000 in 1949, due largely to a rental increase in the Greenbelt, Md., project to become effective about January 1, 1949. In 1950 operating income will decrease to $969,000 since only two projects will remain in operation. Increases in unit rates of operating expense are due to three factors: (1) Necessity for extensive painting, major repairs to the heating system at Greenbelt, and the general increase in labor and material costs; (2) utility cost increases of 15 percent in 1949 over 1948 and an additional 5 percent in 1950; and (3) increases in payments in lieu of taxes by approximately 8 percent in 1949 and 1950 over fiscal year 1948, in conformity with local tax levies.

DISPOSITION OPERATIONS

Subsistence homesteads.—Disposition of 528 units was completed in fiscal year 1948, and only a few units remain. The principal problems on this part of the program have been to assist in private refinancing of sales contracts to eliminate long periods of Government supervision and also to liquidate indebtedness of industrial cooperatives connected with the projects.

Greentown projects.~It is contemplated that all sales will be for cash and that offers will be requested first on sales as projects. General development plans for each town, reflecting land uses for undeveloped areas will be made available to bidders as an indication of possible methods of development consistent with the original character of these projects.

Proceeds of sale are difficult to estimate because it originally was not planned to sell these projects on a commercial market. They were developed as an experiment in model community building and as a means of providing employment in a period of general depression. Therefore, no attempt was made to estimate proceeds of sale as there appeared to be no basis on which to make a forecast; however, in order to indicate disposition, sales proceeds have been shown at the book value of the assets at the time of sale.

An independent appraisal of the Greenhills, Ohio, project is now being made by a fee appraiser, and a mortgage-insurance commitment is being requested of the Federal Housing Administration. It is estimated that a sales contract will be concluded and the transfer completed by June 30, 1949. Greendale, Wis., should be ready for advertisement by December 1948, and actual transfer of property is estimated about December 1949. In the case of Greenbelt, Md., delay in disposition until the 1951 fiscal year is necessary because of certain special problems, notably the need for changes in the town charter.

Special legislative authority is being requested for fiscal year 1950 for the use of $22,000 of the program's operating revenues for special expenses in connection with the disposition of the greentowns, such as surveys, development studies and appraisals. Congress authorized $39,500 for these purposes for fiscal year 1948 and $40,000 for 1949. The further special authorization is requested largely for use in connection with the greentown project in Maryland.

ADMINISTRATIVE EXPENSES

Estimated administrative expenses for fiscal year 1949 consist of $164,000 for management and disposition operations (including $10,000 for pay increase authorized by Public Law 900). A total of $93,000 is estimated for management and disposition operations in fiscal year 1950.

EFFECT ON GOVERNMENT BUDGET

The net excess of receipts over expenditures in fiscal year 1949 is estimated at $13,131,577, and in fiscal year 1950, at $9,391,884. These estimates include the disposition of two greentown projects at book value (statement A).

OPERATING RESULTS

On the basis described under disposition operations, proceeds of sale for the Greenhills and Greendale projects are estimated at $18,829,682, while $263,400 is estimated as proceeds for sale of subsistence homestead units for fiscal years 1949 and 1950. The continued decline in income from project operations is due chiefly to the progressive liquidation of the program. Other items of expense in fiscal year 1949 are mortgage loans determined to be uncollectible in the amount of $1,043,513 and a write-

Federal Reserve Bank of St. Louis

off of nonsaleable assets, such as underground utilities, etc., in an amount of $490,200 which will bring the property account at June 30, 1949, to an amount representing the asset value of saleable properties only (statement B).

FINANCIAL CONDITION

The continued reduction in loans receivable in fiscal years 1949 and 1950 results from the repayment of homestead association and other mortgage notes according to schedule, and from the contemplated write-off of industrial cooperative loan notes determined to be uncollectible. With only the Greenbelt project remaining in the greentowns program, and nine dwelling units remaining in the subsistence homestead program, the net land, structure, and equipment account will be reduced to $10,651,717 at June 30, 1950.

The continuing decrease in total capital from June 30, 1948, through June 30, 1950, is due to the disposition of property by sale or by transfer to other Government agencies.

Administrative expense limitations	$11,500,000	[1] $9,500,000	$8,750,000

[1] Excludes pay increase authorized by Public Law 900.

ANALYSIS OF BUDGET PROGRAM

Pursuant to the Housing Act of 1948 (62 Stat. 1268), a single administrative expense budget is presented consolidating funds required for the administration of the following five programs by the Public Housing Administration:

Public war housing.
Homes conversion.
Veterans' re-use housing.
United States Housing Act (including Public Works Administration projects).
Subsistence homesteads and greentowns.

Administrative expenses are distributed to the various programs on the basis of the work load. This distribution is based upon special surveys and analyses during which employees record time spent on each activity within the several programs. The results supply reasonably accurate factors for use in apportioning the share of total administrative expenses applicable to each program.

The distribution of costs is shown in the following table:

Comparative statement of sources and application of funds

[Fiscal years ending June 30,1948, 1949, and 1950]

	1948 actual	1949 estimate	1950 estimate
FUNDS APPLIED

Total funds provided	11,199,877	110,117,000	8,750,000

i Includes proposed supplemental of $617,000 for pay increase authorized by Public Law 900.

At the beginning of fiscal year 1950 it is estimated that the Public Housing Administration will have under its jurisdiction approximately 700,000 housing accommodations. The administrative work load involved, as described below, will consist chiefly of management and disposition activities, with a minor amount of development activity in connection with low-rent projects reactivated under Public Law 301, Eightieth Congress.

DEVELOPMENT

The small amount of development work in process or in prospect under the United States Housing Act program is expected to be completed in fiscal year 1949. No new development activities are scheduled for fiscal year 1950, and only $20,000 is included for construction clean-up work.

MANAGEMENT

Increased attention will be given in the 1949 fiscal year to project management operations involving more than 600,000 dwelling units in all programs. Careful scrutiny of project budgets and inspection of operations will be required if budget projections are to be realized in the face of general increases in operating costs experienced since the end of the war. A decline in the number of projects under management, due to disposition activities, reduces requirements for the 1950 fiscal year to $4,985,000 or $904,000 below fiscal year 1949.

DISPOSITION

The public war housing program contemplates the sale of 50,000 permanent units in fiscal year 1950 in compari-

Federal Reserve Bank of St. Louis

son with 20,000 dwelling units in fiscal year 1949. In addition, some 15,000 temporary housing units are scheduled for disposition.

Under the homes conversion program some 1,700 leases (10,700 units) are scheduled for termination during fiscal year 1949 and 2,100 leases (12,400 units) in fiscal year 1950.

Disposition of about 122,000 accommodations (including 38,160 nonfederally financed accommodations) in the veterans' re-use housing program that are eligible for transfer to educational institutions under the McGregor Act, will be completed in fiscal year 1949.

All property in the subsistence homesteads program has been disposed of except seven units. Sale of three greentowns is estimated to take place about June 30, 1949, for Greenhills; December 31, 1949, for Greendale; and for Greenbelt in the fall of calendar year 1950, but subsequent to the end of fiscal year 1950.

Administrative expenses for disposition activities in fiscal year 1950 amount to $3,745,000, a decrease of $291,000 from fiscal year 1949.

ESTIMATES OF AUTHORIZATIONS RELATING TO CORPORATE FUNDS

NOTE.—The text of general authorizing language, as incorporated in The Government Corporations Appropriation Act, 1949, and as proposed for 1950, will be found immediately following the summary statements at the beginning of part III of the Budget.

Salaries and Expenses, **Public Housing Administration, Housing and** Home Finance Agency—

Public Housing Administration: Of the amounts available by or pursuant to law for the administrative expenses of the Public Housing Administration in carrying out duties imposed by or pursuant to law including not to exceed [$2,500,000]! *$2,564,000* of the funds available for administrative expenses for the United States Housing Act program **[(all** of which are hereby merged into a single administrative expense account)], not to exceed **[$9,500,000]** *$8,750,000* shall be available for such expenses [subject to the provisions of section 6 (b) of the Act of September 1, 1937, as amended, 42 U. S. C. 1406 (b)], including *purchase of not to exceed seven passenger motor vehicles, for replacement only; and a* health-service program as authorized by law (5 U. S. C. 150): *Provided,* **[That** the number of officers and employees in classification grades 11 of the clerical, administrative, and fiscal service, and 4 of the professional service, and higher grades shall not exceed 20 per centum of the total number of officers and employees paid from such funds: *Provided further,*] That necessary expenses of providing representatives of the Administration at the sites of non-Federal projects in connection with the construction of such non-Federal projects by public housing agencies with the aid of the Administration, shall be compensated by such agencies by the payment of fixed fees which in the aggregate in relation to the development costs of such projects will cover the costs of rendering such services, and expenditures by the Administration for such purpose shall be considered nonadministrative expenses, and funds received from such payments may be used only for the payment of necessary expenses of providing representatives of the Administration at the sites of non-Federal projects or for administrative expenses of the Administration not in excess of the amount authorized by the Congress. *(The Government Corporations Appropriation Act, 1949.)*

Reserve account: Notwithstanding the proviso of section 803 (c) of the Act of October 14, 1940, as amended (42 U. S. C. 154$), and the provisions of section 8 of the Act of July 25, 1947 (Public Law 239), an amount not to exceed $15,000,000 may be carried, until the end of the current fiscal year, in the reserve account established pursuant to section 303 of said Act of October 14, 1940.

The accompanying statements set forth the financial condition of the Defense Homes Corporation as of the close of the fiscal years 1947 and 1948 and the results of the Corporation's operations during the latter year. In accordance with the provisions of Public Law 860, Eightieth Congress, approved June 30, 1948, all of the assets and liabilities of the Defense Homes Corporation were transferred to the Reconstruction Finance Corporation for liquidation. Accountability far these assets and liabilities after June 30, 1948, is therefore reflected in the budget of the Reconstruction Finance Corporation.

STATEMENT A

STATEMENT OF SOURCES AND APPLICATION OF FUNDS

[Fiscal year ending June 30,1948]

	1948 actual	
FUNDS APPLIED		
To acquisition of assets:		
Land, structures, and equipment	$98,400	
Mortgage notes receivable	46,150,414	
Total acquisition of assets		$46, 248,814
To expenses (statement B):		
Cost of commodities sold	$189,395	
Cost of services	9,960	
Direct operating costs	1,339,065	
Interest expense	811,852	
Administrative expenses	34,438	
Total expenses		2,384,710
To retirement of borrowings: Notes payable to Reconstruction Finance Corporation		1,960,004
To increase in working capital: Cash in Treasury checking account		5,620,914
Total funds applied		56,214,442
FUNDS PROVIDED		
By realization of assets;		
Sales of property	50,868, 236	
Transfer of property to Howard University without reimbursement	1, 265,673	
Total realization of assets		52,133,909
By income:		
Sales of commodities	345,878	
Sales of services	10, 620	
Rents	2,052,848	
Interest on mortgage notes	799,044	
Miscellaneous	30, 497	
Total income (statement B)		3, 238,887
By decrease in working capital other than cash in Treasury checking account		841,646
Total funds provided		56, 214,442

EFFECT ON THE GOVERNMENT BUDGET

Checking account expenditures:	
Increase (—) or decrease in Treasury checking account	-$5,620,914
Adjustment to checks issued basis	7,105
Net effect on Government budget	-5,613,809

STATEMENT B

STATEMENT OF INCOME AND EXPENSES

[Fiscal year ending June 30,1948]

	1948 actual	
Income:		
Sales of commodities	$345,878	
Sales of services	10,620	
Rents	2,052,848	
Interest on mortgage notes	799,044	
Miscellaneous	30,497	
Total income		$3,238,887
Expenses:		
Cost of commodities sold	189,395	
Cost of services	9,960	
Direct operating costs	1,339,065	
Interest expense	811,852	
Administrative expenses	34, 438	
Total expenses before depreciation, losses and charge-offs		2,384,710
Net income before depreciation, losses and charge-offs		854,177
Depreciation	477, 854	
Losses on sales of properties	1,031,325	
		1, 509,179
Net income (or loss (—)) for the year		-655,002

ANALYSIS OF SURPLUS

Balance at beginning of fiscal year	$2, 942, 757
Adjustments applicable to prior fiscal years	-48,683
Net income (or loss (—)) for the year (above)	-655,002
Balance at end of fiscal year	2, 239,072

STATEMENT C

COMPARATIVE STATEMENT OF FINANCIAL CONDITION

Net income for the year	$982,692	$228, 500	$540, 080

PURPOSE AND FINANCIAL ORGANIZATION

The original Panama Railroad Company, hereinafter referred to as the New York Company, was incorporated by an act of the Legislature of the State of New York on April 7, 1849. In 1904 the majority of its capital stock was acquired by the United States as a part of the assets of the New Panama Canal Company, which were purchased for $40,000,000, as authorized by the act of June 28, 1902 (34 Stat. 481). The remaining shares were acquired during 1905.

By Executive order of May 9, 1904, the President directed that the policy of the Company be harmonized with the policy of the Government by making it an adjunct to the construction of the Canal, while at the same time fulfilling the purpose for which it was created. The Panama Canal Act, approved August 24, 1912, authorized the President to establish, maintain, and operate, through the Company or otherwise, numerous types of business activities related to the Canal, and this legislation constituted the basic statutory authority for the activities of the New York Company.

The authorized and issued capital stock of the New York Company, as of June 30, 1948, consisted of 70,000 shares with a par value of $7,000,000, which were in the custody of the Secretary of the Army. The Secretary nominated or approved the directors of the Company, and the Governor and the engineer of maintenance of The Panama Canal were president and second vice president, respectively, of the Company, as well as members of its board of directors.

Although the New York Company was authorized by its charter to borrow money and to mortgage its property if necessary, it had never done so and had no bonded indebtedness at the time of its dissolution.

Pursuant to section 304 (b) of the Government Corporation Control Act, approved December 6, 1945, the Panama Railroad Company was reincorporated as a Federal corporation by act of Congress approved June 29, 1948 (Public Law 808, 80th Cong.). As of the beginning of business July 1, 1948, the corporation issued to the United States, and delivered to the Secretary of the Treasury, a receipt for $1 acknowledging the transfer to the corporation of the net assets of the New York Company, and such receipt is evidence of the ownership of the corporation by the Government.

The charter of the Panama Railroad Company provided by Public Law 808 prescribes the general and specific powers of the corporation and constitutes the statutory authority for its present activities and other specific activities enumerated therein. The charter provides that in its capacity as owner of the corporation, the United States will be represented by the President of the United States or such officer of the United States as he may designate, referred to as the "stockholder." The Secretary of the Army has been so designated. The management of the corporation is vested in a board of directors consisting of not less than 9 nor more than 13 persons (presently 13) appointed by the stockholder, who may himself be a member of the board. The Governor of The Panama Canal is, and is required by law to be, a director and president of the corporation. A majority of the directors constitutes a quorum for the transaction of business. Directors receive no salary for their services on the board.

Upon the transfer to the corporation of the net assets of the New York Company, there were released and transferred to the corporation all the right, title, and interest, in and to such assets, which the United States then had or might acquire by virtue of the convention of November 18, 1903, between the United States and the Republic of Panama; and, specifically, any and all reversionary rights of the United States in the lands of the corporation located in the cities of Panama and Colon, Republic of Panama.

The board of directors has the power and duty to appraise, at least annually, its necessary working capital requirements for authorized plant replacement and expansion, and to pay into the Treasury as dividends the amount of funds in excess thereof.

The corporation may borrow from a fund of $10,000,000 established and maintained in the Treasury, for any authorized purposes of the corporation, but for limited periods only, sums of money not to exceed a total of $10,000,000 outstanding at any one time. Amounts borrowed from this fund shall be paid over to the corporation by the Secretary of the Treasury, and repayments thereof shall be redeposited in said fund and will be available for subsequent loans. No loans have been made from this fund, nor are any contemplated during fiscal years 1949 and 1950.

ANALYSIS OF BUDGET PROGRAM BY MAJOR ACTIVITIES

The operations of the Panama Railroad Company comprise eight distinct functions, which are enumerated below and individually discussed in the following text: (1) railroad, (2) harbor terminal facilities, (3) telephone system, (4) Hotel Tivoli, (5) Hotel Washington, (6) commissary division, (7) coaling plants, (8) New York office and steamship line. Statements of income and expenses for each of these functions are shown in schedule B-1.

Basic assumptions.—The estimates for fiscal year 1950 are based on the assumption that production and employment will continue high and that prices and wages will continue at about the level of the beginning of fiscal year 1949.

The volume of the Company's business is affected to a certain extent by world trade conditions, but it is largely dependent upon the activities of the various United States Government agencies in the Canal Zone, which affect certain services of the railroad directly, and others indirectly through the creation of employment in the Canal Zone and in the Republic of Panama. The present indications are that neither of these factors will

Digitized for FRASER

Federal Reserve Bank of St. Louis

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

change greatly in the near future, but unforeseen conditions may develop which will require material revisions of the estimates as submitted. If a new project for improving the capacity and security of the Panama Canal should be adopted by the Congress prior to or during the fiscal year 1950 and appropriations made for initiating work on the project, it is expected that the estimated volume of business will be substantially increased.

Railroad (see schedule V-l).—The railroad comprises 50 miles of main line track between the cities of Panama and Colon, at the Pacific and Atlantic terminals of the Canal, and the usual appurtenances such as freight and passenger stations and terminals, railroad yards, industrial trackage, and the requisite rolling stock. The railroad serves The Panama Canal, the United States Army and Navy, and other Government agencies on the Isthmus, and also performs the functions of a common carrier in meeting the needs of the Republic of Panama, and commercial agencies transacting business in this area.

For purposes of administration and accounting, there are also included under this heading the incidental real estate activities of the Company. The $48,000 income from rentals is nearly all derived from rental of buildings.

The gross revenues from operations of the railroad during the fiscal year 1948 were $2,496,067 and for 1949 are estimated to be $2,410,000. It is estimated that in fiscal year 1950 the gross revenues will decline to $2,306,000 as the result of further diversion of traffic to the trans-Isthmian highway which was constructed during the war.

While operating expenses will also be reduced, the reduction will not be proportionate to the decline in gross revenue. This is because a large part of the expense of operating and maintaining the railroad does not vary in direct ratio to the volume of traffic and must be incurred as long as required standards of service are maintained.

As the result of the anticipated decline in both gross revenues and expenses, it is estimated that net revenues of the railroad, which were $110,778 in fiscal year 1948, will be reduced to a loss of $1,600 in fiscal year 1949, and a profit of $5,200 in 1950.

Harbor terminal facilities (see schedule B-l).—The harbor terminal facilities consist of docks, piers, and appurtenances necessary for handling, transferring, stevedoring, and storing cargo arriving at the Canal Zone ports of Cristobal and Balboa, either for ultimate destination in the Canal Zone or the Republic of Panama, or for transshipment to points beyond. This function formerly included the custody and rental of the Colon stables, which were demolished in fiscal year 1948, involving a capital loss of approximately $20,000.

The gross revenues of the harbor terminals during fiscal year 1948 were $2,573,954, and are estimated to be $2,831,000 for each of fiscal years 1949 and 1950. The estimated increases in gross revenues as compared to fiscal year 1948 are based on an expected increase in the receipt of commercial cargo for transshipment, the extent of which will depend upon general economic conditions.

Operating expenses for fiscal year 1949 are expected to increase as a result of increased business and the completion of deferred maintenance projects, and it is estimated that they will amount to $2,658,100 in that year as compared to $2,440,966 in fiscal year 1948. Expenses for fiscal year 1950 are estimated to be $2,554,100, the decrease as compared to fiscal year 1949 being the result of reduced repair expenses, offset to some extent by increased depreciation charges resulting from the acquisition of new cargo-handling equipment.

The net income of the harbor terminals in 1948 was $132,988, and it is estimated to be $172,900 in fiscal year 1949 and $276,900 in fiscal year 1950.

Telephone system (see schedule B-l).—The telephone system provides telephone service for The Panama Canal and for the civilian communities in the Canal Zone. It also leases trunk lines, circuits, and duct space to the United States Army and Navy and to the Government of Panama. As regards gross and net income, it is the most stable operation conducted by the Panama Railroad Company.

Gross revenues of the telephone system are estimated to be slightly less in fiscal years 1949 and 1950 than they were in 1948 as the result of the discontinuance of some trunk line service by the Army and Navy. The net income for fiscal year 1948 was $49,022 and it is etimated that net income in fiscal years 1949 and 1950 will be $34,200 and $29,500, respectively. The decreases in net revenue are the result of increased operating expenses on account of increasing labor and material costs and increased depreciation resulting from the acquisition of new telephone cables, exchange buildings, and equipment.

Hotels Tivoli and Washington (see schedule B-l).—The Hotel Tivoli in Ancon, adjacent to Panama City, is an old frame structure of 132 rooms owned by The Panama Canal, built in 1907, and fully depreciated many years ago. It is operated by the Panama Railroad Company. The Hotel Washington in Colon is a concrete structure of 82 rooms, built in 1913 and owned by the Panama Railroad Company.

In the decade 1930-39 both hotels operated at a loss, their continued operation having been justified because of their status as essential adjuncts to The Panama Canal, or, more broadly speaking, to the United States Government in this area. After the large expansion in activity on the Isthmus which began about 1940, both hotels were operated at a profit until fiscal year 1947, when the operation of the Hotel Washington resulted in a small loss. In fiscal year 1948 the net income of the Hotel Tivoli was $66,047, but operation of the Hotel Washington resulted in a loss of $34,475.

Business at the Hotel Tivoli is now maintained at a high level by transient guests from commercial air lines, and this business is expected to remain at nearly the same level during fiscal years 1949 and 1950. However, decreasing patronage by the local population will result in declining revenues, particularly in restaurant income. The Hotel Washington has little business from commercial air lines and it is estimated that it will necessarily continue to operate at a loss. In order to avert a loss in the combined operations of the two hotels in fiscal years 1949 and 1950, room rates at both of them were increased effective August 1, 1948. After giving effect to these increases, it is estimated that the net income of the Hotel Tivoli will be $48,000 in 1949 and $54,600 in 1950, while the Hotel Washington will show a net loss of $40,500 in 1949 and $39,100 in 1950. This will result in a net income for the two hotels combined of $7,500 in 1949 and $15,500 in 1950.

In a note accessory to the Treaty of 1936 between the United States and the Republic of Panama, the United States agreed that the hotel business proper would be left in the hands of Panamanian industry when suitable hotel accommodations were available in the Republic of Panama. Preparations are now under way for the construction of a large hotel in Panama City, but the estimates have been prepared on the assumption, which is

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

believed reasonable, that the new hotel will not be in operation before the end of fiscal year 1950.

Commissary division {see schedule B-l).—The commissary division provides food supplies, clothing, and other essential requirements to Government employees and their families, to establishments of the United States Government located on the Isthmus, and to commercial shipping. In addition to retail stores in Canal Zone communities, the division operates large dry and cold-storage plants, a bakery, an ice-cream and milk-bottling plant, an industrial laboratory, an ice plant, an abattoir, and a coffee-roasting plant, primarily as processing plants to supply its retail stores. It also operates the Mindi Dairy on the Atlantic side and the Ancon Laundry on the Pacific side.

Commissary sales, excluding sales of services amounting to $525,861, totaled $32,614,985 in fiscal year 1948 and it is estimated that they will amount to $32,960,000 in each of fiscal years 1949 and 1950. The net revenue of the commissary division in fiscal year 1948 was $263,127, and it is estimated that it will amount to $225,000 in fiscal year 1949 and $400,000 in fiscal year 1950.

Coaling plants {see schedule B-l).—Until July 1, 1948, the Panama Railroad Company operated two coaling plants, one at each terminus of the Canal, to supply coal to shipping calling at Canal Zone ports. Shortly before the close of fiscal year 1946, the Balboa coaling plant was placed on an inoperative or stand-by basis and bunkering operations were confined to emergency demands. Effective July 1, 1948, the Balboa coaling plant was abolished as a function of the Panama Railroad Company and all coaling operations are now conducted at the Cristobal coaling plant on the Atlantic side. In addition to selling coal, the coaling plant derives revenue from vessels docking at coaling plant piers but not taking coal. The sand and gravel handling operations formerly conducted by the Company at the Balboa plant have been taken over by the dredging division of The Panama Canal.

The net revenue of the coaling plants during fiscal year 1948 was $24,728. It is anticipated, however, that demands for coal from shipping calling at the Canal will constantly diminish as coal-burning vessels are withdrawn from service and it is estimated that the net revenue from coaling plant operations will decline to $2,900 in fiscal year 1949 and to $11,600 in fiscal year 1950. The lower net income in fiscal year 1949 is the result of a capital loss in the demolition of surplus coaling plant structures, estimated at $12,500.

New York office and steamship line {see schedule B-l).—The New York office of the Panama Railroad Company is a principal office of the Company maintained under its charter as a Federal corporation and is also the main office of the Company in the United States.

The New York office has direct supervision over and responsibility for the operation of the steamship service and facilities in connection therewith, for the transportation of supplies, material, equipment, and personnel to the Canal Zone; the operation of a commissary purchasing department, and the necessary accounting required in connection with those activities.

The Company's steamship line comprises three identical cargo and passenger steamers of 10,000 gross tons each, built in 1939 at a total cost of $13,200,000, which normally maintain, and are now maintaining, a weekly service between New York and Cristobal, Canal Zone. The steamship line is an essential adjunct to the operation and maintenance of The Panama Canal, furnishing ocean transportation for the large quantity of goods required by The Panama Canal and by the civilian community in the Canal Zone, and furnishing passenger transportation for employees and their families between the Canal Zone and the United States.

During the war, all three steamers were withdrawn from the Company's service for use in the war effort. After the cessation of hostilities, they were returned to the Company and after undergoing extensive overhaul and rehabilitation were restored to their former service. The S. S. *Panama* resumed operations on September 20, 1946, the *Cristobal* on February 5, 1947, and the *Ancon* on June 26, 1947. Rehabilitation of the steamers *Panama* and *Cristobal* had not been completed at the end of fiscal year 1947, and both steamers were again temporarily withdrawn from service in fiscal year 1948 for final repairs and refitting.

The net income from steamship-line operations daring fiscal year 1948 was $324,311, and it is estimated that net incomes for fiscal years 1949 and 1950 will amount to $95,300 and $45,400, respectively. The decreased net income in fiscal years 1949 and 1950 will be the result of increased cost of maintenance and operation of ships without comparably increased income. Subject to action by the board of directors, there will also be an increase of depreciation expenses of $54,500 in each year as the result of capitalizing $600,000 of the steamer rehabilitation expenditures. This increased capitalization represents increased value of the steamers resulting from installation of essential safety devices, and the conversion of public space to staterooms, thereby increasing earning capacity, to offset to some extent the other increased costs.

OPERATING RESULTS

During the fiscal year 1948 the operations of the Company as a whole resulted in a net revenue of $982,692. This result is arrived at after making due provision for depreciation on the Company's physical plant, and takes into account accrued liabilities for all expenses not settled at the close of the fiscal year. During the fiscal year 1948 a dividend of $700,000 was paid in cash by the Company into the Treasury of the United States. Details of income and expenses are presented in statement B.

Pursuant to section 254 of the Panama Railroad Company Act provided by Public Law 808, Eightieth Congress, the Company deposited with the Treasury the sum of $10,000,000 from invested depreciation reserve funds, necessitating the liquidation of interest-bearing Government and other securities. As a result of the disposal of these securities, interest income, which amounted to $219,084 in fiscal year 1948, will no longer accrue to the Company. Section 252 of the Panama Railroad Company Act requires that the corporation reimburse the civil service and Canal Zone retirement and disability funds for Government contributions to the retirement fund applicable to the corporation, and other Government agencies for benefit payments or payments of a similar nature made to the corporation's employees or on its behalf. This provision of law will result in additional expenses to the Company estimated at $241,600 in fiscal year 1949 and $244,600 in fiscal year 1950, which, combined with the loss of interest income on securities, will reduce the Company's earning by approximately $460,000 in fiscal year 1949 and $463,000 in fiscal year 1950. After giving effect to these reductions of net income, it is estimated that the operations of the Company as a whole will result in a net revenue of $228,500 in fiscal year 1949 and $540,080 in fiscal year 1950, and it is estimated that a dividend of $500,000 will be paid into the Treasury of the United States in each of these years.

Federal Reserve Bank of St. Louis

FINANCIAL CONDITION

There follows a brief discussion of the Company's financial condition as detailed in statement C:

Inventories.—The inventories of the Company, totaling $9,055,071 on June 30, 1948, are carried on the books at cost, including the cost of ocean freight not paid in cash, and they are corrected annually based on a physical check at the close of the fiscal year. The merchandise held for sale consists of $101,716 in coal stock and $7,066,451 in commissary stock. It is estimated that at the close of fiscal years 1949 and 1950 the commissary will have an inventory of goods valued at $6,500,000, and the total inventories of the Company are estimated at $8,816,000 at the close of fiscal year 1949 and $8,826,000 at the close of fiscal year 1950.

Land, structures, and eouipment.—All items of plant and equipment are recorded on the books at actual cost, including cost of installation, except for certain items acquired prior to 1921. Depreciation is charged on the straight-line method based on estimated service lives.

The total investment of the Company in plant and equipment as of June 30, 1948, before deducting accrued depreciation, was $44,160,846 and it is estimated that at the close of fiscal years 1949 and 1950 it will amount to $45,734,822 and $47,800,825, respectively.

The principal capital expenditures in fiscal year 1949 will be for new motive power presently contemplated as Diesel-powered passenger train equipment for the railroad, the replacement of certain cargo-handling equipment for the harbor terminals, telephone exchange equipment and cables, dry-cleaning equipment and an annex to the Ancon laundry, and preliminary work on a new ice-cream and milk-bottling plant. In fiscal year 1950 the principal expenditures will be for a number of freight cars for the railroad to complete a long-range program of freight car replacements, the construction of quarters for native employees, further replacement of cargo-handling equipment for the harbor terminals, additional telephone exchange equipment, completion of the laundry annex and the installation of dry-cleaning equipment, and additional work on the new ice-cream and milk-bottling plant. The amounts estimated to be expended are shown in schedule A-1.

Eetirements of plant and equipment are estimated to amount to approximately $151,400 in fiscal year 1949 and approximately $156,700 in fiscal year 1950.

Accounts receivable.—Accounts receivable consist largely of amounts due from United States Government agencies. As no credit is extended to commercial interests or individuals without adequate guarantees, no significant losses from uncollectible accounts are anticipated and no reserves for such losses are provided. Total accounts receivable at the close of the fiscal year 1948 amounted to $1,615,622 and it is estimated that they will total $1,500,000 in each of the fiscal years 1949 and 1950.

Funds.—Funds of the Company which are not required for handling its normal cash transactions, i. e., depreciation and other reserve funds, were formerly invested in United States Government securities. Before the close of fiscal year 1948, these securities were sold and the sum of $10,000,000 deposited with the Treasury in conformity with the provisions of section 2 of Public Law 808, Eightieth Congress, approved June 29, 1948. The total cash working funds of the Company as of June 30, 1948, amounted to $10,089,580, and it is estimated that they will amount to $9,965,341 in fiscal year 1949 and $9,063,071 in fiscal year 1950.

Deferred credits.—The item entitled "For rehabilitation of steamers" represents unpaid freight charges on goods carried under direction of the Army Transport Service and the War Shipping Administration. This credit was established and applied in fiscal year 1948 to offset the expense of rehabilitating the steamers. It was estimated in last year's budget that this expense would be $9,000,000 but on account of various unfavorable economic conditions, the actual cost as of June 30, 1948, amounted to $10,345,883, and as the total credit available is $7,564,098, the provision for rehabilitation will be exceeded by $2,781,785. Of the total steamer rehabilitation expenditures amounting to $10,345,883, there is under study the portion thereof which is capitalizable—estimated at this time as $600,000. This sum will be capitalized in fiscal year 1949 leaving a net loss for steamer rehabilitation of $2,181,785.

Capital.—As a consequence of the reincorporation of the Panama Kailroad Company as a Federal corporation by act of Congress approved June 29, 1948, and the delivery to the Secretary of the Treasury of a receipt for $1 evidencing the ownership of the corporation by the Government, the sum of $1 is shown in statement C as the capital stock of the Company in fiscal years 1949 and 1950, the remainder of the capital stock of the New York Company, $6,999,999, being shown as capital surplus. The surplus of the Company as of June 30, 1948,amounted to $34,984,225 and, including the capital surplus of $6,999,999 referred to above, it is estimated that it will amount to $42,312,724 in fiscal year 1949 and $42,352,804 in fiscal year 1950. The greater portion of the earned surplus is invested in plants and facilities of the Company

EFFECT ON GOVERNMENT BUDGET

Since the Panama Railroad Company does not make expenditures from general or special accounts in the Treasury or from checking accounts with the Treasurer, the only effect on the Government budget as a result of its operation results from the payment of dividends into the Treasury. These dividends amounted to $700,000 in fiscal year 1948, and it is estimated that they will amount to $500,000 in each of fiscal years 1949 and 1950.

ADMINISTRATIVE EXPENSES

These expenses cover the salaries and wages in the New York office of the first vice president, the third vice president and secretary, the treasurer, the auditor, and the employees in the administrative office and in the offices of the treasurer and the auditor. Also included are the general office expenses of these officers and employees and the legal expenses in the United States. With reference to Isthmian activities, the entire administrative expense is the cost of executive, administrative, accounting, collecting, disbursing, and legal services furnished by The Panama Canal.

Estimates for fiscal year 1950 are based upon normal administrative control over the operations of the Company, and will amount to $815,700, as compared to $775,600 in fiscal year 1949. Figures presented in the statement of administrative expenses show the detail of these increases.

ESTIMATES OF AUTHORIZATION RELATING TO CORPORATE FUNDS

NOTE.—The text of general authorizing language, as incorporated in the Government Corporations Appropriation Act, 1949, and as proposed for 1950, will be found immediately following the summary statements at the beginning of part III of this Budget.

Administrative Expenses, Panama Railroad Company—

Panama Railroad Company: Not to exceed **[$715,000]** *$815,700* (to be computed on an accrual basis) of the funds of the company shall be available during the *current* fiscal year **[1949]** for its administrative expenses, including administrative services performed for the company by other Government agencies, which shall be determined in accordance with the company's prescribed accounting system in effect on July 1, 1946, and shall be exclusive of depreciation, payment of claims, expenses of the commissary coupon audit, commissary contraband inspection, expenditures which the company's prescribed accounting system requires to be capitalized or charged to cost of commodities acquired, and expenses in connection with acquisition, construction, operation, maintenance, improvement, protection, and disposition of facilities and other property belonging to the company or in which it has an interest[: *Provided*, That prior to July 31, 1948, the Board of Directors shall declare and pay into the Treasury of the United States as miscellaneous receipts a dividend **of $10,000,000 if** not otherwise required to be turned into the Treasury under the provisions of the proposed Federal charter: *Provided further*, That section 304 (b) of the Government Corporation Control Act, as amended (Public Law 248, approved December 6, 1945), shall not be applicable with respect to the Panama Railroad Company until after June 30, **1949].** *{The Government Corporations Appropriation Act, 1949.)*

ESTIMATES OF APPROPRIATION

Special account:

Panama Railroad Company, Emergency Fund—

In accordance with section 254 of title 2 of the Canal Zone Code (Public Law 808, 80th Cong.), there has been deposited in the Treasury in fiscal year 1948 the sum of $10,000,000 to be maintained in the Treasury as a separate fund from which the corporation may borrow, for limited periods, not to exceed $10,000,000 for any authorized purpose of the corporation. Repayments shall be redeposited in said fund and will be available for subsequent loans. Loans to the corporation from this fund shall not bear interest. *

PURPOSE AND FINANCIAL ORGANIZATION

The Reconstruction Finance Corporation was created by act of Congress approved January 22, 1932. Its authorities have been changed from time to time by subsequent legislation. The Corporation was granted succession to June 30, 1948, by amendment of the Reconstruction Finance Corporation Act (Public Law 132, 80th Cong., approved June 30, 1947),,which redefined its authorities. The amended act was further amended by Public Law 548, Eightieth Congress, approved May 25, 1948, which, among other things, granted the Corporation succession through June 30, 1956, but terminated its general lending authorities, as defined in section 4 of the act, on June 30, 1954.

As now constituted, the Corporation is designed to aid in maintaining the economic stability of the country, to aid in promoting a high level of employment and production, and to assist small business. To do this, the Corporation is authorized to extend credit, when necessary financing cannot be otherwise obtained on reasonable terms, to business enterprises, to financial institutions, and to States, political subdivisions of States, and other public agencies. Under certain circumstances, the Corporation may purchase the preferred stocks of insurance companies in lieu of extending credit. It is also authorized to make rehabilitation loans in areas stricken by floods or other major catastrophes. In furtherance of home construction, the Corporation extends credit to producers of prefabricated houses and housing components, and to builders engaging in large-scale modernized site construction of houses. Through a subsidiary, the Federal National Mortgage Association, it assists in financing homes by maintaining a secondary market for mortgages insured by the Federal Housing Administration or partially guaranteed by the Veterans Administration.

The Corporation also conducts two major manufacturing and sales operations. Under the Rubber Act of 1948, it produces in Government-owned plants and sells to private industry the Nation's entire output of synthetic rubber. In addition the Corporation is responsible for the maintenance of stand-by plants and for research and development in the field of synthetic rubber. Likewise, the Corporation refines tin ores and concentrates in the Government-owned tin smelter at Texas City, Tex., purchases in the world market all refined tin allocated to the United States, and sells the aggregate, in excess of a working inventory, to private industry or to the national stock pile.

The Corporation is also responsible for winding up the affairs of certain of its former war subsidiaries, Defense Plants Corporation, Defense Supplies Corporation, Metals Reserve Company, Rubber Reserve Company, U. S. Commercial Company, and War Damage Corporation; for liquidating the remaining assets and liabilities of the former Smaller War Plants Corporation and the Defense Homes Corporation; and for disposing of surplus real property, upon termination of War Assets Administration on February 28, 1949.

The management of the Corporation is vested in a board of directors consisting of five members who are appointed by the President of the United States by and with the advice and consent of the Senate. The chairman of the board is designated by the President from among the board members.

On June 30, 19,48, the Corporation had $325,000,000 of capital stock outstanding, all of which was held by the Secretary of the Treasury. Public Law 548, Eightieth Congress, limits outstanding capital stock to $100,000,000. Accordingly, $225,000,000 was paid into the United States Treasury as miscellaneous receipts on July 23, 1948. The same law also directs the Corporation to pay annually all accumulated surplus in excess of $250,000,000 into miscellaneous receipts of the Treasury.

The Corporation is authorized by section 7 of Public Law 132, Eightieth Congress, to borrow funds from the Secretary of the Treasury in an amount sufficient to carry out its functions under any provision of law. The act further requires the Corporation to pay interest on any such borrowings at a rate determined by the Secretary of the Treasury, taking into consideration the current average rate on outstanding marketable obligations of the United States.

Section 4 (c) of Public Law 548, Eightieth Congress, provides that the total amount outstanding at any one time of investments, loans, purchases, and commitments made subsequent to June 30, 1947, shall not exceed $1,500,000,000. This limitation was increased to $2,000,000,000 by Public Law 864, Eightieth Congress. In addition, under Public Law 901, Eightieth Congress, the Corporation may make loans to the prefabricated housing

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

industry in amounts not to exceed $50,000,000 outstanding at any one time.

ANALYSIS OF BUDGET PROGRAMS

The Corporation's budget is presented on a consolidated basis with that of its wholly owned subsidiary, the Federal National Mortgage Association. Its activities can be grouped into the following four broad categories:

1. Lending activities, including the purchase of mortgages insured by the Federal Housing Administration and of mortgages partially guaranteed by the Veterans Administration;
2. Production and sale of synthetic rubber;
3. Production, purchase, and sale of refined tin;
4. Liquidation of war and related activities, including those of Smaller War Plants Corporation.

The estimates contained in the budget are premised on the general assumption that present economic conditions will continue through 1950 without appreciable change, particularly with respect to production, employment, wages, and prices. Provision has not been made in this budget for assumption by the Corporation of the surplus real property disposal function from War Assets Administration on February 28, 1949, since funds for this purpose will be requested at a later date after requirements become more clearly ascertainable.

All of the accompanying financial statements and supporting schedules, with the exception of statement D, "Cash disbursements and receipts," have been prepared on an accrual basis in conformity with the Corporation's system of accounting. Statement D sets forth the Corporation's various programs and transactions on a cash basis under the following headings: Part I, lending operations; part II, national defense, war, and reconversion activities; part III, Smaller War Plants Corporation; part IV, administrative expenses; and part V, intragovernmental transactions. In the discussion of programs the amounts used will be those shown on statement D.

LENDING OPERATIONS

(See part I of statement D)

Section 4 (a) of Public Law 548, Eightieth Congress, defines the Corporation's general lending authorities. Monetary restrictions upon certain types of loans are contained in section 4 (c) of the act and are commented upon in the sections dealing with those particular categories.

BUSINESS LOANS AND PARTICIPATIONS

The Corporation provides financial assistance to business enterprises in two ways: By making direct loans to qualified borrowers and by participating in business loans made by banks. The Corporation assumes the full credit risk and servicing responsibility in connection with its direct loans. No such loans are approved if credit is available elsewhere on reasonable terms to the borrower. Under the participation procedure the Corporation, upon application by a bank, guarantees up to 70 percent of loans amounting to $100,000 or less and up to 60 percent of loans which are in excess of that amount. The participation agreement provides that the bank will disburse and service the loans and that the Corporation will take over its share at the bank's request. The bank pays the Corporation a fee for the guaranty. This plan results in banks making many loans which otherwise the Corporation would be called upon to make direct to the borrower.

Demands upon the Corporation for direct business loans continues to be heavy. New commitments made during the fiscal year 1948 amounted to $113.7 million, an increase of 14.5 percent over the previous year. Disbursements in 1948, aggregating $87.2 million, were $7 million above 1947 disbursements. New commitments made during the first 4 months of the fiscal year 1949 equalled approximately 68 percent of commitments made during the entire year of 1948. It is expected that disbursements for direct business loans will total $107 million in 1949 and $106 million in 1950.

While the Corporation's direct business loan volume has increased consistently over the past several years, the opposite is true of participations. That portion of bank loans guaranteed by the Corporation during the fiscal year 1947 aggregated nearly $300 million. The amount guaranteed in 1948 was approximately one-third that of the previous year and it appears that the 1949 total will be still less. However, banks are experiencing an increase in delinquencies and are calling more frequently upon the Corporation to take up its share of previously contracted participations. Disbursements by the Corporation on participations increased from $10.1 million in 1947 to $13.2 million in 1948 and, based upon disbursements for the first 4 months of fiscal year 1949, are expected to reach $20 million in each of the years 1949 and 1950.

The increasing rate of delinquencies in business loans has accentuated the loan servicing problem. Of the total direct loans outstanding at May 31, 1947, of $159.2 million, $6.8 million, or 4.3 percent were delinquent as to principal and interest (see schedule C-2). By June 30, 1948, the ratio had risen to 9.3 percent. Over the same period delinquencies in participations taken over by the Corporation increased in nearly the same proportion. In this connection it should be pointed out that the Corporation only makes loans that have been declined by banks and as a consequence its loan portfolio, generally, represents a greater credit risk than that of commercial banks. Moreover, many of the loans now becoming delinquent were made in the immediate postwar period when financial assistance to business enterprises, particularly small businesses, for expansion and reconversion were considered essential and the prospects of repayment appeared good. Many of these borrowers are in highly competitive fields and are now experiencing difficulty in meeting their repayment schedules. It is the Corporation's policy in such cases to assist borrowers in adjusting their affairs to meet current conditions and it is expected that most delinquent borrowers will find it possible to work out of their difficulties.

LOANS TO AID FINANCIAL INSTITUTIONS

The Corporation is authorized to extend assistance to financial institutions by (1) making loans to any financial institution organized under the laws of any State or of the United States; (2) purchasing or making loans upon the preferred stock of any insurance company when the Secretary of the Treasury has certified that such company is in need of funds for capital purposes; and (3) purchasing legally issued capital notes or debentures of insurance companies organized in States which do not permit the issuance of nonassessable stock. The aggregate amount of purchases or loans made after June 30, 1947, under (2) and (3) may not exceed $15 million outstanding at any one time.

Loans to banks are estimated at $2 million in the fiscal year 1949 and at $1 million in the fiscal year 1950, and

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

loans to insurance companies are estimated at $3 million and $2 million.

The Corporation held, as of June 30, 1948, $137,449,000 of loans, preferred stock, capital notes, and debentures, all acquired under authority rescinded in Public Law 132, Eightieth Congress. Consistent with the policies of bank supervisory authorities, the Corporation is attempting to have the issuing banks retire their indebtedness. Daring the fiscal year 1948, $23,255,240 of such retirements were effected. It is estimated that in the fiscal years 1949 and 1950 additional retirements of $15,534,000 and $10,826,-000, respectively, will be made. It is also expected that in the fiscal year 1950, $1 million will be repaid on loans to insurance companies.

PUBLIC AGENCY LOANS

The trend in inquiries and applications for public agency loans indicates that the Corporation may expect an increasing demand for such loans during the fiscal years 1949 and 1950. Although shortages of labor and material have held down the demand for funds for public agency projects during the postwar years, the situation is easing somewhat and there is a tendency to accelerate programs of this nature. Furthermore, there is clear indication that bond markets have tightened to the extent that the Corporation will be called upon to make loans for projects which heretofore may have been financed through private lending channels. During the fiscal year 1948 inquiries totaling $370 million were received regarding public agency loans. As of June 30, 1948, undisbursed commitments for such loans aggregated $25,229,507 and in addition, applications were on file totaling in excess of $113 million. It is estimated that commitments for this purpose during the fiscal year 1949 will amount to $38,614,000 and to $70 million in fiscal year 1950. Disbursements against total commitments are estimated at $34,110,000 and $35 million for the 2 years as compared with disbursements in the fiscal year 1948 of $21,691,800. The Corporation held as of June 30, 1948, public agency loans of $134,632,893 in connection with 479 completed projects. Repayments and sales of securities amounted to $7,104,382 in the fiscal year 1948 and are estimated at $4,504,000 in the fiscal year 1949, and at $3,166,000 in the fiscal year 1950.

CATASTROPHE LOANS

There were 16 major catastrophes in the United States during the fiscal year 1948, principally storms and floods. The most severe of these were the Florida-Mississippi-Louisiana Gulf coast hurricane and the Columbia River flood in the Pacific Northwest. The flood occurred late in the fiscal year with the result that demands upon the Corporation for financial assistance arising from it will occur in the fiscal year 1949.

During 1948, 347 loans amounting to $1,814,000 were approved. Disbursements on these loans and on prior years' commitments totaled $1,323,585. Disbursements in the year 1949 are expected to amount to $3 million and $900,000 of disbursements are estimated for 1950.

LOANS TO PROVIDE FINANCIAL ASSISTANCE FOR THE PRODUCTION OF PREFABRICATED HOUSES

To facilitate the production of housing units, the Corporation is authorized by section 102 of Public Law 901, Eightieth Congress, to make loans to producers of prefabricated houses or prefabricated housing components and to provide similar assistance to large-scale modernized site construction projects provided that the total of such loans outstanding at any one time does not exceed $50 million.

Disbursements for this type loan are difficult to estimate but based on the number of eligible manufacturers and builders and the experience of the Corporation since enactment of the law, estimated disbursements of $5 million in 1949 and $15 million in 1950 have been included in the budget with repayments estimated at $2 million in the latter year.

PURCHASE OF INSURED OR GUARANTEED MORTGAGES

Under the provisions of Public Law 864, Eightieth Congress, the Federal National Mortgage Association, a subsidiary of the Corporation, was authorized to purchase home mortgages insured by the Federal Housing Administration or guaranteed by the Veterans Administration. In order to encourage further construction of new houses, authority to make such purchases was expanded by Public Law 901, Eightieth Congress. Under the amended authority, purchases of mortgages insured or guaranteed after April 30, 1948, now may be made up to 50 percent of the holdings of a seller. The Association is limited in its borrowing power to 40 times its capital stock and surplus, making as of June 30, 1949, the total anticipated borrowing limitation for the purchase of mortgages slightly less than $1 billion of which approximately $460 million would be available for future commitments. It is estimated that disbursements for purchases of both types of mortgages will aggregate $351 million in 1949 and $180 million in 1950. This does not take into account $50,000,000 carried under proposed legislation.

On June 30, 1948, the Corporation had outstanding $234,436,779 of undisbursed commitments to purchase Federal Housing Administration insured mortgages made under authority in effect prior to enactment of Public Law 864. The budget contemplates that new commitments to purchase Federal Housing Administration insured mortgages made under the new authority will be $150 million in both 1949 and 1950. It is estimated $300 million of these total commitments will be disbursed in 1949 and $80 million in 1950. Repayments are estimated at $10 million in 1949 and $19,001,000 in 1950.

Undisbursed mortgage commitments partially guaranteed by the Veterans Administration outstanding on June 30, 1948, and made under authority existing prior to that date, amounted to $1,244,792. Additional commitments to purchase mortgages so guaranteed and made under the new law are estimated at $75 million in 1949 and $125 million in 1950. On this basis, disbursements of $51 million and $100 million are anticipated in the respective fiscal years 1949 and 1950. Repayments on Veterans Administration guaranteed mortgages are expected to amount to $8 million in 1949 and $11,700,000 in 1950.

In consideration of a fee, the seller normally continues to service these mortgages after they have been purchased by the Corporation, but when mortgages become seriously delinquent or foreclosure becomes necessary, the Corporation assumes the servicing function in order to assure adequate protection of the Government's interests.

RAILROAD LOANS

Although loans to railroads still constitute a sizable item in the Corporation's portfolio ($144,276,600 at June 30, 1948), no important activity is expected in this field during the 2 years under consideration. Disbursements in 1949 and 1950 are estimated at $4,439,000 and $8,300,000, respectively, while repayments, based upon repayment schedules of existing loans, are expected to amount to $8 million in 1949 and $6,368,000 in 1950.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

OTHER LOANS

Other major loans outstanding on the Corporation's books on June 30, 1948, aggregated $328,298,000. These loans were made pursuant to old authorities and, since the final disbursement was made early in the fiscal year 1949, there remains only the liquidating function. The principal items making up this total are (1) a loan of $155,162,000 to the United Kingdom of Great Britain and Northern Ireland from which repayments of $35 million in each of the years 1949 and 1950 are expected; (2) a loan of $60 million to the Philippine Government, which matures in 1952; and (3) national defense loans totaling $72,326,000, with respect to which a final disbursement of $8,136,000 was made in 1949 and on which repayments of $23,982,000 and $4,066,000 are expected in 1949 and in 1950.

MISCELLANEOUS SECURITIES AND PROPERTY ACQUIRED THROUGH FORECLOSURES

As of June 30, 1948, the Corporation held approximately $18,500,000 of miscellaneous securities acquired as payment of indebtedness by borrowers or through foreclosure of loans. Of this total, approximately $15,700,000 represented securities accepted in payment of interest against which no collections are anticipated in the fiscal years 1949 and 1950. Of the balance of $2,800,000, $2,100,000 represents the net value of assets held by a wholly owned corporation, the Consolidated Realty Corporation of New York, which was organized for the purpose of liquidating collateral acquired through the foreclosure of a loan made to a mortgage loan company. It is estimated that these properties will be sold at their appraised value of $7,300,000, and in addition, operating income of $500,000 will be received.

In addition to the above, the Corporation held, as of June 30, 1948, $12,228,000 of real and personal property acquired through foreclosure or by other means. It is expected that during the fiscal years 1949 and 1950 additional property in the amounts of $6,589,000 and $8,186,000 will be acquired. Receipts from the sale of such property during the 2 years are estimated at $3,788,000 and $3,628,000. In the fiscal years 1949 and 1950 expenses in connection with these properties are estimated at $750,000 and $820,000, while income from the property is estimated at $236,000 and $217,000.

SERVICE TO SMALL BUSINESS

A major activity of the Corporation, especially in its field offices, consists of providing assistance to small business concerns either by way of loans, or assistance and advice in setting up applications for loans so that the applicants may obtain credit from commercial lenders which have previously declined to extend credit to the applicant, or through assistance and advice of a character which would enable the applicant to continue in business successfully without the necessity of a loan. The assistance rendered may consist of such engineering, management, accounting, or financial advice as may be involved in obtaining financial aid or as may be deemed necessary by the Corporation for the protection of its interest in servicing its loans.

NATIONAL DEFENSE, WAR, AND RECONVERSION ACTIVITIES

(See part II, statement D)

The war and related activities of the Corporation remaining in the fiscal years 1949 and 1950 for operation and liquidation axe composed of (1) the production and sale of synthetic rubber; (2) the purchase, production, and sale of refined tin; and (3) liquidation of other miscellaneous war programs.

PRODUCTION AND SALE OF SYNTHETIC RUBBER

In Public Law 469, Eightieth Congress, the Congress directed that there be maintained at all times within the United States facilities for the production of synthetic rubber having a rated production capacity per annum of not less than 600,000 long tons of general-purpose rubber and not less than 65,000 long tons of special-purpose rubber. This act further provides that there should be produced and sold, including production in privately owned plants, synthetic rubber in amounts equal to at least one-third of the rated capacities referred to above.

The Corporation has operated, through agents, all Government-owned plants in the synthetic rubber program since its inception in 1942. Executive Order No. 9942, dated April 1, 1948, which implemented Public Law 469, continued this program in the Corporation. The program includes the operation of the rubber-producing facilities, the maintenance of stand-by facilities, research and development work, and the formulation of a program for disposal of Government-owned plants.

Production and sale of rubber.—In order to meet estimated requirements for synthetic rubber, production in 1949 is expected to amount to 360,000 long tons of general-purpose rubber and 78,000 long tons of special-purpose rubber. In 1950 production is expected to be 340,000 tons of general-purpose and 54,000 tons of special-purpose rubber. Annual cost of such production is estimated at $148,080,000 and $130,160,000. In 1948, 394,000 tons of general-purpose and 75,000 tons of special-purpose rubber were produced at a cost of $151,782,000. Total disbursements, including research and development, are expected to amount to $156,590,000 in 1949 and $135,002,000 in 1950. Cash receipts from sales are estimated at $194,313,000 and $168,318,000 for the two fiscal years, as compared to $213,116,917 in the fiscal year 1948. The cost of remodeling existing plants to take advantage of improved production and operating techniques will approximate $6 million in each of the 2 years.

Maintenance of stand-by plants.—It is expected that 13 plants will be in stand-by at June 30, 1949, and 10 at the end of 1950. The cost of placing plants in stand-by condition and the maintenance of those now in stand-by is estimated at $4,500,000 in each of the two fiscal years. In addition, it is anticipated that $600,000 will be expended in each of the 2 years in connection with termination of operating contracts.

Disposal of plants.—It is estimated that five plants not required to meet the purposes of the Rubber Act of 1948 will be sold during the fiscal year 1949 and that four additional plants will be sold in the fiscal year 1950. Receipts from the sale of such plants are estimated at $13,175,000 and $2,550,000, respectively.

With respect to the remaining plants, section 9 of the Rubber Act of 1948 requires that there be presented to Congress in 1950 a program for disposal to private industry of the Government-owned rubber-producing facilities. This study will proceed in collaboration with other interested agencies during the fiscal years 1949 and 1950. No operating disbursements are contemplated in connection with this study.

PURCHASE, PRODUCTION, AND SALE OF TIN

Public Law 125, Eightieth Congress, approved June 28, 1947, authorized and directed the Corporation to continue

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

the Texas City tin smelter in full production until June 30, 1949, " or until such earlier time as the Congress shall otherwise provide/' Public Law 824, Eightieth Congress, extended this authority to June 30, 1951. This authority includes the power (1) to buy, sell, and transport tin, and tin ores and concentrates; and (2) to finance research in tin smelting and processing.

Cash disbursements for the purchase of refined tin, tin ores and concentrates, and for refining costs, amounted to $151,910,768 during the fiscal year 1948 and are estimated at $192,092,000 and $244,773,000 during the fiscal years 1949 and 1950. Cash receipts from the sale of refined tin to industry are estimated at $149,520,000 for each of the fiscal years 1949 and 1950. In 1948 cash receipts were $118,688,452. In addition 15,000 tons of tin will be sold to the Bureau of Federal Supply in the fiscal year 1949 and 42,000 tons in the fiscal year 1950, for $35 million and $96,100,000, respectively. A further 20,000 tons of refined tin, the cost of which already has been offset by cancellation of the Corporation's notes held by the Treasury, will be transferred to the Bureau of Federal Supply in 1949 without reimbursement. In 1949 costs of operating the smelter are expected to amount to $5 million, contemplated expenditures for plant improvement are estimated at $2 million, and about $500,000 will be expended on research in tin smelting and processing. For the fiscal year 1950, the cost of operating the tin smelter is estimated at $6 million, plant improvements at $1 million, and research at $500,000.

LIQUIDATION OF WAR AND RELATED ACTIVITIES

As of June 30, 1948, there remained for liquidation or disposition a number of plants, facilities, accounts receivable, and other assets which originated with the Corporation's many wartime activities. These may be summarized as follows:

1. Accounts, notes, and claims receivable.
2. Inventories.
3. Plants and other facilities.
4. Fiber plantations.

Accounts, notes, and claims receivable.—Included in this category are trade accounts, claims for freight refunds, and other accounts and notes receivable. The Corporation is exerting every effort to complete final liquidation of all these accounts as promptly as possible and it is expected that $19,610,000 will be realized in 1949, including $3,380,000 due from other Government agencies. In 1950 receipts from these items should amount to $2,661,000.

Inventories.—In addition to stocks of tin and synthetic rubber, there remains in the Corporation's possession certain inventories of metals and commodities acquired in connection with war activities. Fiber inventories cannot be completely liquidated until disposal of the Government-owned fiber plantations is effected. (See discussion of fiber plantations which follows.) Estimated production of fibers by the Corporation on its plantations amounts to $6,000,000 in 1949 and $6,500,000 in 1950. Fiber sales during 1949 are estimated at $9 million; during 1950 at $8 million. No additions to inventories, other than fibers, will be made after 1949 and only $691,000 of miscellaneous purchases will be made in that year to wind up contracts.

All inventories except fibers will be disposed of during the fiscal year 1949. Inventories of metals or commodities required for the national stock pile will be transferred to the Bureau of Federal Supply of the Treasury Department without reimbursement since the Corporation's notes held by the Treasury have already been canceled in amounts equal to the cost involved. It is expected, however, that the Corporation will expend $5,895,000 in 1949 for storing, processing, handling, and transporting these materials to the Bureau of Federal Supply stock pile and that a like amount of the Corporation's notes will be canceled by the Treasury. Sale of all remaining inventories to industry for $5,975,000 is contemplated.

Plants and other facilities.—On June 30, 1948, 77 plants and installations remained in the Corporation's possession. Substantially all are still under lease, and will be disposed of as rapidly as the leases expire. Operations are being continued in three plants at the request of other Government agencies, one of which will be discontinued December 31, 1948.

Administration of the leases, the operation of plants, and the disposition of the plants after they become available for disposal will represent a major part of the work in the liquidation program. It is expected that rental from leases will be $16,642,000 in the fiscal year 1949 and $9,012,000 in the fiscal year 1950.

Keceipts from sales of plants are estimated at $26,710,000 in the fiscal year 1949 and $6,699,000 in the fiscal year 1950. Disbursements of $223,000 for repairs and rehabilitation are anticipated in 1949. Any such expenditures in the fiscal year 1950 presumably will be minor and therefore have not been reflected in the budget.

In addition to the functions described above, there remains the necessity of establishing the final accountability of former lessee-operators of facilities which since have been declared surplus to War Assets Administration or were otherwise disposed of by the Corporation. Determination as to whether the lessee has fully discharged his responsibilities to the Government before being given a final release is required by the terms of the lease. The total original book value of such plants as of June 30, 1948, was $3,038,527,000 and approximately 800 leases are involved. It is expected that substantially all this work will be completed during the fiscal year 1949.

Fiber plantations.—The Corporation owns and operates, under agency operating agreements, five fiber plantations in Central America and one in Haiti. The Army-Navy Munitions Board has requested the Corporation to continue operation of these plantations in order to assure a supply of the fibers for this country. In view of this request, negotiations are under way to dispose of the plantations under arrangements whereby delivery of the fibers to this country for domestic consumption and for the permanent stock pile will be assured. While it is contemplated that the Haitian plantation will be sold in the fiscal year 1949, indications are that the others will be retained through 1950.

SMALLER WAR PLANTS CORPORATION

(See part III, statement D)

Of the total assets of the Smaller War Plants Corporation transferred for liquidation to the Reconstruction Finance Corporation (Executive Order 9665), there remained as of June 30, 1948, assets having an appraised value of $9,281,000. This total consists of:

1. Loans, including accrued interest, $6,595,000.
2. Plants and facilities, $351,000.
3. Other, $2,335,000.

Liquidation of the outstanding loans is expected to result in receipts of $2,167,000 in the fiscal year 1949 and $1,729,000 in the fiscal year 1950. Interest collections on such loans are estimated for the 2 years at $429,000 and $225,000.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

The plants and facilities on hand as of June 30, 1948, were all under lease as of that date, but will be disposed of upon termination of the leases. Rental collections from such leases are estimated at $275,000 in the fiscal year 1949 and $81,000 in the fiscal year 1950. Proceeds from the sale of plants are estimated at $87,000 in the fiscal year 1950. No such sales are projected for the fiscal year 1949. There also remains the function of establishing[1] final accountability under approximately 100 leases which, with the exception of a few difficult cases, may be expected to be completed during the fiscal year 1949.

ADMINISTRATIVE EXPENSES

(See "Estimates of authorization relating to corporate funds")

Despite material increases in loan servicing costs which have developed from the purchase of insured and guaranteed mortgages and a continuing upward trend in business and other loan delinquencies, the total cost of administering the activities of the Corporation during each of the fiscal years 1949 and 1950 will be substantially less than that incurred in 1948. This reduction is attributable in part to the liquidation of war and related activities and in part to the continuing efforts of the Corporation to streamline and simplify its organization, methods and procedures, and to effect economies wherever possible.

The following table indicates the extent to which personnel and administrative costs have been or will be reduced from the beginning of the fiscal year 1947 to the close of the fiscal year 1950.

	Number of employees	Annual rate of expenditure[1]		
		Salaries	Other	Total
July 15, 1946	12,229	$47,436,291	$15,623,547	$63,059,838
July 1,1947	7,711	31,537,990	10,223,260	41,761,250
July 1, 1948	5,260	22,191,550	6,331,250	28,522,800
July 1,1949	4,787	20,612,000	5,805,000	26,417,000
July 1, 1950	4,648	20,029,000	5,544,000	25,573,000

1 For purposes of comparability, the pay increase granted by the Corporation comparable to that authorized for other Government agencies by Public Law 900, 80th Congress, is excluded from the total salaries indicated on July 1, 1949, and July 1,1950.

Administrative expenses amounted to $34,975,821 in the fiscal year 1948 and, exclusive of the pay increase, are estimated at $26,687,000 for 1949 and $25,732,100 for 1950. The estimated costs of the pay increase in the fiscal years 1949 and 1950 are $1,526,200 and $1,547,400, respectively.

Estimated administrative expenses to be incurred during the fiscal year 1949, as indicated above, exceed funds presently authorized by $2,674,500, of which $1,474,500 is due to administrative pay increases comparable to those granted under Public Law 900, and $1,200,000 for expanded activities. This latter deficiency, for which supplemental funds will be requested in a separate submission, represents the net additional cost of programs which were authorized or expanded by legislation enacted subsequent to the approval of the Corporation's original budget. The Corporation's 1949 budget provides $228,700 for administrative expenses for the Federal National Mortgage Association. Under the expanded authority to purchase home mortgages insured by the Federal Housing Administration or guaranteed by the Veterans Administration it is now estimated that in 1949 administrative expenses of the Association will increase $1,938,500 to $2,167,200. Of this increase $1,095,800 will be met by savings effected in other programs and $842,700 will be included in a request for supplemental funds. For the fiscal year 1950, estimated administrative expenses of the Federal National Mortgage Association are $3,133,100. It should be emphasized that in both fiscal years estimated administrative expenses are predicated on the volume of mortgages for which purchase commitments will be made. Should commitments exceed amounts estimated ($225,000,000 in the fiscal year 1949 and $275,000,000 in the fiscal year 1950), or should delinquencies materialize at a rate greater than that anticipated, it may be necessary to request an additional increase in administrative funds.

For details of estimates and comparison of administrative expenses by programs and fiscal years, see "Estimates of authorization relating to corporate funds."

EFFECT ON GOVERNMENT BUDGET

As indicated in the recapitulation of statement D, the Corporation's operations are estimated to result in net cash expenditures of $927,588,931 in 1949 and $254,791,800 in 1950, as compared with actual net receipts of $470,040,-101 in 1948. Net receipts or expenditures for 1948 and 1949 include as receipts to the Corporation treasury note cancellations which are regarded as the equivalent of cash transactions. These are shown separately on statement D under "Intragovernmental transactions."

The net effect of these corporate receipts and expenditures upon the Government Budget, after adjustment for payments by the Corporation of capital and surplus into miscellaneous receipts of the United States Treasury, repayments of advances to the Secretary of State, and net additional borrowings from the Treasury, are shown on statement A as budget expenditures of $296,658,376 and $119,445,500 for the years 1949 and 1950, as compared with $59,923,032 in 1948.

OPERATING RESULTS

As indicated in the comparative statement of income and expense for lending operations (statement B, part I), the operations of the Corporation and its subsidiary, the Federal National Mortgage Association, will result in a profit in each of the fiscal years 1949 and 1950. However, estimated net income for the fiscal year 1950, before charge-offs and adjustment of valuation reserves, will be approximately $5,000,000 less than net income estimated for the fiscal year 1949. This decline is primarily attributable to increased interest costs which result from the necessity of borrowing funds to replace the surplus of $307,392,000 paid to the Treasury as a dividend. While gross income will increase by $5,632,400, total expenses will also increase by $10,562,700, of which $9,200,000 represents increased interest on funds borrowed from the Treasury. Administrative expenses applicable to lending activities are expected to increase by $2,193,700 in 1950. Losses and charge-offs of $6,288,000 are anticipated for the fiscal year 1950, a decline of $7,965,000 from 1949, while adjustments of valuation reserves are expected to require a charge against income of $13,000 in the fiscal year 1950, as compared to a net credit of $12,483,000 for the fiscal year 1949.

Dividends, representing the accumulated net income in excess of $250,000,000, will be paid to the United States Treasury in the estimated amounts of $307,391,555 in 1949 and $17,888,300 in 1950.

FINANCIAL CONDITION

As indicated in the comparative statement of financial condition as of the end of fiscal years 1948 through 1950 (statement C, part I), the Corporation's total assets, less

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

applicable reserves,, declined drastically in 1948 and in subsequent years from the $4,739,957,038 shown at the end of 1947.

This reflects the effect of legislation upon certain of the Corporation's assets and upon its notes held by the United States Treasury. During 1948, at the direction of Congress, the Corporation transferred $683,624,000 of assets to the Treasury and to the Public Buildings Administration for which its notes held by the Treasury were canceled in a like amount. (See the "Funds provided" section of statement A for details.) In that same year, in accordance with the provisions of Public Law 860, Eightieth Congress, $9,313,737,000 of the Corporation's notes held by the Treasury, plus the interest accrued thereon subsequent to June 30, 1947, were canceled. The notes canceled represent the unrecovered costs to the Corporation as of June 30, 1947, of its national defense, war, and reconversion activities which appear on the June 30, 1947, statement of financial condition, part I, as a deficit of $6,719,841,834 and as assets on hand of $2,593,894,697. Included among these assets are the rubber plants and the tin smelter.

Public Law 860 further provides that any amounts recovered from the assets or activities for which notes were canceled—as for example profits from the operation of plants, proceeds from the sale of property or recoveries from claims—must be paid into miscellaneous receipts of the Treasury after deduction of related expenses. Under these circumstances it appears that the Corporation has no beneficial interest in the remaining assets and is merely acting as an agent of the Government in their operation and liquidation. As a consequence the assets have been omitted from the corporate statement of financial condition after June 30, 1947, and are shown in detail on statement C, part II, for informational purposes. The statement of financial condition, thereafter, reflects only the Corporation's lending activities and liability to the Treasury for net proceeds realized from the liquidation and operation of national defense, war, and reconversion assets.

Reference to statement C, part II, will disclose that the Corporation, acting as agent for the Government, expects that all but $728,335,000 of the $2,593,895,000 of assets will have been disposed of by June 30, 1950. (See statement C, part II, for accountability.) Of the amount remaining at that date, $649,267,000 will consist of the rubber plants, the tin smelter, the fiber plantations, and related inventories. Approximately $171 million of proceeds realized from these assets will be retained by the Corporation in 1948 and 1949 and $110 million in 1950 (see statement C, part I) as working funds with which to finance the various operations and against which losses may be charged, as no provision is made for that purpose in Public Law 860. Interest of 1% percent is being allowed on such of these retained funds as are being used in the Corporation's loan business. Payments to the Treasury of $100,000,000 in each of the years 1949 and 1950, representing partial remittance of proceeds received from operation and liquidation of the assets, are contemplated.

With respect to the Corporation's loan business, it will be observed from the comparative statement of financial condition that outstanding loans and investments, other than to Government agencies, show a continual increase from $1,122,495,433 on June 30, 1948, to $1,671,572,018 on June 30, 1950. The major portion of this increase will result from the purchase of mortgages, expansion of business loans and loans to public agencies, offset by reductions in a loan to the United Kingdom of Great Britain and Northern Ireland, and in investments in banks. Accounts payable are expected to be reduced substantially in the fiscal years 1949-50 from a total of $126,-032,255 on June 30, 1948, to $57,096,417 on June 30, 1950. While the Corporation had no outstanding notes payable to the United States Treasury on June 30, 1948, such borrowings are expected to reach $1,062,400,000 by June 30, 1950.

LANGUAGE

Authorizing language of the Keconstruction Finance Corporation follows the financial statements.

STATEMENT A.

COMPARATIVE STATEMENT OF SOURCES AND APPLICATION OF FUNDS

{Fiscal years ending June 30,1948, 1949, and 1950]

PART I. LENDING OPERATIONS

	1948 actual		1949 estimate		1950 estimate	
FUNDS APPLIED						
To acquisition of assets:						
Loans, mortgages, and investments	$259,136,355		$537, 685,000		$368,200,000	
Advances to Secretary of State in connection with European Recovery Program	1,105,000,000					
Advances to Secretary of State for UN headquarters construction			25, COO, 000			
Total acquisition of assets		$1,364,136,355		$562, 685,000		$368, 200,000
To expenses (statement B, part I):						
Interest paid to U. S. Treasury			8, 500,000		17,700,000	
Administrative expenses:						
Exclusive of pay increase, comparable to Public Law 900	14,398,949		16,975, 500		19,861,600	
Pay increase, comparable to Public Law 900			1, 027, 500		1,202,800	
Supplemental for new and expanded activities (including pay increase funds of $32,900)			867, 700			
Other expenses	6, 251, 706		6,410,000		5, 579,000	
Total applied to expenses		20, 650, 655		33, 780, 700		44,343,400
To retirement of borrowings:						
Cancellation of notes	10, 048,931,299		5, 895,000			
Repayment of notes	1,434,000,000		94,105,000		45, 600,000	
		11,482,931,299		100,000, €00		45,600,000
To payments to U. S. Treasury:						
Earned surplus of War Damage Corporation	209,908, 866

COMPARATIVE STATEMENT OF INCOME AND EXPENSES

[Fiscal years ending June 30, 1948, 1949, and 1950]

PART 1. LENDING ACTIVITIES

	1948 actual		1949 estimate		1950 estimate	
Income: Interest and dividends earned on loans to, and securities of—						
Commercial enterprises, financial institutions, political subdivisions of States and Territories and home owners	$30, 425, 453		$41, 500, 000		$52, 700,000	
Foreign governments	6, 575, 072		5, 500, 000		4, 500,000	
Other U. S. Government agencies	1, 214, 277					
Total interest and dividends		$38, 214, 802		$47, 000,000		$57, 200,000
Premiums and discounts		77. 535				
Fees on loan participation agreements		1,589,092		**1,** 679,000		1, 603,000
Income from acquired collateral, net		6, 505, 298		3,928, 000		-560, 600
Other income		119,834		72,000		69,000
Total income		46, 506, 561		52, 679, 000		58,311,400
Expenses:						
Interest on:						
Funds borrowed from U. S. Treasury				8, 500, 000		17, 700,000
Funds held for U. S. Treasury and others		5, 504,393		4,927,000		3, 566,000
Administrative expenses:						
^Exclusive of pay increase, comparable to Public Law 900	14, 398,949		16, 975, 500		19, 861, 600	
Pay increase, comparable to Public Law 900			1, 027, 500		1, 202,800	
		14, 398, 949		18,003, 000		21,064,400
Supplemental for new and expanded activities (including pay increase funds of $32,900)				867, 700		
Fees for servicing mortgages		657, 938		1, 480,000		2,012,000
Other expenses		89, 375		3,000		1,000
Total expenses before depreciation, losses, and charge-offs and adjustment of valuation reserves (statement A)		20, 650, 655		33, 780, 700		44,343, 400
Loans, investments, and other receivables charged off.		7, 931, 876		14, 253,000		6,288,000
Total expenses, lending activities		28, 582, 531		48,033, 700		50,631,400
Net income before adjustment of valuation reserves		17,924,030		4,645,300		7, 680,000
Increase (—) decrease in valuation reserves		-918, 241		12, 483,000		-13,000
Net income for the year		17,005, 789		17,128,300		7, 667,000

Analysis of Unreserved Surplus

Balance at beginning of fiscal year [1]		$551,901,483	$559,319,821	$271,416,566
Adjustments applicable to prior fiscal years		6, 276, 799		
Income for fiscal year as shown above		17,005, 789	17,128,300	7, 667,000
Adjustment of surplus reserves		-15,864,250	2, 360,000	1, 623,006
Dividend to U. S. Treasury			-307,391,555	-17, 888,300
Unreserved surplus at end of fiscal year [1]		559,319,821	271,416, 566	262,818, 266

i Includes earned surplus of the Federal National Mortgage Association in the following amounts: July 1, 1947, $2,608,724; July 1, 1948, $1,928,266; July 1,1949, $3,528,266, and **July 1,** 1950, $8,939,609.

ESTIMATES OF AUTHORIZATION RELATING TO CORPORATE FUNDS

NOTE.—The text of general authorizing language, as incorporated in The Government Corporations Appropriation Act, 1949, and as proposed for 1950, will be found immediately following the summary statements at the beginning of part III of this Budget.

Administrative Expenses, Reconstruction Finance Corporation—

Reconstruction Finance Corporation: Not to exceed [$24,796,000] *$26,774,000* (to be computed on an accrual basis) of the funds of the Reconstruction Finance Corporation shall be available during the *current* fiscal lyear [1949J for its administrative expenses and the administrative expenses of the Federal National Mortgage Association; not to exceed $1,500 for periodicals and newspapers; *purchase (not to exceed eighty-four, for replacement only) and hire of passenger motor vehicles;* health service program as authorized by law (5 U. S. C. 150); use of the services and facilities of the Federal Reserve banks: *Provided,* That as used herein the term "administrative expenses" shall be construed to include all salaries and wages, services performed on a contract or fee basis, and travel and other expenses, including the purchases of equipment and supplies, of administrative offices: *Provided further,* That the limiting amount heretofore stated for administrative expenses shall be increased by an amount which does not exceed the aggregate cost of salaries, wages, travel, and other expenses of persons employed outside the continental United States; [wages, fees, and other expenses, including cost of contract services, of persons who are exclusively engaged in construction, operation, clearance, maintenance and protection of plants, operating facilities, acquired collateral, and other property in which the Corporation has an interest;J the expenses of services performed on a contract or fee basis in connection with termination of contracts or in the performance of legal services; and all *administrative* expenses reimbursable from other Government agencies: *Provided further,* That the distribution of administrative expenses to the accounts of the Corporation shall be made in accordance with generally recognized accounting principles and practices: *Provided further,* That, except as otherwise provided hereinafter, none of the funds of the Reconstruction Finance Corporation and its subsidiary shall be used for the custody, maintenance, or disposal of any surplus property within the continental limits of the United States, its Territories or possessions, except such property as may be owned by and held for disposal by the Reconstruction Finance Corporation or its subsidiary; but, notwithstanding any other provision of law, the Reconstruction Finance Corporation may waive reimbursement from War Assets Administration for the administrative property transferred prior to July 1, 1946, and for expenses incurred prior thereto in the custody, maintenance, or disposal of any surplus property: *Provided further,* That no part of the funds of the Reconstruction Finance Corporation or of its subsidiary shall be used to make any purchase or for personal services or to enter into any contract for the use or benefit of any other agency of the Government unless such agency shall have authority in law and appropriations available to make reimbursement for such purchase, personal services, or contract [, except that this, provision shall not apply to expenditures in connection with materials, surplus to the needs of the Corporation, which have been or hereafter shall be transferred to stock piles established pursuant to The Strategic and Critical Materials Stock Piling Act (60 Stat. 599): *Provided further,* That the Secretary of the Treasury is hereby authorized and directed to cancel notes of the Reconstruction Finance Corporation in the amount of $9,313,736,531, plus the interest accrued thereon subsequent to June 30, 1947, the foregoing stated amount representing unrecovered costs to the Corporation as of June 30, 1947, in its national defense, war, and reconversion activities, and any amounts recovered by the Corporation with respect to these activities subsequent to June 30, 1947, shall, after deduction of related expenses, be deposited in the Treasury as miscellaneous receipts: *Provided further,* That, notwithstanding the provisions of section 6 (b) of the Strategic and Critical Materials Stock Piling Act (60 Stat. 599), the Secretary of the Treasury shall cancel notes of the Reconstruction Finance Corporation on account of the transfer of materials to stock piles in an amount equivalent only to the costs incurred by the Corporation subsequent to June 30, 1947, for handling, storing, processing, and transporting such materials, as determined and certified by the Corporation from its accounting records], *(The Government Corporations Appropriation Act, 1949.)*

TENNESSEE VALLEY ASSOCIATED COOPERATIVES, INC.

Pursuant to the Government Corporations Appropriation Act of 1948, the Secretary of the Treasury has taken over active liquidation and dissolution of the Tennessee Valley Associated Cooperatives, Inc., and at his request officials of the Treasury Department were appointed to serve in their official capacities as directors and officers of the Corporation. All cash funds have been transferred to a special deposit account with the Treasurer of the United States, and custody of all original documents and records of the Corporation has been effected. By the end of the fiscal year 1948 all accounts of the Corporation had either been liquidated or were in the final stages of liquidation except preferred stock of associated cooperatives, which it is anticipated will be liquidated before June 30, 1949.

During the fiscal year 1948, a total of $50,000 was returned to the Treasury in partial payment of paid-in surplus. The estimated amount for 1949 is $15,084.

STATEMENT A

COMPARATIVE STATEMENT OF SOURCES AND APPLICATION OF FUNDS

[Fiscal years ending June 30, 1948, 1949, and 1950]

TENNESSEE VALLEY AUTHORITY

PEOGEAM HIGHLIGHTS

	1948 actual	1949 estimate	1950 estimate
Construction activities:			
Facilities for navigation, flood control, and power	$43,360,384	$48,313,079	$62,968,000
Chemical facilities	$4,687,151	$2,101,542	$4,000,000
Facilities for general use	$2,132,852	$1,970,574	$1,435,000
Pay increase applicable to construction activities		$746,805	$713,000
Total construction activities	$50,180,387	$53,132,000	$69,116,000
Net expense or income (—) of developmental programs:			
Navigation operations	$2,710,329	$2,922,000	$2,954,000
Flood control operations	$2,253,464	$2,411,000	$2,431,000
Experimental fertilizer production (chemical operations)	$227,983	-$20,000	—$214,000
Fertilizer and munitions research	$1,464,730	$1,295,000	$1,278,000
Resource development activities	$5,006,881	$4,667,000	$5,250,000
Fertilizer shipped:			
Tons of nitrogen	51,784	51,150	51,150
Tons of phosphorus pentoxide	96,332	90,886	102,420
Power operations:			
Outside sales of electric energy (kw.-hr.)	11,650,976,000	13,110,000,000	13,890,000,000
Gross revenue from outside power sales	$46,603,579	$55,500,000	$56,809,000
Net power income before interest charges	$17,181,747	$20,224,000	$16,810,000
Return on power investment (percent)	4¼	4¾	4

PURPOSE AND FINANCIAL ORGANIZATION

The Tennessee Valley Authority is a Corporation created by act of Congress on May 18, 1933 (16 U. S. C. 831). It was established "to improve the navigability and to provide for the flood control of the Tennessee River; to provide for reforestation and the proper use of marginal lands in the Tennessee Valley; to provide for the agricultural and industrial development of said valley; to provide for the national defense by the creation of a corporation for the operation of Government properties at and near Muscle Shoals in the State of Alabama, and for other purposes." These purposes, directed toward the development of the Tennessee Valley, have not been changed since the creation of the Corporation.

The Tennessee Valley Authority is financed by appropriations, and by proceeds from its operations, principally the sale of power and fertilizer materials. Appropriations are made by the Congress to cover expenses of navigation and flood control operations, fertilizer research, and resource development activities, and for most capital plant additions such as structures, equipment, and land. Proceeds (referred to in the financial statements as corporate funds) are used to finance the operation of dams and reservoirs; to conduct the business of generating, transmitting, and distributing electric energy; and in manufacturing, selling, and distributing fertilizer and fertilizer ingredients.

Section 26 of the Tennessee Valley Authority Act, as amended, provides for payment into the Treasury of the United States of such proceeds as in the opinion of the Tennessee Valley Authority Board are not required for the purposes enumerated above. Through the 1948 fiscal year, payments to the Treasury of the United States (including $11,072,500 for the retirement of bonds) have totaled $42,042,834. Under the provisions of title II of the Government Corporations Appropriation Act, 1948, total payments of not less than $5,500,000 are to be made in the fiscal year 1949 from net income derived from power operations.

ANALYSIS OF BUDGET PROGRAMS

The function of the Tennessee Valley Authority is to bring about the unified development of the water and soil resources of the Tennessee Valley. The budget program is divided into five types of activity: (1) Navigation, flood control, and power operations; (2) fertilizer and munitions research; (3) experimental production of fertilizer materials; (4) resource development activities; and (5) construction or acquisition of structures and equipment to be employed in the foregoing operations.

Each of these activities is related to each of the others in both planning and execution, and is conducted to enable the people of the Tennessee Valley to make full and effective use of the area's resources by methods which encourage the enterprise of individual farmers and businessmen, and which strengthen their State and local institutions and agencies.

As shown in statement A following this narrative, the 1950 program involves the use of $56,409,000 of appropriated funds and $78,766,000 of corporate funds made available from the sale of power, fertilizer products, and other sources. The total of $135,175,000 to be applied under the 1950 program consists of $69,116,000 for acquisition of assets, $60,294,000 for operating expenses, $5,500,000 for retirement of borrowings and payments to the United States Treasury, and $265,000 to increase working capital.

NAVIGATION, FLOOD CONTROL, AND POWER

A major objective of the Tennessee Valley Authority Act is the unified development and use of the Tennessee River system for navigation, flood control, and power (16 U. S. C. 831c). As of June 30, 1948, the total investment in facilities serving these purposes was $691,161,152 and was allocated in accordance with section 14 of the act (16 U. S. C. 831m) as follows: Navigation, $138,171,762; flood control, $145,559,047; and power, $407,430,343. Principal elements consist of a system of 22 major dams, 20 major hydroelectric generating stations, 10 navigation locks, 5 major fuel-electric generating stations, and a power transmission network of over 6,500 circuit-miles.

Navigation operations.—The dams, reservoirs, and other navigation improvements which have been constructed on the Tennessee River and its tributaries now provide a modern waterway from the mouth of the river to Knoxville, Tenn., a distance of 630 miles along the new channel. The Tennessee Valley is thereby linked with the 6,000-mile inland waterways system of 9- to 12-foot channels extending from the Great Lakes to the Gulf of Mexico. Freight traffic on the Tennessee River amounted to 356,000,000 ton-miles in calendar year 1947. This is the greatest volume in the history of the river; it is 40 percent greater than in 1945, the first year the channel was substantially complete, and 11 times the volume in 1933. Figures for the first 8 months of 1948 are about 35 percent ahead of the same period in 1947. In addition to freight transportation, there has been a tremendous growth in recreational navigation as evidenced by the approximately 10,000 boats valued at about $5.5 million which are operating on the new reservoirs.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

The Tennessee Valley Authority is cooperating with private shippers and transportation companies which serve the Tennessee Valley. Technical and engineering investigations and analyses are made to insure that Tennessee Valley Authority operations and construction provide for safe and efficient navigation and to supply factual data for businessmen who use the river. Public-use river terminals are operated to provide service for small shippers and to enable the potential large shipper to try initial barge shipments. Between $2,000,000 and $3,000,000 of private capital has been invested in new river terminal and storage facilities, and new water-front industrial plants costing many more millions of dollars have beenbuilt.

Close working relationships are maintained among the Tennessee Valley Authority, the United States Corps of Engineers, the United States Coast Guard, and State and local agencies in matters relating to navigation on the Tennessee River.

As shown in statement B, the net expense of navigation operations amounted to $2,710,329 in fiscal year 1948, and is estimated at $2,922,000 in 1949, and $2,954,000 in 1950.

Flood control operations.—The Tennessee River and its tributaries constitute the most highly developed river control system in the world, providing 13,534,000 acre-feet of useful controlled storage. Since Norris Dam went into service in 1936, the system has on 17 occasions reduced flood crests which, uncontrolled, would have caused major damage. At the city of Chattanooga alone, the total of the estimated reductions in flood damage resulting from these operations amounts to over $41,000,000.

Benefits to communities below the mouth of the Tennessee are substantial and extend to the lower Ohio and Mississippi basins. Studies show that the present reservoir system would be able to reduce at Cairo, 111., the height of floods such as have occurred in the past by from 2 to 3K feet. Such reductions can mean the difference between overtopping and not overtopping the levees along the Mississippi between Cairo and the mouth of the Red River.

As shown in statement B, the net expense of flood control operations amounted to $2,253,464 in fiscal year 1948, and is estimated at $2,411,000 in 1949, and $2,431,000 in 1950.

Power operations.—Tennessee Valley Authority power operations are confined to generation and transmission of power, sales at wholesale to local distribution systems, and sales to Government agencies and certain industries and utilities. Power is distributed by over 140 local public agencies to about 900,000 ultimate consumers. As of June 30, 1948, the installed capacity of the system was 2,567,402 kilowatts, including 311,120 kilowatts in plants owned by the Aluminum Company of America but operated in coordination with the plants of the Tennessee Valley Authority. The total system output in fiscal year 1948 was 15,645,000,000 kilowatt-hours of which 11,619,000,000 kilowatt-hours was generated at hydro plants and 4,026,000,000 kilowatt-hours was supplied by fuel-electric plants or other auxiliary sources of supply.

Power demands in the service area are growing rapidly, and long ago surpassed the peak demands experienced during the war. System output is estimated at 16,593,000,000 kilowatt-hours and 17,349,000,000 kilowatt-hours, respectively, for 1949 and 1950, as compared with 12,408,000,000 kilowatt-hours in the high war year, 1945.

Net income from power operations (before interest charges) amounted to $17,181,747 in fiscal year 1948. Estimates for 1949 and 1950 are $20,224,000 and $16,810,000, respectively. The return on power investment was 4% percent in 1948, and is expected to fall in the range of 4 to 5 percent in 1949 and 1950. The estimates are based on assumptions of average stream flow. Dry-year conditions would reduce the energy available from hydro sources, increase operating expenses through the heavier use of steam power plants, and thus lower substantially the amount of net income actually realized. Better than average stream flow could produce a small increase over the estimates.

FERTILIZER AND MUNITIONS RESEARCH AND DEVELOPMENT

Fertilizer and munitions research and development activities in the Tennessee Valley Authority program provide for the development of soil resources through the use of improved plant nutrients and the application of sound farming methods and of developing and supplying munitions for military purposes (16 U. S. C. 831d, f, and h). The facilities, materials, and staff involved in this program comprise a national laboratory where fertilizer processes and materials are developed and tested as to manufacturing feasibility. Major emphasis is placed on bridging the gap between test-tube research and practical application by private enterprise. The practical results of the services the Tennessee Valley Authority is rendering to fertilizer and allied industries are becoming increasingly apparent, particularly in their application to the development of western phosphate deposits.

The activities consist of small-scale chemical research and process development. The first category is limited to exploratory tests, background research, and applied research at the laboratory level. Process development includes the technical and economic evaluation of research results; development of unit operations; design, construction, and operation of pilot plants; improvement of design features and operating procedures of demonstration or large-scale plants; and preparation of engineering and economic studies directed toward practical utilization of the findings by other agencies and industries.

The 1950 estimate for fertilizer and munitions research and development is $1,134,000, the same amount as is available in the current fiscal year.

CHEMICAL OPERATIONS

The experimental chemical production facilities at Wilson Dam, Ala., and Columbia, Tenn., will be operated during 1950 for the production of concentrated phosphate and nitrogenous fertilizers. These products will be made available for test-demonstration purposes and for sale under agreements which assure that the materials will be used in a manner that will aid the improved farming practices to conserve the soil, increase its fertility, and control water. In the event of a national emergency, the production facilities can produce large quantities of phosphorus and fixed nitrogen for military purposes.

During 1948, phosphate fertilizers containing a total of 96,332 tons of phosphorus pentoxide (P_2O_5) were shipped from Tennessee Valley Authority plants. Estimates for 1949 and 1950 are 90,886 and 102,420 tons, respectively. The 1950 estimate contemplates full-scale operation of a new experimental calcium metaphosphate unit scheduled for completion in 1949. About one-fourth of^the 21,600 tons of phosphorus pentoxide to be produced in this unit is scheduled for use in test demonstrations; the remainder will be offered for sale in limited areas where the use of the

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

product has been adequately demonstrated through the farm test-demonstration program.

Facilities for the production of ammonia and ammonium nitrate fertilizer were operated at capacity in 1948 and are scheduled for full operation in 1949 and 1950. The production of nitrogenous fertilizers has been primarily an emergency activity to supplement the capacity of private fertilizer plants during the period of urgent need for plant nutrients. The Tennessee Valley Authority has also improved the equipment and techniques of nitrogenous fertilizer manufacture and has made its findings available to private industry.

The fertilizer production activities of the Tennessee Valley Authority are conducted as a developmental rather than a strictly commercial enterprise. However, proceeds arising from the sale and transfer of products are generally sufficient to pay all costs, including depreciation on capital plant and an applicable portion of Tennessee Valley Authority's administrative and general expenses.

RESOURCE DEVELOPMENT ACTIVITIES

Kesource development activities include research and demonstrations in the discovery, creation, and better use of agricultural, forest, mineral, recreational, and fish and game resources; topographic mapping; and investigations and technical assistance in the fields of stream sanitation, public health, transportation, and industrial economics, and public administration (16 U. S. C. 831c, d, i, and u). These activities are carried out in cooperation with State, local, and other Federal agencies.

Appropriated funds requested for resource development activities in 1950 amount to $4,750,000, compared to $4,207,581 available in 1949. Income from farmers under the graduated payment plan for test-demonstration fertilizers is estimated at $225,000 in each year. Schedule B-6 details the fund requirements for the various activities.

The budget for resource development activities includes an estimate of $2,990,000 for agricultural resource development, the basic element of which is the test-demonstration technique. After mineral fertilizers developed in the Tennessee Valley Authority's experimental laboratories have been tested under small-scale controlled conditions, they are further tested, in conjunction with improved farm-management practices, on practical farms in the Tennessee Valley and throughout the Nation. These tests are designed to measure the effectiveness and demonstrate the usefulness of high-analysis mineral fertilizers as a means of preventing soil erosion and water run-off, rebuilding the soil, and improving agricultural production and practices. Under the graduated-payment plan instituted in 1949, test-demonstration farmers will pay part of the cost of Tennessee Valley Authority fertilizers used in the program. These practical farm test demonstrations are carried out through the extension services of the land-grant colleges. The Tennessee Valley Authority contributes financial support for the salaries of extension personnel who provide technical guidance to participating farmers.

The 1950 estimate for agricultural resource development will make possible the operation of experimental fertilizer production facilities at levels which will provide information about production processes and extend farm test-demonstrations to selected new areas and new types of soil. Increased attention will be given to calcium metaphosphate, a highly concentrated fertilizer (60-percent phosphorus pentoxide), which will be produced in increased quantities in a new production unit scheduled for completion in the current fiscal year. Because this material is particularly suitable for areas remote from a source of fertilizer supply, it will be used primarily outside the Tennessee Valley. No increase is planned in the total number of test-demonstration farms in the Valley. Successful operation of the graduated-payment plan for test-demonstration fertilizers will require some intensification of field supervision, record keeping, and planning.

Forest resource development expenditures are estimated at $685,000 in 1950. Tennessee Valley Authority participates in a cooperative regional forestry program which has as its objectives the sustained-yield management of improved forest stands, maximum productivity of high-quality forest products, and development of the recreational value of forests. Specific activities are carried out in accordance with agreements as to areas of work and function with the United States Forest Service and forestry agencies of the States and counties. They include studies and demonstrations in the fields of forestry-management practices, reforestation, and forest-fire control; research on utilization of forest resources; and advice on forestry problems to State and local agencies, industries, and individuals.

The 1950 estimate for mineral resource development is $135,000. Tennessee Valley Authority, in cooperation with other agencies and institutions, carries on investigations and surveys of the mineral resources of the valley area, evaluates mineral deposits, analyzes samples, undertakes ore-dressing tests, and conducts research on the development of processes for the beneficiation and utilization of the valley's minerals. Research results are made available to agencies and industries, primarily in the valley area.

An estimate of $160,000 is included for recreational resource development in 1950. Much of the rapidly growing interest in recreational development in the Tennessee Valley region is attributable to Tennessee Valley Authority reservoirs, which offer opportunities for fishing, swimming, boating, and other outdoor activities. Tennessee Valley Authority's primary function has been to guide the development around its reservoirs to secure maximum possible use of the recreational resources of the region. Technical assistance and advisory services are provided to the many State and local public agencies and private interests actively engaged in planning, building, promoting, and operating recreational facilities. Up to January 1, 1948, the people of the region had invested more than $13,000,000 in parks, pleasure craft, boat docks, resorts, and other recreation facilities on the shores of Tennessee Valley Authority reservoirs.

The 1950 estimate for stream sanitation and public health is $195,000. Tennessee Valley Authority conducts research in stream sanitation and provides advisory assistance to State and local agencies, groups, and industries who are developing and carrying out plans for solving stream pollution problems. Studies on public health problems associated with Tennessee Valley Authority operations are made in cooperation with State and local public health agencies and with educational institutions. Arrangements are made for the joint performance of public health services by Tennessee Valley Authority and local agencies in areas where there is joint public health responsibility.

The $85,000 estimate for fish and game investigations provides for studies on such matters as composition and

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

size of fish populations, the reaction of different species of fish to new conditions resulting from dam construction, the effect of environmental conditions on catching fish, and means of increasing the development of waterfowl and other game.

Topographic mapping expenditures in 1950 are estimated at $450,000. The 1950 mapping rate will permit completion of the valley mapping program in 6 years, except for current revision of obsolete maps.

Special studies and activities to provide necessary information about the region's economy and resources and to assist State and local agencies in meeting problems arising from the impact of the Tennessee Valley Authority program will require $275,000 in 1950. Studies conducted under this program help to assess the effectiveness and economic returns of the Government's investment in the region, to identify the barriers to greater use of the region's assets, and to relate Tennessee Valley Authority's program to the needs of communities and industries. They provide a factual basis for the development by the people of the region of the maximum economic opportunities consistent with sound conservation policies. Tennessee Valley Authority extends advice and technical assistance to State and local governments on community planning, finance, and other governmental problems, particularly those which have been affected by Tennessee Valley Authority operations.

CONSTRUCTION AND ACQUISITION OF ASSETS

Gross fund requirements for construction and acquisition of assets are estimated at $69,116,000 in fiscal year 1950, of which $48,300,000 would be derived from appropriated funds and $20,816,000 from operating proceeds. The program may be summarized as follows:

Completion of Watauga Dam	$1,018,000
Continued construction of South Holston Dam	10,756,000
Additions and improvements to multipurpose dams and reservoirs	1,611,000
Continued work on 6 hydro-generating units now under construction in existing dams	5,942,000
Beginning construction of a steam plant at New Johnsonville, Tenn	16,500,000
Beginning construction of 6 hydro-generating units in existing dams	8,008,000
Transmission and other electric plant	19,133,000
Chemical facilities	4,000,000
Facilities for general use	1,435,000
Cost of pay increase applicable to construction activities	713,000
Total	69,116,000

The first three items above relate to multipurpose structures serving the navigation, flood control, and power programs. The estimate for Watauga Dam provides for completion of this project except for final record drawings. Fiscal year 1950 will be the peak construction period for the South Holston Dam and Reservoir, scheduled for closure late in calendar year 1950.

Most of the remaining funds required in 1950 will be used to increase the generating capacity and the capacity of the transmission network of the power system. The Tennessee Valley region, wholly dependent for electricity upon the Tennessee Valley Authority system, will face a critical shortage of power in the winter of 1951-52. The above program aims to place additional generating facilities in operation toward the end of the calendar year 1951 and during the calendar year 1952 in order to relieve the shortage in supply in the winters of 1951-52 and 1952-53. The installations proposed represent a minimum program for peacetime requirements.

Since the end of the war, installation of new power capacity has not kept pace with the growth in electric load. From 1945, when the peak wartime demand occurred, to the end of the calendar year 1951, the increase in the assured load-carrying capacity for the area will be about 800,000 kilowatts. This includes all the generating units now in course of installation by Tennessee Valley Authority, all peak capacity now scheduled for installation in the Army Engineers' projects in the Cumberland Basin (except the last three at Wolf Creek Dam, scheduled for the spring of 1952), and also the first two of the six new hydro units in the program table outlined abo^e. During this same period, from 1945 to late 1951, the area's demand for power is expected to increase by about 1,500,000 kilowatts (half of which has already developed by 1948). Instead of a margin of nearly 20 percent between demand and assured capacity, which was considered essential in 1945, it is expected that by the end of 1951 the supply for the area's normal demand will be short by some 250,000 kilowatts.

By the winter of 1952-53, the increase in assured capacity since 1945 will be about 1,450,000 kilowatts as compared with an increase in demand of about 1,750,000 kilowatts. While these figures indicate a somewhat less critical condition than in 1951-52, they reflect a program sharply reduced, in full recognition of a minimum budget, from that which otherwise would be considered desirable. To provide the same minimum percentage margin between demand and capacity which existed in 1945, the program of additional generating capacity as now projected would have to be increased by three-fourths of a million kilowatts.

More than two-thirds of the estimate of $4,000,000 for chemical facilities is for completion of projects already under way and minor plant replacements. The major new project is a rotating phosphorous furnace that will replace an old furnace and reduce operating costs as well as demonstrate a promising new development in electric-furnace technology.

The estimate of $1,435,000 for general facilities provides for routine replacement of transportation, office, and other general equipment. The largest single item, $738,000, is for trucks and heavy mobile equipment required in construction activities and in power operations.

ADMINISTRATIVE AND GENERAL EXPENSES

Administrative and general expenses as recorded and reported by the Tennessee Valley Authority are those expenses which are common generally to all of Tennessee Valley Authority's organizations and functions. They consist primarily of costs of administration and management services which have been centralized in the interest of economy and convenience in over-all operations. Schedule B-7 summarizes these expenses by source and shows the distribution to the various programs and projects.

Since Tennessee Valley Authority's financial records are based on commercial and industrial accounting practices, administrative and general expenses are allocated to the various programs in order that total costs of each program may be reported in financial statements and in the annual report required by the Tennessee Valley Authority Act. These allocations are made on the basis of accounting studies of direction of effort.

During fiscal years 1948 and 1949, administrative staff and management service functions have been sharply curtailed below levels which obtained in 1947 and prior years—first, by internal administrative action, upon which

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

was superimposed a further cut in the form of an expenditure ceiling in the 1949 appropriation act. This double cut has resulted in a level of expenditure considerably below that required for maximum operating efficiency. The 1950 estimate of $3,815,000 which represents an increase of $138,471 over the 1949 ceiling, will allow relief at critical points.

EFFECT ON GOVERNMENT BUDGET

As shown in the latter section of statement A, net withdrawals from the United States Treasury during 1950 are estimated at $47,831,000. This net amount results from cash expenditures from United States Treasury funds of $54,361,000, offset in part by payments to the Treasury of $2,500,000 for the retirement of bonds, $1,030,000 for interest on bonds outstanding, and $3,000,000 for the repayment of United States Treasury capital invested in the Tennessee Valley Authority power program.

Tennessee Valley Authority is empowered by section 26 of the Tennessee Valley Authority Act, as amended, to utilize proceeds derived from power sales and other sources in the conduct of its power business, in the operation of dams and reservoirs, and in the production and disposition of fertilizers. Excess proceeds must be paid into the general fund of the United States Treasury. Title II of the Government Corporations Appropriation Act, 1948, further requires repayment to the United States Treasury of $87,059,810 out of net power income by June 30, 1958, and appropriation language for 1949 requires a minimum of $5,500,000 in such repayments during that year. Provision for the 1949 repayment has been made in this budget, and estimated repayments aggregating $5,500,000 are included for the fiscal year ending June 30, 1950.

OPERATING RESULTS

The operating results of the various programs are summarized in statement B, "Comparative statement of income and expenses," and further details are shown in schedules B-1 through B-7. In the preceding section on "Analysis of Budget programs," the program results and objectives are described briefly.

FINANCIAL CONDITION

The financial condition of the Tennessee Valley Authority as of June 30, 1947 and 1948, and estimated financial condition as of the close of fiscal years 1949 and 1950, are shown on statement C, "Comparative statement of financial condition." Following is a brief explanation of significant changes in major items:

Cash and cash funds.—The forecast cash balance at June 30, 1950, is $2,039,000 larger than the balance at June 30,1949, because of an anticipated increase in unliquidated obligations. The estimated balances for the close of the 1949 and 1950 fiscal years assume no unobligated balance of appropriated funds.

Lands, structures, and equipment.—Total fixed assets at June 30, 1950, of $993,394,734 reflects an increase of $65,326,000 during fiscal year 1950. The following significant projects are scheduled for substantial completion in 1950 and are reflected in the accounts for completed plant for that year:

Multiple-use facilities: Watauga Dam and Reservoir.

Power facilities: Additional generating units at Wilson and Wheeler hydroelectric generating stations, Watauga switchyard, and additional transmission facilities.

Chemical facilities: Completion of the laboratory and service building at Wilson Dam and certain additional phosphate and nitrogen facilities.

Funded debt.—Total funded debt as of June 30, 1948, represented by bonds sold to and held by the United States Treasury, was $54,000,000. The 1949 and 1950 Budget programs provide for retirement of $2,500,000 in each of these years.

Appropriations by the Congress.—Through June 30, 1948, the Congress had appropriated $736,223,270 for use by the Tennessee Valley Authority, of which $444,817 was unobligated as of that date. For the 1949 fiscal year, Congress has appropriated an additional $27,389,061 and a supplemental appropriation of $3,450,000 is estimated. All funds appropriated in fiscal year 1949, together with the balance from prior appropriations, will be obligated by June 30,1949. The 1950 Budget program calls for an appropriation of $56,400,000 for use in that year.

Total expenses		875,704		506,000		
Net expense of operation of Norris and Wilson villages		524,397		250,000		
Net income from power operations less net expense of other programs		4,430,027		8,159,000		4,081,000

ANALYSIS OF SURPLUS

[Net income from power operations, less net expense of other programs]

Balance at beginning of fiscal year		$69,618		$4,499,645		$12,658,645
Net income or expense (—) for the year (above):						
Navigation operations	—$2,710,329		-$2,922,000		-$2,954,000	
Flood-control operations	-2,253,464		-2,411,000		-2,431,000	
Power operations	16,617,811		19,684,000		15,780,000	
Chemical operations	-227,983		20,000		214,000	
Fertilizer and munitions research and development	-1,464,730		-1,295,000		-1,278,000	
Resource development activities	-5,006,881		-4,667,000		-5,250,000	
Operation of Norris and Wilson villages	-524,397		-250,000			
Total		4,430,027		8,159,000		4,081,000
Balance at end of fiscal year		4,499,645		12,658,645		16,739,645

STATEMENT C

COMPARATIVE STATEMENT OF FINANCIAL CONDITION

[As of June 30,1947,1948, 1949, and 1950]

	1947 actual	1948 actual	1949 estimate	1950 estimate
ASSETS				
Cash and cash funds:				
With U. S. Treasury	$34,395,576	$22,107,250	$18,660,086	$20,699,086
In U. S. Treasury collection account	16,115,676	2,712,113	1,000,000	1,000,000
Total cash and cash funds	50,511,252	24,819,363	19,660,086	21,699,086
Current receivables:				
Wholesale power customers	3,149,357	3,871,967	3,900,000	3,900,000
Chemical products customers	965,110	853,772	900,000	900,000
Federal agencies	621,932	1,301,295	1,000,000	1,000,000
Employees and agents	52,747	57,395	55,000	55,000
Other	344,837	223,904	145,000	145,000
Total current receivables	5,133,983	6,308,333	6,000,000	6,000,000
Long-term receivables:				
Municipalities and cooperatives	247,586	84,832	59,832	44,832
Sale of Norris village		2,052,500	1,580,500	1,330,500
Total long-term receivables	247,586	2,137,332	1,640,332	1,375,332
Commodities, supplies, and materials:				
Power materials and supplies	4,100,925	7,344,984	5,664,984	5,354,984
Chemical products manufactured and in process	1,913,768	2,118,944	2,733,944	2,689,944
Chemical raw materials and supplies	2,029,487	2,391,194	2,995,194	3,349,194
Test-demonstration fertilizer stored with distributors		134,236	134,236	134,236
Materials and supplies for general use	710,774	676,199	509,988	518,988
Total commodities, supplies, and materials	8,754,954	12,665,557	12,038,346	12,047,346
Land, structures, and equipment:				
Multiple-use dams	576,705,489	579,497,751	583,747,751	613,247,751
Single-use dams	46,459,800	46,453,256	46,503,256	46,553,256
Steam-production plants	29,089,946	29,009,615	29,059,615	29,109,615
Other electric plant	110,324,613	125,889,878	147,139,878	173,389,878
Unamortized acquisition adjustments	1,177,879	974,321	774,321	574,321
Chemical plant	14,731,564	15,404,123	18,154,123	22,904,123
General plant	15,295,276	14,053,325	15,553,325	17,053,325
Construction in progress	40,376,050	64,806,590	86,736,590	90,000,590
Investigations for future projects	200,634	293,875	399,875	561,875
Total fixed assets	834,361,251	876,382,734	928,068,734	993,394,734
Less reserves for depreciation:				
Multiple-use dams	44,526,605	49,938,449	55,903,449	62,098,449
Single-use dams	6,800,084	7,371,229	7,971,229	8,571,229
Steam-production plants	9,179,000	10,040,483	11,040,483	12,040,483
Other electric plant	21,124,879	23,313,508	25,563,508	28,113,508
Chemical plant	5,696,015	6,472,728	7,533.528	8,669,328
General plant	5,938,232	5,234,751	5,479,751	5,568,751
Total reserves for depreciation	93,264,815	102,371,148	113,491,948	125,061,748
Net land, structures, and equipment	741,096,436	774,011,586	814,576,786	868,332,980

SCHEDULE **B-l**

COMPARATIVE STATEMENT OF NAVIGATION OPERATIONS

[Fiscal years ending June 30, 1948, 1949, and 1950]

	1948 actual	1949 estimate	1950 estimate
Income: Incidental income (statement A)	$10,447	$21,000	$21,000
Expenses:			
Study and development of river transportation	$190, 684	$200, 936	$207,000
Operation of public-use river terminals	32,007	47, 755	48,000
Power for lock operations	7,499	8,000	8,000
• Total direct expenses (statement A)	230,190	256, 691	263,000
Pay increase, comparable to Public Law 900		14,309	15,000
Distribution of administrative and general expenses (schedule B-7)	16, 659	17, 000	18, 000
Allocated from multipurpose reservoir operations (schedule B-4)	1,160,091	1,332,000	1,329,000
Total expenses before depreciation	1,406, 940	1, 620,000	1, 625,000
Depreciation on navigation facilities	560, 271	565, 000	570,000
Depreciation allocated from multipurpose reservoir operations	753, 565	758,000	780,000
Total expenses	2, 720, 776	2,943, 000	2, 975,000
Net expense of navigation operations	2, 710,329	2,922, 000	2,954, 000

SCHEDULE B-2

COMPARATIVE STATEMENT OF FLOOD CONTROL OPERATIONS

[Fiscal years ending June 30, 1948, 1949, and 1950]

	1948 actual	1949 estimate	1950 estimate
Expenses:			
Flood-control studies and investigations (statement A)	$71,572	$51,272	$51,000
Pay increase, comparable to Public Law 900		3,728	4,000
Distribution of administrative and general expenses (schedule B-7)	8,332	6,000	7,000
Allocated from multipurpose reservoir operations (schedule B-4)	1,160,091	1,333,000	1,329,000
Total expenses before depreciation	1,239,995	1,394,000	1,391,000
Depreciation on flood-control facilities	259,904	260,000	260,000
Depreciation allocated from multipurpose reservoir operations	753, 565	757,000	780,000
Total expense of flood-control operations	$2,253,464	$2,411,000	$2,431,000

SCHEDULE B-3

COMPARATIVE STATEMENT OF POWER OPERATIONS

[Fiscal years ending June 30,1948, 1949, and 1950]

	1948 actual		1949 estimate		1950 estimate	
Income:						
Operating revenues:						
Sales of electric energy:						
Municipalities and cooperatives	$23, 519, 611		$27,150,000		$31,250,000	
Commercial and industrial	10,979,329		14,200,000		13, 500,000	
Federal agencies	6,156,193		6, 800,000		7,250,000	
Electric utilities	5, 786, 948		7,300,000		4, 750,000	
Rural (retail)	161, 498		50,000		59,000	
Total outside sales	46, 603, 579		55, 500,000		56, 809, 000	
Rents and other revenues	233, 665		207,000		197,000	
Total operating revenues, exclusive of interdivisional sales and rents		$46, 837, 244		$55,707,000		$57,006,000
Incidental income from recovery of operating expenses:						
Production expenses:						
Interchange power delivered	3, 283, 212		1, 264, 000		87,000	
Other	14, 549		10,000		8,000	
Transmission and distribution	3,693		4,000		4,000	
Customers' accounting and collecting	2,242					
Sales promotion	114,318		140, 000		150,000	
Other	13,484		15,000		15,000	
Total	3,431,498		1,433, 000		264, 000	
Interest from long-term receivables	5,299		2,000		2,000	
Total incidental income (note A)		3,436, 797		1,435,000		266,000
Total income (statement A)		50,274,041		57,142,000		57,272,000
Expenses:						
Production:						
Generation	13, 509, 595		14, 756, 583		15,421,000	
Purchased power	1,461, 535		1,450,000		1,625,000	
Interchange power received	942, 414		1, 768,000		3,408,000	
Total production expense	15,913, 544		17,974, 583		20, 454,000	
Transmission	3, 689,499		3,956,061		4,122,000	
Distribution	22, 778		10,461		43,000	
Customers' accounting and collecting	51, 270		47,398		44,000	
Sales promotion	322,457		429,395		450,000	
Payments in lieu of taxes	2,005,482		2,050,000		2,410,000	
General operating expense	1, 550, 660		1,645, 647		1, 770,000	
Other expense	103, 542		73,950		74,000	
Interest on funded debt	563,936		540,000		1,030,000	
Total operating and interest expenses	24, 223,168		26,727,495		30,397,000	
Interdi visional sales and rents (note B)	1,932,281		1, 710,000		1,760,000	
Total direct expenses (statement A)	22, 290,887		25,017, 495		28, 637,000	
Increase in salaries, comparable to Public Law 900			341, 505		294,000	
Distribution of administrative and general expenses (schedule B-7)	931,149		1,045,000		986,000	
Allocated from multipurpose reservoir operations (schedule B-4)	1,169, 439		1,344,000		1,335,000	
Total expenses before depreciation	24,391, 475		27, 748,000		31, 252,000	
Depreciation on power facilities	8,060,001		8, 500,000		9,000,000	
Amortization of electric plant acquisition adjustments	200,000		200,000		200,000	
Depreciation allocated from multipurpose reservoir operations	1,004, 754		1,010,000		1,040,000	
Total expenses		33,656,230		37,458,000		41,492,000
Net income from power operations		16,617,811		19,684,000		15,780,000

NOTE A.—In accordance with the uniform system of accounts prescribed by the Federal Power Commission, Tennessee Valley Authority's published financial statements reflect these items, as follows:

(a) Incidental income is deducted from the appropriate operating expense.

(6) Interdi visional sales and rents are included in operating revenues.

These departures are made herein for clarity of presentation for budgetary purposes.

ESTIMATES OF APPROPRIATION

TENNESSEE VALLEY AUTHORITY

Tennessee Valley Authority Fund—

For the purpose of carrying out the provisions of the Tennessee Valley Authority Act of 1933, as amended (16 U. S. C, ch. 12A), including purchase (not to exceed one[, for replacement only]) and hire, maintenance, repair, and operation of aircraft; the purchase (not to exceed [two] *one* hundred and [seventy, of which two hundred and twenty shall be] *twelve* for replacement only) and hire of passenger motor vehicles, [$27,389,061,] *$56,400,000* to remain available until expended, and to be available for the payment of obligations chargeable against prior appropriations [, together with the unobligated balance of funds heretofore appropriated, of which not to exceed $21,689,000 shall be available for capital expenditures, including construction of dams, additions and betterments to completed multiple-use facilities, investigations for future projects, chemical facilities, and facilities and equipment for general use].

[Tennessee Valley Authority: Pursuant to the requirements applicable to the Tennessee Valley Authority of title II, Public Law 268, approved July 30, 1947, total payments of not less than $5,500,000 shall be made in the fiscal year 1949 from net income derived from power operations.]

Not to exceed [$3,677,000, of which not to exceed $992,061 shall be derived from funds appropriated by title I hereof (to be computed on an accrual basis),] *$4,110,000* of the funds available to the Tennessee Valley Authority, shall be available during the *current* fiscal year [1949] for all administrative and general expenses of the Corporation, which expenses shall be inclusive of costs of all administrative offices and other activities representing management and other functions serving the programs and projects of the Corporation in general. *{The Government Corporations Appropriation Act, 1949.)*

Annual specific appropriation:

Statement of proposed obligations for purchase and hire of passenger motor vehicles for the fiscal year 1950

TENNESSEE VALLEY AUTHORITY

Appropriation	Motor vehicles to be purchased		Old vehicles to be exchanged		Net cost of vehicles to be purchased	Old vehicles still to be used	Cost of hire of motor vehicles	Public purpose and users
	Number	Gross cost	Number	Allowance (estimated)				
Tennessee Valley Authority fund	112	$136,200	112	$53,800	$82,400	636	$2,000	For use of officials and employees of the Tennessee Valley Authority. All automobiles are pooled in 1 fleet and issued to individual employees when such means of transportation is the most economical and advantageous to the Government. The principal users are engineers, construction foremen, timekeepers, inspectors, safety engineers, malaria-control technicians, agriculturists, foresters, and administrative officers. Reconnaissance body vehicles are used primarily by engineering field parties for survey and engineering work in reservoir sites, valley mapping, transmission-line surveys and construction. Motor vehicles will be hired on special occasions and at field locations where the Authority does not maintain a pool of motor vehicles.

Statement of proposed obligations for purchase, maintenance, and operation of aircraft for the fiscal year 1950

TENNESSEE VALLEY AUTHORITY

Appropriation	Aircraft to be purchased		Aircraft to be exchanged		Net cost of aircraft to be purchased	Old aircraft still to be used	Cost of maintenance and operation of aircraft	Public purpose and users
	Number	Gross cost	Number	Allowance (estimated)				
Tennessee Valley Authority fund	1	$55,000			$55,000	9	$132,000	Used in malaria-control larvicide and insecticide application, survey, reconnaissance, inspection of construction, and malaria-control projects in areas remote from transportation facilities or access roads, scheduled transmission-line patrol, aerial photography, mapping, and transportation of executive personnel to points not easily accessible by other means and on trips where time and per diem savings effect an over-all economy. The principal users are malaria-control technicians, transmission-line patrolmen, biologists, botanists, wildlife and forestry technicians, engineers, board of directors, general manager, division heads, and other administrative personnel.

DEPARTMENT OF AGRICULTURE

INTRODUCTORY STATEMENT

The Secretary of Agriculture has under his general direction and supervision six wholly owned Government corporations—Commodity Credit Corporation, Federal Crop Insurance Corporation, Federal Farm Mortgage Corporation, Federal intermediate credit banks, production credit corporations, and Regional Agricultural Credit Corporation. In addition to the wholly owned Government corporations for which business-type budgets are submitted, there are two types of corporations within the Department of Agriculture which, under the act, are termed mixed-ownership corporations—Federalland banks and banks for cooperatives. A statement on the financial relationship of these mixed-ownership corporations with the Government is also included in this chapter of the Budget. Estimates of appropriation of the Farm Credit Administration (and related schedules) are included for the first time in part III. These have previously appeared in part II of the Budget.

The Commodity Credit Corporation is primarily engaged in price support, commodity export, foreign.purchase, and supply programs. The activities of this Corporation are conducted under the direction of an executive staff through the Production and Marketing Administration of the Department of Agriculture.

The Federal Crop Insurance Corporation carries out experimental insurance programs on wheat, cotton, flax, corn, tobacco, and beans. In addition to these separately insured crops, oats is included in a multiple crop policy.

The Federal intermediate credit banks, production credit corporations, and the Regional Agricultural Credit Corporation, together with the cooperatively owned Federal land banks and banks for cooperatives, are engaged in providing credit to farmers and farmers' cooperatives. The Federal Farm Mortgage Corporation, whose authority to make new loans expired on July 1, 1947, is now in the process of liquidation, and its only activity is that of servicing its assets. The operations of these corporations are supervised and examined by the Farm Credit Administration.

PURPOSE AND FINANCIAL ORGANIZATION

A statement describing in detail the creation, purposes, and authorities of the Corporation under its Delaware charter and its financial organization was contained in the budgets heretofore submitted for the fiscal years 1947 and 1948. Pursuant to the provisions of the Government Corporation Control Act, a Federal charter was granted by the Commodity Credit Corporation Charter Act, Public Law 806, approved June 29, 1948. Under section 16 of that act, all assets, liabilities, and obligations of the Delaware Corporation were transferred to the newly created Corporation on July 1, 1948.

The Corporation engages in buying, selling, lending, and other activities with respect to agricultural commodities, products thereof, foods, feeds, and fibers, for the purpose of stabilizing, supporting, and protecting farm income and prices, assisting in the maintenance of balanced and adequate supplies of such commodities, and facilitating the orderly distribution thereof.

The Corporation has an authorized capital stock of $100,000,000, all of which is held by the United States. The Corporation is authorized to borrow $4,750,000,000 on the credit of the United States. On June 30, 1948, obligations outstanding amounted to $476,250,049. It is not contemplated that operations during the fiscal year 1950 will require any increase in the Corporation's borrowing authority. A statement of the Corporation's financial condition is shown immediately following the narrative material (statement C).

The Federal charter confers upon the Corporation authority which will permit it to continue the types of programs previously carried out under the Delaware charter. The principal administrative provisions of the Federal charter are as follows: (a) The board of directors consists of five members. The Secretary of Agriculture or his nominee is a member of the board and the remaining members are appointed by the President with the advice and consent of the Senate. Not more than three of the members of the board may otherwise be employed by the Federal Government. The chairman of the board is selected by the board. (6) Responsibility for day-to-day conduct of the business of the Corporation is vested in a staff of executive officers headed by a chief executive, who is appointed by the board and is responsible to the board. Members of the executive staff must devote their full time to the affairs of the Corporation, (c) The Corporation may utilize the services and facilities, on either a compensated or uncompensated basis, of any agency of the Federal Government, of any State, the District of Columbia, any Territory or possession, or any political subdivision thereof, in carrying out the programs of the Corporation. In addition, the personnel and facilities of the Corporation may be made available, on a reimbursable basis, to any agency of the Federal Government in the performance of any part or all of the functions of any such agency, *(d)* The acquisition or leasing of any real property and the acquisition or leasing of any plant or facility for the physical handling, storage, processing, servicing, and transportation of Corporation-controlled agricultural commodities are forbidden. The Corporation may, however, continue to lease any property leased on the date of the enactment of the charter and may rent or lease office space necessary for the conduct of its business. The Federal charter does not place a limit on the life of the Corporation.

The Congress in enacting title II of the Agricultural Act of 1948 (Public Law 897, approved July 3, 1948), established long-range postwar price support policies which will become effective January 1, 1950, and under which the Corporation will operate its price support program after that date. Title I of the same act continued, with some modifications, the present price support policies through the calendar year 1949 in the case of nonbasic commodities and through June 30, 1950, in the case of basic commodities and wool. The Foreign Aid Act of 1947 (Public Law 389, approved December 17, 1947) and the Economic Cooperation Act of 1948 (Public Law 472, approved April 3, 1948), established policies concerning the disposition of commodities acquired by the Corporation in its price support program for foreign recovery purposes. The provisions of these acts and the effects thereof are discussed under the price support program.

Section 7 of Public Law 395, approved December 30, 1947, authorized the Corporation to encourage the production of agricultural commodities and products thereof in non-European foreign countries. Since the encouragement of agricultural production may include the acquisition of the products produced and is carried out in foreign countries, operations under this act have been included as a part of the foreign purchase program.

ANALYSIS OF BUDGET PROGRAMS

The budget of the Corporation for the fiscal year 1950 is based on five types of programs carried out under its charter and other legislative authorities. These types of programs are:

1. Price support program
2. Supply program
3. Foreign purchase program
4. Commodity export program
5. Loan to Secretary of Agriculture for agricultural conservation purposes

A subsidy program, which during the war years was a major activity of the Corporation, was completed when price ceilings on sugar were terminated effective November 1, 1947. Operations under this program after that date have been limited to its liquidation.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Basically the types of programs carried out by the Corporation are not entirely independent since in carrying out a primary objective of one program, the objective of another program may also be fully or partially attained. For example, purchases under the supply program may reduce or completely absorb the visible surplus of an individual agricultural commodity and in some instances make it unnecessary to carry out a price support operation in connection with that commodity under the price support program. Commodities acquired under the price support program may be used to meet supply requirements or in a commodity export operation; if such commodities were not so disposed of, they would have to be held by the Corporation until other suitable outlets could be developed.

Recently, an important part of the operations of the Corporation has been the procurement of supplies of food, agricultural commodities, and products thereof, needed for cash-paying foreign governments, various relief organizations and Government agencies including, among others, the Economic Cooperation Administration, the Army, and the State Department. Wherever possible, price support operations are directed toward developing the production needed to fulfill such needs as well as the needs of our domestic economy. The level of support complements the Department's production goals and prices are established in some cases not only with a view to meeting minimum legal requirements but also to bringing about desirable shifts in production and obtaining the needed volume of production.

In addition to the programs carried out by the Corporation, the Secretary of Agriculture under the authority of Public Law 271, approved July 30, 1947, has determined that Corporation funds should be transferred to the appropriation for the eradication of foot-and-mouth and other contagious diseases of animals. It is anticipated that the Corporation will be fully reimbursed for all transfers of funds from appropriations made for the eradication of foot-and-mouth disease or from sales proceeds of canned meat procured in Mexico from funds so transferred. As of June 30, 1948, advances under this authority amounted to $36,975,000; proceeds and reimbursements amounting to $34,492,755, including an appropriation of $25,400,000 to the Secretary of Agriculture for this purpose, have been applied as a credit against the advances made.

BASIC ASSUMPTIONS

Budget estimates for operations of the Corporation during the fiscal years 1949 and 1950 reflect a continuation of high production and domestic consumption levels and a continued need for large quantities of food and agricultural products in foreign countries. The 1950 Budget is, however, based on the anticipation that the 1949 production will continue above prewar levels but that crops will be "normal" (i. e., in line with the average yields in the last few years), rather than exceptionally high yields comparable to those achieved in the 1948 crop. It is also assumed that 1949 foreign agricultural production will reflect a continued over-all improvement but that yields will be average. Consequently, exceptionally good 1949 domestic or foreign crops or a lowering of the present high level of domestic consumption may result in substantial adjustments of the Corporation's estimated price support liability for the fiscal year 1950.

The Budget estimates are based on the assumption that national income and industrial activity will increase slightly above 1948 levels in the fiscal year 1949 and that the 1950 fiscal year levels will be maintained very close to the 1949 levels. Foreign demand for United States farm products in the fiscal year 1949 is assumed to be near the 1948 levels but it is assumed that there will be some decrease in the fiscal year 1950. In view of the unusually high levels of production achieved in the 1948 crop year and the assumed normal production during the 1949 crop year, agricultural prices may trend downward; it has been assumed, however, that the general level of agricultural prices will not fall below parity.

If the general price level rises sharply and results in material increases in the parity index, support prices for the basic and certain nonbasic commodities will also rise sharply since they are required by law to be at a specified percentage of parity through the fiscal year 1950 in the case of the basic commodities and wool and through December 31, 1949, in the case of milk and its products, hogs, chickens, and eggs. Furthermore, if commodity prices decline materially due to the large 1948 crops, the volume of commodities acquired and the amount of funds required for price support would be increased materially. If, however, the prospects of crops were poor, the volume of commodities acquired might be lower than estimated.

On the other hand, should there be a substantial decline in national income and consumer purchasing power from the levels assumed, the estimates would probably be inadequate because: (1) In declining markets, farm prices usually drop more rapidly than do parity and related support prices; (2) in view of the large 1948 crops, it is probable that a larger volume of commodities would be acquired; and (3) these factors would more than offset any decline in support prices.

It is the policy of the Corporation to return to commercial channels as rapidly as practical the domestic procurement of food and agricultural commodities to meet the needs of various federal government agencies, foreign governments, and others. Thus, the Corporation has discontinued the procurement of many types of food and agricultural commodities for foreign governments and present operations are confined largely to the procurement of whole grains. It is assumed that procurement of whole grains for the Economic Cooperation Administration will be continued through the fiscal year 1950. It is also assumed that domestic procurement to meet the needs of the occupied areas will be continued through the fiscal year 1950 since it is not anticipated that normal trade relations between this country and such areas will be reestablished prior to the end of that fiscal year.

Much of the procurement of agricultural commodities and products in foreign countries has been returned to commercial channels. It is assumed, however, that during the fiscal year 1950 it will still be necessary for the Corporation to procure some commodities in foreign countries for the Economic Cooperation Administration and to meet requirements for feeding of the occupied areas since it is not anticipated that normal trade relationships can be reestablished prior to the end of the fiscal year 1950. In view of the high levels of domestic production and the improved foreign production, it is assumed that it will not be necessary to initiate any new projects to increase foreign non-European production.

In considering these estimates, it should be recognized that it is very difficult to estimate requirements for the year beginning July 1, 1949, and ending June 30, 1950. Not only are they dependent upon weather conditions and the volume of agricultural production in this country but also upon weather and agricultural production in foreign countries, economic conditions generally, food needs in

Federal Reserve Bank of St. Louis

foreign countries, including occupied areas, availability of dollar exchange, and many other complex and unpredictable factors.

PRICE SUPPORT PROGRAM

Under its price support program the Commodity Credit Corporation, through loans, purchases, and other operations, supports the prices of various agricultural commodities. The purpose of the program is to place a floor under or stabilize the farm price of agricultural commodities by assuring farmers a minimum price or by removing and disposing of burdensome surpluses. In some instances, support prices are established at levels designed to obtain the expanded production of those agricultural commodities needed to meet domestic and foreign requirements. The Corporation carries out its price support program under its charter powers to support the prices of agricultural commodities and to remove and dispose of surplus agricultural commodities. The Congress has by specific legislation directed that these charter powers be used to support the price of certain agricultural commodities.

The Agricultural Act of 1948 (Public Law 897, 80th Cong., 2d sess.) provided, among other things, that: *(a)* Prices of cotton, wheat, corn, tobacco, rice, and peanuts marketed before June 30, 1950, shall be supported at 90 percent of parity if producers have not disapproved marketing quotas, *(b)* Prices of Steagall commodities shall be supported at not less than 60 percent of parity or comparable price nor more than the level at which such commodity was supported in 1948 except that Irish potatoes harvested before January 1, 1949, milk and its products, hogs, chickens, and eggs shall be supported at 90 percent of parity or comparable price. Compliance by producers with production goals and marketing practices prescribed by the Secretary of Agriculture may be required as condition of eligibility for price support, *(c)* The price of wool shall be supported at 1946 levels until June 30, 1950. *(d)* It is the policy of Congress that, to the extent funds are available, the lending and purchase operations of the Department of Agriculture shall be carried out until January 1, 1950, so as to bring the price and income of producers of agricultural commodities for which price support is not mandatory to a fair parity relationship with the commodities for which price support is mandatory. *(e)* After January 1, 1950, the method of computing parity prices shall be revised, *(f)* After January 1, 1950, the price support and level of support of any nonbasic agricultural commodity except potatoes and wool is discretionary and with respect to all such commodities shall not exceed 90 percent of revised parity unless required in the interest of national security. The price of Irish potatoes harvested after December 31, 1949, shall be supported at not less than 60 nor more than 90 percent of parity. Beginning in 1950 the price of wool shall be supported at such *level*, not in excess of 90 nor less than 60 percent of revised parity, as the Secretary may consider necessary to encourage an annual production of approximately 360,-000,000 pounds of shorn wool, *(g)* After January 1, 1950, the Corporation shall not support the prices of commodities (other than Irish potatoes) which are so perishable by nature as not to be reasonably storable without excessive cost or loss except that prices of perishables may be supported to the extent that such support can be carried out through operations with respect to storable products of such perishable commodities or to the extent that the reserve for postwar price support and other funds appropriated for price support are sufficient to cover any losses that may be incurred provided the sums appropriated under section 32 and remaining unexpended at the end of the preceding fiscal year do not exceed $300,000,000. (A) After January 1, 1950, the Corporation shall not sell any farm commodity owned or controlled by it at less than (1) a price reasonably calculated to recover all costs; (2) a price half way between the support price and parity price of the commodity; or (3) a price equivalent to 90 percent of parity, whichever price is lowest. The foregoing restrictions do not apply to sales for new or byproduct uses, sales of peanuts for extraction of oil, sales for seed or feed if such sales will not substantially impair any price support programs, sales of commodities which have substantially deteriorated or of nonbasic perishable commodities when there is danger of loss through spoilage, sales to establish claims, sales for export, sales of wool, and sales for other than primary uses. (Earlier price support legislation was discussed in some detail in the narrative statement for the 1948 Budget under the heading " Creation and purpose.")

In carrying out its price support program the Corporation utilizes normal trade facilities to the fullest practicable extent consistent with the fulfilment of the Corporation's purposes and the effective and efficient conduct of its business. Thus, where loans are made to farmers, the Corporation makes use of local banks, cooperatives, and other private lending agencies by entering into contracts with such lending agencies under which the Corporation agrees to take over loans made in accordance with the Corporation's program on or before maturity upon request of the lending agencies. Service agreements are. also entered into under which cooperative associations, banks, and other agencies may make and service loans as direct agents of the Corporation and be reimbursed for such services on a fee basis.

Effective with the 1947 crop operations, a new type of price support operation was offered to producers of grains, including rice, seeds, peas, and beans. Thus, in those cases where the producer had no immediate requirement for funds, he could secure price support guarantees without taking a loan and incurring interest charges. Producers are permitted to enter into purchase agreements with the Corporation during the period in which loans on such commodities are available. The Corporation agrees to purchase such quantities of eligible commodities as the producer elects to deliver within 30 days after the maturity date established for loans on such commodities; the Corporation, however, is not obligated to purchase more than the producer specifies as the maximum quantity eligible for support when he executes the purchase agreement. The price paid for commodities delivered to the Corporation under these agreements is the applicable loan value or the established support price at the delivery point.

In accordance with the act of February 18, 1946 (Public Law 301, 79th Cong.), $500,000,000 was paid to the Corporation to be held as a reserve for postwar price support of agriculture. The postwar period for the purposes of this reserve began on January 1, 1947. The Corporation established the policy that the cumulative net price support losses recorded on the books of the Corporation, on and after January 1, 1947, and not recoverable from other sources should be charges against this reserve.

Section 11 (e) of Public Law 389, approved December 17, 1947, provided that price support commodities acquired by the Corporation and determined by the President to be appropriate for foreign aid requirements and in excess of domestic needs should be sold at a price determined by the Corporation, which price might be the equivalent of the domestic market price of a quantity of wheat

800000—49——78

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

having a caloric value equal to that of the commodity sold, and that the Secretary of the Treasury should cancel notes of the Corporation in an amount equal to the losses resulting from such sales. Public Law 393, approved December 23, 1947, provided among other things that the amount of losses incurred in accordance with the provisions of Public Law 389 could not exceed $57,500,000. In compliance with legislative provisions, during the fiscal year 1948 the Corporation disposed of certain price support inventories of eggs, Irish potatoes, dried fruit, grapefruit juice, and honey through the foreign aid programs at prices which resulted in losses of $56,239,432.

Section 112 (e) of the Foreign Assistance Act of 1948 (Public Law 472, approved April 3, 1948) provides that surplus commodities acquired by the Corporation through price support operations and determined by the Secretary of Agriculture to be available for use in furnishing assistance to foreign countries shall be used to the maximum extent practicable in furnishing assistance or relief to foreign countries. The Corporation is directed to sell such commodities at a price which will effect full reimbursement but such price is not to exceed the domestic market price at the time and place of delivery. Section 112 (f) of the same act authorizes the Secretary of Agriculture to pay not to exceed 50 percent of such sales price from funds appropriated to carry out the purposes of section 32 of Public Law 320, Seventy-fourth Congress (7 U. S. C. § 612c), as amended. During the fiscal year 1948, sales of frozen eggs and dried fruit were made for foreign aid programs in accordance with the terms of this act; it is estimated that additional sales of these commodities will be made in the fiscal years 1949 and 1950 under these provisions at prices which should not result in any loss to the Corporation.

Loans.—With demand and prices continuing at high levels during the fiscal year 1948, the value of all price support loans made amounted to $288,689,358 as compared to $277,790,231 for the fiscal year 1947. Large loans on tobacco in the fiscal year 1948 ($122,426,315) were due in part to the decrease in foreign demand due to dollar exchange shortages. Substantial loans on cotton and wheat indicated that producers use loans to facilitate the marketing of their commodities even in periods when market prices are substantially above loan rates.

It is anticipated that the exceptionally large, in several cases, record, 1948 crops will result in substantial increases in loans made in the fiscal year 1949, thus loans on basic crops are expected to increase from $261,747,554 in the fiscal year 1948 to $2,074,040,000 in the fiscal year 1949. Loans on Steagall commodities are expected to increase from $20,105,600 to $85,372,000. Loans on other commodities are expected to increase from $6,836,204 to $66,585,579. The estimated decrease in loans made in 1950 is based primarily on an expected increase in livestock numbers and the assumption that yields will be nearer average than the exceptionally high 1948 crop yields. The increased carry-over from the 1948 crop combined with some decreases in foreign demand are expected, however, to result in a relatively high loan level for the fiscal year 1950 ($1,840,062,500 in 1950 as compared with $2,225,997,579 in 1949). In view of the exceptionally large 1948 crops, an expected decrease in foreign demand, and the fact that loans on 1948 crop cotton and corn mature in the fiscal year 1950, collateral acquired in settlement of loans is expected to increase substantially during the fiscal years 1949 and 1950. During the fiscal year 1948, $3,655,822 of collateral was acquired in settlement of loans and it is estimated that collateral acquired in the fiscal year 1949 will amount to $243,613,665 and in 1950 to $888,947,000. Loans outstanding at the end of the fiscal year are expected to increase from $144,281,493 in 1948 to $900,505,000 at the end of the fiscal year 1949 and decrease to $672,426,500 at the end of the fiscal year 1950.

Purchases.—During the fiscal year 1949 it is estimated that price support purchases will amount to $689,640,593 and that these purchases will decrease during the fiscal year 1950 to $373,410,000. This decrease will be due primarily to anticipated lower support levels for potatoes, flaxseed, and eggs, lower production of peanuts because of marketing quotas, and the cessation of dried fruit purchases.

The unusually large 1948 crops and resultant carry-overs are expected to necessitate substantial grain purchases during the fiscal years 1949 and 1950; the amounts of commodities covered by purchase agreements during these years, are, of course, expected to be substantially greater than the amounts purchased. While some increases in the amounts of individual "Steagall" and "other" nonbasic price support commodities purchased during the fiscal year 1950 are anticipated due to specific production-consumption conditions and the availability of competitive foods, the total purchases of these commodities are expected to decrease from $497,140,593 in 1949 to $191,900,000 in 1950.

Sales.—It is estimated that the volume of sales for fiscal year 1949 will increase somewhat from the actual sales made during the fiscal year 1948. Substantial increases in sales of flaxseed, peanuts, wheat, Unseed oil, and dried fruit are partially offset by estimated decreases in sales of dairy products, sugar, potatoes, and wool. The increase in sales from $500,569,837 in 1949 to $746,225,500 in 1950 reflects in the main the disposal of commodities obtained as a result of the exceptionally large 1948 crops of cotton and grains. Since it is anticipated that most of these sales will be made in export channels, supply program estimates are reduced in equivalent amounts.

Commodity stocks.—At the beginning of the fiscal year 1948 commodity stocks held under the price support program amounted to $300,270,049; these had been reduced to $149,719,037 at the end of the fiscal year 1948. The principal inventory reduction during fiscal year 1948 occurred in wool; substantial sales of this commodity reduced the inventory from $229,935,958 to $112,196,285 by the end of the fiscal year 1948. It is estimated that price support inventories will increase from $149,719,037 to $500,876,000 during the fiscal year 1949. These estimated increases in inventories are due principally to the carry-overs resulting from the large wheat and flaxseed crops. The inventory as of June 30, 1950, is estimated to be $1,031,328,000. Loans on the large 1948 cotton and corn crop mature in the fiscal year 1950, and it is anticipated that substantial amounts of collateral will be acquired when such loans mature.

Losses.—Price support operations for the fiscal year 1948 resulted in a realized loss of $125,382,595, of which $55,768,386 was recovered from the Secretary of the Treasury in accordance with Public Laws 389 and 393, Eightieth Congress. This leaves a net realized loss for fiscal year 1948 of $69,614,209 chargeable against the price support program. The principal losses sustained were due to the disposition of potato and *egg* inventories and the sale of wool at prices competitive with imported wool. Estimated realized losses for fiscal year 1949 are $190,694,272, of which $471,046 was recovered from the Secretary of the Treasury. It is anticipated that major

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

losses will occur in peanuts, eggs, potatoes, and wool. The loss on peanuts is due to the reduced prices for peanuts sold to crushers in order to support the price of edible peanuts. Increases in potato losses are anticipated because the 1948 crop in early and intermediate States exceeded the amount normal domestic outlets could absorb; export demand is expected to be back to prewar levels; and the surplus must be sold at substantially reduced prices for byproduct uses. Losses on wool are expected to continue as a result of sales at prices competitive with imported wool prices. Losses on eggs are anticipated because dollar exchange shortages and competition with lower-priced foods are expected to necessitate lower prices in order to move this commodity into export channels.

Price support realized losses for the fiscal year 1950 are expected to amount to $133,722,500. The commodities on which substantial losses are anticipated in fiscal year 1950 are flaxseed, linseed oil, peanuts, eggs, potatoes, and wool. Flaxseed losses are estimated for 1950 because of anticipated price decreases resulting from an expected improvement in world fats and oils production, the anticipated substantial carry-over of flaxseed from the large 1948 crops in the United States, Canada, and Mexico, and a reduction in the levels at which 1949 crop flaxseed will probably be supported as compared to 1948 crop support levels. The factors cited as the principal reasons for anticipated losses on the remaining commodities in fiscal year 1949 also apply for fiscal year 1950.

The estimated losses for the fiscal year 1950 are based on the assumptions stated earlier in this Budget submission; however, any major change in the parity level, industrial activity, or national income from the levels assumed, any major increases in production over those assumed, any change in the sales policy on price support commodities directed by the Congress, or any changes in the economic situation on prices of competitive foods and fibers which might reduce consumption could easily increase the losses in any one of these commodities materially. In supporting the prices of basic commodities it has occasionally been necessary to hold inventories for several years before it was possible to dispose of them with a profit or minimum loss to the Corporation. It is not possible to hold inventories of those nonbasic commodities which are classed as either perishable or semiperishable for extended periods and for that reason immediate outlets must be developed and the inventories disposed of in a relatively short period of time. It is not usually possible to market inventories of perishable and semiperishable commodities by sale at parity prices. Thus, it is ordinarily necessary to divert such inventories into other than normal uses and substantial losses usually occur under such conditions. Moreover, world economic conditions have a direct effect on the Corporation's losses since it is frequently necessary to sell price support commodities at world market prices.

As indicated above, all net losses resulting from price support operations after January 1, 1947, as evidenced by the books of the Corporation, are charged against the reserve for postwar price support. After adjustments of reserves covering the difference between book and estimated realizable values of inventories and collateral securing loans, losses for the fiscal year 1948 amounting to $10,294,308 were charged to the reserve for postwar price support. After adjustments of inventory and loan valuation reserves, it is estimated that the net price support loss to be charged against the reserve for postwar price support will amount to $223,218,126 for the fiscal year 1949 and to $94,299,500 for the fiscal year 1950. These estimates of charges against the postwar price support reserve will be affected by changes in the sales price policy of price support commodities directed by the Congress as well as other indefinite economic factors such as price levels, weather, etc.

SUPPLY PROGKAM

Under its supply program the Corporation procures foods, agricultural commodities and products thereof, and related materials for the purpose of supplying the requirements of United States Government agencies, foreign governments, relief and rehabilitation agencies, and to meet domestic requirements. The centralization of such procurement operations in the Corporation not only has made possible increased efficiency through combined operations but also has eliminated the inflationary effect of competitive buying which would otherwise result if several Government agencies, as well as numerous representatives of foreign countries, were in the market simultaneously. In addition, it has enabled such operations to be conducted in a manner that provides maximum benefit to American agriculture in that the procurement is carried out during peak marketing seasons and is closely coordinated with the price support program. As the world supply of food increases and normal commercial trade channels are reestablished, food procurement for most foreign aid and by cash-paying foreign governments will be increasingly handled through commercial trade channels.

Foods, agricultural commodities and products thereof are procured under this program or aid is given in procurement thereof in order to facilitate distribution or to meet anticipated requirements during the period of short supply. Also in order to make available materials and facilities required in connection with the production and marketing of agricultural commodities, the Corporation, under this program, procures or aids in the procurement of such materials and facilities.

The supply program is carried out under the authority contained in the Corporation's charter, particularly section 5 (b) and (c) thereof.

The Corporation's supply operations are conducted in accordance with procedures and policies reasonably calculated to assure the Corporation against loss. In this connection the Congress by section 4 of the Act of July 16, 1943 (15 U. S. C. 1940 ed., supp. V, 713a-9), specifically required that the Corporation be fully reimbursed for services performed, losses sustained, and operating costs incurred for commodities purchased or delivered to or on behalf of any other Government agency. Supply program participants are usually required to advance funds in an amount equal to the estimated costs of the commodities to be procured by the Corporation,

The volume of purchases under the supply program is expected to decrease slightly below the 1948 level during the fiscal year 1949 with a substantial reduction below the 1949 level during the fiscal year 1950; thus, supply program purchases which amounted to $1,291,253,735 in fiscal year 1948 are estimated to amount to $1,223,315,000 in 1949 and $607,565,000 in 1950. This large reduction for fiscal year 1950 is based on the assumption that foreign production will continue to improve and that commodities acquired under price support operations will be used to the maximum extent possible in meeting export needs. Sales of commodities under the supply program amounted to $1,406,137,541 in fiscal year 1948, as compared with estimates of $1,316,465,408 in fiscal year 1949 and $680,555,000 in fiscal year 1950. It is estimated that the

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

inventories of commodities owned by the Corporation under this program which have been reduced from $123,244,959 as of June 30, 1947, to $97,321,792 as of June 30, 1948, will amount to $77,090,000 as of June 30, 1949, and will be reduced to $37,640,000 by June 30, 1950.

FOEEIGN PURCHASE PROGRAM

Under its foreign purchase program the Corporation purchases abroad such foods, agricultural commodities and products thereof, and related facilities as are needed to meet both foreign and domestic requirements. These purchases have recently consisted largely of commodities in short supply, notably fats and oils, sugar, and rice. Most of the purchases have implemented the allocations of agricultural commodities in short world supply made by the International Emergency Food Committee. This program is carried out pursuant to the Corporation's charter authority, particularly section 5 (b) and (c) thereof.

Purchases of agricultural commodities and products in foreign countries amounted to $242,182,429 during the fiscal year 1948, as compared to an estimated $145,627,000 during the fiscal year 1949 and an estimated $35,000,000 during the fiscal year 1950. The sharp decrease in estimated purchases for the fiscal year 1950 reflects the anticipated return of a substantial portion of foreign procurement activities to commercial trade channels. The anticipated procurement of fats and oils, and rice during the fiscal year 1950 is based on the assumption that it may be necessary to purchase these commodities to meet the requirements of the Department of the Army for use in occupied areas and Economic Cooperation Administration since supplies may not be available through normal trade channels. No inventories were on hand as of June 30, 1948, and it is assumed that any commodities purchased in the fiscal years 1949 and 1950 will be sold by the end of the respective fiscal years.

The Corporation is authorized by section 7 of Public Law 395, Eightieth Congress, to carry out projects to stimulate and increase the production of foods, agricultural commodities, and products thereof, in non-European foreign countries in order to alleviate and prevent shortages provided the project is first submitted to Congress and is not disapproved within 60 days. It is estimated that, under this authority, a loan amounting to $25,000,000 may be made to the Netherlands Indies Government in order to stimulate the production of copra and palm oil. It is anticipated that half of the loan may be advanced during the fiscal year 1949 with the balance to be advanced during fiscal year 1950.

COMMODITY EXPORT PROGRAM

Under its commodity export program, the Corporation may export, cause to be exported, or aid in the development of export markets for agricultural commodities and products. The purpose of the program is to retain and expand foreign markets for agricultural commodities and products thereof produced in the United States and to aid in the disposal of agricultural commodities and products thereof in excess of domestic needs. This program is carried out under the authority contained in the Corporation charter, particularly section 5 (d) and (f).

During the war, and since, when there has been a demand for most of the agricultural commodities and products thereof which could be supplied by the United States, it has been possible in most instances to dispose of them at prices reasonably comparable to domestic prices. Production goals have been set to help meet the dire need of commodities in foreign countries. In some commodities large supplies in excess of domestic needs are planned and production started months before such supplies are ready for export. Because of increased yields in foreign countries caused by ideal weather or other conditions, disappearance of dollar or other exchange with which the foreign government may purchase the commodity, changes in level of economic conditions between the United States and the potential foreign market, etc., it is possible that the excess United States supplies when finally harvested may have to be sold at a loss by the Corporation or for a price less than the domestic market price.

A cotton project under which cotton is made available for export at competitive world prices was begun in the fiscal year 1945. The extent of operations in the fiscal year 1950 under this project will depend largely upon the quantity of cotton in the Corporation's stocks. This country normally exports a large portion of its cotton production including a considerable quantity of shorter staples and lower grades and, consequently, provision is made for a similar project during the fiscal year 1950. Since the latter part of the fiscal year 1946, the Corporation has limited exports under this program to commodities acquired in price support operations. Assuming the continuation of this practice, the losses on cotton exports, the only currently active operation recorded under this program, are estimated to be $2,000 for the fiscal year 1949 and $15,000 for the fiscal year 1950.

The existence of excess supplies of other commodities for which operations under the export program would be necessary during the fiscal year 1950 is not apparent at this time. It may, however, become necessary to carry out operations with respect to other commodities under this program.

SUBSIDY PROGRAM

All subsidy operations during the fiscal year 1948 resulted from liquidation activities with the exception of the sugar subsidy which was active until November 1, 1947, when price ceilings on sugar were removed.

Subsidy payments on the 1947 crop of sugar were authorized by section 6 of the Act of July 25, 1946 (Public Law 545, 79th Cong.) which provided among other things the continuation of subsidy operations on the 1947 sugar crop until the ceiling prices on sugar were removed.

While the financial results of all sugar operations prior to October 31, 1947, were charged to the subsidy program in order that the total costs of keeping prices to consumers within established ceilings might be shown, each of these operations had two purposes. Thus, in addition to maintaining price ceilings, Cuban sugar was purchased to obtain needed supplies to meet domestic and foreign requirements, and domestic continental and off-shore (Hawaii, Puerto Rico, and Virgin Islands) sugar operations have supported the price to producers in order to secure full production. Accordingly, with the termination of the subsidy program, the financial results of these operations are reported under the applicable foreign purchase and price support programs.

LOAN TO THE SECRETARY OF AGRICULTURE FOR AGRICULTURAL CONSERVATION PURPOSES

Section 391 (c) of the Agricultural Adjustment Act of 1938, as amended (7 U. S. C. 1391), requires the Corporation to loan to the Secretary of Agriculture during each fiscal year, such sums, not to exceed $50,000,000 as the Secretary estimates will be required to make advances

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

pursuant to the applicable provisions of sections 8 and 12 of the Soil Conservation and Domestic Allotment Act, as amended. These loans are used to purchase conservation materials during the period from January 1 to June 30 of each year. Repayment of such loans is directed to be made from funds appropriated to carry out sections 7 to 17 of such act, with interest at a rate determined by the Secretary, but not less than the cost of money to the Corporation.

ADMINISTRATIVE EXPENSES

Administrative expenses cover the costs of the general supervisory and operating staff engaged in carrying out the programs of the Corporation. Estimated costs of the audit of the Corporation's accounts by the General Accounting Office and rental costs for office space in Government-owned buildings occupied by Corporation employees are included as administrative expenses. There are not included in administrative expenses, however, necessary expenses (including special services performed on a contract or fee basis, but not including other personal services) in connection with the acquisition, operation, maintenance, improvement, or disposition of any real or personal property belonging to the Corporation or in which it has an interest. Such expenses are treated as nonadministrative expenses as provided in the language carried annually in the appropriation act making corporate funds available for administrative expenses. The language proposed in the Budget program for the fiscal year 1950 authorizing expenditures for administrative expenses of the Corporation contemplates that the Corporation will, consistent with its established practice, treat as nonadministrative expense all expenses of the types which have been so treated during the 1948 and 1949 fiscal years. In accordance with the change in policy discussed in the Budget for the fiscal year 1948, expenditures for administrative equipment purchased are capitalized and are not charged against the administrative limitation. It is also contemplated that administrative expenses will be accounted for on an obligation basis as has been the case in the current and prior years.

The administrative services are performed for the Corporation by its executive staff and employees of the Production and Marketing Administration, and the Corporation assumes its equitable share of Production and Marketing Administration personnel and other costs. In addition, the Corporation utilizes the services of other agencies when it is advantageous to do so. The Corporation is fully reimbursed for all administrative expense incident to supply program activities undertaken for Government agencies, foreign governments, private relief agencies, and others. Such reimbursements provide for all of the Corporation's administrative expenses resulting from the supply program, including expenses of liquidation, and are generally obtained through a mark-up on invoices evidencing sales under that program. Such reimbursements are credited on the books of the Corporation to an account which in turn is used to defray all of the administrative costs of the supply program including expenses of liquidating all phases of the program as they are incurred by the Corporation. Amounts, if any, found to be in excess of needs are transferred to the general income of the Corporation from time to time.

The actual expenses for the fiscal year 1948 and the estimates for the fiscal years 1949 and 1950 are reflected in the schedules following the authorizing language; the estimates for the fiscal year 1950 include a limitation of $12,000,000 for costs of administration exclusive of reimbursements for services performed.

The requested administrative funds are based on the character and volume of operations reflected in the program estimates. If any other functions or programs are assigned to the Corporation, additional administrative funds may be required.

EFFECT ON THE GOVERNMENT BUDGET

The Corporation's activities resulted in a budgetary receipt of $204,403,238 in the fiscal year 1948 and it is anticipated that budgetary expenditures of $863,726,827 and $535,288,000 will be made in 1949 and 1950, respectively. The Corporation's budgetary receipt position for fiscal year 1948 was brought about primarily by the disposal of commodity stocks and the liquidation of receivables. The change over to a budgetary expenditure position for fiscal years 1949 and 1950 is occasioned by the estimated heavy loan programs and the acquisition of collateral in connection therewith.

OPERATING KESULTS

The Corporation's net gain for the fiscal year 1948 amounted to $47,504,956; it is estimated that the net gain for the fiscal year 1949 will amount to $10,000,000 and that the net gain for the fiscal year 1950 will amount to $10,000,000. The loss on sales made in accordance with the provisions of Public Law 389, approved December 17, 1947, and recorded during the fiscal year 1948 was established as a receivable due from the Secretary of the Treasury. Notes covering this amount ($55,768,386) plus the loss on sales made in the fiscal year 1948 but not recorded until the fiscal year 1949 ($471,046) were cancelled by the Secretary of the Treasury on October 28, 1948.

In accordance with the Corporation's established policy, price support losses for the fiscal year 1948 in the amount of $10,294,308 were charged against the reserve for postwar price support; it is estimated that losses of $223,218-126 and $94,299,500 will be charged against this reserve as a result of price support operations in the fiscal years 1949 and 1950, respectively.

The Corporation's June 30, 1947, surplus as adjusted by the Treasury's appraisal ($17,693,492) was returned to the Treasury on April 26, 1948. It is anticipated that the June 30, 1948, surplus of $47,707,008 will be returned to the Treasury during the fiscal year 1949; the amount of the surplus to be returned is subject to any adjustments resulting from the Treasury's appraisal.

FINANCIAL CONDITION

Loans receivable.—The Corporation's loans are principally nonrecourse loans to farmers or cooperative marketing associations under the price support program secured by chattel mortgages or warehouse receipts covering agricultural commodities. Recourse loans are made, however, to potato producers and soybean and peanut processors. A loan may also be made to the Netherlands Indies Government to aid in increasing the production of copra and palm oil.

The Corporation's price support loans are made directly by the Corporation or through private lending agencies under agreement with the Corporation and bear interest at 3 percent per annum. The Corporation's contract with commercial lending agencies provides that loans held by such agencies will be taken over on demand. Sufficient borrowing authority is reserved at all times to cover the

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

amount of these loans. Private lending agencies receive one-half of the interest earned during the period the loans are held by such agencies.

Commodities owned.—Commodities owned by the Corporation are divided into two broad classifications: (1) Commodities acquired as a result of price support operations; (2) commodities purchased under the Corporation's supply and foreign purchase program. The use and economic effect of these two types of inventories are, however, interrelated. Commodities acquired under the price support program may be used to meet supply requirements and commodities purchased under the supply program may effectively reduce or eliminate the necessity for price support operations.

Inventories are recorded at cost including storage, transportation, and accessorial expenses. Due to the varied nature of the many commodities included in the inventory and the related trade practices in storing and handling, the cost is determined by the "first-in, first-out" method for some commodities and by the "average cost" or "individual lot cost" method for other commodities. In each case a consistent practice is followed from period to period.

The Corporation acquires price support commodities by purchase or by forfeiture of commodities pledged or mortgaged as loan collateral. In some instances (e. g., cotton) forfeited loan collateral commodities are "pooled" for the account of producers. Under the pooling arrangement producers have an equitable interest in any net proceeds resulting from the sale of such commodities.

Cash.—The cash balance reflected in the financial statement represents (1) cash on deposit, and (2) the amount of receipts on hand and receipts forwarded for deposit but not as yet credited to the account with the Treasurer of the United States, less the amount of disbursements in transit, i. e., cash committed to cover authorized disbursements in process of completion by Federal Reserve banks. The major portion of the Corporation's cash represents funds made available to the Corporation by the Defense Aid Appropriation Act of 1946 as a special reserve for postwar price support activities. When this postwar price support fund of $500,000,000 was made available, the Corporation borrowed $500,000,000 from the United States Treasury on non-interest-bearing notes and retired a like amount of interest-bearing notes. When price support losses are charged against this reserve, the cash balance of this fund is reduced in a like amount.

Accounts and notes receivable.—The major portion of accounts receivable is represented by amounts due from various government agencies as a result of supply program sales. Receivables from a wide variety of other debtors including suppliers, warehousemen, processors, railroads, and producers are also included in this classification. A reserve is provided for estimated losses on receivables.

Accrued assets.—The major item in this classification represents accrued interest at 3 percent on the amounts due in connection with the export of cotton to Japan and Germany. This account includes the accrued interest due from borrowers, which the Corporation purchases from lending agencies when it acquires commodity loans from them. Interest is computed at *l){* percent from the date the lending agency made the loan until the date the loan is acquired by the Commodity Credit Corporation. Upon the repayment of such purchased loans, the collection from borrowers is applied to the interest purchased. Interest is accrued on recourse loans to potato producers and to soybean and peanut processors.

Fixed assets.—The major fixed assets are grain bins and related equipment; leasehold improvements, machinery, and equipment at the natural cooler storage facility at Atchison, Kans.; and a tobacco storage facility at Paducah, Ky. The initial investment in the natural cooler storage facility was completely amortized by March 31, 1947. Subsequent acquisitions of equipment are fully reserved. Substantial depreciation reserves have been set up against the investment in steel grain bins and equipment. The tobacco storage property is carried at cost; this property was surplus to Army needs and was purchased at a price equal to the value of the land.

Notes payable and capital stock.—The Corporation's operations are financed by capital funds and borrowing from the United States Treasury or, with approval of the Secretary of the Treasury, from private lending agencies and, in the case of most of the Corporation's loan operations, by arrangements under which the loans are made by local banks, cooperatives, and other private lending agencies upon the Corporation's agreement to take over the loans on demand. Daily reports of disbursements and receipts are received from the Federal Reserve banks which act as fiscal agents for the Corporation. If daily disbursements exceed daily receipts, a loan in the amount of such excess is obtained from the United States Treasury; if receipts exceed disbursements, the excess is applied either as a repayment against the Corporation's interest-bearing loan balance or kept on deposit in the United States Treasury if the Treasury is not holding interest-bearing notes to which a repayment could be applied. In compliance with section 7 of the Federal charter of the Corporation, effective July 1, 1948, interest is being paid to the United States Treasury on the capital of the Corporation. This rate has been established at 1.875 percent interest. On the same date, the interest rate on borrowings from the United States Treasury was increased from 1 to 1.25 percent due to general increases in the interest on short-term borrowings. These interest rates which have been established by the United States Treasury are at levels which reimburse the Treasury for its borrowing costs considering the type of borrowings involved. Funds are borrowed from private lending agencies when, in addition to obtaining funds, the Corporation desires to utilize the facilities of such lending agencies in carrying out a particular operation. All borrowing agreements with private lending agencies are approved by the Secretary of the Treasury.

The present borrowing authority of $4,750,000,000 is considered adequate to meet all financing requirements of the Corporation during the fiscal year 1950. Since the Corporation follows the practice of charging the estimated gross fund requirements for the program against the borrowing authorization, it will not approve a new program unless there is sufficient uncommitted borrowing authorization to coyer the program. Only in this manner can the Corporation guarantee fully that funds will be available to carry out each program.

Obligation to purchase loans held by lending agencies.—This liability represents the obligation of the Corporation to purchase upon presentation notes evidencing the commodity loans made by lending agencies in accordance with the applicable policies of the Corporation, and is the offset to the asset "Loans held by lending agencies." Outstanding certificates of interest evidencing the liability

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

of the Corporation to purchase cotton loans are also included in this classification. The liability shown is the unpaid balance of the loans.

Trust and deposit liabilities.—The principal items in this group are the advances of funds made by the Department of the Army and other supply program participants. These advances are liquidated when invoices covering deliveries of commodities are prepared.

Accounts payable.—The principal portion of accounts payable represents amounts due vendors for commodities which have been acquired under the supply program. Other items are outstanding drafts payable to producers, producers' equities in liquidated cotton pools, and amounts due to several Government agencies such as the Department of the Army, Department of the Navy, and United States Treasury.

Accrued liabilities.—The principal item in this group represents storage and other carrying charges accrued on commodity inventories. Also included in this classification is an accrual of administrative expense.

Reserve for postwar price support of agriculture.—This reserve was created by the First Supplemental Appropriation Rescission Act, 1946 (Public Law 301, 79th Cong.) approved February 18, 1946, under title I "Emergency funds appropriated to the President." That act provided that "the $500,000,000 made available by title II of the Second Deficiency Appropriation Act, 1945, as a reserve for expenditure for postwar price support of Agriculture shall be paid to the Commodity Credit Corporation and continued as a reserve fund for expenditure, as and when necessary, for the postwar price support of Agriculture." In accordance with that act, the $500,000,000 was paid to the Commodity Credit Corporation on March 20, 1946. The first charge against the reserve was made as of June 30, 1947, and represented net losses (actual and estimated) on price support activities from January 1, 1947, through June 30, 1947. Subsequent charges or credits have been made on a monthly basis since that date. As of June 30, 1948, this reserve amounted to $429,754,996; it is anticipated that this will be reduced to $206,536,870 as of June 30, 1949, and $112,237,370 by June 30, 1950, by the application of estimated price support losses incurred in the fiscal years 1949 and 1950.

RESTORATION OF CAPITAL

The Act of March 8, 1938 (5 Stat. 107), provided that as of March 31 of each year an appraisal of all the assets and liabilities of the Corporation for the purpose of determining the net worth of the Corporation shall be made by the Secretary of the Treasury. The legislation provides a basis of evaluating the assets. The act further provides that should such appraisal establish the net worth of the Corporation as less than $100,000,000, the Secretary of the Treasury, on behalf of the United States, shall restore the amount of such capital impairment by a contribution to the Corporation in the amount of such impairment; if the appraisal establishes the net worth of the Corporation as more than $100,000,000, the amount of the surplus is paid to the United States Treasury. The act of April 12, 1945 (59 Stat. 50), changed the date of appraisal from March 31 to June 30, beginning with June 30, 1945. A summary of the actual and estimated capital impairment, restoration of capital by the Secretary of the Treasury, and payments to the Treasury by the Delaware and Federal corporations is given in schedule C-3.

The Corporation's books show a surplus of $47,707,008 as of June 30, 1948. The amount of this surplus as adjusted in the appraisal of the assets and liabilities of the Corporation by the Secretary of the Treasury will be returned to the United States Treasury.

PROPOSED LEGISLATION

The foregoing narrative and the following financial statements and supporting schedules do not reflect the effect of proposed legislation (1) to carry out provisions of an International Wheat Agreement, and (2) to permit the Commodity Credit Corporation to acquire facilities for storing commodities, particularly grains, owned or controlled by it. These items are estimated to require net expenditures of $55.5 million and $25 million, respectively, in the fiscal year 1950.

STATEMENT A

COMPARATIVE STATEMENT OF SOURCES AND APPLICATION OF FUNDS

[Fiscal years ending June 30,1948, 1949, and 1950]

	1948 actual		1949 estimate		1950 estimate	
FUNDS APPLIED						
To operating programs:						
Loans (schedule C-2)	$326,324,358		$2,248,497,579		$1,862,562,500	
Purchases of commodities (schedule B-l)	1,877,829,422		2,058,582,593		1,015,975,000	
Carrying charges and related expenditures (schedule B-l)	132,883,309		178,010,615		181,071,000	
Loan collateral settlements [1]	113,083		668,815			
Direct losses (schedule B-l)	15, 203, 528		3,152,000		15,000	
Other program expenses (schedule B-l)	12,934,040		8,496,000		5, 710,000	
Total		$2,365,287,740		$4,497,407,602		$3,065,333,500
To payment of borrowings:						
U. S. Treasury:						
By cash repayments	1,033,000,000		1,688,760,568		1,133,000,000	
By cancellation of notes [2]			56,239, 432			
Total, U. S. Treasury	1,033,000,000		1,745,000,000		1,133,000,000	
Private lending agencies	128,243,991		148,250,049		83,500,000	
Total		1,161,243,991		1,893,250,049		1,216,500,000
To return surplus to U. S. Treasury		17, 693,492		47, 707,008		10,000,000
To purchase of fixed assets		68,984		100,000		125,000
To other expenses (statement B):						
Administrative expenses	19, 792,628		20, 356,214		20,974, 715	
Pay increase, Public Law 900			1, 535,120		1,686,803	
Total	19,792,628		21,891,334		22,661,518	
Interest expense:						
U. S. Treasury	413,161		3,875,000		4,375,000	
Other	429,901		525,000		210,000	
Miscellaneous nonadministrative expenses	2,474, 572		4,325,751		3,850,000	
Total		23,110, 262		30,617,085		31,096,518
To increase in working capital:						
Cash with U. S. Treasury	113, 368, 416					
Other working capital items					144,417,000	
Total		113,368,416				144,417,000
Total funds applied		3,680,772,885		6,469,081, 744		4,467,472,018
FUNDS PROVIDED						
By operating programs:						
Repayment of loans (schedule C-2)	299, 294, 701		1, 235, 860,407		1,193,554,000	
Sales of commodities (schedule B-l)	2,133, 679, 530		1, 962, 735, 245		1,461, 780, 500	
Adjustments (schedule B-1)	677, 899					
Direct gains (schedule B-l)	2, 326, 265					
Other program income (schedule B-1)	24, 242, 767		8, 467,000		5,338, 000	
Loss recoverable from Secretary of Treasury in subsequent years 2 (schedule B-l)	55, 768, 386					
Loss recovered from Secretary of Treasury (by cancellation of notes) [2]			471,046			
Total		2, 515,989, 548		3, 207, 533, 698		2, 660, 672, 500
By borrowings:						
From U. S. Treasury	963, 000, 000		2, 225,000,000		1, 583,000,000	
From private lending agencies	124,164,019		128,000,000		88,000,000	
Total		1,087,164,019		2,353,000,000		1,671,000.000
By realization of assets: Sales of fixed assets		1,385, 268		115,000		115,000
By other income (statement B):						
Interest income	8,153, 836		26,800,000		29, 850, 000	
Reimbursements for services performed for other agencies	12,028,041		13,778,399		10,661, 518	
Sales mark-up not applied to expenses	10, 698, 291					
Adjustment of prior year administrative expenses	55, 279		41,959			
Miscellaneous income	426, 457		50,000		10, 000	
Total		31,361,904		40,670,358		40,521,518
By decrease in working capital:						
Cash with U. S. Treasury			399, 319,452		95,163, 000	
Loss recovered from Secretary of Treasury for prior year (by cancellation of notes)			55,768,386			
Other working capital items	44,872,146		412,674,850			
Total		44,872,146		867,762,688		95,163,000
Total funds provided		3, 680, 772,885		6,469,081,744		4,467,472,018

1 Represents costs other than face value of loans incident to acquisition of loan collateral.

2 Pursuant to the Foreign Aid Act of 1947 (Public Law 389, 80th Cong.) and Third Supplemental Appropriation Act, 1948 (Public **Law** 393, 80th Cong.).

SCHEDULE C-3

STATEMENT OF RESULTS OF TREASURY APPRAISALS

[Actual 1938-1947; estimated 1948-1950]

	Cancellation of Treasury notes	Appropriations	Surplus covered into U. S. Treasury	Cumulative results of payments to (—) or from U. S. Treasury
Under Delaware Charter				
Year ending March 31—				
1938		[1] $94,285,405		$94,285,405
1939		119,599,918		213,885,323
1940			-$43,756,731	170,128,592
1941		1,637,445		171,766,037
1942			-27,815,513	143,950,524
1943				143,950,524
1944		2 256,764,881		400,715,405
15 months ending June 30, 1945[3]	$921,456,561			1,322,171,966
Year ending June 30—				
1946	641,832,081			1,964,004,047
1947			-17,693,492	1,946,310,555
1948			-47,707,008	1,898,603,547
Total under Delaware Charter (1938-1947 actual; and 1948 estimated)	1,563,288,642	472,287,649	-136,972,744	
Under Federal Charter				
Year ending June 30—				
1949			[4] -10,000,000	-10,000,000
1950			[4] -10,000,000	-20,000,000
Total under Federal Charter (estimated)			-20,000,000	

* This amount is cumulative from Oct. 17, 1933, as no appraisals were made prior to Mar. 1,1938.

2 Includes $39,436,885 capital impairment for the year ending Mar. 31, 1943, which was not appropriated by the Congress until the following year's appraisal.

3 The Act of Mar. 8,1938 (U. S. C, 1940 ed., Supp. Ill, title 15, sec. 713A-1), as amended by the Act approved Apr. 12,1945, changed the date of appraisal to June 30 of each year. Therefore, the impairment as of June 30,1945, covers a 15-month period.

[4] Represents estimated gains only. (See statement B.)

ESTIMATES OF AUTHORIZATION RELATING TO CORPORATE FUNDS

NOTE.—The text of general authorizing language for the Commodity Credit Corporation, as incorporated in the Department of Agriculture Appropriation Act, 1949, and as proposed for 1950, will be found under "Title II—Government Corporations" in the Department of Agriculture chapter of part II of the Budget.

FEDERAL CROP INSURANCE CORPORATION

PROGRAM HIGHLIGHTS

[Dollars in thousands]

	Fiscal year 1948 (crop year 1947)	Fiscal year 1949 (crop year 1948)	Fiscal year 1950 (crop year 1949)
Premiums	$40, 709	$13,078	$15, 602
Indemnities	$34, 693	$7,399	$14, 042
Number of commodities insured	6	7	8
Number of contracts in force	539, 834	175, 000	209, 500
Number of counties in program	2,478	375	411
Net gain for the year	$9,346	$5, 839	$1, 707

NOTE.—Crop year 1947 represents the last year of the national program, and crop years 1948 and 1949 the initial years of the experimental program.

PURPOSE AND FINANCIAL ORGANIZATION

The Federal Crop Insurance Corporation was created to alleviate the economic distress caused by crop failures due to unavoidable causes (7 U. S. C. 1501-1519). All insurance programs are conducted on a limited and experimental basis to develop the experience necessary to instituting national programs.

Capital funds.—The Federal Crop Insurance Act provides that the Corporation shall have a capital stock of $100,000,000 (7 U. S. C. 1504, 1504a) subscribed by the United States of America. The full amount of the capital stock authorized has been purchased by the Secretary of the Treasury.

ANALYSIS OF BUDGET PROGRAMS

Problem and significance.—The Corporation is charged with the responsibility of developing sound bases for future national insurance programs designed to protect the farmer against financial difficulties inherent in production risks. The operating experience gained under the present limited operations is used to develop programs that are both workable and financially sound and are acceptable to farmers. The most reliable results are obtained when all of the representative areas and a minimum of from 35 to 50 percent of the farmers in those areas are included in the insurance program.

Insurance program.—The insurance program for crop years 1949 and 1950 has as its main objectives the securing of an adequate and properly distributed participation level and the refinement of rates and coverages. The attainment of these objectives will give representative experience, spread risks, avoid adverse selectivity, and keep unit costs low. The 1949 insurance program will be offered in 411 counties on wheat, cotton, flax, corn, tobacco, beans, and multiple crops. Oats was included in the multiple-crop policy in 1948. Additional commodities will be added to this type policy in both 1949 and 1950. It is estimated that 209,500 contracts will be in force in crop year 1949 and 237,100 in crop year 1950.

The 1949 insurance program falls into two broad types of coverage; namely, commodity and monetary. Commodity insurance guarantees production in bushels or pounds of the commodity, and is being used as the higher coverage type designed to provide protection approximating the investment in the crop. Monetary insurance, guaranteeing an amount in dollars based on a fixed price, is a lower premium and lower coverage type offered to farmers who feel they can absorb greater losses but require protection for out-of-pocket costs. Individual crop programs are developed for each type of coverage, and variations are being tried in an attempt to discover the most acceptable and workable form of insurance. In the greater part of the insurance areas the single-crop policy is used. The Corporation realizes that in general farming areas where farm income is diversified the insurance of a single crop does not provide very satisfactory insurance. Consequently, it is experimenting with an insurance policy which will cover a number of crops combined. Under this policy the coverage for all crops insured on the farm is combined, and a loss under the policy arises only when the value of the total production of the insured crops does not equal the combined coverage. The farmer benefits from the more comprehensive coverage and the lower premium rates resulting from combined coverage; the Corporation assumes less potential liability through the greater spread of risk. Experience in two counties in crop year 1948 indicates the multiple-crop policy has merit. It is, therefore, being extended to other counties in 1949 and is being expanded to include more commodities.

Premium rates will be refined and coverages constantly revised to avoid overinsurance. This is essential to comply with the provision of the act which limits the insurance coverage generally to the level of the investment in the crop. In meeting this provision, the Corporation is securing cost-of-production and farming-practice data and will expand this activity in 1950.

Program administration.—The crop insurance programs are developed and analyzed mainly in the headquarters office and are administered in the field through 29 State offices and through cooperative agreements with the county agricultural conservation associations of the Production and Marketing Administration. Program accounting and contract servicing functions are performed by the branch office in Chicago. The Federal Crop Insurance Act (7 U. S. C. 1516a) authorizes annual appropriations by Congress of not to exceed $12,000,000 for any fiscal year to cover the administrative and operating expenses of the Corporation. The estimated administrative expenses for fiscal year 1950 are $4,054,000.

EFFECT ON GOVERNMENT BUDGET

Corporate operations, including administrative expenses, resulted in budgetary receipts exceeding expenditures by $236,619 in fiscal year 1948. This consisted of a $14,689,723 increase in cash in Treasury checking account and general and special account expenditures of $10,000,000 for capital stock and $4,453,104 for administrative expenses.

The excess of receipts over expenditures in fiscal year 1949 is estimated at $5,697,592, consisting of a $10,167,214 increase in the checking account balance and general account expenditures of $4,469,622 for administrative expenses.

In fiscal year 1950, budgetary expenditures are estimated to exceed receipts by $2,096,296. The checking account balance will increase by $1,928,604 and $4,024,900 will be disbursed for administrative expenses.

Federal Reserve Bank of St. Louis

OPERATING RESULTS

Program improvements and favorable weather conditions enabled the Corporation to show a net profit of $9,345,893 for fiscal year 1948. It is estimated that there will be a net profit of $5,839,050 on all insurance operations for fiscal year 1949. Since it is impossible to predict with accuracy crop conditions for crop year 1949, the estimated net profit of $1,707,170 for fiscal year 1950 is based on the assumption that 90 percent of premiums earned will be paid out in indemnities. This assumption is predicated on the structure of premium rates which are so established as to provide a 10-percent reserve for unforeseen losses.

The following table gives the actual results for fiscal year 1948 and estimated results for fiscal years 1949 and 1950. Prices used for 1949 and 1950 are based on the fixed or maturity-date prices for the 1948 crop year.

Summary of insurance operations

[Fiscal years ending June 30,1948,1949, and 1950]

	1948 actual	1949 estimate	1950 estimate
Wheat:			
Premiums	$22,363,650	$8,824,000	$9,360,000

Indemnities	----------	2,000	131,980
Profit	----------	21, 000	14, 660
Other income (net)	3,329,626	159, 610	147,000
Net income for the year	9,345,893	5,839,050	1,707,170

FINANCIAL CONDITION

The capital position of the Corporation is steadily improving. As a result of favorable crop conditions and changes in operating policy, total capital will have been increased from $20,469,090 (includes $10,000,000 unissued stock as of June 30, 1947, for which subscription was made during August, 1947) at the beginning of fiscal year 1948 to an estimated $37,361,203 by June 30, 1950.

The cash balance will increase by almost $10 million during fiscal year 1949. This is partly due to the expected liquidation of the bulk of the $6,452,524 in uncollected premiums. This large volume of accounts receivable consists mainly of 1947 crop year premiums and is attributed to the unfavorable collection experience in those counties where the insurance program could no longer be offered. A special collection program is being conducted to clean up outstanding accounts. The Corporation is being assisted in this program by the Solicitor's Office of the Department and by the Department of Justice. Firmer collection policies and discount incentives for prepayment of premiums are expected to hold receivables to a minimum in the future.

The reserve for uncollectible accounts is composed of estimated bad debts for crop years prior to 1945 and one-half of 1 percent of insurance premiums for 1945 and subsequent crop years. Uncollectible accounts will be written off against this reserve in accordance with the provisions of Public Law 518, dated December 20, 1944, which permits the write-off of uncollectible accounts after a period of 5 years or earlier under certain circumstances.

The indemnities payable consist of the actual value of unpresented indemnity certificates for the crop years 1941 through 1946 and an estimate for unliquidated indemnities for crop years 1947, 1948, and 1949. Of the $299,275 outstanding as of June 30, 1948, $104,917 represent outstanding certificates on crop years 1941-46 that have not been presented for payment. Use of the fixed-price contract eliminates the necessity of carrying payables for such long periods of time, as the Corporation pays claims immediately upon approval and does not have to wait for the presentation of an indemnity certificate. However, there will always be some unsettled claims at the end of the fiscal years, and the amounts shown represent the estimated value of those claims. The estimated increase in 1950 over 1949 results from the larger number of participants in the program and the use of the 90-percent loss ratio for crop year 1949 as compared to 57 percent for crop year 1948.

Balance at end of fiscal year	-70,185,017		-64, 345, 967	-62,638, 797

NOTE.—Administrative expenses are not included as operating expenses for the reason that premium income is not intended to cover such expenses. The premium rates established do not include any provision for recovering the cost of administering the program which is in accordance with the provisions of the Federal Crop Insurance Act, as amended. Funds required for administrative expenses are provided by the Congress through annual appropriations. Such expenses amounted to $50,608,320 from date of organization through June 30, 1948.

FARM CREDIT ADMINISTRATION

INTRODUCTORY STATEMENT

The Farm Credit Administration is charged with the responsibility of administering and coordinating a national program of agricultural credit pursuant to Executive Order 6084, dated March 27, 1933, and the authority subsequently vested in the Administration.

The general purpose of the Farm Credit Administration system is to provide a complete and coordinated credit system for agriculture by making long-term and short-term credit available to farmers. It also provides credit facilities for farmers' cooperative marketing, purchasing, and business service organizations.

The Administration is mainly a supervisory and regulatory agency. In carrying out its general purposes it supervises and examines 51 credit corporations, 1,255 national farm loan associations, and 503 production credit associations. The corporations under its supervision are as follows:

12 Federal land banks
12 production credit corporations
13 banks for cooperatives
12 Federal intermediate credit banks
Federal Farm Mortgage Corporation
Regional Agricultural Credit Corporation

The national farm loan associations are cooperative organizations of farmers and stockmen through which long-term agricultural mortgage credit is extended by the Federal land banks; the production credit associations, supervised by the production credit corporations, are cooperative organizations of farmers and stockmen extending short-term credit to farmers; the banks for cooperatives provide a permanent source of credit on a sound basis to farmers' cooperative associations; and the Federal intermediate credit banks serve as banks of discount for agriculture and do not make loans directly to individuals. The Land Bank Commissioner loans made on behalf of the Federal Farm Mortgage Corporation were made through the facilities of the Federal land banks and national farm loan associations. Authority to make Land Bank Commissioner loans was not extended beyond July 1, 1947; however, the Corporation continues to use the facilities of the land banks to service its assets. The Regional Agricultural Credit Corporations were established to make loans to farmers and stockmen to whom credit was not available from other sources at reasonable rates of interest. While there were originally 12 such corporations they have been merged into a single corporation with headquarters in Washington, D. C.

ADMINISTRATION

In carrying out its supervisory and regulatory responsibilities the Administration renders such services to its constituent agencies as administrative accounting, preparation and distribution of reports, preparation and submission of budgets, custody of collateral for bonds and debentures, credit research, development of appraisal standards and policies, development and distribution of general information on Farm Credit problems, as well as assistance to the various corporations in connection with their financing and investments. The Administration is responsible for carrying on the functions of research and study relating to cooperative associations as authorized and directed by the Cooperative Marketing Act, approved July 2, 1926.

The Farm Credit Administration, under the direction of the Governor, is organized on a functional basis in two main types of divisions—operating and service. The operating divisions comprise the following:

(1) The Land Bank Division under the direction of the Land Bank Commissioner is responsible for the supervision of the Federal land banks and national farm loan associations, development of policies and regulations governing these institutions, development and maintenance of land appraisal policies and standards, and the supervision of the servicing of the Federal Farm Mortgage Corporation assets.

(2) The Intermediate Credit Bank Division under the direction of the Intermediate Credit Commissioner supervises the Federal intermediate credit banks and develops policies and regulations for their guidance.

(3) The Production Credit Division under the direction of the Production Credit Commissioner supervises the production credit corporations and through the corporations the associations. The division is responsible for general policies and regulations applicable to the activities of these units.

(4) The Cooperative Division under the direction of the Cooperative Commissioner supervises the banks for cooperatives. The Commissioner is also chairman of the board of directors for the Central Bank for Cooperatives.

(5) The Examination Division is charged with the responsibility of examining at least annually all of the corporations and associations comprising the Farm Credit Administration. This division is headed by the chief examiner who is responsible to the Governor.

(6) The Cooperative Research and Service Division provides research and service facilities to farmer cooperative associations.

In addition to these operating divisions, there are five service divisions which perform services common to all units; their activities include maintenance of administrative accounts, development and submission of budgets, compilation, issuance and distribution of reports covering all the corporations in the Farm Credit Administration, internal auditing, personnel services, general information service, economic and agricultural credit research related to the responsibilities and activities of the Farm Credit system, counsel and assistance on financing and investment policies, and general administrative office services.

The Administration obtains its funds for administrative expenses from two principal sources: *(a)* By direct appropriation and. *(b)* by assessment against corporations operating within the Farm Credit system. The distribution of costs between appropriated funds and assessable funds, and the participation by the institutions subject to assessment, are in proportion to the services rendered, such services being measured by the most current work-load statistics available at the time the budget estimates are prepared.

FARM CREDIT ADMINISTRATION—Continued

Agricultural Marketing Revolving Fund, Farm Credit Administration, Department of Agriculture—

This is an indefinite appropriation available for investment in the capital stock of the 13 banks for cooperatives, and for loans to cooperative associations indebted to the fund as are needed to facilitate the collection of such indebtedness. This fund is available for investment in the capital stock of the 13 banks for cooperatives on call by the Governor of the Farm Credit Administration upon his approval of requests by the boards of directors of the banks (12 U. S. C. 1134b, 1141d).

Special account:

Administrative Expenses and Refunds, Farm Credit Administration, Department of Agriculture—

The Farm Credit Administration is authorized to estimate the cost of examination and administrative supervision of the banks, corporations, and other organizations under its jurisdiction and to assess on an equitable basis and collect in advance such estimated cost. The amounts so collected are made available by the Department of Agriculture appropriation act each year for advance to the "Salaries and expenses" appropriation of the Farm Credit Administration. Any excess of collections over costs properly chargeable to each organization assessed is required by law to' be refunded to the assessed organization (12 U. S. C. 832).

Supervisory Expense Funds, Regional Agricultural Credit Corporation, Farm Credit Administration, Department of Agriculture (R. F. C.)—

This account consists of amounts deposited in the Treasury by the Reconstruction Finance Corporation to cover such expenses incurred in connection with the supervision of regional agricultural credit corporations, as authorized by the act of July 21, 1932 (12 U. S. C. 148). Under the act of June 30, 1947 (Public Law 132), authority to pay such expenses was transferred to the Farm Credit Administration. However, the Government Corporations Appropriation Act, 1948, provided that funds of the Regional Agricultural Credit Corporation should be available for such expenses (12 U. S. C. 1148).

PURPOSE AND FINANCIAL ORGANIZATION

The Federal Farm Mortgage Corporation was established pursuant to the provisions of the Federal Farm Mortgage Corporation Act approved January 31, 1934 (48 Stat. 344), for the following purposes: (1) To provide funds for the making of loans to farmers by the land bank commissioner pursuant to the provisions of section 32 of the Emergency Farm Mortgage Act of 1933 (48 Stat. 48), (2) to make funds available to the Federal land banks to assist them in their financing during periods of emergency, and (3) to make loans to joint stock land banks (12 U. S. C. 1020d). The commissioner's lending authority expired July 1, 1947.

Section 3 of the Federal Farm Mortgage Corporation Act (12 U. S. C. 1020b) provides that the capital stock of the Corporation shall be in the sum of $200,000,000, subscribed by the Governor of the Farm Credit Administration on behalf of the United States. For the purpose of such subscription, the $200,000,000 fund which previously had been made available to the land bank commissioner, together with the notes and mortgages which had already been taken by the Commissioner, were by the act expressly transferred to the Corporation. Under the authority of subsequent statutory enactments the Corporation has repaid to the Secretary of the Treasury on l^phalf of the United States $199,990,000. The proceeds of such repayments are held in a revolving fund in the Treasury of the United States, available for future subscriptions to capital of the Corporation. It is contemplated that the outstanding capital stock of $10,000 will remain unchanged during the fiscal years 1949 and 1950.

With the approval of the Secretary of the Treasury the Corporation had authority to issue and have outstanding at any one time bonds in the aggregate amount not to exceed $2,000,000,000. The Corporation, with the approval of the Secretary of the Treasury, prescribed the terms and conditions of the bonds, the rate of interest, the manner of issuance, and the price at which they would be sold. The bonds are fully and unconditionally guaranteed both as to principal and interest by the United States, and all redemptions, purchases, and sales of bonds of the Corporation by the Secretary of the Treasury are required to be treated as public debt transactions of the United States. The Corporation has issued no bonds to the public since approval of the public debt act of 1941; however, when necessary it has sold short-term bonds to the Treasury of the United States. The bond issuance authority of the Corporation was reduced to $500,000,000 by the Government Corporations Appropriation Act of 1949.

The services and facilities of the Farm Credit Administration (central office), Federal land banks, and national farm loan associations are utilized to carry out the functions of the Corporation.

ANALYSIS OF BUDGET PROGRAM

In appraising the budgetary requirements of the Corporation for the fiscal year 1950 it is necessary to recognize the effect that economic conditions may have upon the activity of the Corporation, that the lending authority of the Corporation expired July 1, 1947, and that the Corporation's activities during the fiscal year 1950 will be restricted to the servicing of its assets. The extent to which these activities were carried on during the fiscal year 1948 and the projected levels for the fiscal years 1949 and 1950 are shown in statements A and C immediately following the narrative.

Administrative expenses.—Administrative expenses represent reimbursements to the Federal land banks for services performed as agent of the Corporation and the land bank commissioner in servicing commissioner loans, payment to the United States Treasury and the Federal Reserve banks for expenses in handling bond transactions and checking accounts for the Corporation, cost of audit by the General Accounting Office, and miscellaneous items. Total administrative expenses for the fiscal year 1948 amounted to $2,270,623 whereas these expenses for the fiscal years 1949 and 1950 are estimated at $1,797,000 and $1,500,000 respectively, reflecting decreases of $473,623 and $297,000. (For further detail see statement B and schedules following the authorizing language.)

EFFECT ON THE GOVERNMENT BUDGET

Operations during the fiscal year 1948 resulted in a net budgetary receipt of $60,689,967 representing primarily the liquidation of loans and notes receivable. The estimates of net budgetary receipts for the fiscal years 1949 and 1950 are $26,210,184 and $14,912,400, respectively, representing primarily the liquidation of loans receivable.

OPERATING RESULTS

Operating income of the Corporation for the fiscal year 1948 amounted to $6,144,988 whereas such income for the fiscal years 1949 and 1950 is estimated to be only $4,099,300 and $3,068,700, respectively. This anticipated decrease in income results primarily from the diminishing balance of loans and other interest-bearing assets.

Expenses of the Corporation, exclusive of charge-offs, for the fiscal year 1948 were $2,692,978; comparable expenses for 1949 and 1950 are estimated to be $2,026,900 and $1,721,500, respectively. Again the decreases are due primarily to the reduced volume of assets to be serviced.

Net income for the fiscal year 1948, after adjustment of reserves for losses, amounted to $17,535,369. It is forecast that the Corporation will have similar net income during the fiscal years 1949 and 1950 of $4,702,800 and $3,072,700, respectively (see statement B),

Digitized for FRASER

Federal Reserve Bank of St. Louis

FINANCIAL CONDITION

Loans receivable.—Mortgage loans, purchase money mortgages, sales contracts, etc., outstanding as of June 30, 1948, amounted to $93,582,532. If satisfactory farm commodity prices and generally improved agricultural conditions, which have enabled farmer borrowers to retire their debts in advance, prevail during the fiscal years 1949 and 1950, it is estimated that liquidations during those years will amount to $23,883,000 and $13,500,000, respectively.

Bonds payable.—The Corporation had funds on deposit with the United States Treasury for the liquidation of all matured bonds held by the public at June 30, 1948, amounting to $1,737,800 and matured interest thereon of $166,330. As of that date there were no unmatured bonds outstanding. Although it is proposed that authority to borrow up to $500,000,000 be continued, it is not contemplated that borrowed funds will be required during the fiscal years 1949 and 1950.

Capital stock.—Capital stock in the amount of $990,000 was returned to the United States Treasury during the fiscal year 1948 leaving stock outstanding of only $10,000 at the end of that year. It is not contemplated that there will be a further reduction in this amount.

Earned surplus.—Earned surplus at June 30, 1948, amounted to $122,972,426. It is estimated that earned surplus at June 30, 1949 and 1950 will be $59,675,226 and $62,747,926, respectively. The decrease in 1949 results from statutory requirement to pay dividends of $68,000,000 during the year.

Dividends.—Pursuant to a provision contained in the Government Corporations Appropriation Act, 1949, the Corporation is required to declare and pay into the General Fund of the Treasury during 1949 a dividend amounting to $68,000,000. Payments of $40,000,000 and $10,000,000 were made on July 28 and December 1, 1948, respectively; the remaining $18,000,000 will be paid within the current fiscal year if the Corporation's realization from liquidations is as forecast. The Budget submission for 1950 proposes language deferring dividend payments until after the close of business each fiscal year which would permit determination of the amount available for such payments. Since the proposed language does not preclude payments prior to the end of the fiscal year, it will be the policy of the Corporation to pay dividends during the year if funds in excess of operating requirements are available.

Advances to Farm Credit Administration central office for services and facilities furnished and examinations made	292,079		173,900		175, 800	
		2, 692, 978		2,026,900		1,721, 500
To retirement of borrowings and capital:						
Retirement of bonds held by U. S. Treasury	21, 000, 000					
Retirement of bonds held by public	687, 200		350,000		250,000	
Return of paid-in capital to U. S. Treasury	990,000					
		22, 677, 200		350,000		250,000
To dividend payment to U. S. Treasury				68,000,000		
To increase in working capital:						
Cash in U. S. Treasury checking account		37,957,412				14, 662,400
Other working capital items		1, 616, 769				32,300
Total funds applied		66, 517,972		70,393,900		16,683,200
FUNDS PROVIDED						
By realization of assets:						
Repayments of principal of mortgage loans, purchase money mortgages, sales contracts and other	38, 757,335		23, 883,000		13,500,000	
Sale of acquired security or collateral (statement B)	437,696		149,000		114,500	
		39,195,031		24,032,000		13,614,500
By income (statement B):						
Interest income:						
Mortgage loans	5,171,744		3, 780,000		2, 816,000	
Purchase money mortgages, sales contracts, and other	521,186		288,100		226, 200	
Notes receivable, Federal land banks	205,685					
Other income:						
Fee income	2,164					
Recovery on loans receivable charged off	44, 317		27, 300		23,100	
Recovery on acquired security charged off	6,827		2,800		2,300	
Expense credits and prior year adjustments	190, 613					
Miscellaneous	2, 452		1,100		1,100	
		6,144,988		4,099,300		3,068, 700
By decrease in working capital:						
Cash in U. S. Treasury checking account				42,139,816		
Accounts and notes receivable		21,177,953				
Other working capital items				122, 784		
Total funds provided		66. 517.972		70,393,900		16,683,200

EFFECT ON THE GOVERNMENT BUDGET

Checking account expenditures:						
Increase (—) or decrease of cash in U. S. Treasury checking account		-$37, 957, 412		$42,139,816		-$14,662, 400
Less:						
Retirement of bonds held by U. S. Treasury	$21,000,000					
Retirement of bonds held by public	687, 200		$350,000		$250,000	
Dividend payment to U. S. Treasury			68,000,000			
		21,687,200		68,350,000		250,000
Net expenditure (or credit) in checking accounts		-59,644,612		-26,210,184		-14,912,400
General and special account expenditures:						
Return of capital to U. S. Treasury		-990,000				
Total expenditure (or credit (—)) in budget accounts		-60,634,612		-26,210,184		-14,912,400
Deduct general and special account receipts:						
Interest expense on bonds held by U. S. Treasury		55,355				
Deposits in transit		2, 889				
Net effect on Government Budget		-60,692,836		-26,210,184		-14,912,400

Total obligations			

ESTIMATES OF AUTHORIZATION RELATING TO CORPORATE FUNDS

NOTE.—The text of general authorizing language, as incorporated in The Government Corporations Act, 1949, and as proposed for 1950, will be found immediately following the summary statements at the beginning of part III of the Budget.

Administrative Expenses, Federal Farm Mortgage Corporation—

Federal Farm Mortgage Corporation: Not to exceed **[$2,000,0001** *$1,500,000* (to be computed on an accrual basis) of the funds of the Corporation shall be available for administrative expenses, including employment on a contract or fee basis of persons, firms, and corporations for the performance of special services, including legal services, and the use of the services and facilities of Federal land banks, national farm loan associations, Federal Reserve banks, and agencies of the Government as authorized by the Act of January 31, 1934 (12 U. S. C. 1020-1020h); and said total sum shall be exclusive of *services and facilities furnished and examinations made by the Farm Credit Administration central office,* interest expense, and expenses in connection with the acquisition, operation, maintenance, improvement, protection, or disposition of real or personal property belonging to the Corporation or in which it has an interest: *Provided,* That **[of** the funds available to the Corporation for administrative expenses, not to exceed $244,000 shall be available for payment to the Farm Credit Administration for supervisory or other services rendered: *Provided further,* That prior to June 30, 1949, not less than $68,000,000, and all additional cash funds in excess of operating requirements for the fiscal year **1949,]** *promptly after June 30 of each fiscal year all cash funds in excess of the estimated operating requirements for the current fiscal year* shall be declared as dividends and paid into the general fund of the Treasury: *Provided further,* That the aggregate amount of bonds the Corporation may issue and have outstanding at any one time shall not exceed $500,000,000. *(The Government Corporations Appropriation Act, 1949.)*

PURPOSE AND FINANCIAL ORGANIZATION

The 12 Federal intermediate credit banks were organized pursuant to the Agricultural Credit Act of 1923 (12 U. S. C. 1021-1022). They serve as banks of discount for agriculture and do not make loans directly to individuals or accept deposits of funds otherwise than as collateral security. They are supervised by the intermediate credit commissioner, who is responsible to the Governor of the Farm Credit Administration (12 U. S. C. 638; E. O. 6084, Mar. 27, 1933). Each bank operates under the direction of a district farm credit board (12 U. S. C. 640b and 640d).

The paid-in capital of each bank is $5,000,000, a total of $60,000,000 for the system, paid in by the Secretary of the Treasury (12 U. S. C. 1061). In June 1948, $500,000 of paid-in surplus was supplied to the Federal Intermediate Credit Bank of Columbia, S. C, out of the revolving fund of $40,000,000 created by section 15a of the Federal Farm Mortgage Corporation Act (Public, No. 88, 73d Cong., approved Jan. 31, 1934).

ANALYSIS OF BUDGET PROGRAM

Lending program.—The volume of credit to be granted during the fiscal year ending June 30, 1950, is estimated at $1,789,752,000, an increase of nearly $372,000,000 over the 1948 volume. The actual volume may vary substantially from the amount estimated, since the demand for credit is governed largely by conditions over which the banks have no control. Factors of major consequence contributing to the large volume of loans and discounts include higher production and marketing costs, changes in the pattern of farming, and increasing purchases of equipment needed to reduce labor costs. The filling of feed lots has required substantially more money than formerly because of the high cost of feeder livestock. In addition, a substantial number of individual borrower's accounts have reached the banks as a result of farmers and stockmen informing their neighbors of the credit services available through concerns rediscounting with the credit banks. Only a minor part of the increase is due to retrenchment by other lenders in the short-term agricultural credit field since loans offered to the banks are accepted for discount only if the financial condition and farming operations of the note makers are found to be on a sound basis.

Financing program.—To finance their lending operations during the fiscal year 1950 the intermediate credit banks expect to issue consolidated debentures, and borrow from commercial banks for short periods, in the amount of $1,135,040,000. The United States Government assumes no liability for the debentures or other obligations of the Federal intermediate credit banks (12 U. S. C.1043).

Administrative expenses.—Administrative expenses for the fiscal year 1950 are estimated at $1,398,000, compared with $1,335,000 for 1949, a net increase of $63,000, Included in these expenses are amounts for pay increases comparable to Public Law 900 of $94,070 for 1950 and $85,000 for 1949. A supplemental authorization will be requested for the latter amount for the fiscal year 1949.

The entire increase of $63,000 is budgeted for additional salary costs and provides for 14.6 additional employees (on a net man-year basis) for the 12 banks.

EFFECT ON GOVERNMENT BUDGET

Operations during the fiscal year 1948 resulted in a net expenditure of $1,175,624. It is estimated that there will be a net expenditure of $558,388 in the fiscal year 1949 and a net budgetary receipt of $245,100 in 1950. The net expenditure in 1948 reflects the general account expenditure of $500,000 for the United States Treasury subscription to paid-in surplus of the Federal Intermediate Credit Bank of Columbia, S. C.

OPERATING RESULTS

The net income of the intermediate credit banks for the year ending June 30, 1950, is estimated at $1,507,400, compared with $1,375,500 estimated for 1949 and $1,512,723 earned in 1948. The 1948 income included a nonrecurring credit of $490,532, representing premiums previously written off on United States securities purchased. That portion of such premiums applicable to the noncallable life of the securities was reinstated.

Income.—Gross income from loans and discounts is estimated at $13,094,000 for 1950, compared with $6,946,312 earned in 1948. On October 1, 1948, the lending rate of all of the banks was 2 percent per annum. The rate in Puerto Rico is 2.5 percent. (Under the regulations of the Farm Credit Administration, as amended January 1, 1948, the rate of interest paid by note makers on paper discounted or purchased by an intermediate credit bank may not exceed the discount rate of the bank by more than 4 percent per annum.) Income from Government obligations owned by the banks is estimated at $1,041,000 for 1950, compared with $1,042,681 earned in 1948.

Expenses.—All expenses of the banks are paid out of their income. Interest and other costs on debentures and other borrowed money are estimated at $10,950,900 for 1950, compared with costs of $5,397,199 in 1948. The average cost of money obtained through sales of debentures for the year 1948 was 1.48 percent per annum, compared with 1.13 percent during the previous year. Interest costs are estimated for budget purposes at 1.70 for 1949 and 1.80 for 1950. These costs may be exceeded if recent upward trends in short-term money rates continue.

Surplus reserves.—Out of earnings for the year ending June 30, 1950, the banks expect to transfer to reserve for contingencies the sum of $535,000, compared with $800,000

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

so credited in 1948. It is estimated that $729,300 will be added to earned surplus account at June 30, 1950, compared with $534,542 credited to surplus in 1948.

Franchise taxes.—Franchise taxes, pursuant to 12 U. S. C. 1072, payable out of earnings for the fiscal year 1950 are estimated at $243,100, compared with $178,181 for 1948. Total franchise taxes paid by the banks since organization aggregate $7,358,856.

FINANCIAL CONDITION

Loans and discounts.—Loans and discounts outstanding at June 30, 1948, amounted to $565,340,676, an increase of 40 percent over the June 30, 1947, balance. No loss to the intermediate credit banks is in prospect on any loans and discounts outstanding on June 30, 1948. Miscellaneous notes and accounts receivable amounted to $489,357 at June 30, 1948.

Investments.—At June 30, 1948, the banks held public debt obligations of the United States with a par value of $43,150,800, carried at an amortized cost of $43,585,148. These investments are an important factor in enabling the banks to obtain funds in the investment markets at reasonable rates for the benefit of agriculture. They are utilized from time to time as collateral for short-term bank borrowings and, in the event of serious difficulty in marketing debentures, could be sold.

Liabilities.—Unmatured consolidated debentures and notes payable outstanding on June 30, 1948, amounted to $528,325,000. Matured debentures and interest thereon in the amount of $479,081 were covered by a like amount on deposit with the Treasurer of the United States.

Capital funds.—At this time no change in capital funds invested in the banks is contemplated in either 1949 or 1950.

Borrowing authority.—The aggregate amount of debentures and other similar obligations which any Federal intermediate credit bank may have outstanding may not exceed 10 times the surplus and paid-in capital of such bank (12 U. S. C. 1041). The banks have no assurance that debentures in an amount approaching their legal borrowing capacity can be sold. At June 30, 1948, the ratio of outstanding debentures and notes payable to the capital and surplus of the system was *5%* to 1, which is the highest ever attained. The point at which buyer resistance may develop with resulting higher interest costs, if the ratio position of the banks is not improved, will depend to a considerable extent upon the money markets and general economic conditions affecting agriculture.

PURPOSE AND FINANCIAL ORGANIZATION

The Farm Credit Act of 1933 (12 U. S. C. 1131 et seq.) provided for the organization of the production credit system to provide permanent credit facilities especially adapted to the short-term credit requirements of agriculture. The system includes a production credit corporation in each of the 12 farm credit districts and 503 local production credit associations. The corporations were established to (1) organize, (2) partially capitalize, and (3) supervise the local production credit associations which make loans to farmers and stockmen and obtain most of their loanable funds by discounting farmers' notes with, and other borrowing from, the Federal intermediate credit banks.

A revolving fund of $120,000,000 was provided in 1933 for the capitalization of the 12 production credit corporations (12 U. S. C. 11311), in accordance with the credit needs of their respective districts. The revolving fund will be reduced to $90,000,000 in 1949 through the required payment of $30,000,000 of capital to the surplus fund of the Treasury (Public Law 860, 80th Cong.). It is anticipated that at June 30, 1950, the paid-in capital of the corporations will total $42,235,000 and that $47,765,000 will be available in the revolving fund representing the total of the annual capital repayments to the Treasury which were made by the corporations from 1944 through 1948 and anticipated payments to the revolving fund of $5,400,000 in 1949 and $4,000,000 in 1950.

The capita] of the production credit corporations and most of their surplus is invested in class A stock of production credit associations and in United States Treasury bonds.

Each of the 12 production credit corporations operates within its own financial structure under its district farm credit board of directors (12 U. S. C. 1131).

ANALYSIS OF BUDGET PROGRAMS

Organizing production credit associations.—Production credit associations have been established to serve all of the Continental United States and Puerto Kico (12 U. S. C. 1131c and 1131d.) A typical association serves about five or six counties with two field offices in addition to its main office.

Capitalizing production credit associations.—When the local production credit associations were organized, their initial capital was provided by the district production credit corporations (12 U. S. C. 1131c). As farmers and stockmen obtained loans, they purchased capital stock in their local associations, and it was intended that ultimately the capital stock originally provided by the production credit corporations would be retired in full and the associations would be wholly owned by their members. To maintain the capital structure of their associations on a sound basis in relation to loan volume and to hasten farmer ownership, many farmers and stockmen have purchased extra stock in excess of legal requirements for their loans. Many other farmers have retained their stock after repaying their loans. Much progress has been made toward the objective of complete local ownership of the associations as shown by the "Program highlights" at the beginning of this statement.

In developing long-term financial plans for their associations under the leadership of the corporations and in encouraging members to buy substantial amounts of extra stock, the directors of the local associations have had in mind the urgent need for maintaining a dependable short-term credit system which will not run out of funds in an emergency. The local associations need a source from which substantial amounts of supplemental capital will be available immediately, at least for temporary periods if required by contingencies which develop.

Substantial readily available resources in the form of investments in United States Government bonds are maintained by the production credit corporations to enable them to meet the sound needs of the local associations for such supplemental capital when required and to provide tangible assurance to the directors and members of the associations that the production credit corporations are able to provide such capital.

It is estimated that at June 30, 1950, the corporations will hold $35,986,634 of United States Government bonds, an amount equal to 3.6 percent of the anticipated volume of loans of the production credit associations in that year.

Capital stock of associations purchased by the production credit corporations ordinarily is paid for by the corporations selling United States Government bonds to the associations at par value under repurchase agreements, subject to the right and obligation of the corporations to repurchase the bonds at par value. These repurchase agreements have applied to most of the bonds acquired by the associations in the past. However, as associations attain complete local ownership, their bond investments are made by them at market prices and subject to all investment risks. The corporations' obligations under the repurchase agreements are of major amounts but are decreasing substantially.

Supervising production credit associations.—Under the Act (12 U. S. C. 113Id et seq.) and regulations thereunder, the corporations are charged with supervision of the associations with broad authorities. Each association operates under its own board of directors elected by the local stockholders. The corporations guide the associations in building their own local credit institutions soundly. In their supervision the corporations have emphasized (1) sound and constructive credit service !to farmers, (2) efficient, economical, and sound operations, (3) good service throughout the associations' territories,

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

(4) building up of adequate reserves, (5) ownership of the associations by their member stockholders, (6) training, and (7) decentralization. The policies of training and decentralization enable the corporations to function with relatively small staffs, a majority of whom are working directly with association directors and officers, largely through contacts at the association offices and occasional group meetings for neighboring associations. It is estimated that in 1950 there will be one corporation employee for each $5,491,000 of loans made by the local associations.

Supervision of loan policies is of special importance now since the associations are receiving a large volume of loan applications, and historically, unsound credit in times of high income causes major losses when prices decline and farm profits disappear. The corporations aid the associations in working out a well-balanced loan policy for extending needed credit to farmers and stockmen who have a sound operation or for whom a sound program can be developed. The corporation's review of credit activities includes an annual credit examination of loans, for which the associations are assessed.

Administrative expenses.—The administrative expenses of the production credit corporations relate primarily to the function of supervising production credit associations. The personnel of the 12 production credit corporations as estimated for both 1949 and 1950 totals 182.1 (net permanent, average number) as compared with 198.4 in 1948. On the average, each of the 12 production credit corporations serves 4 States with a personnel strength, as estimated for 1950, of 15.2 comprised of 3 senior officers, a field force of 5.4 employees, and other personnel, 6.8.

The estimated administrative expenses in 1950 of the 12 corporations are $1,328,000, an increase of $60,000 over the amount approved for 1949, exclusive of the assessed expenses of the Farm Credit Administration, Washington, D. C. This increase results from the cost of $60,275 in 1950 of pay increases comparable to Public Law 900 less $275 savings in other items. The personnel, travel funds, and other expenses estimated for 1950 are essential in view of the increasing association loan volume and the importance of adequate supervision of credits and operations under anticipated economic conditions.

EFFECT ON GOVERNMENT BUDGET

Operations during the fiscal year 1948 resulted in a net budgetary receipt of $11,258,999. It is estimated that the net budgetary receipt during the fiscal years 1949 and 1950 will be $35,078,975 and $4,000,000, respectively. These amounts reflect the return of paid-in capital to the revolving fund and to miscellaneous receipts of the Treasury.

OPERATING RESULTS

Net income in 1948 amounted to $634,052. Net losses of $29,900 and $627,500, respectively, are estimated for 1949 and 1950.

The operating results in 1948 were affected by two changes in accounting policy made in accordance with the recommendations of the General Accounting Office. First, the corporations recorded their liability for the value of accrued annual leave at June 30, 1948, in the amount of $228,966. Second, the corporations established on their books the unamortized premium of $601,984 on their bond investments.

FINANCIAL CONDITION

Investments in class A stock of production credit associations.—On June 30, 1948, the corporations had investments of $30,940,600 in class A stock of associations against which valuation reserves of $65,400 had been established to provide for all foreseeable losses. The corporations' investments in class A stock are expected to be further reduced to $25,920,100 in 1949, and to $21,770,100 at June 30, 1950.

United States securities.—The corporations' investments in United States securities amounted to $66,471,634 (amortized cost) at June 30, 1948. The investments are expected to be reduced to $36,470,634 in 1949, and to $35,986,634 at June 30, 1950.

Capital stock.—Annual repayments to the revolving fund starting in 1944 had reduced the paid-in capital of the corporations from $120,000,000 to $81,635,000 at June 30, 1948. Pursuant to Public Law 860, Eightieth Congress, $30,000,000 is being returned to the surplus fund of the Treasury during 1949. Also, it is expected that $5,400,000 will be returned to the revolving fund in 1949 and $4,000,000 in 1950, reducing the paid-in capital of the corporations to $42,235,000 at June 30, 1950. There will be no adequate basis for measuring the ultimate long-term capital and surplus needs of the production credit corporations until the system has weathered a period of falling or continued lower prices for farm products. However, past experience in agricultural credit has demonstrated the need for adequate capital resources in such a system.

Earned surplus.—It is required that the corporations accumulate surpluses of at least 25 percent of their paid-in capital (12 U. S. O. 1131c (c)). At June 30, 1948, the surpluses of the corporations aggregated $16,761,030, or 20.5 percent of their paid-in capital. Their surplus not only safeguards the paid-in capital against impairment, but also directly influences the amount of paid-in capital required,

ESTIMATES OF APPROPRIATION

Farm Credit Administration, Revolving Fund, Department of Agriculture—

This is a revolving fund created for the purpose of capitalizing the production credit corporations. This fund is available for investment in the capital stock of the 12 production credit corporations on call by the Governor of the Farm Credit Administration upon his approval of requests by the boards of directors of the corporations (12 U. S. C. 1131b).

	1948 actual	1949 estimate	1950 estimate
FUNDS AVAILABLE FOR OBLIGATION			
Retirement of investments in production credit corporations' capital stock	$11,015,000	$5,400,000	$4,000,000
Prior year balance available	27,350,000	38,365,000	43, 765,000
Total available for obligations	38,365,000	43,765,000	47,765.000
Balance available in subsequent year	-38,365,000	-43, 765,000	-47, 765,000
Total obligations			

ESTIMATES OF AUTHORIZATION RELATING TO CORPORATE FUNDS

NOTE.—The text of general authorizing language, as incorporated in The Government Corporations Appropriation Act, 1949, and as proposed for 1950, will be found immediately following the summary statements at the beginning of part III of this Budget.

Administrative Expenses, Production Credit Corporations—

Production credit corporations: Not to exceed [$1,500,000] *$1,828,000* (to be computed on an accrual basis) of the funds of the corporations shall be available for administrative expenses, including the purchase of [not to exceed three J *one* passenger motor vehicle[s Qfor replacement only[)], *and* services performed for the corporations by other Government agencies *{except services and facilities furnished and examinations made by the Farm Credit Administration central office))* and said total sum shall be exclusive of interest expense, legal and special services performed on a contract or fee basis, and expenses in connection with the acquisition, operation, maintenance, improvement, protection, or disposition of real or personal property belonging to the corporations or in which they have an interest [: *Provided,* That of the funds available to the corporations for administrative expenses, not to exceed $232,000 shall be available for payment to the Farm Credit Administration for supervisory or other services rendered: *Provided,* That prior to June 30, 1949, the corporations shall return Government capital aggregating not less than $30,000,000 to the Treasury of the United States to be carried to the surplus fund and covered into the Treasury, and the Governor of the Farm Credit Administration is authorized and directed to cancel the capital stock of the corporations in par value amount equal thereto J. *{The Government Corporations Appropriation Act, 1949.)*

PURPOSE AND FINANCIAL ORGANIZATION

The regional agricultural credit corporations were established pursuant to section 201 e of the Emergency Relief and Construction Act of 1932 (12 U. S. C. 1148) to make loans to farmers and stockmen for agricultural purposes. Originally there were 12 regional agricultural credit corporations, 1 in each Federal land bank district. These corporations were supervised and controlled by the Reconstruction Finance Corporation until May 27, 1933, when such supervision and control was transferred to the Farm Credit Administration by Executive Order 6084, dated March 27, 1933. Pursuant to the authority contained in the Farm Credit Act of 1937 (12 U. S. C. 1148c) the 12 corporations have since been merged into a single corporation, the Regional Agricultural Credit Corporation of Washington, D. C.

The capital stock of the regional agricultural credit corporations was subscribed and paid for by the Reconstruction Finance Corporation (12 U. S. C. 1148). The stock was held by the Reconstruction Finance Corporation on behalf of the United States until March 22, 1938, when, pursuant to Executive Order 7848, it was transferred to the Secretary of the Treasury to be held for and on behalf of the United States. The maximum capital stock of the 12 corporations issued and outstanding amounted to $44,500,000, of which only $100,000 was outstanding at June 30, 1948. The balance of $44,400,000 is deposited in a revolving fund in the United States Treasury; however, subscriptions during the fiscal year 1949 are limited to $25,000,000 in accordance with the Government Corporations Appropriation Act of 1949 (Public Law 860). Administrative expenses of the corporations through June 30, 1947, were paid by advances amounting to $21,960,000 by the Reconstruction Finance Corporation which were reflected on the Corporation's books as paid-in surplus (12 U. S. C. 1148). In November 1947,^12,500,000 of the foregoing amount was deposited into miscellaneous receipts of the Treasury reducing the paid-in surplus to $9,460,000.

ANALYSIS OF BUDGET PROGRAM

In appraising the budgetary requirements for the fiscal year 1950 it is assumed that the Corporation will continue the orderly liquidation of loans and advances made under its various loan programs and will make loans and advances for specific agricultural purposes as authorized by the Secretary of Agriculture pursuant to section 2 of the Agriculture Appropriation Act of 1949. An amendment to this section contained in the Department of Agriculture Appropriation Act, 1949, provides that the Secretary of Agriculture may authorize the Regional Agricultural Credit Corporation to reenter an area or region where an economic emergency or production disaster has occurred. Notwithstanding an authorization of administrative expenditures for the fiscal year 1949 of $100,000 for such a program, no loan program has been provided for in the budget submission under said provisions for the fiscal year 1949 or 1950, as no affirmative action has been taken by the Secretary to utilize the foregoing authorization. In addition to the foregoing, the Government Corporations Appropriation Act, 1949 (Public Law 860), authorized the making of loans to bona fide fur farmers. It is anticipated that loans under this program will amount to $2,000,000 in 1949 and $2,800,000 in 1950.

The following is a tabulation of the liquidation program by types of loans:

Progress in liquidation as of June 30, 1948

Restricted area loans:			
Loans and advances (December 1943 through June 30, 1948) [3]		$7,961,101	
Less:			
Repayments i	$7,768,584		
Transfers to assets acquired	7,478		
Charge-off s	30,451		
		7,806, 513	
Balance outstanding (1.94 percent)			$154,588
Food production loans and advances:			
Loans and advances (February 1943 through June 30, 1948) *		$69,316,108	
Less:			
Repayments i	$63,215,707		
Transfers to assets acquired	419, 208		
Charge-offs	1,010,955		
Cancellations	3,531,304		
		68,177,174	
Balance outstanding (1.64 percent)			1,138,934
Fruit loans, Wenatchee area:			
Loans and advances (March 1941 through June 30, 1948)		$34, 679,581	
Less:			
Repayments	$34,367,020		
Charge-offs	9,904		
		34, 376, 924	
Balance outstanding (0.87 percent)			302,657
Other loans:			
Loans and advances (October 1932 through June 30, 1948) i		$550,102,892	
Less:			
Repayments i	$546,709,389		
Transfers to assets acquired	666, 231		
Charge-offs	2,714,372		
		550,089,992	
Balance outstanding (0.002 percent)			12,900
Sales contracts, notes receivable, etc			25,192
Advances for borrowers			3,213
Total outstanding			1,637,484

[1] Includes renewals.

NOTE.—Beginning of period shown in foregoing is beginning of the program.

Administrative expenses.—The estimate of $90,000 of administrative costs for the fiscal year 1950 (including pay increase comparable to Public Law 900 of $4,200) covers the cost of the administration of the fur farm program, the liquidation of prior year loans and advances, and the audit by the General Accounting Office.

EFFECT ON GOVERNMENT BUDGET

The Corporation's operations for the fiscal year 1948 resulted in a net budgetary receipt of $224,690. It is estimated that during the fiscal year 1949 there will be a net budgetary expenditure of $780,800 and in 1950 a net budgetary receipt of $36,700. The change from a net budgetary receipt in fiscal year 1948 to a net budgetary expenditure in fiscal year 1949 reflects the initiation of the fur loan program.

Federal Reserve Bank of St. Louis

OPERATING KESULTS

During the fiscal year 1948 programs carried on by the Corporation resulted in a net loss of $132,805 after provisions for all foreseeable losses and adjustment of reserves for losses. It is estimated that net losses of $71,000 and $59,500 will be sustained in the fiscal years 1949 and 1950, respectively. As a result of these losses it is estimated that the Corporation's financial statements will reflect a deficit of $7,973,324 as of June 30, 1950.

FINANCIAL CONDITION

Loan account.—As of June 30, 1948, there were 3,805 loans outstanding amounting to $1,637,484 (including sales contracts, notes receivable, etc.) against which there were maintained reserves of $1,304,659. It is anticipated that the amount of loans outstanding will increase to $2,848,584 as of June 30, 1949, and decrease to $2,477,-496 as of June 30, 1950. These changes in loans outstanding reflect primarily the operations of the fur loan program which was initiated during the fiscal year 1949.

Capital funds.—It will be necessary to increase the capital stock by $900,000 in the fiscal year 1949 and $400,000 in the fiscal year 1950 in order to meet requirements in connection with loans to bona fide fur farmers. The additional capital will be subscribed from the revolving fund maintained in the Treasury and available for this purpose.

FEDERAL LAND BANKS

At a time of national economic distress the Congress, by an amendment to the Federal Farm Loan Act, approved January 23, 1932 (12 U. S. C. 698), provided for subscription by the Secretary of the Treasury on behalf of the United States of $125,000,000 of capital stock in the 12 Federal land banks. This $125,000,000 has all been repaid and now constitutes a revolving fund available for subscription to capital stock by the Secretary of the Treasury upon application by any Federal land bank, made with the approval of the Farm Credit Administration.

For a 5-year period ending July 10, 1938, Congress provided that borrowers from the Federal land banks need not pay currently the principal installments on their loans if they were not otherwise in default (12 U. S. C. 771 (Twelfth)). To provide the banks with funds to use in their operations in place of amounts extended or deferred, the Emergency Farm Mortgage Act, approved May 12, 1933, provided for subscriptions to their paid-in surplus by the Secretary of the Treasury (12 U. S. C. 781 (Tenth)). For this purpose a total of $189,000,000 was appropriated in 1933 and subsequent years, all of which has been repaid by the banks and now constitutes a revolving fund in the Treasury available for future subscriptions to paid-in surplus. Such subscriptions can be made only on account of extensions made by the banks to borrowers and with the approval of the land bank commissioner.

The Federal Farm Loan Act contemplates a cooperative farm mortgage loan system to be owned and operated by the farmers who use the services of the system, subject to Federal supervision. This objective has been kept constantly in mind and the Federal land banks are now completely owned by farmers. The Federal land bank system as a farmers' cooperative credit system aims to operate on its own resources even under periods of agricultural distress and its interest rate and other operating policies are designed to make this possible insofar as conditions can be foreseen and met by prudent business practices.

The Federal land banks and national farm loan associations have greatly strengthened their net worth positions and it is considered they have sufficient resources to carry their worthy members and prospective members through most periods of distress. In view of this circumstance and in keeping with the afore-mentioned objectives, appropriation language follows which will return the total appropriation of $189,000,000 now in the paid-in surplus revolving fund to the surplus fund of the Treasury. Substantive language will be submitted later to provide for the repeal of the law creating the revolving fund and the authority for its use for subscription to the paid-in surplus of the 12 banks.

In the event the Federal land banks are again called upon to finance a major portion of the outstanding farm mortgage debt, it is believed they have sufficient net worth to enable them to handle a substantial portion of such financing. However, if these demands should reach the proportions they assumed during 1933, 1934, and ensuing years, the strain upon the banks might be such that their net worth position would not be adequate. Therefore, it is believed that the capital stock revolving fund should be preserved, although it is recognized that these funds will be resubscribed in the Federal land banks only in the event of a period of severe economic distress and if such a course be advisable in the public interest.

ESTIMATES OP APPROPRIATION

Subscriptions to Capital Stock, Federal Land Banks, Revolving Fund, Office of the Secretary, Treasury Department—

Under an amendment to the Federal Farm Loan Act, the Secretary of the Treasury, on behalf of the United States, subscribed to $125,000,000 of capital stock of the 12 Federal land banks. Funds repaid by the 12 banks are deposited in this revolving fund, available for further subscription to the stock of any of the 12 Federal land banks, on the request of the directors thereof, made with the approval of the Farm Credit Administration. These funds are made available on *call* by the Secretary of the Treasury upon request of the board of directors of any land bank with the approval of the Farm Credit Administration (12 U. S. C. 698).

	1948 actual	1949 estimate	1950 estimate
FUNDS AVAILABLE FOR OBLIGATION			
Pri or year balance available	$125,000,000	$125,000,000	$125,000,000
Balance available in subsequent year	-125,000,000	-125,000,000	-125,000,000
Total obligations			

Subscriptions to Paid-in Surplus, Federal Land Banks, Revolving Fund, Office of the Secretary, Treasury Department—

Under an amendment to the Federal Farm Loan Act, the Secretary of the Treasury, on behalf of the United States, was required to subscribe to the paid-in surplus of any of the 12 Federal land banks in an amount equal to the amount of extensions and deferment of payments granted on mortgage loans held by the banks. Repayments made by the 12 banks are held in this revolving fund. Authority to obtain further subscriptions on account of deferments granted expired on July 11, 1938. Authority to obtain further subscriptions on account of extensions granted still exists. The fund is made available on call by the Secretary of the Treasury upon request of any Federal land bank qualifying for subscription thereto with the approval of the Land Bank Commissioner (12 U.S. C. 771,781).

FUNDS AVAILABLE FOR OBLIGATION			
Prior year balance available	$189,000,000	$189,000,000	
Balance available in subsequent year	-189,000,000		
Carried to surplus fund		-189,000,000	
Total obligations			

KEDUCTTONS IN APPROPRIATION

Amounts available from appropriations are hereby reduced in the sums hereinafter set forth, such sums to be carried to the surplus fund and covered into the Treasury immediately upon the approval of this Act:

The total amount of $189,000,000 in the revolving fund appropriated to the Office of the Secretary, Treasury Department, for subscriptions to the paid-in surplus of the Federal land banks, as authorized by the Federal Farm Loan Act, as amended {12 U. S. C. 781 (Tenth)).

BANKS FOR COOPERATIVES

The Farm Credit Act of 1933, as amended, provides that capital funds required by the banks for cooperatives would be obtained from the revolving fund of the Agricultural Marketing Act (12 U. S. C. 1134b-1134i) and

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

from cooperatives obtaining loans from the banks (12 U. S. C. 1134k). Present provisions of the law (12 U. S. C. 1134k) make it mandatory that capital stock in the bank for cooperatives owned by a cooperative association which has paid its indebtedness to the bank must be retired and canceled upon request by the association. Because of this requirement the amount of capital stock in the banks owned by farmers' cooperatives ordinarily varies with the amount of loans outstanding and has never constituted more than a comparatively small part of the capital needs of the banks. As of June 30, 1948, stock owned by cooperatives and deposits of cooperatives in the guaranty fund totaled $12,642,500 or only 6.6 percent of the total capital stock of the banks.

The desirability of eventual ownership of the banks for cooperatives by the agricultural cooperatives of the country has been recognized for a number of years. After long consideration a bill to accomplish this objective was introduced in both Houses during the Eightieth Congress. Hearings were held by both Houses and the bill reported out by the House Committee on Agriculture. This proposed legislation provided for the eventual retirement of the capital stock in the banks owned by the Federal Government through (1) the purchase of stock by cooperatives in relation to the amount of interest paid on loans from the banks, (2) the issuance of stock in the form of patronage dividends, and (3) the direct sale of stock to cooperatives.

BANKS FOR COOPERATIVES

Bulk	1,435,630	1,586,100	1,586,100
Cargo ton miles	1,955,913,025	2,075,542,000	2,075,542,000
Railroad tonnage	952,505	979,600	979,600
Net loss	$2,308,401	$1,606,500	$2,315,500

PURPOSE AND FINANCIAL ORGANIZATION

The chartering of the Inland Waterways Corporation in 1924 was an outgrowth of the need for inland water transportation during the First World War. By the Federal Control Act of March 21, 1918, the Director General of Railroads was authorized to purchase, construct, and operate transportation facilities on inland waterways. In accordance with this authority, the Director General commandeered substantially all privately owned vessels on the inland waterways and initiated a program for the construction of new floating equipment. Under the terms of the Transportation Act of 1920, the functions exercised by the Director General of Railroads were transferred to the Secretary of War, who conducted the operations through the Bureau of Inland and Coastwise Waterways Service. When, by 1924, it had become evident that this operation could not be effectively carried on by a typical Government administrative bureau, the Inland Waterways Corporation was created by act of Congress, June 3, 1924 (47 U. S. C. 151). The Corporation was operated under the direction and supervision of the Secretary of War until its transfer to the Department of Commerce in 1939.

The Corporation's chief purpose and objective is to demonstrate the feasibility of water transportation on the inland rivers and to extend the benefits of this service to the people of the United States. The Inland Waterways Corporation accordingly provides the most complete common carrier barge service offered on the Mississippi, Illinois, Missouri, and Warrior Rivers. All types of freight, except livestock and perishables, are transported on 3,300 miles of inland rivers with 24 boats and 268 barges. Operations are conducted through numerous private terminals as well as through 21 general merchandise facilities. A railroad switching facility operating between Port Birmingham, and Ensley, Ala., serves the industrial area in and near Birmingham, Ala., and provides a connecting link between the Corporation's facilities and trunk line railroads serving the southeast.

The Corporation executes the stated policy of Congress to provide transportation services on the Mississippi, Illinois, Warrior, and Missouri Rivers until *(a)* there shall have been completed navigable channels as authorized by Congress; (6) terminal facilities shall have been provided on such rivers reasonably adequate for joint rail and water service; (c) there shall have been published and filed under the provisions of the Interstate Commerce Act, as amended, such joint tariffs with rail carriers as shall make generally available the privileges of joint rail and water transportation upon terms reasonably fair to both rail and water carriers; and *(d)* private persons, companies, or corporations engage in, or are ready to engage in, common carrier service on such rivers. The Corporation has no specified term of existence. Enabling legislation provides, however, that as soon as the foregoing conditions shall have been met the facilities of the Corporation may be sold or leased to private enterprise when such transfer can be made to the best advantage of the Government (49 U. S. C. 153).

The Corporation is managed by the usual general officers appointed by the Secretary of Commerce who also selects the chairman and six members of an advisory board. Statutory provisions require that board members be chosen from "individuals prominently identified with commercial or business interests in territory adjacent to the operations of the Corporation." Each member serves for 5 years with no compensation except reimbursement for travel on Corporation business.

The Corporation's originally authorized capital stock of $5,000,000 was increased in 1928 to $15,000,000 (49 U. S. C. 152). Of this amount $14,000,000 has actually been appropriated through 1949. The Corporation has no authority to issue bonds or to incur other long-term debts. Paid-in surplus of $12,298,189 represents the 1924 appraised value of equipment and facilities turned over by the War Department when the Corporation was chartered.

Merger with the Corporation of the Warrior River Terminal Company, a wholly owned subsidiary formerly operating the railroad-switching facility between Port Birmingham and Ensley, Ala., was approved by the Interstate Commerce Commission on April 13, 1948. Dissolution of the Terminal Company was approved on June 21, 1948, by the State of Alabama, under whose laws it was incorporated.

ANALYSIS OF BUDGET PROGRAM BY MAJOR ACTIVITIES

The budget program of the Inland Waterways Corporation for the fiscal year 1950 consists of four categories: (1) Common carrier operations, (2) capital replacement program, (3) lending activities, and (4) administrative expenses. The level at which the various activities of the Corporation were conducted during the fiscal year 1948 and the projected level for the fiscal years 1949 and 1950 are shown in the statement of sources and application of funds.

COMMON CARRIER OPERATIONS

Budgetary requirements of the Corporation vary markedly with the effect produced on revenues and operating plans by the usual hazards and uncertainties of water transportation. Ice conditions, floods, high and low water, are some of the natural unpredictable factors encountered, for example, while the poor condition of floating and terminal equipment, freight car shortages

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

and work stoppages also disrupt operating plans and reduce revenues.

The Budget estimates are predicated on water-line traffic of 2,117,900 single count tons in 1949 and 1950, an increase over the 2,051,484 tons transported in fiscal year 1948. Revenue freight tonnage shown below by divisions contains duplications inasmuch as some traffic moves over more than one division.

Division	1948 actual	1949 estimate	1950 estimate
	Tons	*Tons*	*Tons*
Lower Mississippi River	1, 536,495	1, 577,573	1, 577, 573
Upper Mississippi River	485, 280	498,237	498, 237
Illinois River	486,878	500,090	500,090
Missouri River	69,595	71,479	71,479
Warrior River	127,000	127,000	127,000
Warrior Terminal	952, 505	979, 600	979, 600

Conservative estimates place revenues in 1949 and 1950 at $9,113,800 and $9,096,500 respectively, as compared with expenses of $10,720,300 and $11,412,000. The estimate of $1,000,000 for subscription to capital stock in 1950, which will exhaust the existing statutory authorization of $15,000,000, will be reserved for working capital requirements to meet the anticipated loss of $2,315,500 in 1950.

With the favorable decision rendered by the Interstate Commerce Commission in the long contested joint barge-rail rate case assuring the extension of barge service to shippers removed from the banks of the rivers, the outlook for increased merchandise traffic is brighter than at any time in the Corporation's history. Negotiations to implement the decision have been started with the railroads. Despite the favorable prospects, however, merchandise traffic is estimated at 531,800 tons for 1949 and 1950, as compared with actual traffic of 615,854 tons in 1948.

Chief responsibility for the failure of merchandise traffic to recover in the postwar period is attributed to the poor service available with existing deteriorated floating equipment. Cargo damage resulting from leaky barges and erratic service resulting from frequent lay-ups for repairs tend to alienate shippers.

Bulk traffic continues to move at satisfactory levels and offerings have exceeded the Corporation's ability to handle such traffic with the equipment and power available. Expedited service is now provided for this type of traffic through fast tows limited to bulk cargo. A separate local service continues to reach all points and to handle all types of traffic.

Because of the Corporation's precarious financial condition, certain operational changes have been effected to reduce expenses and conserve funds. Operations have been discontinued at Baton Rouge, La., until more suitable equipment and a more practical terminal are available. Missouri River traffic has been suspended north of Kansas City and limited to monthly service to that point. Temporary embargoes are in effect on less than bargeload traffic to, from, and via upper Mississippi River ports. Shipments to and from Greenville, Miss., and Helena, Ark., have also been limited to bargeload freight and cotton. Terminal facilities recently leased to experienced private operators at 10 locations are expected eventually to reduce terminal handling charges to the Corporation through expanded local use of those facilities.

CAPITAL REPLACEMENT PROGRAM

Successful operation of the Federal Barge Line is almost impossible with existing deteriorated and obsolete^floating equipment. Until modern equipment is available to offset increased operating costs that have been characteristic of river operations everywhere, the prospect of large annual losses will continue. Retirement of inoperable equipment, moreover, will rapidly curtail operations generally. Frequent repairs to towboats and barges resulting from advanced deterioration already produces serious delays in moving traffic.

Legislation will be requested, therefore, to increase the Corporation's capital stock to provide funds for a minimum rehabilitation program. An appropriation of $2,-000,000 will be required in fiscal year 1950 to begin the program. Included in this program will be sufficient towboats and barge capacity of the same type as the recently commissioned integrated tow to permit full economic operation of that innovation in river transportation. Cost data collected on the one integrated tow unit now in regular service following experimental operation for several months indicate fulfillment of design expectations. The integrated tow's potentialities can be realized, however, only when sufficient units are in operation to provide full service, including sufficient barge capacity to shorten turn around time for the towboats.

Other capital replacements include complete conversion of three small steam towboats to Diesel power, two in fiscal year 1948 and one in 1949. Completion of radiophone installations on all boats will permit closing of the Memphis radio station this year. The establishment of shop and store facilities at St. Louis is also scheduled for 1949.

The $200,000 estimated for capital improvements in 1949 will be limited to minimum replacement needs. Present estimates of working capital requirements for 1950 preclude any provision for capital improvements without funds provided by an increase in capital stock.

LENDING ACTIVITIES

The Corporation is authorized to make loans to States, municipalities, and transportation companies that will contribute to the improvement of transportation facilities along the inland waterways (49 U. S. C. 141). Loans to the cities of Memphis, New Orleans, and Kansas City, Mo., were outstanding on June 30, 1948, in the total amount of $207,593. No new loans have been granted since 1935 nor are any contemplated for fiscal years 1949 and 1950. Payments on outstanding loans of $31,056 in 1948 included full settlement of the Kansas City debt. Repayments are estimated at $98,743 in 1949 and $20,000 in 1950. The remaining balance due on the loan to the city of Memphis will be repaid in 1949.

ADMINISTRATIVE EXPENSES

Administrative expenses cover the general supervisory and supporting staff engaged in over-all administration of the program carried on by the Corporation. Since the Corporation is subject to the regulations of the Interstate Commerce Commission, administrative expenses for water and terminal railroad operations for 1950 will be those set forth under the title "General expenses" in the Commission's uniform system of accounts for carriers by water.

Consolidated administrative expenses of the Corporation and the Warrior River Terminal Company were $433,715 in 1948, exclusive of reimbursements. Comparable Corporation expenses in 1949 and 1950 are estimated at $529,300 and $542,000 respectively. Within-

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

grade promotions account for increased requirements in. 1950.

EFFECT ON GOVERNMENT BUDGET

Since the Corporation maintains checking accounts with private banks, the only effect of its operations on the Government Budget will be an expenditure by the Treasury in fiscal year 1950 of $1,000,000 for the purchase of capital stock.

OPERATING RESULTS

Revenue in fiscal year 1948 was $8,296,626 as compared with expenses of $10,605,027, resulting in a net loss of $2,308,401 for the year. A small increase in tonnage handled over 1947 volume and increased rates (following those granted the railroads), raised transportation revenues from $6,519,279 in 1947 to $7,134,367 in 1948.

The gains, however, were more than offset by increased transportation expenses which rose from $5,765,202 in 1947 to $6,929,273 in 1948. Advancing vessel fuel costs alone accounted for $666,349 of the increase, with a total cost in 1948 of $1,561,480, as compared with $895,131 in the previous year. Increasing supply prices and the expenses of handling the increased volume of freight were chiefly responsible for the remainder of the increase. Maintenance expenses, at a high level in 1947 reflecting progressive floating equipment deterioration, also offset gains in revenue with an. increase to $1,638,124 in 1948 as compared with $1,424,072 in 1947.

Relatively favorable operating results for the first four months of the current fiscal year, accounted for by heavy bulk traffic movements, are reflected in the present estimates. Allowance for the usual winter traffic slump, however, and a conservative estimate of future traffic based on present quality of service and available equipment are also taken into consideration in estimating the long term situation,.

FINANCIAL CONDITION

Operations were relatively successful until 1939. Important statutory demonstration functions, for example, were performed largely with funds made available from income derived from regular transportation services. War and postwar traffic dislocations, coupled with inability to offset increased operating costs characteristic of maritime operations generally with increased operating efficiency that adequate equipment could provide, have reduced* earned surplus of $2,651,314 at December 31, 1938, to a deficit of $14,539,770 at June 30, 1948. Estimated operating losses will increase the deficit to $18,461,770 at June 30, 1950.

The Corporation possessed $50,000 in Government securities at June 30,1948, which will be disposed of during the current fiscal year. Government securities in the amount of $2,238,060 were liquidated in fiscal year 1948 to meet operating losses and to provide such capital improvements as the first unit of the integrated tow and conversion of two small steam towboats to Diesel power.

ESTIMATES OF APPROPRIATION

Subscriptions to Capital Stock, Inland Waterways Corporation—

Inland Waterways Corporation: For the purchase of capital stock of the Inland Waterways Corporation authorized by section 2 of the Act of June 3, 1924, as amended (49 U. S. C. 152), [$2,000,000] *$1,000,000,* to remain available until expended. *(The Government Corporations Appropriation Act, 1949.)*

Appropriated 1949, $2,000,000 Estimate 1950, $1,000,000

Obligations: 16 Investments, loans (purchase of capital stock of Inland Waterways Corporation)—1949, $2,000,000; 1950, $1,000,000.

ESTIMATES OF AUTHORIZATION RELATING TO CORPORATE FUNDS

NOTE.—The text of general authorizing language, as incorporated in The Government Corporations Appropriation Act, 1949, and as proposed for 1950, will be found immediately following the summary statements at the beginning of part III of this Budget.

Administrative Expenses, Inland Waterways Corporation—

Inland Waterways Corporation: Not to exceed [$498,800] *$5^2,000* shall be available for administrative expenses, to be determined in the manner set forth under the title "General expenses" in the Uniform System of Accounts for Carriers by Water of the Interstate Commerce Commission (effective January 1, 1947) [for water operations, and in the manner set forth under the title "Operating expense accounts—general" in the Uniform System of Accounts for Steam Railroads of the Interstate Commerce Commission (issue of 1943) for railroad operations]: *Provided,* That no funds shall be used to pay compensation of employees normally subject to the Classification Act of 1923, as amended, at rates in excess of rates fixed for similar services under the provisions of the Classification Act, as amended, nor to pay the compensation of vessel employees and such terminal and other employees as are not covered by the Classification Act, at rates in excess of rates prevailing in the river transportation industry in the area *(including prevailing leave allowances for vessel employees, but the granting of such allowances shall not be construed as establishing a different leave system within the meaning of that term as used in section 8 of the Act of December 21, 1944 (fi U. S. C. 61d))l: Provided further,* That the Corporation is authorized to pay not to exceed $1,482.90 for services actually rendered by former employees during the fiscal year 1947 and for which there is no present authority to pay, as follows: L. Brown, $120.06; W. Finch, $140.11; J.'Johnson, $116.16; S. Jones, $86.31; R. Neely, $148.71; G. Sanders, $103.19; N. L. Sanders, $123.82; G. Walker, $130.78; W. Winfield, $183.37; W. Scruggs, $153.60; E. Donley, $102.68; H. Thomas, $74.11].

Net gain (or loss (—)) for the year	-236,370	-211,500	-247,100

i Includes 2,394 tons of 1948 production.

PURPOSE AND FINANCIAL ORGANIZATION

The Virgin Islands Company operates under a charter which was granted it by the Colonial Council of St. Thomas and St. John on April 9, 1934. However, under the provisions of section 302 (b) of the Government Corporation Control Act of 1945, Public Law 248, Seventy-ninth Congress, this charter expired on June 30, 1948. It was continued as a Federal corporation by Public Law 855, Eightieth Congress, for a period of 1 year ending June 30, 1949. A bill providing for reincorporation, with a Federal charter, and authority to extend its activities into new fields will be presented at the first session of the Eighty-first Congress. The proposed legislation will provide that the new corporation shall acquire the assets and assume the liabilities of the present Company on July 1, 1949. Pending the enactment of reincorporation legislation, this budget is submitted to continue existing programs.

The Virgin Islands Company was established to aid in effecting the economic rehabilitation of the Virgin Islands. Sugarcane has been the chief crop and main source of employment on the island of St. Croix for almost 150 years. Other crops have been tried, with poor results; and even sugarcane is a marginal crop because of light rainfall, high evaporation, and quick run-off. Average yields of sugarcane are only about one-third of those in nearby Puerto Rico and Cuba.

During the peak season the Virgin Islands Company employs directly about 1,100 persons. In addition the Company's sugar mill is the sole market for sugarcane produced by some 550 small farmers. Thus, about 1,650 people receive their income directly from the Company—almost 50 percent of the 3,429 employed people reported in the 1940 Census. Subsistence levels have been raised, decent housing and subsistence plots furnished, and sanitary systems introduced. If the activities of the Company were to cease, the only apparent substitute would be direct and continuing relief.

The capital stock of the Company consists of three shares of $10 each, held in trust as of June 30, 1948, by the Secretary of the Interior, the Under Secretary of the Interior, and the Governor of the Virgin Islands.

ANALYSIS OF BUDGET PROGRAMS

To accomplish the purposes for which the Company was established and under the authority contained in its charter, the Company has a fivefold program of activities as follows:

1. Production and sale of sugar.
2. Production and sale of rum and alcohol.
3. Vegetable program.
4. Rural electrification program.
5. Assistance to small farmers and miscellaneous programs.

Production and sale of sugar.—This activity employs most of the people who work for the Company. From the time the Company was organized, the sugar operations have shown a loss. Since its principal purpose is to provide employment, the Company has not mechanized operations to the extent possible and has given work to older and less efficient persons who, under ordinary circumstances, would be relief cases for the municipality. This seems to be the only practicable alternative to a dole until it is possible to provide other employment opportunities through the development of other types of agriculture and the tourist industry. Also, the Company's sugar mill is the only market for the sugarcane produced by approximately 550 small farmers. During the year 1948 the Company produced 25,932 tons of sugarcane, and purchased 19,847 tons, a total of 45,779 tons, at a composite average net cost of $7.70 a ton. The sugar sales to June 30, 1948, totaled $218,552. The mark-down of the sugar inventory on hand June 30, 1948, to market value totaled $46,249. The severe drought in the summer of 1947 stunted the cane harvested in 1948 and the yield amounted to approximately 46,000 tons instead of the estimated 54,000 tons.

Production and sale of rum and alcohol.—The glutted condition of the rum market in the continental United States has drastically curtailed the sales and will probably continue to depress the prices to be obtained in the future. The Company is manufacturing alcohol to supply a bay rum concern in St. Thomas, which promises to develop into a substantial account. Inquiries are received from other companies requiring alcohol, and it is hoped that the Company may be able to make satisfactory negotiations, thereby increasing the Company's sales as well as encouraging and assisting new businesses.

Vegetable program.—The Company is assisting a new local industry, and at the same time solving a labor problem, on St. Croix by growing tomatoes and other vegetables for the New York winter market. The Virgin Islands Company is obliged to employ a number of aged people who are unable to do productive work in the canefields. It is the intention to let the more aged people work in the vegetable fields where the work is less arduous. Perhaps this arrangement will prevent their having to be laid off and thrown on the municipality for assistance. The majority of the workers left in the canefields will be younger and stronger which will tend to make that operation more efficient also. Income and expenses for this program for 1949 and 1950 are estimated as follows:

	1949	1950
Gross sales	$16,400	$14,400
Direct expenses	13,100	12,000
Gross income	3,300	2,400

Federal Reserve Bank of St. Louis

Rural electrification programs.—In 1941 the Rural Electrification Administration loaned the Virgin Islands Company $150,000 to construct and operate a power system for rural St. Croix.

In 1947 the original Rural Electrification Administration loan was modified and the total borrowing authority increased to $1,500,000 to extend the rural lines and increase plant capacity in order to serve more consumers. Of this amount, $255,503 had been advanced as of June 30, 1948.

Current will be furnished to all rural areas as lines are extended. Surplus power is sold to the St. Croix Power Authority, which uses it to supply Frederiksted and Christiansted. Formerly the St. Croix Power Authority produced direct current power for both towns, in inadequate amounts and at excessive cost. Based on an agreement between the Power Authority and the Rural Electric Division, the towns are converting from direct current to alternating current and are purchasing surplus power from the Rural Electric Division. This plan will continue until additional rural consumers require the full Rural Electric Division production, by which time the Power Authority will be in a position to supply its own power.

Assistance to small farmers and miscellaneous programs.—The Company expects to maintain at about the present level its assistance to small farmers in plowing their {and and furnishing cane seed. Any governmental agency, private concern, or individual may purchase the products of the Company, rent its equipment, or otherwise have access to the service of the Company upon approval of its duly authorized officers. The Company has followed this policy of assisting hundreds of small growers and homesteaders to help themselves by renting them tractors and farm equipment, furnishing improved varieties of cane seed for planting, and grinding facilities for the sugarcane they produce. In order to insure proper care of children whose parents are employed by the Company, nurseries and attendants for the children are provided during working hours.

In addition to these activities, the Company maintains a herd of cattle, operates a rock crusher used in local road construction, and runs a mail, cargo, and passenger schooner between St. Thomas and St. Croix. It expects to continue its cooperation with the cattlemen on the island of St. Croix in the operation of an abbatoir and to continue the operation of a poultry farm by a private lessee. A market and cold storage plant on the island of St. Thomas is operated by the municipality.

In addition to the vegetable program described above, the Company is giving assistance to the St. Croix Fruit & Vegetable Corp., a newly formed farmers' cooperative, to insure a steady flow of fresh vegetables to the New York market during the winter season. This activity is in line with the Company's policy to encourage new industries within the islands.

Until August 31, 1948, the Company also operated, on a cost-plus-a-percentage reimbursable basis, the direct current electric generators which were used to generate electricity for the urban areas of Frederiksted and Christiansted. On September 1, 1948, this function was transferred to the rural electrification program.

Administrative expenses.—This expense covers the general supervisory staff and expenses relating to the over-all supervision of the programs carried on by the Company. It does not cover salaries and wages for the growing and harvesting of cane and manufacture of sugar and rum, or other activities. During the fiscal year 1948 the greater portion of salaries, wages, and indirect expenses were distributed to operations and a limitation of $20,000 was placed on the administrative expenses remaining after distribution of indirect expenses to operations. In the estimates for 1949 and 1950, total administrative expenses, as defined in the Government Corporations Appropriation Act, 1949, are shown in this Budget. It is expected that $97,880 will be required for administrative expenses in 1950, the same amount as the 1949 limitation.

EFFECT ON GOVERNMENT BUDGET

Net budgetary expenditures for the fiscal year 1949 are estimated at $306,611, with $216,480 estimated for 1950. Budgetary receipts are estimated at $15,645 for the fiscal year 1949 and $13,420 for 1950.

OPERATING RESULTS

During the fiscal year 1948, programs carried on by the General Operations Division resulted in a net loss of $220,111, with a further loss of $16,259 for the Rural Electric Division, a total loss of $236,370. For the fiscal years 1949 and 1950, it is expected that the losses will total $211,500 and $229,800, respectively. The loss of $220,111 in fiscal year 1948 for the General Operations Division was due principally to the decrease in the price for raw sugar and the poor rum market. No particular improvement in the continued loss position can reasonably be expected until such time as rum can be sold in the United States market at a profit.

Although losses are expected in 1949 and 1950 for the Rural Electric Division, it is anticipated that the division will be operating at a profit beginning with the year 1951 as by that time the towns of Christiansted and Frederiksted will be converted to alternating current by the St. Croix Power Authority and the electric energy will be furnished by the Rural Electric Division, thus materially increasing the sales of electric energy.

FINANCIAL CONDITION

Accounts receivable.—The $280,967 of accounts receivable on June 30, 1948, consisted primarily of $199,087 due from the Secrest Corp. for the sale of sugar in June 1948 and $32,500 from the Production and Marketing Administration, Department of Agriculture, covering the sugar benefit payment for the crop of 1948. The majority of these accounts have now been liquidated.

Inventories.—The inventories of commodities, supplies, and materials are all valued at cost or market, whichever is lower. Materials and supplies are valued at cost. The molasses is valued at the price approved by the Production and Marketing Administration, Department of Agriculture, for each year's production. The 1948 molasses production of 328,038 gallons was valued at 12 cents a gallon. The rum in process and in bottles, most of which is in barrels, represents direct manufacturing costs, together with an applicable part of overhead. The sugarcane in fields is valued at the cost of the direct materials and direct labor, together with an applicable part of overhead expended on the crop up to the close of the fiscal year. Livestock for sale is at market value, less the estimated cost to the time of sale. The sugar is valued at market at the Company's warehouses since the cost of the 1948 production exceeded the market value.

Land, structures, and equipment.—The cost of land, structures, and equipment, net of depreciation reserves,

Federal Reserve Bank of St. Louis

represents the Rural Electric Division equipment and that part of general operating equipment which has been acquired by the Company in its own corporate name. In addition, the Company operates, for the United States Government, additional assets which on June 30, 1948, were valued, at cost less depreciation, at approximately $1,418,000.

Accounts payable.—The accounts payable of $105,165, as of June 30, 1948, consisted largely of past-due accounts which the Company's financial condition had not allowed it to pay. The majority of these accounts have now been paid.

Notes payable.—As of June 30, 1948, the Company had borrowed $250,000 from the United States Treasury, and it is expected that $500,000 will be borrowed during 1949 and $100,000 in 1950, making a total estimated borrowing of $850,000 outstanding as of June 30, 1950. In addition, the General Operations Division had borrowings of $400,491 from commercial banks outstanding as of June 30, 1948, all of which have now been liquidated. It is expected that, in addition to the borrowings from the United States Treasury, there will be further borrowings of $472,000 for 1949 and $450,000 for 1950 from commercial banks which will be repaid during the same year from proceeds from the sale of sugar. The Rural Electric Division was indebted to the Rural Electrification Administration in the amount of $255,503 as of June 30, 1948. This amount will be increased to $366,300 by June 30, 1949.

ESTIMATES OF APPROPRIATION

Loan to Virgin Islands Company, Treasury Department —

The Virgin Islands Company is authorized to borrow from the Treasury of the United States not to exceed **[$500,000]** *$100,000,* for which purpose there is hereby appropriated out of any money in the Treasury not otherwise appropriated £$500,000] *$100,000.* The Secretary of the Treasury is authorized to make such loans to the Company for repayment not later than one year after the making thereof, at rates of interest determined by the Secretary of the Treasury, taking into consideration the current average rate on outstanding marketable obligations of the United States as of the last day of the month preceding the making of any such loan to the Company: *Provided, That the Secretary of the Treasury is authorized to extend the maturity dates for repayment of notes issued under authority of the Government Corporations Appropriation Act, 1949, to two years after the making thereof. (The Government Corporations Appropriation Act, 1949.)*

Appropriated 1949, **$500,000** Estimate 1950, **$100,000**

Obligations: 16 Investments and loans—1948, $250,000; 1949, $500,000; 1950, $100,000.

ESTIMATES OF AUTHORIZATION RELATING TO CORPORATE FUNDS

NOTE.—The text of general authorizing language, as incorporated in The Government Corporations Appropriation Act, 1949, and as proposed for 1950, will be found immediately following the summary statements at the beginning of part III of this Budget.

Administrative Expenses, The Virgin Islands Company—

Not to exceed $97,880 of the funds available to the Company shall be available fpr administrative expenses (to be computed on an accrual basis), including salaries of officers, Washington office personnel, and the accounting, purchasing, and pay-roll departments; clerical services; traveling, automobile, office, and sundries expenses; stationery and office supplies; telephone and telegraph; postage; dues and subscriptions; repairs and maintenance of office buildings and equipment; employees' welfare; and public relations: *Provided,* That such total sum shall be inclusive of the gross amounts of the foregoing categories of expenses before apportionment of any part thereof to manufacturing or other expenses: *Provided further,* That such administrative expenses shall be exclusive of salaries of the engineering and shipping departments, storekeepers, and plant clerical personnel; interest expenses; bank service charges; audit fees; and depreciation.

Section 304 (b) of the Government Corporation Control Act, as amended (Public Law 248, approved December 6, 1945), shall not be applicable with respect to the Virgin Islands Company until after June 30, [1949] *1950. {The Government Corporations Appropriation Act, 1949.)*

FEDERAL PRISON INDUSTRIES, INC.

PROGRAM HIGHLIGHTS

	1948 actual	1949 estimate	1950 estimate
Sales to Government agencies	$14,785,201	$15,000,000	$15,250,000
Percent of cost of sales to sales	76.6	79.9	80.0
Percent of administrative expense to sales	1.67	1.79	2.20
Net industrial profit	$3,003,226	$2,501,026	$2,522,272
Percent of earnings to sales	20.31	16.67	16.54
Average number of inmates provided employment	3,157	3,600	3,600
Number of inmates provided vocational training	7,956	8,500	8,500
Dividends paid into Treasury	$2,000,000	$2, 562,000	$1,500,000

PURPOSE AND FINANCIAL ORGANIZATION

By the provisions of title 18, United States Code, sections 4121-4128, Federal Prison Industries, Inc., is authorized (a) to establish and operate industries in the United States penal institutions for the production of articles and commodities for use in the prisons or for sale to other agencies of the Federal Government, and (b) to provide such forms of employment as will give the inmates of these institutions "a maximum opportunity to acquire a knowledge and skill in trades and occupations which will provide them with a means of earning a livelihood upon release." These industries must be so diversified as to "reduce to a minimum competition with private industry or free labor."

By a more recent act of Congress (Public Law 821, approved June 29, 1948) the Corporation is authorized to extend its functions arid duties to military disciplinary barracks.

The Corporation has no capital stock. Its original capital consisted of all assets of the industries division of the Bureau of Prisons, Department of Justice, as of January 1, 1935, the net value of which was $4,113,380. Since that time, to June 30, 1948, it has received property from other Government agencies, either at a nominal value or without exchange of funds, of a fair value of $736,127 in excess of cost to the Corporation. Its accrued earnings as of June 30, 1948, after payment of dividends amounting to $11,688,000, totaled $10,796,107. Cash in the Treasury as of that date was $3,570,121, with an additional amount of $1,944,853 in the hands of the Treasury disbursing offices for the payment of current vouchers and $44,966 in transit to the Treasury.

All funds of the Corporation are deposited in the Treasury of the United States to the credit of the prison industries fund, which is used as operating capital. The Corporation has no borrowing or lending power.

ANALYSIS OF BUDGET PROGRAMS

In the Federal prisons and disciplinary barracks the Corporation has two major programs, (1) the establishment and operation of diversified industries, and (2) vocational training of prisoners (18 U. S. C. 4122, 4123).

INDUSTRIAL ACTIVITIES

Operations.—The extent of the Corporation's activities varies with the number of prisoners for whom employment is to be provided. During the fiscal year 1948 inmate population of the penal institutions averaged 17,103. No material variation from this average is anticipated during 1949 and 1950. Approximately 14 percent of the prisoners are not employable by reason of age, illness, or restriction. Normally, approximately 75 percent of the employable prisoners are employed in the operation and maintenance of the institutions themselves. It therefore appears that industrial employment must be provided for approximately 3,600 prisoners duiing 1949 and 1950. This compares with average full-time employment of 3,157 prisoners during 1948.

At the beginning of the fiscal year 1948 there were 43 shops operated in 23 lines of industry in 20 penal and correctional institutions. During the year the brick plant at Chillicothe, Ohio, the fiber furniture factory at Springfield, Mo., the handweaving mill and the metal shelving salvage at El Reno, Okla., and orcharding at Columbia Camp, Wash., were discontinued. A machine, die and tool shop at El Reno, Okla., a woolen mill at Terre Haute, Ind., and a garment factory at Seagoville, Tex., were in process of establishment. These changes will make no material difference in the number of inmates employed or in the supervisory civilian force required.

During the fiscal year 1950 the Corporation will be expected to establish industries in at least five disciplinary barracks of the Army and Navy under Public Law 821. The Corporation cannot proceed to carry out this congressional policy until funds are made available for the administrative expense of making necessary surveys and developing an industrial program. Based upon the Corporation's experience it is estimated that ultimately a staff of 8 to 15 civilian supervisors and instructors will be required for each installation and an increase of approximately 6 positions will be needed in the Washington office to provide adequate administrative planning and control. The estimate for 1950 includes provisions for such additional personnel and expense.

Administrative expense.—This includes salaries and expense of the supervisory and clerical staff located in the District of Columbia, together with the cost of the audit of the Corporation performed by the General Accounting Office. Excluded are salaries and expense of employees assigned to vocational training, whether located in the District of Columbia or elsewhere, and all other salaries and expense charged to production, manufacturing expense, or cost of sales.

During the fiscal year 1948 an average of 44.6 positions in the central office in Washington were filled, the salaries for which with attendant expenses totaled $245,645. The increase to $283,700 in the fiscal year 1949, while sufficient to pay the increased salaries effective July 11, 1948, will

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

not provide an estimated $30,000 for increased administrative operations required to prepare for expansion of activities into the military disciplinary barracks. The further increase to $330,000 in 1950 is to carry the increased staff on a full-year basis.

VOCATIONAL TRAINING

During the fiscal year 1948 it was estimated that training would be provided for 5,500 prisoners. Actually such training was provided for 7,956 prisoners. As the age group of prisoners decreases, a higher percentage, now about 50 percent, are qualified for training in trades and vocations. For these, vocational training opportunities should be provided. It is expected that training will be provided for 8,500 prisoners in the Federal prisons during 1949 and 1950. In addition, training must be provided for inmates of such disciplinary barracks as the Corporation may include in its activities during those years.

To make vocational training effective it is necessary that employment be secured for trainees as they are released from the institutions. The Corporation maintains in the field five employment officers for this purpose. A statement of the vocational training accomplished during the fiscal year 1948 follows:

Type of training	Number of training fields or shops	Number of enrollees without duplication	Number of inmates completing training
Agricultural	24	702	174
Industrial (on the job)	104	1,891	592
Maintenance (on the job)	187	3,574	1,156
Trade classes	38	1,427	367
Special and related	57	1362	1,811
Total	410	7,956	4,100

i There were 3,414 additional enrollments in special classes but they are accounted for in other groups.

For 1949 the vocational expense limitation of $380,000 is expected to be sufficient for all costs, including pay increases under Public Law 900. The increase to $400,000 for 1950 is to cover additional production training expense and to provide for the expansion of activities into the military disciplinary barracks.

EFFECT ON GOVERNMENT BUDGET

The net effect of the Corporation estimates on the Government budget for the fiscal year 1949 will be a net budgetary receipt of $804,449, composed of $2,562,000 dividends and the net expenditure of $1,757,551, as shown on statement A. The net effect during the fiscal year 1950 will be the receipt of $1,386,700 representing dividends paid into the Treasury of $1,500,000 less net expenditures of the Corporation of $113,300.

OPERATING RESULTS

During the fiscal year 1948 the gross sales of the Corporation were $14,785,201, which was $2,735,201 in excess of the estimate. The net earnings of the Corporation were $2,675,865, which was $1,048,835 more than the previous year, and $907,865 in excess of the estimate for the year. No material variation in sales level is anticipated, and consequently the total sales for the fiscal year 1949 are estimated at approximately $15,000,000, and for 1950 approximately $15,250,000. The increase in the latter figure represents an estimated value of products to be produced in the military disciplinary barracks.

The board of directors at their meeting January 7, 1948, authorized payment of $2,000,000 as a dividend into the Treasury, which amount was transferred on January 28, 1948. In addition the directors authorized the payment of $1,312,000 from the 1948 earnings of the Corporation but such payment was not consummated until the fiscal year 1949. It is estimated that earnings for the fiscal year 1949 will justify the payment of an additional dividend in the amount of approximately $1,250,000 if commitments in connection with extension of program to military disciplinary barracks do not require substantial additional investments. It is estimated that a dividend of $1,500,000 will be declared in the fiscal year 1950. These estimates are reflected in the financial statements.

FINANCIAL CONDITION

Plant and equipment.—The value of the plant and equipment as of June 30, 1948 totaled $4,252,115 after deduction of accrued depreciation in the amount of $3,319,987. Estimated expenditures for buildings and improvements are $592,367 for fiscal year 1949 and $521,951 for fiscal year 1950, as shown in schedule C-1. Estimated expenditures for the fiscal years 1949 and 1950 for machinery and equipment will be approximately $915,000 and $340,646 respectively.

Working capital.—The working capital assets of the Corporation consist of cash, accounts receivable, commodity and material inventories and sundry items. Actual and estimated amounts of these assets as of June 30 are in 1948, $12,647,489; in 1949, $10,816,411; and in 1950, $10,703,586. Offsetting liabilities in 1949 and 1950 approximate $1,144,000 each year.

The Corporation has adequate funds to finance its proposed programs for the fiscal years 1949 and 1950.

SCHEDULE B-1

COST OF SALES

[Fiscal years ending June 30,1948,1949, and 1950]

	1948 actual	1949 estimate	1950 estimate
Cost of manufacturing:			
Raw materials	$8,950,110	$9,288,903	$9,291,807
Labor, inmate	616,144	704,000	884,000
Subtotal	9,566,254	9,992,903	10,175,807
Factory overhead expense:			
Salaries, civilian	1,254,659	1,372,822	1,599,971
Deduct: Lapses	189,644	80,488	80,660
Net civilian salaries	1,065,015	1,292,334	1,519,311
Light, heat, power and water	191,991	192,000	192,000
Travel expense	9,453	9,400	9,400
Rents and royalties	66,358	66,400	66,400
Telephone and telegraph	8,381	8,400	8,400
Factory supplies	127,065	127,000	127,000
Lost and damaged goods	42,134	42,000	42,000
Building repairs	7,096	7,000	7,660
Machine repair parts	136,680	136,700	136,700
Motor vehicle expense	7,259	7,200	7,200
Freight, express and parcel post	10,724	10,700	10,700
Minor miscellaneous expense	19,721	19,700	19,700
Minor equipment and repairs	42,033	42,000	42,000
Amortization of deferred expense	9,151	9,000	9,000
Office supplies and printing	15,038	15,000	15,000
Special meals and uniform expense	4,783	4,000	4,000
Packing and storing	30,465	30,500	30,500
Total factory overhead expense	1,793,347	2,019,334	2,246,971
Inventory variation: Work in process:			
Inventory at beginning of year	752,229	841,916	841,916
Inventory at end of year	841,916	841,916	950,000
Subtotal	-89,687	----------	-108,084
Total cost of goods manufactured	11,269,914	12,012,237	12,314,694
Inventory variation: Finished goods:			
Inventory at beginning of year	911,721	907,597	907,597
Inventory at end of year	907,597	907,597	1,000,000
Subtotal	4,124	----------	-92,403
Add purchases and outside expense (mostly to dye and waterproof duck)	177,218	91,437	91,437
Deduct other adjustments (items run through manufacturing expense but charged to assets, vocational, or shipping expenses instead of cost of sales)	391,455	391,000	391,000
Cost of sales (statements A and B)	11,059,801	11,712,674	11,922,728
Add depreciation	265,105	275,000	280,000
Total cost of sales	11,324,906	11,987,674	12,202,728

SCHEDULE C-1

DEPARTMENT OF STATE

INTRODUCTORY STATEMENT

The Institute of Inter-American Affairs was incorporated for a 3-year period on August 5, 1947 (22 U. S. C. 281). Section 5 of this law provides for the management of the Corporation by a board of directors, who receive no additional compensation for their services as directors. Directors are appointed by and hold office at the pleasure of the Secretary of State, who designates one of them as chairman of the board. At its inception, the Institute took over all assets, liabilities, etc., of two Delaware Corporations created by the Coordinator of Inter-American Affairs, one also called the Institute of Inter-American Affairs and the other the Inter-American Educational Foundation, Inc.

In addition to the Institute of Inter-American Affairs, there also follow budget data on two other Corporations created by the Coordinator of Inter-American Affairs. The liquidation of these Corporations, the Institute of Inter-American Transportation and Prencinradio, Inc., should be completed during the fiscal year 1949.

THE INSTITUTE OF INTER-AMERICAN AFFAIRS

PROGRAM HIGHLIGHTS

[Dollars in thousands]

	1948 actual	1949 estimate	1950 estimate
Contributions to cooperative programs:			
Institute	$9,166	$5,726	$5,674
Cooperating governments	$11,073	$10,904	$10,920
Number of cooperating republics	17	16	16
Number of cooperative programs	31	25	25

PURPOSE AND FINANCIAL ORGANIZATION

The Institute of Inter-American Affairs collaborates with other governments and governmental agencies of the American Republics in technical programs in the fields of public health, sanitation, agriculture, and education. Senate Report 675, Eightieth Congress, contains the following endorsement of the program of the Institute: "The Foreign Relations Committee agreed that a continuation of the kind of cooperation in the fields of public health, sanitation, agriculture, and education contemplated in S. 1678 (now Public Law 369, 80th Cong.) would do much to strengthen the ties of friendship and understanding among the peoples of the 21 American Republics. In approving what they considered a practical and tangible evidence of the good-neighbor policy, the committee called attention to the relatively small cost involved to the United States and underlined the fact that the other American Republics are constantly assuming an increasingly large share of the total cost of the program." The Committee on Foreign Affairs of the House expressed their approval of the program in House Report 955, Eightieth Congress, as follows: "The committee have come to the following considered judgments: (a) The activities whose continuation is here proposed have well justified their existence as instruments of the United States foreign policy. (6) That their value to this Nation lies not alone in their contribution to the strengthening of relations among the American nations and building up the foundations of democratic society in the Western Hemisphere but also in the dividends, both realized and potential, which they pay in increasing the foreign trade of the United States. (c) That # the United States burdens in supporting the cooperative action programs have tended to diminish both absolutely and in proportion to the other American Republics' contributions; that the prospect of a continuation of this trend amply warrants this Nation in continuing support of the programs so as to protect what it has already invested, *(d)* That the activities under review do not overlap with the functions of other international undertakings in which this Nation participates."

The Institute, in taking over the assets, liabilities, etc., of the two predecessor Corporations, acquired $3,266,106 in cash from the former Institute and $1,011,223 in cash from the Inter-American Educational Foundation, Inc., as well as $8,115,000 from the Secretary of State in liquidation of grants made by the Coordinator of Inter-American Affairs to these two Corporations. The Congress appropriated an additional $2,500,000 to the Secretary of State for the Institute which will be granted to the Institute during the fiscal year 1949. For budgetary and comparative purposes the books of the Institute carry forward the total capital and expenditure figures of the two predecessor Corporations. The total capital provided by grants from appropriated funds, including the $2,500,000 to be received in the fiscal year 1949 equals $72,984,008. Additional funds in the amount of $1,188,395 have been contributed by several participating Latin-American countries for direct expenditure by the Institute or its two predecessor Corporations. Public Law 369, Eightieth Congress, authorizes appropriations at a rate not to exceed $5 million annually to carry out the purposes of said act.

The major activities of the Corporation are conducted in accordance with the terms of agreements entered into with the governments of the other American Republics. Agreements usually provide for program operation by a cooperative service which reports to the appropriate minister (health, agriculture, or education) but is headed by the chief of the Institute field party. Both the ministry and the Institute contribute funds, materials, services, and facilities. During the past several years the governments of the other American Republics have been increasing the proportionate share of their contributions. Contributions by the other American Republics to these cooperative services and to the Corporation for direct expenditure are estimated at $55,722,985 in cash and $5,277,015 noncash. This $61 million equals 96.1 percent of the amount of Corporation funds budgeted for such programs.

No funds have been borrowed or securities issued either by the present Corporation or by the two predecessor Corporations. The transactions of the Corporations have been audited by the General Accounting Office.

ANALYSIS OF BUDGET PROGRAMS

The Corporation expects to continue its activities in the following major categories: (1) Health and sanitation, (2) food supply, and (3) cooperative educational activities. The cost of cooperative programs was $8,297,342 for fiscal year 1948, is estimated at $5,204,241 for 1949, and at $4,923,526 for 1950. The active programs are discussed below. Pertinent financial data are set forth on the statement of sources and application of funds (statement A) and the statement; of income and expenses (statement B).

HEALTH AND SANITATION PROGRAM

Cooperative bilateral agreements designed to aid and improve the health and general welfare of the people of the Western Hemisphere are continuing in all countries except Panama, Nicaragua, Costa Rica, and Dominican Republic, where the programs terminated in September 1945, March and June 1947, and June 1948, respectively. No agreements have been executed with, or programs undertaken in, Argentina or Cuba.

The Corporation proposes to continue the present programs in 1950.

As of March 31, 1948,1,241 health and sanitation activities or projects carried on under cooperative agreements had been completed and 637 were active. The total of 1,878 are divided into the following categories: 303 (including 240 completed) involved the construction or improvement of medical and public health facilities; 808 (including 554 completed) were in the field of sanitation; and 767 (including 447 completed) were medical or other public health activities such as operation of health centers and laboratories, and special disease control projects. During the fiscal years 1949 and 1950 increased emphasis will be placed on the service aspects of the program.

In connection with the cooperative health and sanitation programs, 8,578 national personnel are now employed. Of these, 430 are physicians, 173 engineers, 192 nurses, 581 practical nurses or sanitary inspectors, 5,589 local workmen, and 1,613 technical, clerical, and other personnel. In addition, 127 employees, including 13 physicians, 38 engineers, and 30 nurses, are United States citizens.

FOOD SUPPLY PROGRAM

The food supply program is designed to improve chronic unfavorable economic conditions preventing stability in the other American Republics. The Third Inter-American Conference on Agriculture at Caracas, Venezuela, agreed that the work of the Institute of Inter-American Affairs and the United States Department of Agriculture has been beneficial in promoting food production, agricultural techniques, and technical education. The final act of the Conference stated: "This collaboration should be continued * * *."

The food supply program aims to increase production of food crops and to demonstrate United States practices which lead to a higher standard of living. Cooperative food supply agreements provide for the execution of specific detailed project agreements which vary in accordance with local needs. In general the projects involve: (1) Demonstrating improved methods of irrigation, drainage, erosion control, cultivation, and livestock and pasture management; (2) helping local producers to obtain agricultural machinery, seed, fertilizer, and insecticides; (3) assisting in construction of food storage facilities and improvement of distribution and marketing systems; and (4) initiating or strengthening agricultural education and extension programs.

The continuation of the 1948 and 1949 food supply programs in Haiti, Costa Rica, Peru, and Paraguay is anticipated. In Haiti an irrigation project at Fonds Parisien supplying water to 1,250 acres, was successfully completed. Demonstrations indicated the feasibility of another irrigation project in the 150,000-acre Artibonite Valley. Haiti has requested an Export-Import loan of $3 million for this work. In Costa Rica a country-wide agricultural extension system incorporating supervised farm credit and home management demonstration, as well as technical assistance projects in meat and corn producting areas, is being developed. Twelve extension offices are planned for 1950 as compared with three in 1947 and eight in 1949. In Peru 30 extension offices are promoting the utilization of United States manufactured equipment and the introduction of insecticides and pesticides. In Paraguay emphasis is being placed on expanding the rice industry, increasing the coverage of the supervised credit program, and developing the National Institute of Agronomy. Technical assistance was rendered Paraguay in its fight to control grasshoppers.

COOPERATIVE EDUCATION PROGRAM

The Education Division of the Institute fulfills requests from Latin American Ministers of Education for aid in improving primary and secondary public education. The Institute sends a small field staff of educators from the United States to work with the Minister of Education and his staff and with teachers of the national schools. Projects include orientation of officials in the Ministry of Education, training of teachers and school administrators, and encouragement of community participation in educational programs. Continuation of the programs in 7 of the 12 countries with active programs in 1948 is planned for 1949 and 1950.

ADMINISTRATIVE EXPENSES

Administrative expenses of the Corporation include salaries of the Washington supervisory staff concerned with program operations, salaries of employees providing housekeeping services, cost of the required audit (Public Law 248, 79th Cong.), rental and building maintenance costs, and incidental expenses, excepting FBI investigations.

EFFECT ON THE GOVERNMENT BUDGET

Inasmuch as the Institute has no income, expenditures other than contributions from the cooperating governments represent expenditures of the Government. Net expenditures are estimated to be $7,572,940 in the fiscal year 1949 and $5,923,526 in the fiscal year 1950.

OPERATING RESULTS

During fiscal year 1948, operations carried on by the Corporation resulted in a net expenditure, or depletion of capital, of $9,165,992. Net expenditures during fiscal year 1949 are estimated at $5,725,741 and during fiscal year 1950 at $5,673,526.

INSTITUTE OF INTER-AMERICAN TRANSPORTATION

GENERAL SUMMARY STATEMENT

The Institute of Inter-American Transportation was created under the laws of the State of Delaware on June 26, 1943, pursuant to authority contained in the First Supplemental National Defense Appropriation Act, 1943 (56 Stat. 708). A certificate of dissolution of the Corporation was filed with the Secretary of the State of Delaware on August 21, 1946, and the 3-year liquidation period under the laws of that State will expire on August 21, 1949.

The total capital provided to the Corporation was $7,601,986, of which $737,390 had been returned to the United States Treasury by June 30, 1947. An additional $74,890 was returned in fiscal year 1948, bringing total returns to $812,280 and practically completing the disposition of the assets of the Corporation.

PRENCINRADIO, INC.

GENERAL SUMMARY STATEMENT

Prencinradio, Inc., was created under the laws of the State of Delaware on July 20, 1942, pursuant to authority contained in the Third Supplemental National Defense Appropriation Act, 1942 (55 Stat. 818). A certificate of dissolution of the Corporation was filed with the Secretary of State of Delaware on May 14, 1946, and the 3-year liquidation period will, therefore, expire on May 14, 1949.

Funds available to the Corporation were derived from grants made to it by the former Office of Inter-American Affairs. Of the total of $1,833,200 thus made available there had been returned to the United States Treasury a total of $1,100,000 as of June 30, 1948. It is estimated that an additional return of $61,793 will be made in fiscal year 1949, in part contingent upon collections of accounts receivable. The total of returns estimated is, therefore, $1,161,793.

The liquidation activities of the Corporation in fiscal year 1949 are being absorbed by personnel of the Institute of Inter-American Affairs.

TITLE III—GENERAL PROVISIONS

SEC. 301. Funds made available by this Act for administrative expenses shall be available, in addition to objects for which such funds are otherwise available, for personal services and rent in the District of Columbia; printing and binding; examination of budgets and estimates of appropriations in the field; travel expenses in accordance with the Standardized Government Travel Regulations, the Subsistence Expense Act of 1926, as amended (except as to per diem rates outside continental United States) and the Act of February 14, 1931, as amended (5 U. S. C. 73a); for the objects specified under the head "General provisions" in title II of the Independent Offices Appropriation Act£, 1949] *for the current fiscal year,* all the provisions of which title unless otherwise specified in this Act, shall be applicable to the expenditure of such funds; and services in accordance with section 15 of the Act of August 2, 1946 (5 U. S. C. 55a): *Provided,* That in the event any functions budgeted as administrative expenses are subsequently transferred to or paid from other funds, the limitations on administrative expenses herein provided shall be correspondingly reduced.

SEC. 302. No part of any funds of or available to any wholly owned Government corporation shall be used for the purchase or construction, or in making loans for the purchase or construction of any office building at the seat of government primarily for occupancy by any department or agency of the United States Government or by any corporation owned by the United States Government.

SEC. 303. Funds of the corporations and agencies covered by the provisions of this Act shall be available for payment of claims pursuant to section 403 of the Federal Tort Claims Act (28 U. S. C. [921] *2672).*

SEC. 304. Any funds of, or available for expenditure by, any corporation or agency included in this Act, which are not subject to audit by the General Accounting Office under the provisions of the Government Corporation Control Act (31 U. S. C. 841-869) or other law, shall be accounted for and audited in accordance with the Budget and Accounting Act, as amended, and no such fund shall be obligated or expended unless and until an appropriate appropriation account shall have been established therefor pursuant to an appropriation warrant or a covering warrant: *Provided,* That this section shall not be so construed as to modify or repeal any provision of any other law respecting warranting, accounting for, and auditing of funds.

SEC. 305. No part of the funds of, or available for expenditure by, any corporation or agency included in this Act shall be used to pay the salary or wages of any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided,* That for the purposes hereof an affidavit shall be considered prima facie evidence that the person making the affidavit has not contrary to the provisions of this section engaged in a strike against the Government of the United States, is not a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or that such person does not advocate, and is not a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided further,* That any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence and accepts employment the salary or wages for which are paid from any funds available to any corporation or agency included in this Act shall be guilty of a felony, and upon conviction, shall be fined not more than $1,000 or imprisoned for not more than one year, or both: *Provided further,* That the above penalty clause shall be in addition to, and not in substitution for, any other provisions of existing laws.

SEC. 306. After June 30, 1949, the corporations or agencies subject to the Government Corporation Control Act, as amended (31 U. S. C. 841), are authorized, with the approval of the Comptroller General, to consolidate, notwithstanding the provisions of any other law, into one or more accounts for banking and checking purposes all cash, including amounts appropriated, from whatever source derived: Provided, That such cash, including amounts appropriated, of such corporations or agencies shall be expended in accordance with the applicable terms of their respective enabling acts and any other acts applicable to their transactions. (The Government Corporations Appropriation Act, 1949.)

INTRODUCTION TO PART IV

Part IV of the Budget presents four special analyses, together with related tabular material. These analyses are separately listed and discussed below.

EXPLANATION OF THE ESTIMATES OF RECEIPTS

This statement prepared by the Treasury Department discusses the estimated budget receipts from each of the principal sources for the fiscal years 1949 and 1950, in comparison with actual receipts for the fiscal year **1948.**

FEDERAL ACTIVITIES IN CIVIL PUBLIC WORKS AND NATIONAL DEFENSE CONSTRUCTION

This analysis deals with appropriations and expenditures for public works in the fiscal years 1948, 1949, and 1950. The concept of Federal public works used herein includes direct outlays, grants, and loans to States and local public bodies, and the cost of surveys and planning. Figures also include maintenance in a few cases where a single appropriation is used to finance both new construction and maintenance. Expenditures from Government corporation checking accounts are shown on a gross basis in the tables and adjusted to a net basis (i. e., expenditures less collections) in the totals.

FEDERAL AID TO STATE AND LOCAL GOVERNMENTS

Grants-in-aid and Federal revenues shared with the States and their subdivisions are set forth in a brief analysis. Like the article on Federal public works, this discussion is accompanied by a table of appropriations and expenditures for the fiscal years 1948, 1949, and 1950. Since some grants-in-aid are used to finance public works, certain items are included in both this analysis and the preceding one.

RECEIPTS FROM AND PAYMENTS TO THE PUBLIC, FISCAL YEARS 1929-1950

A new historical table presents receipts from and payments to the public on a consolidated basis—including budget and trust funds—but excluding major intragovernmental and noncash transactions. This table summarizes for the past 20 fiscal years, with estimates for 1949 and 1950, the type of data presented in table 13 of part I for the fiscal years 1948, 1949, and 1950. The accompanying discussion explains more fully the basis of the compilation.

EXPLANATION OF THE ESTIMATES OF RECEIPTS

ON THE BASIS OF EXISTING LEGISLATION

The estimates of receipts from taxes and customs for the current and ensuing fiscal years under existing legislation are prepared in December each year by the Treasury Department. The estimates of miscellaneous receipts in general are prepared by the agency depositing the receipts in the Treasury.

The definition of "budget receipts" used in this estimate differs from that used in previous estimates in that (1) "refunds of receipts" are deducted in deriving "budget-receipts" whereas in previous estimates refunds were included in expenditures and (2) miscellaneous receipts exclude payments to the Treasury, principally by wholly owned Government corporations, for retirement of capital stock and for disposition of earnings. Such payments are also excluded from expenditures. Where used for comparative purposes actual budget receipts of previous years have been adjusted for these two changes.

TOTAL RECEIPTS

Total receipts (daily Treasury statement basis) are estimated in the amounts of $44,043.7 million in the fiscal year 1949 and $45,420.7 million in the fiscal year 1950. Total receipts are estimated to decline in the fiscal year 1949 by $2,055.1 million from actual receipts in the fiscal year 1948, but are expected to rise $1,377.0 million in the fiscal year 1950 over the level estimated for the fiscal year 1949.

The details of the estimated and actual receipts are shown in table 6, pages A12-22. Throughout the tables shown in this exposition the figures are rounded and will not necessarily add to totals. This exposition utilizes the budget classification of receipts.[1]

Percentage distribution of total receipts by sources

Source [1]	Actual		Estimate	
	1947	1948	1949	1950
Direct taxes on individuals	45.9	47.5	43.9	43.6
Direct taxes on corporations	21.7	22.1	26.6	27.0
Excise taxes	16.3	16.0	17.5	17.4
Employment taxes	4.6	5.2	5.9	7.3
Customs	1.1	.9	.9	.9
Miscellaneous receipts	10.4	8.3	5.2	3.8
Total receipts	100.0	100.0	100.0	100.0

1 The budget classification of taxes differs in several respects from the classification used by the Treasury Department in the daily Treasury statement. In the budget classification, the Treasury "income tax" is divided into "direct taxes on individuals" and "direct taxes on corporations." The budget classification removes from the Treasury "miscellaneous internal revenue" the estate and gift taxes, which are placed in "direct taxes on individuals." The budget "excise taxes" consist of the Treasury "miscellaneous internal revenue" less estate and gift taxes. The budget "employment taxes" consist of the Treasury "social security taxes," "taxes on carriers and their employees," and "railroad unemployment insurance contributions for administrative expenses."

Amounts shown for the fiscal years 1947 and 1948 are on the basis of the daily Treasury statement as far as possible. Since the classification used in the daily Treasury statement does not correspond exactly to the budget classification, it is necessary to allocate arbitrarily some of the adjustments from the detailed collections basis to the dailyTreasury statement basis. The adjustment from the collections basis to the daily Treasury statement basis for "miscellaneous internal revenue" is contained in "excise taxes" and the adjustment for "income tax; other" (other than withheld by employers) is contained in "direct taxes on individuals." The total amounts for employment taxes, customs, and miscellaneous receipts are on the basis of the daily Treasury statement. All details of taxes, other than "income tax: withheld by employers" and the details of "employment taxes" are on the basis of collections. Details of miscellaneous receipts are on the basis of warrants issued.

Direct taxes on individuals are estimated to decrease in the fiscal year 1949 from the record levels attained in the fiscal years 1947 and 1948 and to remain below these levels, although increasing in the fiscal year 1950. Although decreasing in absolute amount and relative importance this source remains the most important major source by a consider at le margin. Continuing increases are estimated for direct taxes on corporations, the second m.ost important source of revenue, for excises, the third m.ost im.portant, and for em.ployment taxes, which displace miscellaneous receipts as the fourth most important source in the fiscal year 1949. Customs are estimated to decrease from actual receipts of the fiscal year 1948 in the fiscal year 1949 and remain at that level in the fiscal year 1950. Miscellaneous receipts are estimated to decrease significantly in the fiscal years 1949 and 1950. The fiscal year 1950 represents the third consecutive year of decline from the record receipts from this source of the fiscal year 1947.

FISCAL YEAR 1949

Actual receipts in the fiscal year 1948 and estimated receipts in the fiscal year 1949 are compared by major sources in the following table:

Total budget receipts by sources

[In millions of dollars]

Source	1948 actual	1949 estimate	Increase (+) or decrease (-), 1949 over 1948
Direct taxes on individuals	21,895.9	19,327.0	-2,568.9
Direct taxes on corporations	10,174.4	11,709.0	+1,534.6
Excise taxes	7,402.0	7,715.0	+313.0
Employment taxes	2,395.7	2,610.0	+214.3
Customs	421.7	407.0	-14.7
Miscellaneous receipts	3,809.1	2,275.7	-1,533.4
Total receipts	46,098.8	44,043.7	-2,055.1
Deduct:			
(a) Appropriation to Federal old-age and survivors insurance trust fund	1,616.2	1,754.0	+137.8
(b) Refunds of receipts	2,271.9	2,709.4	+437.5
Budget receipts	42,210.8	39,580.3	-2,630.5

Budget receipts in the fiscal year 1949 are estimated to amount to $39,580.3 million, a decrease of $2,630.5 million from actual budget receipts in the fiscal year 1948 but all items do not contribute to the over-all decrease. Substantial decreases in receipts from direct taxes on individuals, miscellaneous receipts—and the large increase in the deduction item, refunds—together with the small decrease in customs exceed increases in receipts from direct taxes on corporations, excise taxes, and employment taxes.

Direct taxes on individuals.—The yields of direct taxes on individuals are shown in the following table:

[In millions of dollars]

Source	1948 actual	1949 estimate	Increase (+) or decrease (-), 1949 over 1948
Individual income tax:			
Withheld	11,436.1	10,414.0	-1,022.1
Not withheld	8,943.6	7,446.0	-1,497.6
Back taxes	616.8	670.0	+53.2
Total individual income tax	20,996.6	18,530.0	-2,466.6
Estate tax	822.4	739.0	-83.4
Gift tax	77.0	58.0	-19.0
Total direct taxes on individuals	21,895.9	19,327.0	-2,568.9

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Receipts from individual income taxes in the fiscal year 1949 are estimated to decrease by $2,466.6 million as compared with the fiscal year 1948. The reduction in tax liabilities under the Revenue Act of 1948 causes receipts to decrease although the levels of income reflected in fiscal year 1949 receipts are higher than those reflected in fiscal year 1948 receipts. Another factor tending to increase receipts is the salaries and wages of the armed forces which become subject to withholding beginning January 1, 1949.

Current payments other than withheld decrease because of the large overpayments in the first half of calendar year 1948 which will be partially offset by reduced payments made in the fiscal year 1949 on declarations and final returns for calendar year 1948 incomes. The overpayments arose because the tax reductions contained in the Revenue Act of 1948 were applicable to the entire calendar year 1948 although the act was not passed until April 2, 1948, and reduced rates of withholding did not go into effect until May 1, 1948.

Back taxes are estimated to increase slightly.

Estate- and gift-tax collections are estimated to decrease because of the Revenue Act of 1948 which allowed special treatment of transfers between spouses for both the estate and gift taxes which substantially reduces tax liabilities under these laws. The changes made by the Revenue Act of 1948 will not be fully effective for some time because of the 15-month lag between the date of death and the date of filing the return which is permissible under the estate-tax laws.

Direct taxes on corporations.—The yields of the taxes from this source appear in the table below:

[In millions of dollars]

Source	1948 actual	1949 estimate	Increase (+) or decrease (-), 1949 over 1948
Income and excess-profits taxes	8,930.6	10,354.0	+1,423.4
Back taxes	1,243.8	1,355.0	+111.2
Total direct taxes on corporations	10,174.4	11,709.0	+1,534.6

Corporation income and excess-profits tax receipts in the fiscal year 1948 reflect incomes and tax provisions of the calendar years 1946 and 1947, while receipts in the fiscal year 1949 reflect incomes and tax provisions of the calendar years 1947 and 1948. The rising trend of corporate income during the calendar years 1946, 1947, and 1948 is responsible for the increase in estimated receipts. It is estimated that back tax receipts will rise also and consequently that total receipts from direct taxes on corporations will be higher in the fiscal year 1949 than in the fiscal year 1948.

Excise taxes.—Receipts from this source by major groups are listed in the following table:

[In millions of dollars]

Source	1948 actual	1949 estimate	Increase (+) or decrease (-), 1949 over 1948
Liquor taxes	2,255.3	2,333.0	+77.7
Tobacco taxes	1,300.3	1,341.0	+40.7
Stamp taxes	79.5	76.0	-3.5
Manufacturers' excise taxes	1,649.2	1,753.0	+103.8
Retailers' excise taxes	469.9	467.0	-2.9
Miscellaneous taxes	1,657.5	1,745.0	+87.5
Adjustment to daily Treasury statement basis	-9.6		+9.6
Total excise taxes	7,402.0	7,715.0	+313.0

Most of the important tax groups included in excise taxes are estimated to increase in the fiscal year 1949 as compared with actual receipts in the fiscal year 1948, reflecting the higher levels of disposable personal income for fiscal 1949, as compared with fiscal 1948.

Employment taxes.—The yields of the various employment taxes are shown below:

[In millions of dollars]

Source	1948 actual	1949 estimate	Increase (+) or decrease (-), 1949 over 1948
Federal Insurance Contributions Act	1,616.2	1,754.0	+137.8
Federal Unemployment Tax Act	207.9	229.0	+21.1
Railroad Retirement Tax Act	557.1	616.0	+58.9
Railroad unemployment insurance contributions for administrative expenses	14.5	11.0	-3.5
Total employment taxes	2,395.7	2,610.0	+214.3
Deduct appropriation to Federal old-age and survivors insurance trust fund	1,616.2	1,754.0	+137.8
Net employment taxes	779.5	856.0	+76.5

The estimated increase in receipts in the fiscal year 1949 over the fiscal year 1948 is based on higher industrial and railroad pay rolls and on an increase in the tax rate under the Railroad Retirement Tax Act. The rate change from 5% percent to 6 percent each on the carriers and on their employees beginning on January 1, 1949, will be reflected in receipts under this act beginning with the last quarter of the fiscal year 1949. Because of Public Law 379, Eightieth Congress, the rates of tax under the Federal Insurance Contributions Act remain at 1 percent each on the employer and employee during the period reflected in these estimates.

Customs.—Customs receipts are estimated to be $407.0 million in the fiscal year 1949 or $14.7 million less than in the fiscal year 1948. This decrease is due primarily to the rate concessions which were made by the United States under the Geneva Agreement of October 30, 1947, and which became effective on January 1, 1948, by virtue of the Presidential Proclamation of December 16, 1947. These rate concessions were reflected in customs receipts for the last half only of the fiscal year 1948 but will be reflected in such receipts for the entire fiscal year 1949.

Miscellaneous receipts.—The estimated decrease in miscellaneous receipts from fiscal year 1948 to 1949 is due in large part to the tapering off of the surplus property disposal program and other war-connected activities. Surplus property receipts, which comprised almost half of the 1948 miscellaneous receipts total, are expected to decline from $1,829.5 million in 1948 to $693.0 million in 1949.

Refunds of receipts.—Refunds of receipts are estimated to amount to $2,709.4 million in the fiscal year 1949 as compared with actual refunds of $2,271.9 million in the fiscal year 1948. Amounts withheld under the individual income tax in the first 4 months of calendar year 1948 were based on rates which were reduced retroactively to January 1, 1948. The consequent large amounts of excess withholdings are reflected in refunds to be made in the fiscal year 1949.

FISCAL YEAR 1950

Estimated receipts in the fiscal years 1949 and 1950 are compared by major sources in the following table:

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Total budget receipts by source

[In millions of dollars]

Source	1949 estimate	1950 estimate	Increase (+) or decrease (-), 1950 over 1949
Direct taxes on individuals	19,327.0	19,788.0	+461.0
Direct taxes on corporations	11,709.0	12,252.0	+543.0
Excise taxes	7,715.0	7,900.0	+185.0
Employment taxes	2,610.0	3,324.0	+714.0
Customs	407.0	407.0	
Miscellaneous receipts	2,275.7	1,749.7	-526.0
Total receipts	44,043.7	45,420.7	+1,377.0
Deduct:			
(a) Appropriation to Federal old-age and survivors insurance trust fund	1,754.0	2,420.0	+666.0
(b) Refunds of receipts	2,709.4	2,097.1	-612.3
Budget receipts	39,580.3	40,903.6	+1,323.3

Budget receipts in the fiscal year 1950 are estimated to amount to $40,903.6 million, an increase of $1,323.3 million over estimated budget receipts in the fiscal year 1949. A major part of this increase is caused by the estimated decrease in refunds of receipts amounting to $612.3 million. The increase in budget receipts excluding the change in refunds is $711.0 million. Increases are estimated in receipts from all tax sources with the exception of customs which remain unchanged, but the total increase from tax sources is offset to a considerable extent by the large decrease estimated in miscellaneous receipts which consist for the most part of receipts from nontax sources.

Direct taxes on individuals.—The yields of the direct taxes on individuals are shown in the following table:

[In millions of dollars]

Source	1949 estimate	1950 estimate	Increase (+) or decrease (-), 1950 over 1949
Individual income tax:			
Withheld	10,414.0	10,680.0	+266.0
Not withheld	7,446.0	7,807.0	+361.0
Back taxes	670.0	648.0	-22.0
Total individual income tax	18,530.0	19,135.0	+605.0
Estate tax	739.0	605.0	-134.0
Gift tax	58.0	48.0	-10.0
Total direct taxes on individuals	19,327.0	19,788.0	+461.0

Receipts from individual income taxes in the fiscal year 1950 are estimated to increase $605.0 million over the fiscal year 1949.

Withholding receipts are estimated to increase very slightly as a result of the higher levels of salaries and wages subject to withholding. The salaries and wages of members of the armed forces will be subject to withholding for the full fiscal year as compared with one-half year in the fiscal year 1949.

Current payments other than withheld increase $361.0 million in the fiscal year 1950 principally because payments in the fiscal year 1949 from this source will be reduced by overpayments on calendar year 1948 liabilities made in the last half of the fiscal year 1948 prior to the enactment of the Revenue Act of 1948 which reduced tax rates and base retroactively to January 1, 1948.

Back taxes are estimated to decrease slightly.

Estate and gift tax collections are estimated to decrease further because of the impact of the Revenue Act of 1948 which will become fully effective for the great bulk of returns filed in the fiscal year 1950.

Direct taxes on corporations.—The receipts from this source are shown in the table below:

[In millions of dollars]

Source	1949 estimate	1950 estimate	Increase (+) or decrease (-), 1950 over 1949
Income tax	10,354.0	10,756.0	+402.0
Backtaxes	1,355.0	1,496.0	+141.0
Total direct taxes on corporations	11,709.0	12,252.0	+543.0

The combined income for the calendar years 1948 and 1949 is estimated to be greater than the combined income for the calendar years 1947 and 1948 and current income tax receipts are estimated accordingly to be greater in the fiscal year 1950 than in the fiscal year 1949. Back tax receipts, which are estimated to be slightly greater in fiscal year 1950 than in fiscal year 1949, reflect primarily the rising trend of incomes during the calendar years 1946, 1947, and 1948.

Excise taxes.—Receipts from the major groups of excise taxes are listed in the following table:

[In millions of dollars]

Source	1949 estimate	1950 estimate	Increase (+) or decrease (-), 1950 over 1949
Liquor taxes	2,333.0	2,419.0	+86.0
Tobacco taxes	1,341.0	1,368.0	+27.0
Stamp taxes	76.0	75.0	-1.0
Manufacturers' excise taxes	1,753.0	1,763.0	+10.0
Retailers' excise taxes	467.0	478.0	+11.0
Miscellaneous taxes	1,745.0	1,797.0	+52.0
Total excise taxes	7,715.0	7,900.0	+185.0

Small increases are estimated in each of the major excise tax groups with the exception of stamp taxes which show a very small decrease. No great change is anticipated in the excise tax group in the fiscal year 1950 as compared with the fiscal year 1949 as expenditures for taxable goods and services are expected to be about the same in both years.

Employment taxes.—The yields of the various employment taxes, under existing legislation, are shown below:

[In millions of dollars]

Source	1949 estimate	1950 estimate	Increase (+) or decrease (-), 1950 over 1949
Federal Insurance Contributions Act	1,754.0	2,420.0	+666.0
Federal Unemployment Tax Act	229.0	239.0	+10.0
Railroad Retirement Tax Act	616.0	654.0	+38.0
Railroad unemployment insurance contributions for administrative expenses	11.0	11.0	
Total employment taxes	2,610.0	3,324.0	+714.0
Deduct: Appropriation to Federal old-age and survivors insurance trust fund	1,754.0	2,420.0	+666.0
Net employment taxes	856.0	904.0	+48.0

The estimated increase in receipts in the fiscal year 1950 over the fiscal year 1949 is based on higher industrial and railroad pay rolls, on changes in the tax rates, and on a prospective change in the method of collection of taxes under the Federal Insurance Contributions Act. The rate change under the Railroad Retirement Tax Act from 5%

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

percent to 6 percent each on the carriers and on their employees beginning on January 1, 1949, will be reflected in receipts for the last quarter only of the fiscal year 1949 but for all four quarters of the fiscal year 1950. The rate change under Public Law 379, Eightieth Congress, amending the Federal Insurance Contributions Act, from 1 percent to *l}i* percent each on the employer and employee beginning on January 1, 1950, would be reflected under the present method of collection in receipts beginning with the last quarter of the fiscal year 1950. The prospective regulation which will place the collection of most of the tax imposed by the Federal Insurance Contributions Act on a monthly instead of a quarterly basis with respect to wages paid after June 30, 1949, will further increase the receipts under this act in the fiscal year 1950.

Customs.—Customs receipts are estimated to be $407 million in the fiscal year 1950, continuing at the same level estimated for the fiscal year 1949.

Miscellaneous receipts.—Estimated receipts from this source are expected to decrease in the fiscal year 1950, principally because of the continuing decline in receipts from the disposal of surplus property.

Refunds of receipts.—Refunds are estimated to be $2,097.1 million in the fiscal year 1950, or $612.3 million less than the abnormally large refunds estimated for the fiscal year 1949.

FEDERAL ACTIVITIES IN CIVIL PUBLIC WORKS AND NATIONAL DEFENSE CONSTRUCTION

The public works and construction activities of the Federal Government have been classified in the Budget with other governmental activities under the functions which they serve. In this section they are grouped to show the volume and nature of Federal civil public works and national defense construction. In both the text discussion and the tabular presentation civil public works and national defense construction are presented separately. Major emphasis is given in the discussion to civil public works. From the standpoint of over-all effect on the Nation's construction industry, however, total Federal construction activity, civil and national defense, is significant.

TOTAL CONSTRUCTION OUTLAYS

The volume of Federal public works and construction will increase in fiscal year 1950 to even higher levels than in fiscal years 1948 and 1949. Expenditures for civil public works are estimated to increase by 22 percent over those in fiscal year 1949, whereas expenditures for national defense construction show a much smaller increase. The result is an increase of $546 million for total Federal construction outlays in fiscal year 1950 over fiscal year 1949, as compared with a larger increase of $700 million in fiscal year 1949 over fiscal year 1948.

[Fiscal years. In millions]

Type	Expenditures		
	1948 actual	1949 estimate	1950 estimate
Civil public works (including loans and grants)	$1,620	$2,429	$2,959
National defense construction	395	286	302
Total	2,015	2,715	3,261

CIVIL PUBLIC WORKS

The impact on the construction industry of Federal and federally aided public works is becoming accentuated. These activities are taking an increasing share of construction labor, equipment, and materials at a time when there are shortages and competitive demands. For this reason the recommended 1949 and 1950 programs have been held largely to continuation of going projects. In the formulation of the recommendations, careful consideration has been given both to the specific need for the individual projects and to the relative need for these projects in comparison with total Budget needs and needs from the economy as a whole.

As a general policy, recommendations for civil public works in fiscal year 1950 allow only for the minimum rate of progress with due regard to logical order and timing of work. Projects involving the production and transmission of power in shortage areas are provided for at an economical rate which will meet the demand at the earliest possible date. New major projects are recommended only where the public need for them is so urgent that it is not in the national interest to postpone them. Recommendations for new loan and grant commitments for public works in fiscal year 1950 are being held at or below authorized annual rates or rates prevailing in fiscal year 1949.

SIZE AND NATURE OF FISCAL YEAR 1950 PROGRAM

Federal civil public works expenditures are estimated to reach $2,959 million in fiscal year 1950 as compared with $2,429 million of estimated expenditures in fiscal year 1949 and $1,620 million of actual expenditures in fiscal year 1948. The major portion of these expenditures in fiscal year 1950 will be for six large programs: Veterans hospital construction; flood control, navigation and power projects of the Corps of Engineers; irrigation and power projects of the Bureau of Reclamation; construction of facilities for the expanding atomic energy program; grants to States by the Public Roads Administration for highway construction; and loans by the Rural Electrification Administration to cooperatives and public bodies for rural electrification lines. An estimated $2,471 million, or about 83 percent of total civil works expenditures will be for these six programs. Of the remaining $488 million about $282 million is for expenditures of the Public Health Service, Public Buildings Administration, Civil Aeronautics Administration, and the Tennessee Valley Authority.

TABLE 1.—*Expenditures for civil public works*

CONTINUING WORK AND NEW PROJECTS

A total of $2,728 million, or approximately 90 percent of total expenditures for civil public works in fiscal year 1950, is required to continue work in progress or to make payments on prior year commitments for public works loans and grants. The fiscal year 1950 public works expenditure program has thus been largely determined by appropriations and contract authorizations made for fiscal year 1949 and prior years. Only $295 million of fiscal year 1950 expenditures is estimated to be required for new projects, features, and commitments.

TABLE 2.—*Total estimated cost of the 1950 civil public works program—Classified according to date of expenditure, and continuing work and new projects, features, and commitments*

[Fiscal years. In millions]

Program	Total estimated cost	Expenditures		
		To June 30, 1949	Estimated, fiscal year 1950	Required to complete in later years

i Includes Corps of Engineers expenditures for veterans' hospitals.

Continuing work,—Expenditures for "continuing work" in fiscal year 1950 include (1) those required in fiscal year 1950 for direct Federal projects or features of projects started with obligational authority provided in prior years, and (2) those required in fiscal year 1950 to meet loan and grant commitments, such as Federal-aid highway grants and Rural Electrification Administration loans, provided in prior years. In some cases these amounts also include nonproject costs such as administration, maintenance, and other continuing expenses included in over-all public works appropriations,

An estimated $1,768 million will be required for continuing work on Federal construction projects, and $960 million will be needed for loan and grant commitments made under prior year authority. Over one-half of these fiscal year 1950 expenditures for continuing work on Federal projects will be for river development work of the Corps of Engineers and the Bureau of Reclamation. Another 15 percent will be for continued construction work on veterans' hospitals, most of which will be under contract in fiscal year 1950. Large expenditures will also be made on facilities required by the Atomic Energy Commission. Most of the expenditures in fiscal year 1950 for prior year loan and grant commitments will be for payments to States under the postwar highway program, which will approach its expenditure peak in fiscal year 1950, and for loan payments to REA cooperatives for electric line and facilities construction.

New projects, features, and commitments.—The term "new projects, features, and commitments" includes (1) those direct-Federal projects or project features on which construction will be started with appropriations and contract authorizations recommended for fiscal year 1950, and (2) new commitments recommended for fiscal year 1950 on loan and grant programs.

Only about $264 million is estimated for expenditures in fiscal year 1950 on new Federal projects totaling $1,663 million in final cost. Estimated new commitments for loans and grants for fiscal year 1950 totaling $560 million are at or somewhat above the fiscal year 1949 level, but only $31 million will be spent in fiscal year 1950 in payments on these commitments. The remainder will be carried into 1951 and later years.

New power generation and transmission projects recommended in fiscal year 1950 are considered necessary to meet urgent power demands, particularly in the Pacific Northwest and the Tennessee Valley. An early start on the St. Lawrence seaway and power development upon its authorization by Congress is recommended to increase power capacity and to provide oceangoing navigation for the Great Lakes. Other new river and harbor projects recommended for fiscal year 1950 are needed to correct deficiencies which are retarding domestic and international navigation. Additional new projects, such as those for the National Park Service, National Advisory Committee for Aeronautics, and the Civil Aeronautics Administration are held to a minimum consistent with meeting urgent needs.

New loan commitments of $350 **million** are recommended for rural electrification for fiscal year 1950 to meet the growing demands of rural areas for electric service. Grant commitments recommended for Federal-aid hospital and airport construction are at or below the levels established in authorizing legislation, and will provide only for the minimum requirements. No loan commitments are recommended for water pollution control construction for fiscal year 1950. The Federal-Aid Highway Act of 1948 provided new contract authorizations **of** $450 **million** for each of the fiscal years **1950 and 1951.**

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Other new projects recommended for fiscal year 1950 which are contingent upon passage of proposed legislation include housing, public works, and communications facilities in Alaska, rehabilitation and betterment of reclamation projects, and a building for use of the Bureau of the Census.

COMMITMENTS AFTER FISCAL YEAR 1950

About $8.0 billion of expenditures will be required after fiscal year 1950 to complete the projects and to make payments for the loan and grant commitments in the present civil public works program, including the new starts recommended for fiscal year 1950. This total is almost three times the estimated total expenditures for civil public works in fiscal year 1950. Although the major portion of these expenditures will be required in fiscal years 1951 and 1952, expenditures on some large projects will continue thereafter for a number of years.

For Federal projects, new starts recommended in fiscal year 1950 will add $1.4 billion to the $4.6 billion of expenditures required after fiscal year 1950 to complete projects started in prior years. New loan and grant commitments recommended for fiscal year 1950 will add $0.5 billion to the $1.5 billion of expenditures required after fiscal year 1950 to liquidate commitments made in prior years.

The largest volume of expenditures required after fiscal year 1950 is for completing large multiple-purpose river basin projects of the Corps of Engineers and Bureau of Reclamation, some of which may take a number of years after fiscal year 1950 to complete. Other large requirements are for completion of construction on the $940 million veterans' hospital program, and payments on the postwar Federal-aid highway programs. These requirements will fall largely in fiscal years 1951 and 1952. Expenditures for completion of other programs, including that of the Atomic Energy Commission, will also be made largely in fiscal years 1951 and 1952.

The estimates of expenditures required after fiscal year 1950 to complete Federal projects are based largely upon current construction costs. Should construction costs change to any great extent before the projects are completed, the required expenditures would differ somewhat from the estimates shown in table 2.

RESERVE OF FEDERAL PROJECTS

Authorized work.—Agency reports indicate that on the basis of present prices about $12.8 billion of construction work, authorized either in general or specifically by Congress, is available after fiscal year 1950. Almost 75 percent of the authorized work is included in the programs of the Corps of Engineers, Bureau of Reclamation, and Rural Electrification Administration, and the Forest Service program for roads and trails. Some of these programs extend over 10 to 20 years.

TABLE 3.—*Reserve of authorized projects and programs for undertaking after fiscal year 1950*

Agency and program:	Total cost of projects (billions)
Corps of Engineers:	
Rivers and harbors	$1.1
Flood control	2.7
Bureau of Reclamation	3.5
Rural Electrification Administration	1.5
Civil Aeronautics Administration, Federal-aid airports	.4
Department of Agriculture, forest roads, trails, and improvements	.7
Other	2.9
Total	12.8

Programs not yet authorized.—In addition to authorized programs, Federal agencies report a total of $14 billion of proposed construction which has not yet been authorized by Congress. Among the larger programs are $3.6 billion of multiple-purpose irrigation and power projects proposed by the Bureau of Reclamation, and $3.1 billion of multiple-purpose river and harbor and flood-control work recommended by the Corps of Engineers. Grants-in-aid programs to be considered for authorization by the Congress include additional grants for Federal-aid highways.

Planned projects.—The status of plans for Federal construction projects is constantly changing as projects are placed under contract and planning is started on others. Also, the status of plans varies among different Federal agencies. As of June 30, 1949, the Corps of Engineers will have an estimated $100 million of authorized projects completely planned and another $1.6 billion of authorized work in the planning stage. A large volume of other authorized construction work, such as multiple-purpose projects of the Bureau of Reclamation, is in the planning stage preparatory to construction. Other Federal agencies including the Public Buildings Administration are preparing detailed project plans on a more limited scale. However, there is no large organized backlog of fully planned work in reserve, as most of the planning of projects is accomplished only a relatively short time in advance of construction.

BASIC SURVEYS AND DETAILED PLANS

The 1950 Budget provides appropriations for continuing the collection of basic data, the undertaking of preliminary examinations and surveys, and to a limited degree for the preparation of detailed plans and specifications for construction projects. Basic data, such as topographic maps, and records of rainfall, run-off, and stream flow are essential to the efficient and economical design and construction of many projects, particularly in the field of resource development. Similarly, well conceived development projects require much preliminary investigation and survey work to determine their engineering and economic feasibility. Many Federal developments have been hampered in the past by inadequate examination of all of the problems involved before projects were authorized and construction was undertaken. Preparation of detailed project plans well in advance of construction provides for more orderly programing of project construction, and prevents many expensive changes in project designs during the construction period.

Basic data.—A total of $21.4 million is recommended for appropriation or allotment in fiscal year 1950 for topographic mapping and geodetic control surveys and for assembly of hydrologic data. This compares with a total of $15.8 million for these purposes for fiscal year 1949. These data are essential not only for proper planning of construction projects but also to provide the necessary basis for the economical conservation and development of natural resources.

Preliminary surveys.—Appropriations and allotments totaling $12.6 million are recommended for fiscal year 1950 for continuation of preliminary surveys on construction projects under investigation for possible future construction. Careful surveys are required in particular for the many and varied aspects of river-basin developments which involve the interests of many Federal agencies. Accordingly, the 1950 Budget includes funds, either through direct appropriation or by transfer, for river-

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

basin surveys for such agencies as the National Park Service, Fish and Wildlife Service, and the Public Health Service, as well as for the primary construction agencies.

Detailed plans.—For planning of authorized construction projects, a total of $18 million of appropriations and allotments is recommended for fiscal year 1950. The major share of this total covers detailed plans for river-basin projects of the Corps of Engineers and the Bureau of Reclamation. In addition, substantial amounts for detailed plans will be available from construction appropriations for some agencies, including the Atomic Energy Commission.

PROGRAM BY MAJOR FUNCTIONS

In most of the functional fields of Federal Government operations, public works are required to some extent. The wide range of functions served by Federal public works is indicated in table 4, which shows civil public works classified according to major function and subfunction. The major fehare of Federal public works expenditures is for development*bf Natural resources and for transportation and communication.

TABLE 4.—*Federal civil public works expenditures by function and subfunction*

[Fiscal years. In millions]

Function	1948 actual	1949 estimate	1950 estimate
Veterans' services and benefits: Veterans' hospitals, other services, and administrative costs	$106.2	$186.3	$261.4

Total, civil public works, net	1,619.5	2,429.1	2,959.2

VETERANS' SERVICES AND BENEFITS

Veterans Administration hospitals.—During fiscal year 1950, work will continue on the large construction program for Veterans Administration hospitals consisting of 75 new hospital projects to provide over 37,000 beds and the repair and modernization of existing hospitals at a total estimated cost of $939.6 million. Of the total program of 90 new hospitals and 9 additions to existing hospitals previously approved to provide over 53,000 beds, currently estimated fund requirements contemplate the cancellation of 24 hospital projects not yet under construction and the reduction in capacity of 14 additional hospitals, thereby curtailing the program by about 16,000 beds at an estimated saving of $279 million.

As a result of the curtailment of this program, no new obligational authority is necessary and funds already appropriated are adequate to cover expenditures through fiscal year 1950.

Thirty-six hospital projects consisting of 14,000 beds are already under construction and by the end of fiscal year 1950 it is expected that all of the remaining program will be under contract, except 4 projects aggregating 4,500 beds and approximately 10 percent of the repair and modernization program for existing hospitals.

In carrying out this program, the Veterans Administration is using the services of the Corps of Engineers for the planning and construction of 51 new hospitals.

INTERNATIONAL AFFAIRS AND FINANCE

Public Roads Administration.—The small amount of expenditures under this function is for continuation of cooperative work on the Inter-American Highway in Central America.

SOCIAL WELFARE, HEALTH, AND SECURITY

Except for construction of some research facilities, the Federal Government's activities in this field are largely for assistance to State and local agencies for construction of hospital and health centers and surveys and planning for water pollution control works.

Public Health Service.—The Federal-aid hospital construction program provides a total of $375 million of Federal grants over a 5-year period for non-Federal public and private nonprofit hospitals. Fiscal year 1950 will be the third year of active operations under the program. A total of $150 million in contract authorizations has been provided through fiscal year 1949, and an additional contract authorization of $75 million is recommended for fiscal year 1950. Hospital construction under the program has lagged because of delays in preparing plans and high costs and shortages in the construction industry. In fiscal year 1950, however, construction activities are expected to be well under way and expenditures are estimated to total $60 million.

The Water Pollution Control Act of 1948 authorizes appropriations for $22.5 million in loans and $2 million in grants for each of 5 fiscal years beginning with fiscal year 1949. Such loans and grants are to be made available to States, localities, and interstate agencies for surveys, detailed plans, and construction of facilities for stream pollution control. The program will be carried out cooperatively by the Public Health Service in the Federal Security Agency and the Federal Works Agency. Appropriation of $1,000,000 to the Public Health Service is recommended for fiscal year 1950 for grants to States for industrial water studies. An additional $500,000 is

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

recommended for appropriation to the Federal Works Agency for grants to States and local communities for preparation of detailed construction plans for pollution control facilities. No construction loans are recommended for fiscal year 1949 or 1950, pending results of over-all river basin surveys and the preparation of detailed construction plans.

An appropriation of $17 million is recommended for continuation of construction during fiscal year 1950 on the joint mental health, cancer, heart, and general medical research center at Bethesda, Md. Construction is under direction of the Public Buildings Administration.

HOUSING AND COMMUNITY FACILITIES

Housing and Home Finance Agency.—During fiscal year 1950, loans will be made to local housing authorities for correction of war-caused deficiencies on low-rent housing projects, and expenditures will also be made for correction of such deficiencies on federally owned low-rent projects. Final settlement of contract claims will be made during fiscal year 1949 for temporary homes for veterans, erected under the re-use housing program largely completed in 1947. As a part of the program to develop the resources of Alaska a $10jmillion revolving fund is included under proposed legislation to finance loans for construction of housing in Alaska.

Federal Works Agency, Bureau of Community Facilities.—Continuation of construction of high priority public works projects in the Virgin Islands to provide roads, water supply, sanitation facilities and other facilities will require expenditures of $1.3 million in fiscal year 1950, and approximately $5.1 million in later years to complete the authorized program. An appropriation of $2 million, contingent upon passage of authorizing legislation, is also recommended for construction of community facilities in Alaska.

EDUCATION AND GENERAL RESEARCH

Expenditure of $8.8 million under this function for fiscal year 1950 are for planning and continuation, of construction of buildings at Howard University, Washington, D. C, for a geophysical institute at Fairbanks, Alaska, and for research facilities at the National Bureau of Standards, including plans for a radio propagation laboratory under proposed legislation. To provide a basis for determining whether Federal assistance is required for school building construction, a survey of elementary and secondary school building requirements and adequacy of State and local resources to meet such requirements is recommended in this Budget.

AGRICULTURE AND AGRICULTURAL RESOURCES

Public works included under this function are directed toward conservation and development of agricultural resources and aid to the agricultural economy. Closely associated with these activities are a number of land conservation and improvement programs, such as the soil conservation operations of the Soil Conservation Service, which are not included here because they are primarily of a nonstructural nature. However, these activities are essential elements in any coordinated regional and national programs for land and water conservation and development.

Department of Agriculture, flood control—The $9.3 million of expenditures for flood-control activities by the Soil Conservation Service and the Forest Service in fiscal year 1950 will provide for surveys and for continued work on 10 watersheds, among which are the Los Angeles in California, Trinity in Texas, Washita in Oklahoma, and Little Sioux in Iowa. Completion of a survey report on upstream flood control in the Missouri River Basin is anticipated during fiscal year 1949, and accordingly a supplemental appropriation of $5 million is recommended for that year, to begin flood-control operations upon authorization of the program by the Congress. Acceleration of watershed protection and upstream flood control activities is necessary in the Missouri River Basin, as in other strategic areas throughout the Nation, in order to keep pace with the expanding program of downstream dam and levee construction by the Corps of Engineers and, in some areas, by the Bureau of Reclamation. For fully effective flood control a balance is necessary between upstream and downstream operations, particularly because upstream flood-control operations help to prevent soil erosion and retard siltation of multiple-purpose reservoirs.

Rural Electrification Administration.—The rural electrification program has continued to expand in response to pressing demands from rural groups for electric service. Between July 1945 and October 1948, the Rural Electrification Administration allocated loan funds to provide over 497,000 miles of distribution lines to serve over 1,450,000 customers. Loan advances totaled $265 million in fiscal year 1948 and are estimated to reach $310 million in fiscal year 1949. For the fiscal year 1950, advances to borrowers are estimated at $360 million.

NATURAL RESOURCES

The conservation and development of the Nation's natural resources involves a wide range of public works activities constituting a major element of total Federal public works activity. The function includes the multiple-purpose development of river basins for flood control, irrigation, hydroelectric power and other purposes, and the conservation and development of land, forest, mineral, recreational, and fish and wildlife resources. The development of natural resources also requires certain capital outlays of a nonstructural nature which cannot be classed strictly as construction, such as range improvements, wildlife development, reforestation, and forest protection. Such improvement work is not included herein as this section covers only work of a structural character.

Total expenditures for natural resources construction are estimated to rise from $1,107 million in 1949 to $1,282 million in 1950. These outlays will involve some increase for multiple-purpose projects involving hydroelectric power installations and related transmission lines in power shortage areas, as such projects are carried on at a rate which will most efficiently meet power demands at earliest practicable dates. Expenditures for other natural resources projects started in fiscal year 1949 and prior years will also continue upward in fiscal year 1950, although the rate of progress on these projects will be held to a minimum consistent with logical order and timing of work. Recommendations for new projects in fiscal year 1950 are held to a minimum in this Budget and include only high-priority items such as power generation and transmission projects in power-shortage areas including the Chief Joseph and Ice Harbor Dams in the Pacific Northwest (classified under Transportation) and the New Johnsonville steam plant in the TVA area.

Federal Reserve Bank of St. Louis

Corps of Engineers.—The flood-control program of the Corps of Engineers is Nation-wide in scope and closely related to multiple-purpose river basin developments of other Federal agencies, non-Federal public agencies, and private interests. It involves the provision of major storage reservoirs, usually for multiple purposes, construction of levees, and improvement of channels. The ultimate objective is to develop coordinated systems of flood-protection works as a part of the full development of the Nation's major river systems. In fiscal years 1949 and 1950, major emphasis will continue to be given to flood-control works in the Mississippi River Basin, including large programs on the Missouri, Ohio, and Arkansas Rivers and the, alluvial valley of the Mississippi River, in accordance with the long-range program for flood control in this basin presented to Congress in July 1947. In addition, major projects are under construction in the Susquehanna, Roanoke, and Savannah River Basins on the Atlantic seaboard, the Alabama-Coosa, Trinity, and Brazos Rivers on the Gulf coast, in the Los Angeles and Central Valley areas of California, and the Columbia River Basin in the Pacific Northwest. Expenditures for flood control are estimated to increase from $442 million in 1949 to $481 million in fiscal year 1950.

The Corps of Engineers is continuing its investigations and surveys of river basins, in accordance with congressional directives to determine the engineering and economic feasibility of additional flood-control projects for possible future authorization, and is preparing detailed plans for authorized projects to be started in later years.

Bureau of Reclamation.—This program for development of water resources in the 17 Western States will continue to expand in fiscal year 1950, as construction proceeds on many large irrigation and power projects started in prior years. Major developments are under way in the Columbia Basin, the Central Valley of California, lower Colorado River in Arizona and California, the Colorado-Big Thompson project in Colorado, and the Missouri River Basin. Included in the program is the construction of transmission lines to carry to principal load centers the electric power and energy produced at the projects and at related projects of the Corps of Engineers now under construction. Budget recommendations for fiscal year 1950 provide for continuation of existing construction activities at economical rates designed to bring in power benefits in shortage areas as soon as practicable, and irrigation benefits at orderly schedules with due regard to over-all agricultural requirements.

New work in fiscal year 1950 will be restricted largely to certain new features required in connection with existing developments. Expenditures for construction are estimated to increase from $258 million in fiscal year 1949 to $322 million in fiscal year 1950.

Funds are included to enable the Bureau of Reclamation to continue its preliminary investigations and surveys in the river basins of the West.

Bonneville Power Administration:—This agency is responsible for marketing power generated at federally owned dams in the Pacific Northwest* Funds are recommended for accelerating the construction of transmission facilities to match the generating schedules of Corps of Engineers and Bureau of Reclamation projects in order to meet the increasing power demands of the region. Expenditures are estimated at $36 million for fiscal year 1950.

Southwestern Power Administration.—This agency is responsible for marketing of electric power generated at Federal hydroelectric plants in the Oklahoma-Arkansas-Texas area. An initial appropriation of $7.5 million was provided in fiscal year 1947 for construction and acquisition of transmission lines and related facilities to integrate the power generated at the Norfork Dam and the Denison Dam and to construct Federal lines and service connections to cooperatives and municipalities. Three additional hydroelectric projects at Bull Shoals, Fort Gibson, and Tenkiller Ferry under construction by the Corps of Engineers are scheduled for initial generation of electric power in the spring and summer of 1953. Accordingly, funds have been recommended for this agency to provide for transmission facilities as required for marketing of power from these new projects.

Tennessee Valley Authority.—The 1950 Budget provides for expansion of construction activities in the Tennessee Valley. During fiscal year 1950 construction will be completed on Watauga Dam and will continue on South Holston Dam. The 1950 Budget also provides for installation of additional hydroelectric generating units in existing dams and extension and improvement of the transmission system to meet the expanding power needs of the region. A supplemental appropriation is recommended for fiscal year 1949 for starting of work on a $54 million steam-electric generating plant and the installation of two hydroelectric generating units at existing dams.

International Boundary and Water Commission, United States and Mexico.—Current activities consist of the construction, in cooperation with the Mexican Government, of the first of the multiple-purpose dams authorized on the Rio Grande in accordance with the terms of the treaty signed on February 3, 1944. Other activities include flood control and stream rectification works along the Rio Grande. Expenditures in fiscal year 1950 are estimated at $8.8 million and can be expected to increase in succeeding years as work provided in the treaty reaches a peak.

Bureau of Indian Affairs.—For fiscal year 1950 a small program of survey and construction work is provided on Indian irrigation projects in the Western States, chiefly for continuation of work on the Colorado River irrigation project.

National Park Service.—Increases are recommended for construction of roads, trails, and physical improvements in national park areas. These increases provide the minimum of improvements and additions to existing facilities required to serve the increasing number of visitors to national parks, monuments, and historic sites.

The National Park Service is also conducting surveys of recreational possibilities of reservoir projects under construction by the Corps of Engineers and the Bureau of Reclamation.

Atomic Energy Commission.—Construction activities of the Atomic Energy Commission provide production, research, housing and community facilities at various locations throughout the country. Total expenditures for these purposes are estimated to increase from $279 million for fiscal year 1949 to $326 million for fiscal year 1950, with substantial expenditures required in later years to complete the current program.

Federal Reserve Bank of St. Louis

TRANSPORTATION

Outlays for transportation consist largely of Federal aid for highways and airports and Federal construction of river and harbor projects and air navigation facilities. Estimated expenditures of $894 million in fiscal year 1950 will comprise about 30 percent of total estimated expenditures for civil public works. The expenditures for transportation represent a considerable increase over the $518 million of expenditures for fiscal year 1948 and the estimated $760 million for fiscal year 1949.

Corps of Engineers, rivers and harbors.—Expenditures for river and harbor improvements, estimated at $217 million for fiscal year 1950, provide for construction, maintenance, operation, and surveys of navigation projects, including associated multiple purposes. For construction alone, expenditures are estimated to increase from $86 million in fiscal year 1949 to $127 million in fiscal year 1950. Construction expenditures in fiscal year 1950 will be largely for construction of work at a minimum economic rate on projects started in prior years. Twelve new authorized river and harbor projects or new modifications of existing projects with appropriations totaling $24 million are recommended for fiscal year 1950. In addition an appropriation of $20 million is recommended under pending legislation for fiscal year 1950 to start construction on the St. Lawrence Seaway and Power project. Projects in the fiscal years 1949 and 1950 rivers and harbors programs provide for dredging and rock excavation in a number of major harbors on the Atlantic, Pacific, and Gulf coasts, improvement of the Intracoastal Waterway along the Gulf coast, work on inland waterways such as the Cumberland, Ohio, upper Mississippi, Missouri, and Warrior Rivers, and improvements to Great Lakes harbors and channels.

Expenditures for river and harbor work will continue to increase in fiscal year 1951, even without the starting of any new projects in that year, because of requirements to complete projects started in 1950 and prior years.

The Panama Canal.—Construction of community facilities in the Canal Zone, including housing, roads, streets, schools, and hospital improvements, will require an estimated expenditure of $3.6 million in fiscal year 1950.

Public Roads Administration.—The major portion of expenditures of the Public Roads Administration is for the postwar Federal-aid highway programs authorized by the Federal-Aid Highway Acts of 1944 and 1948. The 1944 act provided authorizations of $500 million annually for each of the three postwar fiscal years, and the 1948 act provided $450 million for each of the fiscal years 1950 and 1951. Expenditures under the postwar programs became sizable in fiscal year 1948, and in fiscal years 1949 and 1950 are expected to approach the annual rate authorized by Congress.

As provided in the Federal-Aid Highway Act of 1948, appropriations for forest highways will now be made directly to the Public Roads Administration rather than to the Department of Agriculture for transfer to the Public Roads Administration as in the past. These forest highways, built in and through national forests under supervision of the Public Roads Administration, form an integral part of the Federal-aid highway system. Expenditures for fiscal year 1950 are estimated at $23.5 million, or approximately the $20 million annual rate authorized by Congress. Expenditures totaling $43.9 million will be required in future years to liquidate the balance of authorizations to forest highways made by Congress in the Federal-Aid Highway Acts of 1944 and 1948.

Road programs of other Federal agencies.—Other Federal road programs include the construction of secondary roads associated with Indian reservations and highways and roads in the Territory of Alaska.

Civil Aeronautics Administration.—Fiscal year 1950 will be the fourth year of the Federal-aid airport program which authorizes $520 million of Federal grants over a 7-year period. Through fiscal year 1949, $117.5 million in cash and contract authorizations has been made available for airport grants to local public agencies and for administration, and in fiscal year 1950 an additional $40 million of obligational authority (including $36.5 million in contract authorization) is recommended. The recommended fiscal year 1950 program, which is less than one-half the maximum annual rate authorized by Congress, will permit grants for only the most urgent of airport projects. These are primarily projects relating to the larger-type airports of special importance to air commerce and national defense.

Expenditures for the establishment of air-navigation facilities on the Federal airways system in the continental United States and in the Territories and possessions are estimated at $20 million in fiscal year 1949 and $30 million in fiscal year 1950, and can be expected to increase in later years as the program of implementing the airways with the latest electronic aids is expanded and accelerated.

National Advisory Committee for Aeronautics.—Estimated expenditures by this agency for fiscal year 1950 total $14.8 million for construction of improvements and new facilities at its three laboratories: Langley Field, Va.; Cleveland, Ohio; and Moffett Field, Calif. The major new items recommended for fiscal year 1950 involve construction and modification of high-speed wind tunnels.

Alaska Railroad.—In fiscal year 1950 expenditures of $26.5 million are estimated for continuation of the rehabilitation program started in fiscal year 1948 to restore and improve the Alaska Railroad in order to provide proper service to areas dependent upon the railroad to promote the development of the Territory. The total program is now estimated to cost about $76 million and is being expedited in order to bring it to substantial completion in fiscal year 1950.

GENERAL GOVERNMENT

Public Buildings Administration.—In accordance with the Budget policy on civil public works, no general public buildings program is recommended. However, construction work will proceed on a few public buildings already started, and expenditures for these buildings are estimated to increase from $5.4 million in fiscal year 1949 to $22 million in fiscal year 1950. Funds are recommended under proposed legislation for construction of a building at Suitland, Md., urgently needed by the Bureau of the Census in connection with the 1950 decennial census.

Bureau of Indian Affairs.—The fiscal year 1950 program includes continuation of construction on a number of hospital and school building projects in Alaska to meet urgent requirements, and the provision of similar facilities on reservations in the United States. If urgent require-

ments for facilities for Indians are to be more adequately met, expenditures in fiscal year 1951 and later years will increase over the $8.2 million estimated for 1950.

NATIONAL DEFENSE CONSTRUCTION

Expenditures totaling $302 million for national defense construction in fiscal year 1950 will provide for the continuation of programs now under way, including permanent housing, research and development, and training facilities at establishments in the continental United States, and development of facilities at overseas bases. A tentative estimate covering additional requirements is included in the Budget, pending the enactment of authorizing legislation.

FEDERAL AID TO STATE AND LOCAL GOVERNMENTS

Financial transfers between levels of government, mainly in the form of grants-in-aid for specified services, have become a large factor in American public finance. Aid by the States to local governments has increased in recent years. Similarly, Federal financial aid to the States and their subdivisions also has increased and is a substantial element in State and local government financing. It is likewise a substantial part of the Federal Budget. These relationships and their recent trends may be indicated by the following figures:

Fiscal year	Federal expenditures for aid to State and local governments (millions)	Federal aid as percent of—	
		State-local revenues from all sources	Federal Budget expenditures
1947	$1,689	11	4
1948	1,638	9	[a]
1949	1,963	Not available	5
1950	2,480	Not available	6

Federal financial aid to State and local governments is almost wholly in the form of grants-in-aid, which are estimated to total $2,458 million in the fiscal year 1950. Other aids in the form of shared revenues, mostly from forest and mineral properties, are estimated at $22 million.

By far the largest category of Federal grants is for programs concerned with social welfare and health, for which grants of $1,359 million are estimated for the next fiscal year. These represent 58 percent of all Federal Budget expenditures for social welfare, health, and security.

Grants for transportation facilities—the construction of highways and airports—are estimated as requiring Federal expenditures of $518 million in the fiscal year 1950.

Grants for education are expected to total $323 million, including $290 million of estimated expenditures under proposed legislation to assist the States in financing elementary and secondary schools.

These three functions—social welfare, transportation, and education—account for 90 percent of all Federal grant expenditures estimated for the fiscal year 1950, including grants under proposed legislation. They represent 88 percent of all such grant expenditures to be made under legislation already in force.

Explanation of table.—This special analysis brings together all the grants and shared-revenues appearing in parts I and II of this Budget, where the authorizations and expenditures for grants-in-aid and shared revenues are reported as elements in the work programs of the responsible Federal agencies. The accompanying table enumerates the individual aid programs, with the amounts of appropriations and expenditures for each, for the fiscal years 1948, 1949, and 1950. In the summary tables in part I, these Federal-aid transactions are classified in the functional categories to which they are most closely related. For example, the $1,359 million of grants-in-aid in the field of social welfare, health, and security in 1950, shown in this special table, are included in the total Budget expenditures of $2,358 million reported for the same function in table 1 of part I.

The grant-in-aid is paid in some instances from an appropriation which covers also Federal administrative or other expenses. In such cases, in order to exclude wherever possible any objects of expenditure other than the actual grants, the amounts tabulated here as "appropriations" are ordinarily only a part of the actual appropriation—the part approximating the expenditure for the grant payment. However, for a few programs, e. g., federally aided highways, the appropriation and the expenditure shown in the table include general administrative expenses because these are not reported separately in budgetary accounts.

Legislation governing a few grant programs permits aid to private nonprofit agencies or institutions. Consequently, a few grants to private nonprofit institutions may be included in the totals—specifically, for veterans' educational facilities of the Federal Works Agency, the school lunch program of the Department of Agriculture, the hospital-construction grants of the Federal Security Agency, and the veterans' re-use housing program of the Housing and Home Finance Agency.

Included in the table are repayable advances for public-works planning by State and local agencies, since these interest-free advances become grants if the planned improvements are not built. The accumulated total of these advances, made mostly in the fiscal years 1946 and 1947, will be $57 million by the end of the fiscal year 1950. Repayments are deposited with the United States Treasury, and are reported in the Budget as miscellaneous receipts. Accumulated repayments through the fiscal year 1950 are estimated at $38 million, including $16,982,000 estimated for 1949, and $17,841,000 for 1950.

Also included as a grant is the account, Purchases of agricultural commodities for distribution through authorized agencies. These expenditures initially take the form of payments to farmers or producers, rather than to governmental units, but the commodities purchased are usually distributed forthwith to State or local institutions or other agencies as a grant-in-kind. The amount reported as a grant to State and local governments is the value of the commodities distributed rather than the expenditure for the original purchase.

Factors affecting grant expenditures.—Statutory provisions governing the apportionment and payment of granted funds, and the extent of supervision and control to be exercised by the administering Federal agency, vary widely among the several programs. The amount apportioned may be a flat sum for each State; it may be proportionate to a single specified factor, such as population; or it may be based on consideration of several factors, such as need for the aided service and the financial ability of the recipient State or local government. A few Federal grant statutes provide for payments to the State or local governments with little or no supervisory discretion assigned to any Federal Government agency and with few requirements as to the conditions to be met in order to qualify for the grant. Others establish conditions, such as the matching of apportionments and conformity to specified standards of administration, service, and personnel; prescribe procedures relating to planning, reporting,

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

and audits; and assign definite supervisory responsibilities to Federal agencies.

The largest grant program, for public assistance, is subject to specific conditions and standards of operation, but the amounts of the Federal appropriation and expenditure in any one year for this purpose are determined by applying a statutory formula to the expected case loads and the individual benefit rates established by the several States. This arrangement constitutes an "open-end" grant, since the total amount of the Federal Government commitment for any year is not predetermined and is not limited to the amount appropriated in advance. The amounts for most other grant programs are subject to periodic limitation in advance, but within comparatively narrow limits established in the basic authorizing laws.

Total expenditures.—Estimated expenditures for grants and shared revenues in the fiscal year 1950 total $2.5 billion, of which $2.1 billion represent requirements under existing laws and $358 million would be paid under proposed legislation recommended in the Budget. Approximately 24 percent of the total consists of grants for construction of civil public works.

Appropriations and other authorizations.—Except for the relatively few construction: programs, the appropriation made for grants for any year is ordinarily expended within that year. The Budget recommendations for appropriations for the fiscal year 1950 total $2.3 billion, including $368 million as an estimate of the amount that will be required under proposed legislation. This total includes $431 million to liquidate contract authorizations. It omits recommended new contract authorizations of $746 million, comprising $450 million for highways, $75 million for hospitals, $36 million for airports, and, under proposed legislation $85 million for annual contributions for low-rent housing, and $100 million for slum clearance.

Other financial relationships.—Apart from grants and shared revenues, many other Federal expenditures and policies affect the finances of State and local governments. Types of transactions not covered in the tabulation of grants include the following:

(a) Reimbursements for various specific services, such as payments to public educational institutions for tuition of veterans and of scholars assigned by the armed forces, and payments to local governments for care of Federal prisoners in local institutions.

(b) Contractual payments to public institutions for research and training in specified fields.

(c) The value of war surplus educational and hospital supplies, materials, and equipment, and of military airports donated, or sold at substantial discount, to State and local agencies.

(d) Payments in lieu of State or local property taxes on federally owned or leased property (excepting that payments from revenues, as in the case of the Tennessee Valley Authority, are included in shared revenues).

Also, the table does not include indirect financial benefits accruing to State and local units, such as exemption from Federal income tax of interest paid on State and local debt; deductions of State and local income, property, and other taxes from personal and corporate incomes in computing Federal income tax; services which may be rendered to other governmental units by Federal agencies in the ordinary course of their operations; and some programs administered cooperatively for the purposes of both the State and the Federal Governments, such as the National Guard or agricultural crop reporting.

Since the table deals only with aid given by the Federal Government, it does not record the reciprocal assistance in the form of services rendered or payments made to the Federal Government by the States or their subdivisions.

1 This is part of an appropriation for a broader program.

[2] This is the grant-in-aid part of an appropriation which includes administrative or other activities.

3 Appropriations exclude contract authorizations, as follows: 1948, $75,000,000; 1949, $75,000,000; and 1950, $75,000,000. The appropriations are entirely to liquidate contract authorizations.

[4] Appropriation amounts represent transfers from exportation and domestic consumption of agricultural commodities, excepting for a supplemental appropriation of $5,000,000 in 1948.

6 Excludes $85,000,000 contract authorization.

[8] Excludes $100,000,000 contract authorization.

RECEIPTS FROM AND PAYMENTS TO THE PUBLIC, FISCAL YEARS 1929-1950

The accompanying table, showing receipts from and payments to the public, presents a picture of the flow of money between the Federal Government as a whole and the public. The public is defined to include individuals; banks (including the Federal Reserve and Postal Savings Systems); businesses; private corporations; State, local, and foreign governments; and international organizations. This table, therefore, is useful in judging the effect of Federal finances on other sectors of the economy.

Budget receipts and expenditures include the transactions in the general and special accounts of the Government, plus net transactions in the checking accounts of wholly owned Government corporations. Thus, budget receipts and expenditures include many transactions within the Federal Government itself, and exclude some cash transactions between the Federal Government and the public. For example, payments of interest to the Treasury by wholly owned Government corporations are both budget expenditures and budget receipts, but they are excluded from receipts from and payments to the public. Other examples of budget expenditures which are excluded from payments to the public are payments from the general fund of the Treasury to the Federal employees' retirement (trust) funds and to the veterans' life-insurance (trust) funds. Intragovernmental transactions are eliminated in compiling the statement of receipts from and payments to the public.

In converting the traditional budget accounts to this statement of receipts from and payments to the public, an important addition is made by including trust accounts—which are not represented in the traditional budget statement. For example, employment taxes collected under the old-age and survivors' insurance provisions of the Social Security Act, as amended, which are not included in budget receipts, are added to obtain receipts from the public. Similarly, neither employment taxes collected by the States and deposited by them in the unemployment trust fund, nor premiums on veterans' life insurance policies are included in budget receipts, but they are added to obtain receipts from the public. On the other side of the ledger are trust account payments to the public, which are not included in budget expenditures, but are included in payments to the public. Examples of these payments include payments of old-age annuities and withdrawals by States for unemployment compensation benefits.

Another source of difference between budget expenditures and payments to the public is the inclusion as budget expenditures of noncash items of a public-debt nature, which represent an obligation of the Federal Government to make a cash payment in the future. Examples of such items include interest accrued on savings bonds held by the public which will not be paid until the bonds are redeemed, subscriptions to the International Monetary Fund in the form of non-interest-bearing notes which will later be exchanged for cash, and armed forces leave bonds which will be redeemed for cash at a later date. These items are not included in payments to the public, although they are budget expenditures. At a later time, when actual cash payments to the public are made for these items, they are included in payments to the public, but no expenditure is then recorded in the budget, the expenditure having been recorded previously at the time when the obligation was undertaken and the item entered in the public-debt total.

Because trust-account receipts from the public now total several billion dollars annually, receipts from the public are typically considerably larger than budget receipts. This is especially true since the introduction of the social security trust funds in 1936 and 1937. Trust-account payments to the public are typically smaller than trust-account receipts; part of the receipts is held in trust for payment to the public in future years. The accumulation of funds in trust accounts, which is now expected to continue for some years, is a major reason why at present the excess of receipts from the public over payments to the public tends to exceed any budget surplus.

In order to reconcile the data on receipts from and payments to the public with net borrowing from the public and with changes in the Treasury cash balance, it is necessary to show in the accompanying table those Treasury cash receipts which do not come from the public. These receipts (now relatively minor in amount) arise from the exercise of the monetary authority, and consist of the seigniorage on silver and the increment resulting from reduction in weight of the gold dollar. Income from this source, as is also true of receipts from the public, increases the Treasury cash balance, decreases borrowing requirements, and can be used to repay debt held by the public.

Repayment of borrowing from the public differs from the reduction in the public debt shown in Part I, table 5. Repayment of borrowing from the public—as the public is defined above—consists of the repayment of moneys previously borrowed from the public by the United States Treasury and by Government corporations. Changes in the public debt, on the other hand, reflect changes in the amount of outstanding United States securities (excluding securities of Government corporations), even though some of these securities were not issued for cash or in exchange for maturing securities (such as armed forces leave bonds), and even though in some cases the holder of the securities is an agency of the Federal Government rather than a member of the public. There are three specific types of transactions in which the two concepts differ: (1) Sales and redemptions in the market of obligations of Government corporations are not included in changes in the direct public debt, but are included in deriving net repayment of borrowing from the public; (2) investments by Federal enterprises and trust funds in United States securities permit the repayment of borrowing from the public, but this shift in holdings does not decrease the total public debt; and (3) certain types of public-debt transactions, such as the issuance and redemption of armed forces leave bonds, are not borrowing or repayment of borrowing from the public, but are reflected in changes in the public debt.

INTRODUCTION TO THE APPENDIXES

Appendix 1, "Unexpended balances of Budget accounts as of June 30, 1948, and appropriations for the fiscal year 1949," shows, by organization unit, the unexpended balances of general and special accounts and of corporation checking accounts with the United States Treasurer at the end of the fiscal year 1948. These balances include a $3 billion item which for bookkeeping purposes Was transferred to the Economic Cooperation trust fund. The balances exclude the unexercised portion of authorizations to expend from public debt receipts. This appendix also shows appropriations for the fiscal year 1949 made available by action of Congress prior to November 1, 1948. Part of these appropriations were made immediately available and were expended in the preceding fiscal year or are included in the June 30 balances. After deducting for the immediately available items, the balances and appropriations are added together to show the "total available" for expenditure to each organization unit.

Appendix 2, "Permanent and indefinite Budget appropriations," is in two parts. The first part shows the permanent appropriations for the fiscal years 1948, 1949, and 1950. These appropriations are set up in the accounts from year to year under standing legislation, without new action by Congress. The second part of the appendix shows the nonpermanent appropriations which are indefinite in amount. These are contained in current acts of Congress. Trust appropriations, most of which are permanent, are omitted from the appendix.

Appendix 3, "Expenditures from funds appropriated to the President," shows the actual expenditures in the fiscal year 1948 and estimated expenditures in fiscal years 1949 and 1950 from "Funds appropriated to the President." With the exception of the Economic Cooperation program, expenditures from presently available appropriations are shown in table 8 under the agency responsible for the payment. For convenience, this appendix brings together in a single place the expenditures by all agencies from "Funds appropriated to the President."

Appendix 4, "Comparison of expenditures by organization unit," presents the expenditures of departments and agencies and their constituent units for the past eight fiscal years. Whenever reorganizations have transferred activities between departments, agencies, and units, the expenditures for the preceding years shown in this table have been readjusted to conform with the pattern of organizational responsibility in effect on June 30, 1948.

Appendix 5, "Comparison of Budget receipts and expenditures by function," presents an historical comparison of Budget receipts and expenditures for the past eight fiscal years, the current fiscal year (1949) and the Budget year (1950). The receipts are classified by source as in tables 1 and 6 of part I. The expenditures are classified by function as in tables 1 and 7. Changes in functional classification made this year (as set forth below) are carried back through all the years of the table for comparative purposes.

Changes in the functional classification

Change No.	Classification used in the 1949 Budget	Description of change	Classification used in the 1950 Budget
1	**National defense:** 053. Air and Army defense	Division of one subclass into two, made possible by the separation of appropriations for the Air Force and the Army in the 1950 estimates.	National **defense:** 052. Air force defense 053. Army defense
2	**Social welfare, health, and security:** 202. Unemployment and accident compensation **Labor:** 552. Training and placement of workers	Unemployment compensation moved from Social welfare, health, and security into Labor, and grouped there with placement activities to which it is closely related. Training activities are therefore left in a separate subclass.	**Social welfare, health, and security:** 202. Accident compensation **Labor:** 552. Unemployment compensation and placement activities 553. Training of workers
3	**Labor:** 553. Labor information, statistics, and general administration	Renumbering.	**Labor:** 554. Labor information, statistics, and general administration
4	**Refunds of receipts** (including interest): 700.	Refunds changed from an expenditure to a deduction from receipts; interest on refunds moved into General Government classification.	**General government:** 605. Interest on refunds of receipts
5	**General government:** 605. Government payment toward civilian employees' general retirement system	Renumbering.	**General government:** 606. Government payment toward civilian employees' general retirement system
