## INTRAGOVERNMENTAL FUNDS

### REAL PROPERTY ACTIVITIES

*Buildings Management Fund, General Services Administration*

AMOUNTS AVAILABLE FOR OBLIGATION

Appropriation (obligations incurred)—1955, $500,000.

ANALYSIS OF TRANSFERS TO REVOLVING FUND

Obligations incurred during the year (total transfers to revolving fund—out of current authorizations)—1955, $500,000.

PROGRAM AND PERFORMANCE

Management, rental, operation, maintenance, and protection of Government-owned and leased space in and outside the District of Columbia for housing Federal agencies; repair and improvement of Government-owned space in the District of Columbia and adjacent area; repair and improvement of Government-owned buildings outside the District of Columbia managed by General Services Administration; operation of joint-use communication facilities and other related building services are initially financed through the buildings management fund which is reimbursed from funds appropriated, transferred, or advanced for that purpose to the General Services Administration (66 Stat. 594). The principal of the fund consists of $3.5 million appropriations and $4.1 million capitalized assets.

Operating expenses for 1957 are estimated at $180.4 million, a net increase of $15.2 million over 1956. This net increase is composed of the following items:

| | |
|---|---|
| Operation, protection, and maintenance of Government-owned space | $758,849 |
| Rental, protection, operation, maintenance and repair of leased space | 218,500 |
| Operation, protection, and maintenance of purchase contract space | 135,000 |
| Consolidation of leased locations | 1,200,000 |
| Repairs and improvements of Government-owned buildings in District of Columbia area | 5,270,000 |
| Repair and improvement of Government-owned buildings outside District of Columbia (General Services Administration operated) | 7,900,000 |
| Miscellaneous reductions | −320,000 |
| Total | 15,162,349 |

Any operating surplus, after provision for prior year losses, if any, is paid into the Treasury as miscellaneous receipts. No payments are planned through 1957, but earnings are projected in 1956 and 1957 sufficient to eliminate the June 30, 1955, deficit of $448,649.

*Construction Services, Public Buildings, General Services Administration*

PROGRAM AND PERFORMANCE

Work performed in acquisition of Federal building sites, preparation of drawings and specifications for the construction, remodeling, renovation, repair, and improvement of buildings, and supervision of construction activities are financed through reimbursement from funds appropriated, transferred, or advanced to the General Services Administration (40 U. S. C. 296).

An increase in the service activity of the fund for 1956 and 1957 is occasioned by a contemplated expansion of construction and repair and improvement programs.

During 1955 the surplus decreased by $46,862 to $129,355, due principally to net loss of $40,304 in operations, reduction of $6,675 in the employees' accrued leave liability and certain minor adjustments. This surplus will be written off by reducing charges to individual projects and programs during 1956 and 1957.

## PERSONAL PROPERTY ACTIVITIES

### General Supply Fund, General Services Administration

*General supply fund: To increase the general supply fund established by the Federal Property and Administrative Services Act of 1949, as amended (5 U. S. C. 630g), $10,000,000.*

Estimate 1957, **$10,000,000**

AMOUNTS AVAILABLE FOR OBLIGATION

Appropriation—1957, $10,000,000.

ANALYSIS OF TRANSFERS TO REVOLVING FUND

Obligations incurred during the year (total transfers to revolving fund—out of current authorizations)—1957, $10,000,000.

PROGRAM AND PERFORMANCE

This fund finances, on a reimbursable basis, a national supply depot system and a system of ordering supplies for direct delivery to agencies. The fund sells the supplies or services at cost to other agencies and the District of Columbia. Expenses for operating the fund for these purposes are provided for under the appropriation "Expenses, general supply fund."

Also financed by the fund and reimbursed by the using agencies are operations of interagency motor equipment pools established in areas of high vehicle density.

Estimate for 1957 provides for further increase in sales of stores items to military establishments under the Administration's program for progressively expanding use of these supply facilities by Department of Defense. No substantial change is anticipated in sales level of nonstores items. Activation of additional interagency motor equipment pools programed for 1957 is expected to produce substantial increase in sales of services and result in elimination of some 750 vehicles from agencies' fleets.

Actual goods and services delivered during 1955, and estimated for 1956 and 1957, follows:

[In thousands]

| | *1955 actual* | *1956 estimate* | *1957 estimate* |
|---|---|---|---|
| Stores items (including fuel) | $80,358 | $86,500 | $115,000 |
| Nonstores items | 47,491 | 63,000 | 70,000 |
| Motor equipment pool and repair facilities | 1,977 | 3,300 | 8,200 |
| Special operations | 5,000 | 5,000 | 5,000 |
| Total | 134,826 | 157,800 | 198,200 |

Current investment of the United States Government in the fund is $46 million, of which $44 million represents direct appropriations, $1 million donated assets, and retained earnings of $1 million. Increase of 25.6 percent in delivered orders over 1956 necessitates provision of an additional $10 million in capital by direct appropriation. Additional donated assets arising from transfers of motor vehicles from other agencies upon establishment of interagency motor equipment pools will be utilized to capitalize the value of such equipment in the fund.

Any operating surplus, as determined by General Accounting Office audit, must be returned to Treasury as miscellaneous receipts. Earnings from prior years' operations amounting to $821,750 were returned to Treasury during 1955 and $976,896 will be returned during 1956.

## GENERAL ACTIVITIES

### Administrative Operations Fund, General Services Administration

*Administrative operations fund: Funds available to General Services Administration for administrative operations, in support of program activities, shall be expended and accounted for, as a whole, through a single fund, which is hereby authorized: Provided, That costs and obligations for such administrative operations for the respective program activities shall be accounted for in accordance with systems approved by the General Accounting Office: Provided further, That the total amount deposited into said account for the fiscal year 1957 from funds made available to General Services Administration in this Act shall not exceed $9,745,300, of which not to exceed $137,700 may be used for travel expenses: Provided further, That amounts deposited into said account for administrative operations for each program shall not exceed the amounts included in the respective program appropriations for such purposes.*

NOTE.—Data for 1955 and 1956 are shown here for comparative purposes only.

PROGRAM AND PERFORMANCE

It is proposed to create a new consolidated administrative operations fund under which all sums available to GSA for administrative operations may be expended and accounted for as a whole. The various appropriations and funds benefiting will pay their share of the obligations incurred. Total sums available and their sources, including comparative data for 1955 and 1956, are:

The budget for the General Services Administration contemplates substantial increases in many programs, particularly (*a*) repair, alteration, and air conditioning of Government buildings and (*b*) expanded volume of business in supplying common-use items to Government agencies through the general supply fund. This program expansion will require some increases in administrative expenses for necessary accounting, budget, legal, administrative, and compliance services. In addition, it is proposed to increase the internal audit staff.

## GENERAL PROVISIONS

The appropriate [foregoing] appropriation *or fund available* to the General Services Administration shall be credited with (1) cost of *operation, protection,* maintenance, upkeep, [and] repair, *and improvement,* included as part of rentals received from Government corporations pursuant to law (40 U. S. C. 129); (2) reimbursements for services performed in respect to bonds and other obligations under the jurisdiction of the General Services Administration, issued by public authorities, States, or other public bodies, and such services in respect to such bonds or obligations as the Administrator deems necessary and in the public interest may, upon the request and at the expense of the issuing agencies, be provided from the appropriate foregoing appropriation; and (3) appropriations or funds available to other agencies, and transferred to the General Services Administration, in connection with property transferred to the General Services Administration pursuant to the Act of July 2, 1948 (50 U. S. C. 451ff) and such appropriations or funds may, with the approval of the Bureau of the Budget, be so transferred.

*Not to exceed 5 per centum of any appropriation made available to the General Services Administration for the current fiscal year by this Act may be transferred to any other such appropriation, but no such appropriation shall be thereby increased more than 5 per centum.*

During the current fiscal year, no part of any money appropriated in this or any other Act shall be used during any quarter of such fiscal year to purchase within the continental limits of the United States typewriting machines (except bookkeeping and billing machines) at a price which exceeds 90 per centum of the lowest net cash price, plus applicable Federal excise taxes, accorded the most-favored customer (other than the Government, the American National Red Cross, and the purchasers of typewriting machines for educational purposes only) of the manufacturer of such machines during the six-month period immediately preceding such quarter: *Provided,* That the purchase, utilization, and disposal of typewriting machines shall be performed in accordance with the provisions of the Federal Property and Administrative Services Act of 1949, as amended. (*Independent Offices Appropriation Act, 1956.*)

*Statement of proposed obligations for purchase and hire of passenger motor vehicles for the fiscal year 1957*

## PROPOSED FOR LATER TRANSMISSION

*Refunds under Renegotiation Act, General Services Administration* (under existing legislation, 1956).—A supplemental appropriation is required to pay claims filed by contractors under the Revenue Act of 1943 and Renegotiation Act of 1951. Present funds available for such payments are expected to be exhausted about January 1956.

It is estimated that the supplemental appropriation will provide new obligational authority of $270,000 for interest payments on claims, and $4,330,000 for refunds of amounts previously collected from contractors.

## CURRENT AUTHORIZATIONS

INTRODUCTORY STATEMENT

The Housing and Home Finance Agency administers the major housing and community development activities of the Federal Government through (1) the Office of the Administrator; (2) the Federal Housing Administration; (3) the Public Housing Administration; (4) the Federal National Mortgage Association; (5) the Community Facilities Administration; and (6) the Urban Renewal Administration.

The Administrator, serving as principal housing officer of the Federal Government, is responsible for supervision and coordination of programs and functions of these constituents.

Most of the activities and programs of the Agency are financed from corporate funds. However, certain activities are financed from appropriations such as: Salaries and expenses, Office of the Administrator; advances for the program of public works planning; capital grants for slum clearance and urban renewal; salaries and expenses for the United States Housing Act program; and annual contributions to local housing authorities for maintenance of the low-rent character of public housing projects.

## OFFICE OF THE ADMINISTRATOR

**Salaries and Expenses, Office of the Administrator, Housing and Home Finance Agency**

PROGRAM AND PERFORMANCE

The Administrator supervises and coordinates the housing programs and functions of the Agency. The Administrator is also responsible for several activities which are administered by the constituent agencies of the Agency under delegations of authority from the Administrator. These include: Slum clearance and urban renewal which has been delegated to the Urban Renewal Commissioner; the programs of public works planning, college housing loans, public facility loans, and certain liquidating activities which have been delegated to the Community Facilities Commissioner; and the management and disposition of publicly financed war and veteran housing construction under the Lanham and related acts which have been delegated to the Public Housing Commissioner. The Administrator also serves as chairman of the National Voluntary Mortgage Credit Extension Committee and provides staff assistance to the national committee and to 16 regional committees through which the voluntary home mortgage credit program operates.

The appropriation requested for 1957 is $6,450,000. This is an increase of $1.1 million compared with the total amount available for 1956. The larger appropriation request stems from the expansion of program activities under new legislation, particularly the urban renewal program and the program of public works advance planning. Each of these activities was expanded under the terms of the Housing Act of 1954 and the Housing Amendments of 1955.

2. *Consolidated compliance activities.*—Provision is made for the consolidated investigation and compliance staff to serve the entire Agency.

3. *Agencywide urban renewal coordination.*—Provision is made for carrying out certain functions vested directly in the Administrator in order to assure the coordination of the several forms of Federal assistance authorized for urban renewal, including determination that a community has a workable program to combat urban blight and is thereby entitled to apply for Federal assistance such as grants for slum clearance and urban renewal or special mortgage insurance aids under the National Housing Act.

4. *Voluntary home mortgage credit.*—Provision is made for staff assistance to the national committee and regional committees engaged in a program to facilitate the flow of funds for FHA-insured and VA-guaranteed home mortgage loans into areas of shortage and for minority housing financing.

[1] Accepted prior to exhaustion of authorization.

The Housing Act of 1950 authorized Treasury borrowings of $300 million for long-term loans to institutions of higher learning for construction of student and faculty housing. The Housing Amendments of 1955 made five major changes in the program: (1) The definition of eligible facilities was broadened to include dining halls, student unions, infirmaries, and other essential service buildings; (2) authority for administrative determination of interest rates was withdrawn and rates were set by the statute at the average rate on outstanding Treasury obligations plus one-fourth of 1 percent for administrative and other costs—thereby reducing the current interest rate on loans from 3.25 percent to 2.75 percent; (3) the substitution of private financing for Government loans was required only when available at equally favorable terms rather than the previous "generally comparable" terms under which provision private financing had been required if available at or below an interest rate of 3.5 percent; (4) the maximum maturity was increased from 40 to 50 years; and (5) the Treasury borrowing authorization was increased to $500 million.

ANALYSIS OF BUDGET PROGRAM

As a result of the liberalization of the program by the Housing Amendments of 1955, a multiple expansion of the demand for loans has taken place. The larger public institutions previously using private financing account for a major part of the increase. The increase in net approved loans and preliminary reservations of funds is estimated at $211 million in 1956 and $120 million in 1957. Actual loan executions, which lag well behind reservations, are estimated at $106 million in 1956 and $215 million in 1957.

Private construction financing will be used wherever practicable and disbursement of the Federal loan is assumed to occur when construction is roughly 80 percent complete. Since there is an application processing and construction time lag, the greater part of the increase in Federal expenditures is expected to occur after the budget year. Loan disbursements are estimated at $36 million in 1956 and $60 million in 1957. Undisbursed loan commitments at the end of 1957 are estimated at $256 million, and an additional $69 million in reservations of funds is expected to be outstanding.

Despite the statutory reduction in the interest rate, it is expected that private financing can be obtained for the earliest maturities of some of the loans to public institutions. This is estimated to total $5.3 million in the current year and $8 million in 1957, substantially below the level of private financing obtained in 1955 on a much smaller loan volume.

Administrative expenses are estimated at $1.1 million in 1957, an increase of $375,000 above the current year as adjusted by a proposed supplemental of $187,000 to care for the increased workload under the amended program.

FINANCING OPERATIONS

Borrowings from Treasury are estimated to total $60 million in 1957, contrasted with borrowings of $30 million in 1955 and $40 million in 1956.

OPERATING RESULTS AND FINANCIAL CONDITION

As a result of the reduced margin between interest on borrowings from the Treasury and loans to the colleges under the new program and the increased costs of processing the higher volume of applications, the net loss for 1957 is estimated to increase to $631,000, thereby bringing the deficit to $1,025,360 as of June 30, 1957. Operating results of the program will improve in future years when the high administrative costs attendant on active loan negotiation and disbursement decrease and the portfolio reaches substantial size.

The interest-bearing investment of the Government at the end of 1957 is expected to be $181.5 million, representing notes held by Treasury.

Loans to States and municipalities for essential public works or facilities are authorized by title II of the Housing Amendments of 1955. A statutory priority goes to small municipalities of under 10,000 population, and loans are limited to applicants unable to obtain funds from other sources at reasonable rates. The program is financed by a Treasury borrowing authorization of $100 million.

Title II also terminated the similar lending authority under section 108 of the Reconstruction Finance Corporation Liquidation Act. No loan commitments had been executed under the appropriation for this section, and the applications in process have been transferred to the new program.

ANALYSIS OF BUDGET PROGRAM

At present private lenders are supplying the great bulk of municipal financing needs at reasonable interest rates. Smaller communities in States remote from the principal money markets are the major exception and are expected to constitute the chief source of demand for loans under this program. Loans will typically be used to finance the construction of revenue-producing facilities, particularly water and sewer systems, and will ordinarily be secured by revenue or special fund obligations.

Interest rates to borrowers are required to be reasonable, but must at the same time eventually cover interest paid to the Treasury, administrative costs, and an adequate reserve for losses. The rates should also be such as to facilitate sales of local bonds in the private market either when the projects are satisfactorily completed or later when project operations have proved revenues adequate for bond servicing. Under present market conditions, the basic interest rates have been set at 3.75 percent for general obligation bonds of 30-year maturity and 4.25 percent for revenue bonds of the same period with upward or downward adjustments for variation in the maturity period. The basic interest rates will be revised periodically with the shifts in market rates for municipal and long-term Federal bonds.

On the basis of inquiries to date, loan applications are estimated at 200 in the current year and 300 in the budget year. Loan commitments are estimated at $7.5 million in 1956 and $25 million in 1957. It is estimated that these amounts will be reduced by private purchases of $0.5 million in 1956 and $2.5 million in 1957.

Administrative expenses are estimated at $475,000 in 1957. Workload will be high compared with the dollar volume of loans because of the low average size of loans and the extensive financial and engineering services needed to develop readily marketable loans for borrowers of this type.

OPERATING RESULTS AND FINANCIAL CONDITION

The only source of income is the net margin of approximately 1.25 percent between the interest received on loans and that paid to the Treasury. The program accordingly cannot reach the break-even point until a substantial bond portfolio has been acquired. After establishing reserves for possible future losses at the rate of 1 percent of loan disbursements, the cumulative deficit reaches an estimated $682,125 at the close of 1957.

The interest-bearing investment of the Government is expected to total $9 million on June 30, 1957, representing notes held by Treasury.

PROGRAM AND PERFORMANCE

Title II of the Housing Amendments of 1955 eliminated the similar loan program under section 108 of the Reconstruction Finance Corporation Liquidation Act, except as to applications filed prior to the effective date of the new act. Since no loan commitments had been executed under the limited appropriation for this section, the applications in process have been transferred to the new program to avoid administrative complications, and rescission of the appropriation is proposed. The only expenditures under this program were administrative costs; cancellation of advances covering these costs is proposed.

The Housing Act of 1954 authorized a 3-year program of interest-free advances for planning local public works to be constructed without Federal assistance. The Housing Amendments of 1955 removed the time limitation and established a revolving fund. The act authorized appropriations additional to the $10 million in the original enactment of $12 million in 1957, $12 million in 1958, $14 million in 1959, and further amounts necessary to maintain in the fund advances outstanding and undisbursed balances not to exceed $48 million.

ANALYSIS OF BUDGET PROGRAM

The program is intended to further a constant high level of public works construction by financing a reservoir of well-planned public works. To minimize obsolescence of plans and to maximize the volume of construction per planning dollar, emphasis is placed on preliminary planning. Complete planning is permitted where immediate construction or the type of facility justifies.

Based on the program levels in the statute and current experience as to average size of application, it is estimated that there will be 280 applications in 1956 and 820 in 1957. Approval of 170 and 665 applications in the respective years is forecast, with corresponding funding requirements of $2.3 million through 1956 and an additional $10 million in 1957. Repayments of advances are expected to start in 1957.

Administrative expenses estimated at $500,000 for 1957, an increase of $300,500 over the previous year, are included in the estimate of expenses for the Office of the Administrator.

FINANCING OPERATIONS

Under the original authorization of $10 million, $1.5 million was appropriated in the Supplemental Appropriation Act, 1955, and $3 million in the Independent Offices Appropriation Act, 1956. Appropriation of $12 million is requested for 1957.

OPERATING RESULTS AND FINANCIAL CONDITION

Since the contingent advances are interest-free if repaid when due at the time construction of a project is started by a local government, the program has no income. The allowance for losses against these advances is estimated at $160,000 in 1956 and $1,280,000 in 1957 and assumes that 20 percent of the projects will never be constructed.

Through 1957 the net investment of the Government is expected to increase to $15 million, consisting of appropriations totaling $16.5 million and a deficit of $1.5 million.

The Independent Offices Appropriation Act, 1955, established a single revolving fund for more efficient liquidation of remaining assets under the following programs: War public works (42 U. S. C. 1531–1534); defense housing and community facilities (42 U. S. C. 1591); first and second advance planning (50 U. S. C. 167 and 40 U. S. C. 451); loans for prefabricated housing (12 U. S. C. 1701g); Alaska housing (48 U. S. C. 484); subsistence homesteads and greentowns (40 U. S. C. 40 and 49 Stat. 115); and public war and veterans' reuse housing (42 U. S. C. 1521).

ANALYSIS OF BUDGET PROGRAM

With the expiration on August 1, 1955, of authority to contract for additional defense housing and to make commitments for additional grants for defense community facilities, program development operations were completed for all programs managed under this revolving fund. Program disbursements under outstanding contracts and commitments will continue, however, into 1957 at substantially reduced levels.

The disposition of war and emergency housing will decline to substantially lower levels in 1957. This reflects the reduction, as a result of disposition in prior years, of the inventory remaining for liquidation and the increasing proportion of projects and properties on hand involving special problems. Actual and scheduled disposition by types, in terms of dwelling units, is as follows:

| | *1955 actual* | *1956 estimate* | *1957 estimate* |
|---|---|---|---|
| Sales of permanent projects | 20,334 | 27,000 | 10,000 |
| Demolition, removal and sales of temporary projects | 38,184 | 13,000 | 7,341 |
| Transfers to local governments and other agencies | 29,365 | 7,000 | |
| Total | 87,883 | 47,000 | 17,341 |
| Remaining on hand, end of year | 108,356 | 61,465 | 44,124 |

Since transfers, demolitions, and removals represent a smaller proportion of disposition in 1957 than in prior years, proceeds from sales will not drop as sharply as the level of the disposition program in terms of dwelling units. Proceeds will, to an increasing extent, however, consist of purchase money mortgages rather than cash as private mortgage financing generally cannot be obtained.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Real property under management, and net operating receipts will drop sharply, the number of active dwelling units available for occupancy at the close of each year declining as follows:

| | *1955 actual* | *1956 estimate* | *1957 estimate* |
|---|---|---|---|
| Federally operated | 39,147 | 31,256 | 23,940 |
| Leased | 58,161 | 23,161 | 16,136 |
| Total | 97,308 | 54,417 | 40,076 |

Despite substantial repayments of loans and mortgages in each of the 3 years, as shown by the highlight table, the total volume of such investments on hand is expected to rise to $197 million by the end of 1957 because of the purchase money mortgages taken in the sale of real property. Because of their small average amount and the absence of Government guaranties and insurance, these mortgages are not generally attractive to private investors. Efforts are, however, underway to sell the more marketable mortgages at moderate discounts if necessary. Proceeds from this source are estimated at $4 million in 1957.

*Administrative expenses.*—The estimate of $2,310,000 is $478,000 below the current year including a proposed supplemental of $30,000. Expenses for management of loans and investments and for disposition of real property will hold at approximately the same level as against a substantial decrease for real property management.

FINANCING OPERATIONS

Liquidating dividends are estimated to be paid to Treasury at $47 million in the current year and $33 million in 1957. This will bring cumulative cash repayments to $640 million, or 25 percent of the original Federal expenditures for war and emergency purposes. Over $200 million in additional cash recoveries and repayments to the Treasury should occur in future years as liquidation proceeds.

OPERATING RESULTS AND FINANCIAL CONDITION

Losses of $69.4 million and $39.5 million are shown, respectively, in 1956 and 1957, as real property is demolished or sold for less than book value. In view of the recognized liquidating character of the fund, no action is required with respect to the resultant $342 million deficit at the close of the period.

The original investment in these programs totaled almost $2.5 billion. Over $560 million had been recovered from operations and disposition by the end of 1955 and returned to the Treasury; property costing $305.6 million had been transferred to other agencies and programs, chiefly the Department of Defense; and funds and property amounting to $742.2 million had been donated or relinquished to local governments in accordance with various statutes. There remained on hand, at the end of 1955, assets with a book value of $652.7 million.

The Housing Act of 1949 authorized Federal assistance to local governments for the acquisition and clearance of slums and blighted areas, their preparation for re-use, and sale or lease for redevelopment. A Treasury borrowing authorization of $1 billion was provided for planning advances and loans. In addition, contracts with local governments were authorized for $500 million in capital grants to defray up to two-thirds of net project costs.

The Housing Act of 1954 broadened the original enactment to authorize an urban renewal program providing Federal assistance for the conservation and rehabilitation of entire city neighborhoods as well as for slum clearance. It also made the development of an acceptable local program for the elimination and prevention of slums and blighted areas a requirement for Federal assistance. The act further increased the capital grant authorization by $200 million in 1956, $200 million in 1957, and an additional $100 million to be made available at the discretion of the President.

ANALYSIS OF BUDGET PROGRAM

An estimated 90 communities will be granted approval in each of the years 1956 and 1957 for workable programs, that is, comprehensive community programs to attack the causes as well as the symptoms of blight required as a condition for Federal assistance. In addition, the planning of some 80 urban renewal projects is expected to start in 1957 as against 71 in the current year and 42 in the past year. Reservations of capital grant funds for these projects will increase the total by $203 million in 1956 and $217 million in 1957.

The number of projects approved for execution is estimated at 107 compared to 80 in the current year and 26 in 1955. In addition, 18 project completions are projected for 1956 and 31 for 1957, the first since the enactment of the legislation in 1949. Capital grant payments to projects in execution or completed during this period and for demonstration projects are estimated to increase from $50 million in 1956 to $64 million in 1957.

Commitments for loans for project execution and for planning advances are estimated at $129 million in 1956 and $160 million in 1957. Most of the loan funds required during these years will be used for short-term financing of development costs. The greater part of these needs will, as the table below indicates, be met from private financing guaranteed by the pledge of the Government loan commitment.

| Balance outstanding at end of year | 31,365 | 47,865 | 84,865 |

Administrative expenses of $3.7 million are included in the estimate of expenses for the Office of the Administrator.

FINANCING OPERATIONS

Appropriations for capital grants are estimated at $50 million for 1957. In addition, borrowings from Treasury are expected to total $10 million.

OPERATING RESULTS AND FINANCIAL CONDITION

Anticipated net earnings from the margin between the Treasury borrowing and the project loan rate amount to $346,413, reducing the cumulative deficit to $524,963.

The net investment of the United States Government is estimated at $62.5 million at the end of 1957. The interest-bearing investment of $63 million represents notes held by Treasury.

## FEDERAL NATIONAL MORTGAGE ASSOCIATION

The Association, operating under the Federal National Mortgage Association Charter Act (12 U. S. C. 1716, et seq.) purchases, manages, and sells residential mortgages insured by the Federal Housing Administration or guaranteed by the Veterans Administration. Under amendments to the original enactment made by the Housing Act of 1954, the Association's functions are carried out through three programs for which separate accountability is required by statute. These programs—secondary market operations, special assistance functions, and management and liquidating functions—are described in the following sections:

### Secondary Market Operations

The purpose of the secondary market operations is to provide supplementary assistance to the secondary market for home mortgages by providing a degree of liquidity for mortgage investments, thereby improving the distribution of investment capital available for home mortgage financing. Assistance is provided by the purchase and sale of mortgages insured by the Federal Housing Administration or guaranteed by the Veterans Administration on or after August 2, 1954, of such quality, type, and class as to meet generally the purchase standards imposed by private investors. Purchases and sales may be made only at such prices as will prevent excessive use of the Association's facilities and permit the Association to operate on a fully self-supporting basis.

The authorizing statute contemplates that the secondary market operations will ultimately be completely owned and financed by private program participants. Accordingly, these operations are treated in the budget as a trust enterprise, and the financial statements relating thereto appear in part IV of this document.

FNMA secondary market operations were initially capitalized through the purchase of $92.8 million of preferred stock by the Secretary of the Treasury. This preferred stock will be retired as rapidly as feasible, and in the meantime the Association will pay dividends on it to the Treasury at rates determined by the Secretary of the Treasury at the beginning of each fiscal year. Private capitalization for these operations is accumulated through a statutory requirement that private subscriptions to common stock must be made equal to 3 percent of the unpaid principal amount of mortgages sold to FNMA. Recommendations for legislation to transfer ownership of the Association to the private owners of capital stock must be submitted to the Congress as promptly as practicable after all the Treasury preferred stock has been retired.

The Association is authorized to finance secondary market operations through borrowing from the public on the security of nonguaranteed debentures. However, the Secretary of the Treasury, so long as the preferred stock is outstanding, is authorized to purchase such debentures in an amount not exceeding $1 billion outstanding at any one time.

*Analysis of budget program.*—The new secondary market operation, established in 1955, is not yet a fully recognized part of the home mortgage market. Market acceptance is, however, growing at a reasonable rate and operations are expected to reach significant levels during the current year. The principal activities of the secondary market operations are shown in the following table:

[In millions]

| | *1955 actual* | *1956 estimate* | *1957 estimate* |
|---|---|---|---|
| Mortgage purchases (net of discount) | $9.2 | $193.6 | $290.4 |
| Mortgage sales (net of discount) | ---- | 19.4 | 48.6 |
| Repayments and other credits | (1) | 3.0 | 8.0 |
| Balance in portfolio at year end (cost) | 9.1 | 180.4 | 414.1 |

[1] Less than $50,000.

The prices at which mortgages are purchased and sold are established by FNMA at the market price for the particular class of mortgages involved. In establishing prices, FNMA follows the policies of private institutions and varies the price depending upon geographic location, unexpired term and interest rate of the loan, ratio of equity to value of the subject property, and (in the case of sales prices) the repayment record established over a period of time. The budget assumes that mortgages will be purchased during 1956 and 1957 at an average discount of 3.2 points below their face value and that sales will be made at an average price one-half point above the purchase price.

*Financing operations.*—Borrowings from the public are estimated to provide the major source of program funds during the period covered by this budget. Recourse to Treasury borrowings is planned only as an interim measure. Additional financing will be obtained from utilization of the cash proceeds from the Treasury subscription to preferred stock and from subscriptions of common stock by program participants. No retirements of preferred stock are estimated in this budget because the program has only recently been established and a sufficient amount of common stock has not been accumulated. The amounts of the principal financing balances outstanding at year end are summarized in the following table:

[In millions]

| | *June 30, 1955, actual* | *June 30, 1956, estimate* | *June 30, 1957, estimate* |

| Treasury financing: | | | |
| Borrowing from Treasury | ---- | 1.7 | 2.3 |
| Preferred stock | 92.8 | 92.8 | 92.8 |

Operations are reflected in budget expenditures only to the extent of Treasury financing.

Special Assistance Functions

FNMA is authorized to provide special assistance to the extent that the President has determined that it is in the public interest for the financing of (1) selected types of home mortgages (pending establishment of their marketability) originated under special housing programs designed to provide housing of acceptable standards at full economic costs for segments of the national population which are unable to obtain adequate housing under established home financing programs, and (2) home mortgages generally as a means of retarding or stopping a decline in mortgage lending and home building which threatens materially the stability of high level national economy.

FNMA special assistance is provided through commitments to purchase and purchases of mortgages and 20-percent immediate participations in mortgages, together with deferred participation agreements whereby FNMA agrees to assume the remaining 80-percent interest upon the occurrence of a default giving rise to foreclosure rights. Authority is limited, in the case of mortgages, to $200 million outstanding at any one time and, in the case of immediate participations, to $100 million outstanding at any one time. In addition, the Housing Amendments of 1955 authorized the Association to enter into commitments, not exceeding $50 million outstanding at any one time, under its special assistance functions, for the purchase of cooperative housing mortgages insured under section 213 of the National Housing Act, as amended, and to effect commitments and purchases of armed services housing mortgages (or participations therein) insured under the new title VIII of that Act, not exceeding $200 million outstanding at any one time.

FNMA special assistance functions are financed exclusively by Treasury borrowings, and benefits and burdens of the program inure solely to the Secretary of the Treasury.

*Analysis of budget program.*—During 1956 and 1957, FNMA will provide special assistance, under Presidential determination, to (1) mortgages on housing in or supporting urban renewal areas of the types to be insured under sections 220 and 221 of the National Housing Act; (2) mortgages on housing in Alaska and Guam; (3) mortgages on programed defense, disaster, and military housing. In addition, cooperative and armed services housing will be assisted under the special authority cited above. The following table shows estimated commitments for purchases and participations during the period covered by this budget in terms of the principal amounts of mortgages to be supported:

| 80-percent deferred participations | ---- | 108.6 | 235.4 |

The maximum feasible use of the previously untried participation authority will be made whereby private institutions finance four-fifths of the principal amount involved.

The portfolio activities of the special assistance functions are shown in the following table:

[In millions]

| | 1955 actual | 1956 estimate | 1957 estimate |
|---|---|---|---|
| Purchases (net of discount) | ---- | $9.2 | $76.7 |
| Repayments and other credits | ---- | ---- | 1.4 |
| Balance in portfolio, end of year (cost) | ---- | 9.2 | 84.5 |
| Undisbursed commitments, end of year: | | | |
| Mortgages | $0.1 | 294.5 | 336.4 |
| 20-percent immediate participations | ---- | 27.1 | 76.3 |
| Deferred participations, end of year: | | | |
| Against immediate participations purchased | ---- | ----- | 38.0 |
| Against commitments to purchase immediate participations | ---- | 108.6 | 305.2 |

Mortgages and participations will be sold to private investors as rapidly as their marketability is established. Purchase and sale prices established in this program will be those which the mortgages would command if they were immediately acceptable to private institutions. The budget assumes that purchases will involve an average discount of 2 points. No mortgage sales are projected pending the growth of the portfolio to levels for which an effective sales program is practical.

*Financing operations.*—Net borrowings from the Treasury are estimated at $5.9 million in 1956 and $72.1 million in 1957, thereby increasing the interest-bearing investment of the Government to $78 million at the end of 1957.

*Operating results and retained earnings.*—Net income from the special assistance functions is estimated at $3.3 million and $2.3 million in 1956 and 1957, respectively. Retained earnings at the end of 1957 are estimated at $5.6 million.

## MANAGEMENT AND LIQUIDATING FUNCTIONS

The Association, under this function, is directed by statute to manage and liquidate the previously acquired portfolio of the Association in an orderly manner, with a minimum of adverse effect upon the home mortgage market and a minimum loss to the Federal Government. Liquidation is accomplished through regular repayments of mortgages according to their amortization schedules, sales of mortgages to private investors as rapidly as they can be absorbed without serious disruption of normal market conditions, and other credits arising from prepayments and foreclosures.

*Analysis of budget program.*—Mortgage purchases and cancellation of previous commitments in the current year are estimated to completely liquidate the advance contracts and commitments entered into by the Association prior to enactment of the FNMA Charter Act in 1954. It is estimated that mortgages having a face value of $25 million in the current year and $150 million in the budget year can be sold under the mortgage market conditions which will be current at the time of sales. Mortgage sales prices are fixed by FNMA at a level calculated to avoid serious repercussions upon the home mortgage market and at the same time accomplish the orderly liquidation required by law as rapidly as feasible. The budget assumes the sale of 4-percent mortgages at discounts of 4 points and 4½-percent mortgages at par. The following table shows the estimated activities of this function during the period covered by this budget:

[In millions]

| | *1955 actual* | *1956 estimate* | *1957 estimate* |
|---|---|---|---|
| Mortgage purchases | $539.0 | $105.0 | ------- |
| Mortgage sales (net of discount) | 200.0 | 24.0 | $144.3 |
| Discount on sales | 2.8 | 1.0 | 5.7 |

| Balance in portfolio at year end | 2,558.3 | 2,483.3 | 2,171.3 |
| Undisbursed commitments, year end | 120.9 | ------- | ------- |

*Financing operations.*—Funds in the amount of $570 million were borrowed in 1955 from the public on the security of nonguaranteed debentures; the proceeds were used to repay previous borrowings from the United States Treasury. All other program financing is supported by United States Treasury borrowings. Net repayments of Treasury borrowing during the period covered by this budget are shown in the following table:

|---|---|---|---|
| Borrowing from the public | $570.4 | ------- | ------- |
| Borrowing from Treasury (net) | −338.5 | −$122.9 | −$327.5 |

*Operating results and retained earnings.*—The following table shows net income and total retained earnings of the management and liquidating function during the period covered by this budget:

| | *1955 actual* | *1956 estimate* | *1957 estimate* |
|---|---|---|---|
| Net income for year | $34,614,923 | $28,768,850 | $17,165,000 |
| Retained earnings, end of year | 23,278,595 | 52,047,445 | 69,212,445 |

All benefits and burdens of the management and liquidating function inure solely to the Secretary of the Treasury, and retained earnings will, as circumstances warrant, be paid into the Treasury.

PROGRAM AND PERFORMANCE

The Association carries out the three fiscally separate functions described as a single integrated Government instrumentality with one administrative expense limitation and a single budget and staff. Administrative expenses under limitation, allocated among the functions, are expected to rise in fiscal 1956 and 1957 because of increased purchasing activity in the secondary market and special assistance functions.

PURPOSE AND FINANCIAL ORGANIZATION

The Administration, created by the National Housing Act of 1934, is a noncorporate business-type agency made subject to the Government Corporation Control Act by the Housing Act of 1948. The principal purposes of the Administration are to stabilize the mortgage market and to improve home financing practices and housing standards and conditions, through insurance of loans and investments to finance the construction, purchase, repair and improvement of residential structures. On June 30, 1955, a total of $37.8 billion of insurance had been written, of which $18.7 billion was outstanding.

The Administration conducts a wide variety of programs through 11 separate insurance funds, the most important of which is the mutual mortgage insurance fund for the insurance of mortgages on 1- to 4-family dwellings under section 203 of the National Housing Act. Other funds cover the insurance of home repair and improvement loans, insurance of mortgages on multifamily housing including cooperative housing, insurance of mortgages on housing for defense and other special purposes, and insurance of equity investments in rental housing.

The mutual mortgage insurance fund differs from other insurance funds in that mortgagors may receive participation payments from any excess of fees and premiums paid over losses and expenses allocable to the fund.

The Housing Amendments of 1955 extended the multifamily housing mortgage insurance program to include insurance of mortgages on trailer parks; created a new armed services housing program by amendment and extension of the military housing mortgage insurance program; and liberalized the terms for insurance of mortgages on cooperative and urban renewal housing.

All of the Administration's insurance programs are income producing. Income is derived from insurance premiums, appraisal and miscellaneous fees, and interest on investments in Government securities.

ANALYSIS OF BUDGET PROGRAMS

The estimates reflect assumptions designed to carry out the President's housing program with emphasis on the prevention of slums and urban blight and housing for personnel of the armed services.

1. *Repair and improvement loan insurance, title I.*—Financial institutions insured against losses are required to provide 10 percent coinsurance on loans for the alteration, repair and improvement of residential properties. Loans insured are characteristically short-term, unsecured notes currently averaging around $600. Estimates are set forth below:

| | *1955 actual* | *1956 estimate* | *1957 estimate* |
|---|---|---|---|
| Initiation: Loans insured | 1,263,731 | 1,200,000 | 1,300,000 |
| Maintenance of insurance in force (number of notes) end of year | 3,441,300 | 2,735,800 | 2,988,000 |
| Settlement: | | | |
| Claims | 46,425 | 43,500 | 41,000 |
| Average defaulted notes in process of collection | 156,000 | 161,000 | 160,000 |

2. *Home mortgage insurance, sections 8 and 203.*—Mortgages may be insured on 1- to 4-family structures for rent or sale up to statutory limits of 90 percent for existing or 95 percent for new housing of the first $9,000 of appraised value, and 75 percent of value above $9,000, depending upon the character of the property and the amount and character of the loan involved. The section 8 program for insurance of mortgages on low-cost small homes (not meeting the Administration's standards for section 203 mortgages) was terminated in 1954, and provision was made for continuation of this program under the section 203 mutual mortgage insurance fund. Estimates are as follows:

| | *1955 actual* | *1956 estimate* | *1957 estimate* |
|---|---|---|---|
| Initiation: | | | |
| Unit applications examined | 631,764 | 599,000 | 603,300 |
| Inspections made (1- to 4-family units) | 1,216,440 | 1,270,200 | 1,186,600 |
| Unit mortgages insured | 255,220 | 354,700 | 342,200 |
| Maintenance of insurance in force—end of year (dwelling units) | 1,719,704 | 1,935,706 | 2,137,106 |
| Settlement: | | | |
| Mortgages terminated (dwelling units) | 130,302 | 138,698 | 140,800 |
| Properties and mortgages acquired | 600 | 750 | 750 |
| Properties and mortgages on hand | 574 | 369 | 369 |

3. *Multifamily project mortgage insurance, sections 207 and 213.*—Mortgages may be insured on new or existing multifamily housing projects up to statutory limits of 80, 90, or 95 percent of appraised value (or in the case of cooperative housing, estimated replacement cost). The Housing Amendments of 1955 also provide for the insurance of mortgages on trailer courts or parks, not to exceed $1,000 per space. Increases projected for 1956 and 1957 reflect chiefly higher levels of activity in the cooperative housing program under the 1955 amendments. Estimates are as follows:

| | *1955 actual* | *1956 estimate* | *1957 estimate* |
|---|---|---|---|
| Initiation: | | | |
| Unit applications examined | 18,125 | 20,500 | 34,500 |
| Average multifamily units under inspection | 15,000 | 11,400 | 13,100 |
| Unit mortgages insured | 15,205 | 15,500 | 22,200 |

4. *Urban renewal housing mortgage insurance, sections 220 and 221.*—Mortgage insurance programs to assist in financing the rehabilitation of existing dwellings, as well as the construction of new dwellings, in connection with slum clearance and urban renewal undertakings, are estimated in the following table. Section 220 provides under terms comparable to section 203, mortgage insurance for the construction or rehabilitation of housing in designated urban renewal areas. Section 221 provides mort-

gage insurance for low cost housing built or rehabilitated for persons displaced by governmental action in communities having approved urban renewal plans. With the growing number of slum clearance and urban renewal projects in execution, a substantial and increasing volume of applications for insurance under section 220 and, to a lesser extent, section 221 is anticipated in 1956 and 1957.

5. *Servicemen's housing mortgage insurance, section 222.*—Under the Housing Act of 1954, section 222 was added to the National Housing Act to authorize a new mortgage insurance program providing for the insurance of mortgages to finance the purchase of homes by servicemen in the Armed Forces of the United States, who have been a minimum of 2 years in service. Mortgages under this section may be insured on single-family structures up to 95 percent of appraised value. Estimates are as follows:

6. *Special incentive mortgage and loan insurance, sections 603, 608, 609, 610 and 611.*—Special war housing mortgage insurance provisions of title VI were continued until April 1948 for home mortgages and until March 1950 for rental project mortgages to provide veterans' emergency housing. Other special incentive programs were also added. These included insurance of (*a*) loans for the manufacture of prefabricated housing, (*b*) loans to finance the construction, by modern site-fabrication methods, of groups of 25 or more single-family dwellings, and (*c*) mortgages executed in connection with the sale by the Government of certain federally owned housing. Insurance authority under title VI has terminated. Authority to insure mortgages to finance the sale of Government-owned housing has been transferred to title II of the National Housing Act by the terms of the Housing Act of 1954. Estimates are as follows:

| | *1955 actual* | *1956 estimate* | *1957 estimate* |
|---|---|---|---|
| Initiation: Unit mortgages insured | 48 | ------- | ------- |
| Maintenance of insurance in force—end of year (dwelling units) | 708,560 | 670,430 | 626,656 |
| Settlement: | | | |

| Properties and mortgages acquired | 971 | 464 | 320 |
| Properties and mortgages on hand | 1,863 | 1,028 | 579 |

7. *Yield insurance for rental housing equity investments, title VII.*—Title VII provides for insurance of an annual return of 2¾ percent and a minimum annual amortization of 2 percent on equity investments in rental housing for families of moderate income. No insurance has been written under this title. It is estimated that applications covering 1,000 dwelling units will be processed through to insurance in each of the fiscal years 1956 and 1957.

8. *Armed services housing mortgage insurance, title VIII.*—Title VIII, authorizing the insurance of mortgages on rental housing for civilian and military personnel of the armed services and for personnel at atomic energy installations, was added to the National Housing Act by Public Law 211 in 1949. The Housing Amendments of 1955 amended title VIII to authorize a wholly new program for housing for the armed services. The new program authorizes the insurance of mortgages totaling $1,363,500,000. Insurance authority expires September 30, 1956, except pursuant to commitments issued on or before that date. The maximum mortgage amount, based on replacement cost, may not exceed an average of $13,500 per dwelling unit in any one project. After the completion of construction, the Department of Defense will assume the mortgage and operate the housing directly as public quarters. Present plans call for the initiation of applications for 100,000 dwelling units during the current and budget years, which will exhaust the available authorization. Estimates are as follows:

| Initiation: | *1955 actual* | *1956 estimate* | *1957 estimate* |
|---|---|---|---|
| Unit applications examined | 1,540 | 45,000 | 51,400 |

| Mortgages terminated (dwelling units) | 98 | 2,100 | 1,500 |
| Properties and mortgages acquired | 2 | 7 | 5 |
| Properties and mortgages on hand | 2 | 8 | 9 |

9. *Mortgage insurance for programed defense housing, title IX.*—Mortgage insurance for both 1- to 4-family and multifamily housing was provided for under title IX, within the limits of programed housing needs in defense areas designated by the President. The authorization to insure under this title has terminated except for commitments outstanding. Estimates are as follows:

| Initiation: | *1955 actual* | *1956 estimate* | *1957 estimate* |
|---|---|---|---|
| Unit applications examined | 258 | 600 | ------ |
| Inspections made (1- to 4-family units) | 23,306 | 5,000 | ------ |

*Administrative expenses.*—Headquarters expenses in connection with general administration of the programs; the servicing of insurance in force; and the technical, administrative, and fiscal control over insuring operations are estimated at $7,150,000 for 1957. Operating expenses of $37,300,000 for 1957 for the 76 field insuring offices are included in a separate nonadministrative budget.

### FINANCING OPERATIONS

All FHA operations are financed out of income. Mortgage insurance claims are met by the issuance of debentures which are subsequently redeemed out of insurance income and the proceeds of the sale of acquired properties and mortgages. In 1955, $51,768,200 of debentures were issued. Debentures to be issued are estimated at $77,753,150 in 1956 and $66,252,400 in 1957. Debentures were retired in 1955 in the amount of $88,925,800. Retirement of debentures in 1956 and 1957, respectively, are estimated at $44,814,586 and $58,738,000.

### OPERATING RESULTS AND RETAINED EARNINGS

Operations in 1955 resulted in a net income of $71,021,015. This income was distributed entirely to insurance reserves. $55,101,472 was placed in the general surplus account of the mutual mortgage insurance fund, which was established pursuant to Public Law 560, 83d Congress, and $15,919,543 was placed in the general insurance reserves under the nonmutual insurance programs.

Net income is expected to be $74,246,006 in 1956 and $95,151,400 in 1957. In the 2-year period it is estimated

that income totaling $140,003,883 will be added to the general surplus account of the mutual mortgage insurance fund, while an estimated $29,393,523 of income will be placed in the insurance reserves under nonmutual funds.

Insurance reserves which totaled $338,826,126 on June 30, 1954, increased to $397,551,324 during 1955 and are expected to reach $464,597,236 by June 30, 1956, and $552,548,636 by June 30, 1957. These reserves are required to meet future insurance losses and expenses.

In accordance with Public Law 560, approved August 2, 1954, the title I claims account was merged with the title I insurance fund. Collections made by the title I claims program prior to August 1, 1954, amounting to $34,775, were covered into the Treasury in 1955.

FINANCIAL CONDITION

On June 30, 1954, the total of FHA capital and insurance reserves stood at $354,090,614. During 1955 the capital and reserves increased to $417,861,324 and it is estimated that they will reach $484,907,236 by June 30, 1956, and $572,858,636 by June 30, 1957.

INSURANCE AUTHORITY

Public Law 345, approved August 11, 1955, amended the general mortgage insurance authorization under section 217. This amendment provides that the aggregate amount of principal obligations of all mortgages which may be insured and outstanding at any one time under insurance contracts or commitments to insure pursuant to any section or title (except sec. 2) shall not exceed the sum of (*a*) the outstanding principal balances, as of July 1, 1955, of all insured mortgages (without taking into account prepayments or delinquencies), (*b*) the principal amount of all outstanding commitments to insure as of July 1, 1955, and (*c*) $4 billion. This general insurance authorization applies to all mortgage insurance programs except new insurance written under title VIII pursuant to commitments issued on or after August 11, 1955, and provides adequate amounts to carry such mortgage insurance programs through 1956. Additional authorization will be required in 1957 (see schedule C–1).

Section 803 (*a*) of the act as amended by Public Law 345, 84th Congress, created a separate mortgage insurance authorization with regard to all new insurance written under title VIII pursuant to commitments issued on or after August 11, 1955, including both the new armed services housing program and the extended military housing program. This new insurance authorization provides that the aggregate amount of principal obligations of all mortgages insured under this program shall not exceed $1,363,500,000 and that the limitation in section 217 shall not apply to this program. This amount will be adequate to carry the program through both 1956 and 1957 as shown on schedule C–1.

The title I, section 2, authorization of $1,750,000,000 for repair and improvement insurance will be sufficient to carry this program through both 1956 and 1957 (see schedule C–1).

## PUBLIC HOUSING ADMINISTRATION

The Public Housing Administration has direct responsibility for the low-rent public housing program under the United States Housing Act of 1937 (50 Stat. 888), as amended. In addition, the Public Housing Commissioner directs on behalf of the Administrator the liquidation of certain activities included in the revolving fund for liquidating programs (see revolving fund (liquidating programs)). These include the subsistence homesteads and greentowns program, the public war housing program, the defense housing program and the veterans' re-use housing program.

Administrative expenses for these programs are presented in consolidated form. These expenses are paid from a single fund and are distributed on a workload basis to the programs.

PURPOSE AND FINANCIAL ORGANIZATION

The United States Housing Act of 1937 (42 U. S. C. 1401 et seq.) provided for a program of locally owned and operated low-rent housing by authorizing loans and annual contributions to maintain the low-rent character of the projects. Subsequently, Public Law 671, approved June 28, 1940, (42 U. S. C. 1501) permitted the construction of permanent housing for war workers, subject to conversion to low-rent use after the emergency. The Housing Act of 1949, increased the borrowing power of the Administration to $1.5 billion and increased the annual contributions authorization to $336 million.

ANALYSIS OF BUDGET PROGRAM

Major activities are the development, capital financing, and management review of low-rent public housing projects, and the payment of annual contributions to aid local authorities in assuring low rents for low-income families.

*Development.*—The Housing Act of 1954 authorized the Public Housing Administration to enter into new contracts for loans and annual contributions for 35,000 units in 1955. By joint resolution the Congress authorized an extension to August 1, 1955, and 30,630 units were placed under contract up to that time. The Housing Amendments of 1955 authorized the execution of contracts for an additional 45,000 units on or before July 31, 1956. The 1955 legislation terminated the requirement, contained in the 1954 act, that, before a contract for annual contributions to a public housing project can be entered into, the community must have a workable program for the prevention and elimination of slums and blight. It also removed the restriction requiring, as a condition to any new contract, that a title I slum clearance and urban redevelopment, or urban renewal project, be underway in the community; that the local governing body certify that the housing is needed to assist in meeting the relocation requirements of title I; and that the Housing and Home Finance Administrator determine that the number of units does not exceed the number needed to house families relocated by governmental action.

The following table summarizes the status of the development program in terms of dwelling units at the end of each fiscal year:

| | *1955 actual* | *1956 estimate* | *1957 estimate* |
|---|---|---|---|
| Program reservation but no preliminary loan contract | 5,206 | 5,206 | 5,206 |
| Preliminary loan contract but site not selected | 68,971 | 48,971 | 48,971 |
| Site selected but no annual contributions contract | 21,363 | 11,363 | 11,363 |
| Annual contributions contract but construction award not authorized | 57,740 | 77,740 | 42,740 |
| Construction authorized but not available for occupancy | 26,962 | 34,962 | 46,962 |

The budget program provides for the execution of annual contributions contracts for 45,000 units in 1956 and contemplates the commencement of construction of 25,000 units in 1956 and 35,000 in 1957. It is estimated that 17,000 units will be completed for occupancy in 1956 and 23,000 units in 1957.

*Capital financing.*—Project development is ordinarily financed in the first instance by advances by the Administration to the local authorities. These advances are retired from the proceeds of the sale of temporary notes of the local authorities to private investors as soon as the advances outstanding are of sufficient amount to make private financing practical. Since the Administration guarantees privately financed notes, they have excellent security and have been sold at interest rates of around 1.5 percent per year. All temporary notes are retired as soon as the local authority sells its long-term bonds to the public. These bonds are typically 40-year serial maturities and are secured by the Government's pledge to pay annual contributions. They have been sold during the past year at interest rates varying from 2.33 to 2.55 percent.

Private temporary financing outstanding amounted to $942 million on June 30, 1955, and is estimated at $739 million at the end of 1956 and $611 million at the end of 1957. The decline over this period is attributable to the sale of local authority long-term bonds and the subsequent repayment of temporary notes. Permanent financing by the sale to private investors of these bonds totaled $485

million during 1955 and is estimated at $500 million for each of years 1956 and 1957. Loans by the Administration to local authorities amounted to $100 million on June 30, 1955, and are estimated at $109 million on June 30, 1956, and at $119 million on June 30, 1957.

The following table summarizes capital financing activities for the years 1955, 1956, and 1957:

[In millions]

| Acquisitions during the year | 1,613 | 1,121 | 1,030 |
| Repayments during the year | 1,764 | 1,324 | 1,158 |
| Balance at end of year | 942 | 739 | 611 |
| New housing authority bonds issued | 485 | 500 | 500 |

The budget program contemplates no change in borrowing from the United States Treasury in 1956 and an increase of $6 million in 1957.

*Management.*—The Administration reviews management operations of local housing authorities, approves operating budgets, audits books of account, and inspects physical plant, to assure compliance with the law and the orderly and economical operation of the projects. The dwelling units are leased to low-income families at rents scaled to amounts which such families can pay.

The following table summarizes the status of projects available for occupancy at the end of the year:

[1] The appropriation of $68,050,000 exceeded actual requirements by $288,071.
[2] Includes a proposed supplemental appropriation of $2,750,000 to be submitted for consideration at a later date.

Increased annual contribution requirements in 1957 are occasioned primarily by the increased number of units eligible for contributions which result from the completion and permanent financing of new and reactivated projects and the sale to local authorities of federally owned projects.

Projects not receiving annual contributions are as follows: (*a*) *Farm labor camps.*—The Housing Act of 1950 transferred to the Administration, from the Department of Agriculture for use as low-rent housing, 38 farm labor camps. Thirty-six of these have been turned over to local authorities for operation under arrangements which provide for payment to the Federal Government of any net income for 20 years.

(*b*) *Public war housing projects.*—The Housing Act of 1950 authorized the conveyance to local authorities, for low-rent use, of certain permanent war-housing projects. All net revenues are paid to the Administration for deposit to the Treasury.

(*c*) *Public Works Administration projects.*—The Housing Act of 1937 authorized the transfer to the United States Housing Authority of the low-rent projects developed by the Public Works Administration. Wherever local housing authorities had been organized, these projects were leased to them for operation under contracts which provided for the return of the net income from the projects to the Government. More recently, the Public Housing Administration has undertaken to transfer title to these projects to local authorities, under a contract which provides for payment to the Federal Government of all net income for a period of 40 years.

(*d*) *Federally owned projects.*—As of June 30, 1955, there were 7 low-rent projects, containing 2,437 units operated directly by the Administration. In the case of 3 projects State law precluded the local authority from accepting transfer from the PHA, while in 1 additional instance the local authority elected to refuse transfer. The three remaining projects represented special situations where PHA deemed it to be in the public interest to operate the projects directly. Besides these 7 projects PHA has leased to local authorities 15 low-rent projects containing 10,988 units.

*Administrative expenses.*—The administrative expense appropriation is estimated at $9,767,000 for 1956 (including a proposed supplemental of $1,067,000) and $10,700,000 for 1957, the rise reflecting mainly increased development activity and to a lesser extent the augmented burden of management as new units are completed for occupancy and are added to the existing workload. These amounts are merged with funds for administrative expenses of the liquidating emergency housing program conducted by the Public Housing Administration into a single fund, which is shown under the estimate for "Administrative expenses, Public Housing Administration." Nonadministrative expenses for site inspection and audit and for management of federally operated projects are estimated at $1,820,000 in 1956 and $3 million in 1957; the former expenses are reimbursed by local authorities and capitalized in development costs.

OPERATING RESULTS AND RETAINED EARNINGS

Operating income from the United States Housing Act program is not intended to be sufficient to cover all program costs including administrative expenses. During the current and budget years, net losses are approximately equal to the administrative expense appropriation plus disposition losses, chiefly on the transfers and conveyances of PWA and war-housing projects to local housing authorities.

PROGRAM AND PERFORMANCE

The Public Housing Administration receives funds for administrative expenses from two sources: (1) An appropriation for regular recurring costs, and (2) an allocation from the revolving fund (liquidating program) for expenses incurred in the operation and disposition of the liquidating emergency housing program. Administrative expenses required to perform necessary functions under the housing programs are presented in consolidated form. These expenses are paid from a single fund and distributed on the basis of special surveys and analyses of employees' actual working time. The distribution of costs is shown in the following table:

ANALYSIS OF BUDGET PROGRAM

The Public Housing Administration is responsible for administering both the low-rent public housing program and the liquidating emergency housing program. The two programs are administered by a single integrated organization. Pursuant to authority contained in the Housing Act of 1948 (62 Stat. 1268), funds for administrative expenses of these two programs are consolidated in a single account.

Activities conducted by the Administration fall into three main classes: Development, management, and disposition. Administrative expenses of the Administration, therefore, arise from the performance of these three functions.

*Development.*—The Administration incurs expenses in the course of assisting local housing authorities in project planning, working out architectural, engineering, and construction problems, analyzing proposed sites, helping in land acquisition, preparing cost estimates, and rendering similar advisory services. Development expenses in 1957

will relate solely to the low-rent public housing program, inasmuch as no further development activity will be conducted by the Administration with regard to the liquidating emergency housing program.

The Housing Act of 1954 authorized the Administration to enter into new contracts for loans and annual contributions for 35,000 dwelling units. This authorization was extended to August 1, 1955, and 30,630 units were placed under contract up to that time. The Housing Amendments of 1955 authorized execution of contracts for 45,000 additional units; this authorization expires July 31, 1956.

*Management.*—The Administration incurs expenses in the performance of such functions as conducting management reviews of active projects, analyzing and reviewing budgets submitted by the local housing authorities, making fiscal and occupancy audits, undertaking inspections to insure proper maintenance of properties, providing consulting engineering services, and making personal property audits. Management activity is largely devoted to the low-rent public housing program. The liquidating emergency housing program is diminishing as projects are removed from the workload.

The management workload for each program is as follows:

NUMBER OF DWELLING UNITS IN MANAGEMENT AT YEAR END

| | *1955 actual* | *1956 estimate* | *1957 estimate* |
|---|---|---|---|
| Low-rent public housing program | 403,471 | 422,471 | 445,471 |
| Liquidating emergency housing program | 108,356 | 61,465 | 44,124 |
| Total management | 511,827 | 483,936 | 489,595 |

*Disposition.*—Expenses of disposition are limited to the liquidating emergency housing program and represent the cost of disposal of housing projects constructed during the war or subsequent to the outbreak of the Korean conflict.

Liquidation of the Government's interest in public war housing and veterans' re-use housing is proceeding rapidly. Actual and scheduled disposition in dwelling units is as follows: 87,883 in 1955, 47,000 in 1956, and 17,341 in 1957.

*Administrative expenses, revolving fund (liquidating programs), Office of the Administrator* (under existing legislation, 1956).—An increase in the limitation on administrative expenses for the liquidating programs in the estimated amount of $30,000 will be needed to cover increased travel costs under legislation enacted by the last Congress.

*Administrative expenses, Federal Housing Administration* (under existing legislation, 1956).—An increase of $495,000 in the limitation for administrative expenses in 1956 is required to provide staff to carry out the new and amended programs provided by the Housing Amendments of 1955 and for increased General Accounting Office audit costs.

*Administrative expenses, college housing loans* (under existing legislation, 1956).—An increase in the limitation for administrative expenses for 1956 in the amount of $187,000 is needed to provide funds for processing the vastly increased number of loan applications occasioned by the major program liberalization and enlargement under the Housing Amendments of 1955 (effective Aug. 11, 1955).

*Administrative expenses, Public Housing Administration* (under existing legislation, 1956).—A supplemental appropriation for 1956 in the estimated amount of $1,067,000 is needed to cover costs of placing annual contributions contracts authorized by the Housing Amendments of 1955 and for additional costs for General Accounting Office audit.

## CURRENT AUTHORIZATIONS

## AGRICULTURAL RESEARCH SERVICE

SALARIES AND EXPENSES

### Salaries and Expenses, Agricultural Research Service

For expenses necessary to perform agricultural research relating to production and utilization, to control and eradicate pests and plant and animal diseases, and to perform related inspection, quarantine and regulatory work, and meat inspection: *Provided,* That not to exceed $15,000 of the appropriations hereunder shall be available for employment pursuant to the second sentence of section 706 (a) of the Organic Act of 1944 (5 U. S. C. 574), as amended by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a): *Provided further,* That appropriations hereunder shall be available for the operation and maintenance of aircraft and the purchase [(for emergency replacement only)] of not to exceed [one] *three, of which two shall be for replacement only*: *Provided further,* That appropriations hereunder shall be available pursuant to 5 U. S. C. 565a for the construction, alteration, and repair of buildings and improvements, but unless otherwise provided, the cost of constructing any one building (except headhouses connecting greenhouses) shall not exceed $7,500 and the cost of altering any one building during the fiscal year shall not exceed $3,750 or two per centum of the cost of the building, whichever is greater: *Provided further,* That appropriations hereunder shall be available for uniforms, or allowances therefor, as authorized by the Act of September 1, 1954 [(68 Stat. 1114)], *as amended (5 U. S. C. 2131)*:

Research: For research and demonstrations on the production and utilization of agricultural products, and related research and services, including administration of payments to State Agricultural Experiment Stations; [$37,800,000] *$42,915,000: Provided further, That not to exceed $1,550,000 shall be available for construction of buildings and for the acquisition of necessary land therefor by donation, or exchange, and not to exceed $75,000 for alterations of buildings, without regard to limitations prescribed herein.*

Plant and animal disease and pest control: For operations and measures to control and eradicate pests and plant and animal diseases and for carrying out assigned inspection, quarantine and regulatory activities, as authorized by law; [$18,658,700] *$21,200,000,* of which [$1,000,000] *$1,500,000* shall be apportioned for use pursuant to section 3679 of the Revised Statutes, as amended, for the control of outbreaks of insects and plant diseases under the joint resolution approved May 9, 1938 (7 U. S. C. 148–148e), and the Act of August 13, 1954 ([Public Law 586] *7 U. S. C. 148*), to the extent necessary to meet emergency conditions: *Provided further,* That no part of this appropriation shall be used to pay the cost or value of trees, farm animals, farm crops, or other property injured or destroyed as a result of plant insect and disease control activities except potatoes and tomatoes as authorized under the Golden Nematode Act: *Provided further,* That, in the discretion of the Secretary, no part of this appropriation shall be expended for the control of sweet-potato weevil in any State until such State has provided cooperation necessary to accomplish this purpose, or for barberry eradication until a sum or sums at least equal to such expenditures shall have been made available by States, counties, or local authorities, or by individuals or organizations for the accomplishment of this purpose, or with respect to the golden nematode except as prescribed in section 4 of the Golden Nematode Act.

Meat inspection: For carrying out the provisions of laws relating to Federal inspection of meat and meat-food products and the applicable provisions of the laws relating to process or renovated butter; [$14,325,000] *$15,745,000.*

[Research: For the construction of roads at the National Arboretum in accordance with the provisions of the Act of March 4, 1927 (44 Stat. 1422, 20 U. S. C. 191–194), $150,000: *Provided,* That the construction of said roads may be performed by the Bureau of Public Roads, Department of Commerce.]

[Not to exceed $25,000 of funds appropriated under this head in the Department of Agriculture and Farm Credit Administration Appropriation Act, 1956, for research, shall be available for construction of a building at the United States Range Livestock Experiment Station, Miles City, Montana.] *(5 U. PROGRAM AND PERFORMANCE

The Agricultural Research Service conducts fundamental and applied research and demonstrations relating to the production and utilization of agricultural products, and those control and regulatory programs of the Department which involve enforcement of plant and animal quarantines, meat inspection, the control of diseases and insect pests of animals and plants, and related work.

The proposed increase provides for (*a*) expansion of research to meet pressing problems of agricultural production and utilization, including specific problems of Great Plains agriculture, (*b*) construction of research facilities amounting to $1,485,000, and (*c*) meeting the increasing workload of plant and animal inspection and quarantine work, and meat inspection.

1. *Research*—(*a*) *Crops research.*—Investigations are conducted to develop improved varieties of food, feed, fiber, and other plants; to improve crop production practices including methods to control plant diseases; to improve methods for control of harmful and utilization of beneficial insects affecting farm production; and to develop and test new chemical formulations for the control of crop pests.

(*b*) *Farm and land management research.*—Investigations are conducted to improve fertilizers and soil man-

agement and irrigation practices; to develop and improve conservation practices; to study water yield, runoff, sedimentation, and other hydrologic problems of agricultural watersheds; to determine the relation of soils to plant, animal, and human nutrition; and to apply engineering principles to agriculture. Production economics research is conducted on profitable adjustments in farming by type and size of farm; efficiency in use of labor, equipment, land, and water; inventory and analysis of land resources; and problems of farm valuation, taxation, debt, tenure, risk, and insurance.

(*c*) *Livestock research.*—Investigations are conducted on farm livestock, poultry, and domestic fur animals to develop superior strains and types, establish nutritive requirements, determine means of maintaining maximum fertility, achieve efficient use of feed and forage in the production of meat, milk, eggs, wool, fur, and other products; develop practical methods of control of diseases and parasites affecting livestock; and develop improved livestock management methods.

(*d*) *Administration of payments to States, and Territorial research.*—Research under Federal grant funds at each State agricultural experiment station is coordinated with the research conducted by other States and by agencies of the Department. Agricultural experiment stations are operated in Puerto Rico, Virgin Islands, and Alaska.

(*e*) *Home economics research.*—Investigations are conducted on human nutritional requirements, the composition and nutritive value of foods, and household preparation and preservation of foods. Studies are made of household utilization of textiles, clothing, and equipment, and of family requirements for housing and related facilities. Investigations are also made of food consumption practices and the nutritive value and economy of customary diets, patterns of rural family expenditures and production for household use, and economic problems of household management.

(*f*) *Utilization research.*—Investigations are conducted in the field of chemistry and related physical and biological sciences to develop new and improved foods, feeds, drugs, fabrics, industrial chemicals, and other products from agricultural commodities; to devise improved methods for evaluating the suitability of commodities for processing; to devise better processing methods; to increase the use of byproducts; and to solve waste disposal problems.

2. *Plant and animal disease and pest control—*(*a*) *Plant disease and pest control.*—The work consists of control and quarantine measures designed to protect agriculture from plant diseases and pests, including destructive insects, nematodes, and noxious weeds. The Federal Insecticide, Fungicide, and Rodenticide Act is administered and enforced. A supplemental appropriation for 1956 is proposed for later transmission and appears at the end of this chapter.

(*b*) *Animal disease and pest control.*—Measures are devised to exclude communicable diseases of foreign origin from this country; to prevent the spread of diseases through interstate shipments of livestock or distribution of impure or impotent veterinary biologics; to control and eradicate livestock diseases, and to maintain, through a marketing agreement with manufacturers and handlers, adequate supplies of hog cholera virus and serum for protection of swine.

The acceleration of the brucellosis eradication program conducted under this appropriation is authorized under title II, section 204 (e), Public Law 690, approved August 28, 1954. It provides that the program shall be financed by transfer of not to exceed $15 million annually for 2 years from funds available to the Commodity Credit Corporation. Current authorization for this accelerated program expires June 30, 1956.

The volume of inspections, interceptions of unauthorized plant materials, export certifications issued, and other protective activities is indicated by selected examples in the following table:

3. *Meat inspection.*—Federal meat inspection is required for all meat in interstate commerce and is conducted to assure a clean and wholesome meat supply for human consumption. The work includes inspection of animals, carcasses and meat, and meat-food products at various stages of handling and processing. Measures are enforced to insure informative labeling and meats imported or exported are inspected. Continuous inspection of the manufacture of process butter is also provided.

The volume of inspections and examinations performed annually is indicated by examples for the fiscal year 1955, given in the following table:

| *Item* | | *Number of units, fiscal year 1955* |

PROGRAM AND PERFORMANCE

Funds are allotted to the agricultural experiment stations of the land-grant colleges in the States, Hawaii, Alaska, and Puerto Rico for agricultural research, including investigations and experiments to promote a permanent and efficient agricultural industry and improvements in the rural home and rural life. The allotments are made primarily on the basis of prescribed amounts in the authorizing acts and partly on the basis of need in specific areas to find solutions to agricultural problems. The States are contributing about $3 to $1 paid by the Federal Government.

The proposed increase is to strengthen the cooperative research program at the State, Territorial, and Puerto Rico agricultural experiment stations.

PROGRAM AND PERFORMANCE

On recommendation and approval of the Office of Defense Mobilization, investigations are made of the feasibility of developing domestic sources of supplies of any agricultural material or substitute for it determined by that Office to be strategic and critical.

1. *Investigations of domestic production of vegetable tannins.*—These studies aim at domestic production of crops from which materials for tanning leather can be derived, and development of methods of extracting such materials.

2. *Development of a domestic source of castor oil.*—Work on this strategic oil is devoted to developing improved varieties of castor beans adapted to mechanical harvesting and to improving equipment for growing and harvesting the crop.

3. *Research on domestic production of strategic fibers.*—This work centers on the domestic production of fibers that can be used for such purposes as lines and ropes on naval vessels and as substitutes for jute.

PROGRAM AND PERFORMANCE

1. *Eradication activities.*—After discovery of foot-and-mouth disease in Mexico in 1946, measures were undertaken to prevent the spread of the disease into the United States and to assist Mexico in control and eradication. Mexico was declared free of the disease on September 1, 1952. An outbreak of foot-and-mouth disease occurred in Mexico in May 1953, but by December 31, 1954, Mexico was declared free of the disease.

On August 1, 1952, an emergency was declared as the result of the spread of vesicular exanthema of swine. Cooperative measures have been undertaken to eradicate the disease. Chief means of spread of the disease is through feeding of uncooked garbage. To further eradication efforts, 46 States now have laws or regulations requiring the cooking of garbage fed to swine.

Funds for carrying out these eradication programs have been transferred from other funds available to the Department. Corporate funds so used are subsequently repaid from specific appropriations for that purpose.

2. *Research.*—Foot-and-mouth disease research was initiated in fiscal year 1955 on Plum Island, N. Y., in facilities made available to the Department of Agriculture by the Department of the Army. Pending completion of new facilities now under construction, the current research program is limited in scope. In view of the anticipated completion of the new laboratory this fiscal year, the estimates include an increase to undertake a full-scale research program.

PROGRAM AND PERFORMANCE

The Supplemental Appropriation Act, 1956, provided $250,000 for surveys, plans, and specifications for constructing or altering animal disease research and control laboratory facilities. Preliminary plans and drawings are being prepared and a supplemental estimate will be submitted in the fiscal year 1956 to cover alteration or construction of such facilities.

## EXTENSION SERVICE

INTRODUCTORY STATEMENT

Extension work is a nationwide cooperative undertaking of the United States Department of Agriculture, the State land-grant colleges, counties and municipalities. Its primary function is out-of-school applied education in agriculture and home economics. It brings to rural people and others the results of research conducted by the Department, the colleges, and other agencies. Its objective is to help people help themselves to attain greater efficiency in farming, marketing, and homemaking, thereby improving their economic status and their family and community life.

PROGRAM AND PERFORMANCE

1. *Payments for cooperative agricultural extension work under Smith-Lever Act.*—Funds appropriated under the Smith-Lever Act are distributed to each State, Hawaii, Alaska, and Puerto Rico, on the basis of formulas stipulated in the act. The funds are used within the States primarily for the employment of county extension workers. These workers provide counsel and assistance to farm families for the improvement of agriculture and family living in day-to-day operations as well as sound long-time farm and home programs. Work with youth is largely through 4–H Clubs. The proposed increase would be used to further strengthen the extension program emphasizing the farm unit approach as an effective teaching method in the application of the results of research and advancing technology in the solutions of problems of individual farm families; and to conduct pilot extension programs geared to the needs of low-income and part-time farmers in disadvantaged agricultural areas.

2. *Payments for cooperation in farm forestry extension work.*—The work formerly conducted under this activity and appropriated under the Clarke-McNary Act has been shifted to, and become part of that financed by appropriations under the Smith-Lever Act.

3. *Payments and contracts under the Agricultural Marketing Act.*—Funds appropriated under sections 204 (b) and 205 of the Agricultural Marketing Act of 1946 for educational work applicable to the marketing and distribution of agricultural products are distributed to the States, Hawaii, Alaska, and Puerto Rico, on a matching basis under approved projects, and on the basis of contracts with the States. The proposed increase under this act is for the purpose of expanding marketing educational work.

PROGRAM AND PERFORMANCE

The Federal Extension Service administers the nationwide system of cooperative extension work in agriculture and home economics in cooperation with the State land-grant colleges and universities. The Service provides leadership, counsel and assistance to the States and Territories with respect to (1) overall policies, (2) program development and adjustment in line with changing conditions and new technology, (3) modern effective informal teaching methods, (4) organization of staff and work for most efficient use of resources available, (5) evaluation of methods, procedures, and results obtained, and (6) in-service training for extension personnel.

As the educational agency of the Department, the Service coordinates all the Department's educational activities and works closely with research and action agencies of the Department, other departments of Government, and national organizations, to advance efficient agricultural and homemaking practices in the program of work of each State and Territory. The States are supplied with the latest information regarding departmental programs of direct concern to farm people.

Leadership and assistance is provided the States in the planning and development of extension programs in agriculture, home economics, 4–H Club work, marketing, utilization, and information. State and county extension personnel are assisted and trained in developing and using more effective teaching methods and are provided with other types of direct program and procedural help.

Funds to cover the cost of penalty mailings of the cooperative extension agents in the States are also provided under this appropriation.

## FOREST SERVICE

INTRODUCTORY STATEMENT

The Service carries on three primary functions: (1) Protection, development, and use of about 181 million acres of land in national forests in the United States, Alaska, and Puerto Rico; and management of land utilization projects covering about 7 million acres; (2) cooperation with States and private forest landowners to obtain better fire protection on approximately 431 million acres of forest lands and better forest practices on about 345 million acres of privately owned commercial timberlands, to encourage reforestation, and stimulate development and management of State, county, and community forests; and (3) research for all forest lands and related ranges to bring about better protection from fire, insects, and diseases; to increase productivity, and facilitate full utilization of forest, water, and range resources, and more profitable production of timber and forage. Included in these three primary functions are construction and maintenance of roads and trails, control of forest pests, protection against floods, land exchange, and a number of cooperative projects.

SALARIES AND EXPENSES

### Salaries and Expenses, Forest Service

For expenses necessary, including not to exceed $15,000 for employment pursuant to the second sentence of section 706 (a) of the Organic Act of 1944 (5 U. S. C. 574), as amended by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), including travel expenses of advisory councils or similar groups; to experiment and make investigations and report on forestry, national forests, forest fires, forest insects and diseases, and lumbering; to advise the owners of woodlands as to the proper care of the same; to investigate and test American timber and timber trees and their uses, and methods, for the preservative treatment of timber; to seek, through investigations and the planting of native and foreign species, suitable trees for the treeless regions; to protect, administer, and improve the national forests, including tree planting and other measures to prevent erosion, drift, surface wash, soil waste, and the formation of floods, and to conserve water; to ascertain the natural conditions upon and utilize the national forests, to transport and care for fish and game supplied to stock the national forests or the waters therein; for management of lands acquired under the land utilization program; and to collate, digest, report, and illustrate the results of experiments and investigations made by the Forest Service: *Provided,* That the appropriations available to the Forest Service for the current fiscal year may be used for the operation and maintenance of aircraft, and the purchase of not to exceed four (for replacement only), uniforms, or allowances therefor, as authorized by the Act of September 1, 1954 [(68 Stat. 1114)], *as amended (5 U. S. C. 2131)*; the purchase, erection, and alteration of buildings and other public improvements, but the cost of any building purchased, erected, or as improved, exclusive of the cost of constructing a water-supply or sanitary system and of connecting the same with any such building, and exclusive of the cost of any tower upon which a lookout house may be erected, shall not exceed $18,500 ($22,500 in Alaska) with the exception that any building erected, purchased, or acquired, the cost of which was $18,500 or more, may be improved out of the appropriations available to the Forest Service within any fiscal year by an amount not to exceed 2 per centum of the cost of such building, and not to exceed $250,000 of such appropriations may be used for the maintenance, improvement, and construction of aircraft landing fields in, or adjacent to, the national forests, as follows:

National forest protection and management: For the administration, protection, use, maintenance, improvement, and development of the national forests, including the establishment and maintenance of forest tree nurseries, including the procurement of tree seed and nursery stock by purchase, production, or otherwise, seeding and tree planting and the care of plantations and young growth; the maintenance of roads and trails and the construction and maintenance of all other improvements necessary for the proper and economical administration, protection, development, and use of the national forests, including experimental areas under Forest Service administration; the construction (not to exceed $18,500 for any one structure), equipment, and maintenance of sanitary and recreational facilities; timber cultural operations; development and application of fish and game management plans; propagation and transplanting of plants suitable for planting on semiarid portions of the national forests; estimating and appraising of timber and other resources and development and application of plans for their effective management, sale, and use; expenses of the National Forest Reservation Commission as authorized by section 14 of the Act of March 1, 1911 (16 U. S. C. 514); examination, classification, surveying, and appraisal of land incident to effecting exchanges authorized by law and of lands within the boundaries of the national forests that may be opened to homestead settlement and entry under the Act of June 11, 1906, and the Act of August 10, 1912 (16 U. S. C. 506–509), as provided by the Act of March 4, 1913 (16 U. S. C. 512); investigation and establishment of water rights, including the purchase thereof or of lands or interests in lands or rights-of-way for use and protection of water rights necessary or beneficial in connection with the administration and public use of the national forests; not to exceed $100,000 for the purchase of parcels of land and interests therein in Sanders County, Montana, but such land shall not be acquired without the approval of the local government concerned; and all expenses necessary for the use, maintenance, improvement, protection, and general administration of the national forests, and for the management of lands under title III of the Act of July 22, 1937, and the Act of August 11, 1945 (7 U. S. C. 1010–1012); [$35,511,500] *$41,668,000*: *Provided,* That the Secretary may sell at market value any property located in Yalobusha, Chickasaw, and Pontotoc Counties, Mississippi, administered under title III of the Act of July 22, 1937, and suitable for return to private ownership under such terms and conditions as would not conflict with the purposes of said Act.

Fighting forest fires: For fighting and preventing forest fires on or threatening lands under Forest Service administration, including lands under contract for purchase or in process of condemnation for Forest Service purposes, and for liquidation of obligations incurred in the preceding fiscal year for such purpose, $5,250,000, of which $1,750,000 shall be apportioned for use, pursuant to section 3679 of the Revised Statutes, as amended, to the extent necessary to meet emergency conditions.

Control of forest pests: For the control of white pine blister rust pursuant to the Act of April 26, 1940 (16 U. S. C. 594a), including the development and testing of new control methods, [$2,735,000] *$2,734,000*, of which $355,000 shall be available to the Department of the Interior for the control of white pine blister rust on or endangering Federal lands under the jurisdiction of that Department or lands of Indian tribes which are under the jurisdiction of or retained under restrictions of the United States; and for carrying out the Forest Pest Control Act (16 U. S. C. [, Supp. V,] 594–1—594–5), [$3,537,500] *$2,386,000*, of which [$3,137,500] *$1,751,000* shall be apportioned for use pursuant to section 3679 of the Revised Statutes, as amended, for the purposes of said Act to the extent necessary under the then existing conditions; [$6,272,500] *$5,120,000*.

Forest research: For forest research at forest or range experiment stations, the Forest Products Laboratory, or elsewhere, in accordance with the provisions of sections 1, 2, 3, 4, 7, 8, 9, and 10 of the Act approved May 22, 1928, as amended (16 U. S. C. 581, 581a–581c, 581f–581i), including the construction and maintenance of improvements; fire, silvicultural, watershed, forest insects and diseases, and other forest investigations and experiments; investigations and experiments to develop improved methods of management of forest and related ranges; experiments, investigations, and tests of forest products; marketing research and service on timber and timber products; a comprehensive forest survey; and investigations in forest economics; [$7,754,000] *$8,900,000*: *Provided,* That funds may be advanced to cooperators under such regulations as the Secretary may prescribe when such action will stimulate or facilitate cooperative work.

[For an additional amount for "Salaries and expenses", for national forest protection and management, $300,000: *Provided,* That this appropriation shall be effective only upon enactment into law of H. R. 5891, Eighty-fourth Congress.] *(5 U. S. C. 511–512, 524, 565a; 7 U. S. C. 1621–1627; 16 U. S. C. 471–583i; 31 U. S. PROGRAM AND PERFORMANCE

1. *National forest protection and management*—(*a*) *Resource protection and use.*—The national forests are protected from fire, and their resources are managed in such ways as to bring about full utilization and maximum sustained production.

MAIN WORKLOAD FACTORS

| *Description* | *1955 actual* | *1956 estimate* | *1957 estimate* |
|---|---|---|---|
| Area administered and protected (acres) | 181,071,658 | 181,000,000 | 181,000,000 |
| Timber managed and protected (billion board feet) | 600 | 600 | 600 |
| Timber sales (number) | 27,542 | 28,200 | 28,500 |
| Timber harvested (billion board feet) | 6.3 | 7.25 | 7.75 |
| Forest fires controlled (number) | 11,792 | 11,000 | 11,000 |
| Area burned (acres) | 203,973 | 350,000 | 200,000 |
| Grazing use permits (calendar year) | 25,783 | 25,500 | 25,500 |
| Estimated number of livestock on national forest ranges (including calves and lambs) | 8,000,000 | 8,000,000 | 8,000,000 |
| Special use permits (number) | 54,703 | 56,000 | 57,500 |
| Estimated number of visitors to national forests (calendar year) | 40,304,000 | 45,000,000 | 50,000,000 |
| Receipts (by fiscal years): | | | |
| Timber sales | $75,043,577 | $101,800,000 | $108,500,000 |
| Grazing | 2,953,257 | 3,000,000 | 3,000,000 |
| Land use and power | 1,524,046 | 1,700,000 | 1,700,000 |
| Land utilization projects | 1,618,410 | 1,500,000 | 1,500,000 |
| Total receipts | 81,139,290 | 108,000,000 | 114,700,000 |

This item also provides for management of about 7 million acres in land utilization projects, including revegetation and other development work. These lands are used under lease or permit by local farmers and ranchers under specific use conditions.

(*b*) *Resource development.*—Main factors are shown in the following table:

MAIN WORKLOAD FACTORS

[In acres]

| *Description* | *1955 actual* | *1956 estimate* | *1957 estimate* |
|---|---|---|---|
| Planted to trees (annual) | 13,000 | 20,000 | 20,000 |
| Planted to trees (cumulative) | 1,385,084 | 1,405,084 | 1,425,084 |
| Still to be planted (total) | 4,000,000 | 4,000,000 | 4,000,000 |
| Reseeded to range grasses (annual) | 41,077 | 60,000 | 60,000 |
| Reseeded to range grasses (cumulative) | 591,715 | 651,715 | 711,715 |
| Still to be reseeded (total) | 3,408,285 | 3,348,285 | 3,288,285 |

2. *Fighting forest fires.*—This provides for employment of additional manpower and other facilities to suppress forest fires which cannot be controlled by the fire-control organization provided for under national forest protection and management.

3. *Control of forest pests*—(*a*) *White pine blister rust control.*—Protection of white pine trees from blister rust is provided by removing ribes (alternate host plants) from areas where white pines grow. Some of this work is done in cooperation with State, private, and other Federal land-managing agencies. Ribes have been removed from approximately 17 million acres to date. This acreage is reworked to keep the ribes suppressed. Approximately 6.2 million additional acres require further eradication work. The following table indicates the estimated program for 1956 and 1957 as compared to work done in 1955:

[In acres]

| *Description* | *1955 actual* | *1956 estimate* | *1957 estimate* |
|---|---|---|---|
| Initial eradication | 184,792 | 175,000 | 175,000 |
| Rework | 668,376 | 750,000 | 750,000 |
| Total | 853,168 | 925,000 | 925,000 |

(*b*) *Forest pest control.*—Operations consist of surveys to detect and appraise the danger of insects and plant diseases which injure or destroy forest resources and suppressive measures before extensive damage is done and while areas requiring treatment are small.

4. *Forest research*—(*a*) *Forest and range management research.*—Research is conducted at regional forest experimental stations and elsewhere to provide private and public land managers and owners with a sound basis for protection and management of timber, range, and watershed lands. Studies are conducted to maintain a sustained yield of products at the lowest possible costs; increase forage on rangelands for maximum production of livestock without damage to soil, watershed, or other values; assure maximum regular flow of usable water, and reduce flood and sedimentation.

(*b*) *Forest protection research.*—Research is conducted at the regional forest experiment stations and elsewhere to develop sound measures for the protection of forests from damage by fire, insects, and diseases. These investigations provide the technical basis for control and preventive measures, including predictions of fire danger.

(*c*) *Forest products research.*—The work of the Forest Products Laboratory is directed toward improvement of forest products, reduction and utilization of waste, utilization of low-quality wood and unpopular species and development of new wood products. Studies are undertaken to reduce costs of logging and wood utilization, develop basic knowledge, and disseminate findings to meet the needs of the forest owner, primary manufacturer, wood fabricator, and ultimate consumer.

(*d*) *Forest resources research.*—These investigations are conducted to inventory and appraise the condition of forest lands and their ownership, volume and quality of standing timber, annual growth and depletion, potential need for timber products, and other information on supply, production, marketing, and utilization.

FOREST ROADS AND TRAILS

### Forest Roads and Trails, Forest Service

For expenses necessary for carrying out the provisions of section 23 of the Federal Highway Act approved November 9, 1921, as amended (23 U. S. C. 23, 23a), relating to forest development roads and trails, including the construction, reconstruction, and maintenance of roads and trails on experimental areas under Forest Service administration, $24,000,000, which sum is authorized to be appropriated by the Act of May 6, 1954 ([Public Law 350] *23 U. S. C. 23*), to remain available until expended. (*Department of the Interior and Related Agencies Appropriation Act, 1956.*)

Appropriated 1956, **$24,000,000** Estimate 1957, [a] **$24,000,000**

[a] Excludes $2,165 for activities transferred in the estimates to "Salaries and expenses, Office of the Secretary of Agriculture." The amounts obligated in 1955 and 1956 are shown in the schedule as comparative transfers.

PROGRAM AND PERFORMANCE

Roads and trails are essential to the protection and management of the national forests and the utilization of their resources. The existing system consists of 120,914 miles of earth- or gravel-surfaced roads and 118,755 miles of supplemental trails.

Funds for 1957 will permit continued emphasis on the construction of timber access roads urgently needed to accelerate harvesting of national forest timber.

The Federal-Aid Highway Act of 1954 (23 U. S. C. 23) made available contract authorizations totaling $70.5 million. Contract authorization equivalent to funds appropriated for roads and trails are administratively canceled annually. The program for 1957 cancels the balance of the authorization.

STATE AND PRIVATE FORESTRY COOPERATION

## State and Private Forestry Cooperation, Forest Service

For expenses necessary for cooperation with the various States in forest-fire prevention and suppression, in forest tree planting *on non-Federal public and private lands*, and in forest management and processing, pursuant to the Act of August 25, 1950 (16 U. S. C. 568c, 568d), and sections 1, 2, 3, and 4 of the Act of June 7, 1924 (16 U. S. C. 564–567c), and Acts supplementary thereto; advising timberland owners, associations, and other appropriate agencies in the application of forest management principles to federally owned lands leased to States and to private forest lands, and advising wood-using industries in processing of forest products, so as to attain sustained-yield management, the conservation of the timber resources, the productivity of forest lands, and the stabilization of employment and economic continuance of forest industries; [$11,337,129] *$11,385,000. PROGRAM AND PERFORMANCE

This program, carried on in cooperation with the States, encourages private timber growing through assistance in preventing and suppressing forest fires, reforestation of denuded and poorly stocked areas, and good management of woodlands. Privately owned forest lands comprise three-fourths of the Nation's commercial forest area and produce 90 percent of all timber cut. The fire-control program applies to all forest lands within the boundaries of organized protection units. The balance of the program is concentrated on small forest properties in private ownership because they are in greater need of management.

1. *Cooperation in forest fire control.*—Assistance is furnished 44 States and Hawaii in preventing and suppressing forest fires on private and State owned lands by financial aid, training, procurement of equipment, and a nationwide fire-prevention campaign. About 89 percent of the 431 million acres of non-Federal ownership are now partially covered. During 1954 the acreage burned on protected areas was 0.7 percent as against an estimated 12 percent on unprotected lands. Of the total expendi-

tures under this program, 72 percent is contributed by States and counties, 5 percent by private owners, and 23 percent by the Federal Government.

2. *Cooperation in forest tree planting.*—To encourage woodland owners to plant trees on the more than 60 million acres of inadequately stocked State and private forest land, the States provide trees at less than cost. The Federal Government shares about 25 percent of the cost with the States.

3. *Cooperation in forest management and processing.*—In cooperation with State foresters, 274 projects in 1,300 counties are operated to aid small-woodland owners in applying good management to their timber holdings. In 1954 these projects covered some 32,224 owners and about 2.6 million acres.

4. *General forestry assistance.*—Assistance and advice is given by field technicians in response to inquiries in technical forestry fields.

## [ACQUISITION OF LANDS FOR NATIONAL FORESTS]

### [Weeks Act]

**Acquisition of Lands for National Forests, Weeks Act, Forest Service**

[For the acquisition of forest lands under the provisions of the Act approved March 1, 1911, as amended (16 U. S. C. 513–519, 521), $190,000. to be available only for payment of the purchase price of any lands acquired, including the cost of surveys in connection with such acquisition: *Provided*, That no part of this appropriation shall be used for acquisition of any land which is not within the boundaries of a national forest: *Provided further*, That no part of this appropriation shall be used for the acquisition of any land without the approval of the local government concerned.] (*Department of the Interior and Related Agencies Appropriation Act, 1956.*)

PROGRAM AND PERFORMANCE

The funds are used to acquire lands to protect the watersheds of navigable streams and to increase the production of timber. The National Forest Reservation Commission has approved the establishment of 78 national forest purchase units in 33 States, mainly in the eastern half of the United States. The present value of forest lands thus purchased to date is conservatively estimated at $200 million which is more than twice their cost.

[GENERAL PROVISIONS, FOREST SERVICE]

[SEC. 201. Within the unit limit of cost fixed by law, the lump-sum appropriations and authorizations made for the Forest Service under this Act shall be available for the purchase, in addition to those specifically provided for, of not to exceed 165 passenger motor vehicles for replacement only, and for the hire of such vehicles, necessary in the conduct of the work of the Forest Service outside the District of Columbia.]

[SEC. 202. Provisions of law prohibiting or restricting the employment of aliens shall not apply to (1) the temporary employment of translators when competent citizen translators are not available; (2) employment in cases of emergency of persons in the field service for periods of not more than sixty days.]

[SEC. 203. Of appropriations herein made which are available for the purchase of lands, not to exceed $1 may be expended for each option to purchase any particular tract or tracts of land.]

[SEC. 204. Except to provide materials required in or incident to research or experimental work where no suitable domestic product is available, no part of the funds appropriated to the Forest Service shall be expended in the purchase of twine manufactured from commodities or materials produced outside of the United States.]

[SEC. 205. No part of any appropriation to the Forest Service in this Act shall be used for publicity or propaganda purposes to support or defeat legislation pending before the Congress.] (*Department of the Interior and Related Agencies Appropriation Act, 1956.*)

## SOIL CONSERVATION SERVICE

CONSERVATION OPERATIONS

**Conservation Operations, Soil Conservation Service**

For necessary expenses for carrying out the provisions of the Act of April 27, 1935 (16 U. S. C. 590a–590f), including preparation of conservation plans and establishment of measures to conserve soil and water (including farm irrigation and land drainage and such special measures as may be necessary to prevent floods and the siltation of reservoirs); operation of conservation nurseries; classification and mapping of soils; dissemination of information; purchase and erection or alteration of permanent buildings; operation and maintenance of aircraft; and furnishing of subsistence to employees; [$59,300,000] *$65,215,000*: *Provided*, That the cost of any permanent building purchased, erected, or as improved, exclusive of the cost of constructing a water supply or sanitary system and connecting the same to any such building and with the exception of buildings acquired in conjunction with land being purchased for other purposes, shall not exceed $2,500, except for eight buildings to be constructed or improved at a cost not to exceed $15,000 per building and except that alterations or improvements to other existing permanent buildings costing $2,500 or more may be made in any fiscal year in an amount not to exceed $500 per building: *Provided further*, That no part of this appropriation shall be available for the construction of any such building on land not owned by the Government: *Provided further*, That in the State of Missouri, where the State has established a central State agency authorized to enter into agreements with the United States or any of its agencies on policies and general programs for the saving of its soil by the extension of Federal aid to any soil conservation district in such State, the agreements made by or on behalf of the United States with any such soil conservation district shall have the prior approval of such central State agency before they shall become effective as to such district: *Provided further*, That no part of this appropriation may be expended for soil and water conservation operations under the Act of April 27, 1935 (16 U. S. C. 590a–590f), in demonstration projects: *Provided further*, That not to exceed $5,000 may be used for employment pursuant to the second sentence of section 706 (a) of the Organic Act of 1944 (5 U. S. C. 574), as amended by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a): *Provided further*, That qualified local engineers may be temporarily employed at per diem rates to perform the technical planning work of the service. (*5 U. S. C. 511–512, 565a; 7 U. S. C. 1387; 16 U. S. C. 590q–1; Department of Agriculture and Farm Credit Administration Appropriation Act, 1956.*)

PROGRAM AND PERFORMANCE

The Service, in cooperation with State and other agencies, aids in bringing about physical adjustments in land use to conserve soil, water, and plant resources, establish a permanent and balanced agriculture, and reduce the hazards of floods and sedimentation.

Proposed increases are to provide technical assistance to new soil conservation districts and additions to existing districts in planning and establishing soil and water conservation practices; furnish accelerated assistance to low-income farmers in selected areas; speed up soil surveys and technical assistance in establishing conservation practices in areas where serious erosion and land-use problems exist, particularly in the southern Great Plains; and accelerate map compilation and the preparation and publication of soil maps and survey reports.

Assistance furnished soil conservation districts and other cooperators in developing and carrying out locally adapted programs in the States, Territories, and possessions consists in the main of the following: (*a*) surveys to provide physical land facts needed for farm and ranch conservation planning, and by other Federal, State, and local agencies and the public;

WATERSHED PROTECTION

### Watershed Protection, Soil Conservation Service

For expenses necessary to conduct surveys, investigations, and research and to carry out preventive measures, including, but not limited to, engineering operations, methods of cultivation, the growing of vegetation, and changes in use of land, in accordance with the Watershed Protection and Flood Prevention Act, approved August 4, 1954 ([Public Law 566] *16 U. S. C. 1001–1007*), and the provisions of the Act of April 27, 1935 (16 U. S. C. 590a–590f), to remain available until expended, [$12,000,000] *$16,000,000*, with which shall be merged the unexpended balances of funds heretofore appropriated or transferred to the Department for watershed protection purposes. (*5 U. S. C. 511–512; Department of Agriculture and Farm Credit Administration Appropriation Act, 1956.*)

Appropriated 1956, **$12,000,000** Estimate 1957,[a] **$16,000,000**

[a] Excludes $5,935 for activities transferred in the estimates to "Salaries and expenses, Office of the Secretary of Agriculture." The amounts obligated in 1955 and 1956 are shown in the schedule as comparative transfers.

PROGRAM AND PERFORMANCE

1. *Watershed planning and works of improvement.*—The Department cooperates with States and their political subdivisions in planning and installing works of improvement in small watersheds. Such works are designed to prevent erosion, floodwater, and sediment damage, and to further the conservation, development, utilization, and disposal of water.

As of the end of the fiscal year 1955, there were 28 field parties developing work plans for projects approved for planning. Eight additional work plan parties are to be established in 1956. Work plans include works of improvement, land-treatment measures, cost-benefit analyses, cost estimates, cost-sharing and maintenance proposals, and other data which serve as the basis for approval for receiving Federal assistance. In 1956, planning is expected to be conducted in nearly all States.

MAIN WORKLOAD FACTORS

| | *1955 actual* | *1956 estimate* | *1957 estimate* |
|---|---|---|---|
| Number of applications received | 353 | 250 | 250 |
| Number of applications approved for planning | 68 | 100 | 100 |
| Number of work plans completed and submitted to Congress | --- | 50 | 75 |
| Number of projects expected to start operation | --- | 15 | 75 |

Works of improvement include waterflow-retarding structures, debris and desilting basins, diversion ditches and dikes, stream-channel improvement, floodways, and gully-control structures. These are installed in approved projects on a cost-sharing basis. Technical assistance is also provided to the sponsoring organization on contracting, installation of structures, and conservation farm planning.

The increase for 1957 is to (1) establish two additional work plan parties, (2) provide for the Federal share of the cost of structures, and (3) provide technical assistance in establishing conservation practices and supervise installation of structures.

Watershed protection on the pilot watersheds which were initiated in fiscal year 1954 will be continued in the 1957 fiscal year at the same level as in 1956.

2. *Surveys and investigations of water resources programs.*—The Department cooperates with Federal, State, and local public agencies in making investigations and surveys of watersheds for the development of coordinated water resources programs. Water-resource plans of other agencies are reviewed where such plans affect agriculture.

The increase is to place on a full-year basis the program initiated in fiscal year 1956.

FLOOD PREVENTION

## Flood Prevention, Soil Conservation Service

For expenses necessary, in accordance with the Flood Control Act, approved June 22, 1936 ([Public Law 738] *33 U. S. C. 701–709*), as amended and supplemented, and in accordance with the provisions of laws relating to the activities of the Department, to perform works of improvement, including not to exceed $100,000 for employment pursuant to the second sentence of section 706 (a) of the Organic Act of 1944 (5 U. S. C. 574), as amended by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), at rates for individuals not to exceed $100 per diem, to remain available until expended, [$10,000,000] *$10,700,000*, with which shall be merged the unexpended balances of funds heretofore appropriated or transferred to the Department for flood prevention purposes: *Provided*, That no part of such funds shall be used for the purchase of lands in the Yazoo and Little Tallahatchie watersheds without specific approval of the county board of supervisors of the county in which such lands are situated[: *Provided further*, That hereafter the funds appropriated for flood prevention purposes may be expended in watersheds heretofore authorized by section 13 of the Flood Control Act of December 22, 1944, as amended, for necessary measures for the prevention of erosion, floodwater, and sediment damages, including gully control, floodwater detention, and floodway structures, in areas other than those over which the Department of the Army has jurisdiction and responsibility]. (*5 U. S. C. 511–512; Department of Agriculture and Farm Credit Administration Appropriation Act, 1956.*)

PROGRAM AND PERFORMANCE

The aim of the Department's flood prevention work on watersheds is to prevent or reduce floodwater and sediment damage in upstream areas and to reduce sedimentation of river channels and reservoirs.

The proposed increase in the appropriation is to accelerate the installation of works of improvement in those watersheds where the local people desire to move ahead with the program more rapidly and are able to furnish necessary easements and rights-of-way for the structural improvements, share construction costs, and accept responsibility for maintenance of the completed works of improvement.

1. *Preliminary examinations and surveys.*—During the fiscal year 1955 the Department essentially completed

the review surveys of 6 of the 11 authorized flood prevention watersheds where works of improvement are presently being installed. Remaining field work and the review survey reports will be completed in 1956. No further preliminary examination or survey work is contemplated under this appropriation.

2. *Works of improvement.*—Improvement measures were authorized on 11 watersheds by the Food Control Act of 1944. Measures primarily for flood prevention, such as floodwater retarding and sediment control structures, debris barriers and basins, deflectors, diversion ditches and dikes, riprapping of stream banks, and other improvements are being installed, usually by private contractors, on a cost-sharing basis with local interests. Land treatment measures which contribute to flood prevention are installed by private owners with technical and other assistance furnished by the Department. Measures installed on the watersheds are complementary to the mainstream flood control works constructed by the Corps of Engineers and other agencies.

3. *General basin investigations in the Arkansas-White-Red River and New England-New York areas.*—All field work and reports on the agricultural phases of the resource development programs for the Arkansas-White-Red River and the New England-New York areas were completed by the Department during the 1955 fiscal year. Copies of the reports have been furnished to all interested States and agencies involved for review and comment. Such revisions of the reports as are determined necessary and final reproduction will be completed in 1956. No additional basin investigations are contemplated by the Department under this appropriation.

*WATER CONSERVATION AND UTILIZATION PROJECTS*

### Water Conservation and Utilization Projects, Soil Conservation Service

*For expenses necessary to carry out the functions of the Department under the Acts of May 10, 1939 (53 Stat. 685, 719), October 14, 1940 (16 U. S. C. 590y–z–10), as amended and supplemented, June 28, 1949 (63 Stat. 277), and September 6, 1950 (7 U. S. C. 1033–1039), relating to water conservation and utilization projects, to remain available until expended, $232,000, which sum shall be merged with the unexpended balances of funds heretofore appropriated to said Department for the purpose of said Acts.*

PROGRAM AND PERFORMANCE

In cooperation with the Bureau of Reclamation, which constructs the dams, reservoirs, and principal canals, the Service develops efficient irrigation farming units on specific projects for sale. Land classification and topographic surveys are made, and project lands are subdivided into farm units of economic size. The land is cleared and leveled, and farm ditches, drains, and other water-control structures are built.

In order to protect and improve the project lands, the developed farm units are leased under specific use conditions or are planted to protective cover crops pending their sale to qualified farm families. Technical guidance on irrigation and conservation is furnished until the project is closed.

All irrigation development work on the Angostura project in South Dakota was completed in the fiscal year 1955, and final sale of the remaining farm units will be made before the 1956 crop season. Land development work on the Eden Valley project in Wyoming is continuing, and sale of the first farm units is expected to be made in the fiscal year 1957.

S. C. 590h (b)), for the respective States: *Provided further*, That not to exceed 5 per centum of the allocation for the [1956] *1957* agricultural conservation program for any county may, on the recommendation of such county committee and approval of the State committee, be withheld and allotted to the Soil Conservation Service for services of its technicians in formulating and carrying out the agricultural conservation program in the participating counties, and the funds so allotted may be placed in a single account for each State, and shall not be utilized by the Soil Conservation Service for any purpose other than technical and other assistance in such counties, *and in addition, not to exceed 1 per centum may be made available to any other Federal, State, or local public agency for the same purpose and under the same conditions*: *Provided further*, That for the [1956] *1957* program $2,500,000 shall be available for technical assistance in formulating and carrying out agricultural conservation practices and $1,000,000 shall be available for conservation practices related directly to flood-prevention work in approved watersheds: *Provided further*, That in carrying out the [1956] *1957* program the Secretary shall give particular consideration to the conservation problems on farmlands diverted from crops under acreage-allotment programs: *Provided further*, That such amounts shall be available for the purchase of seeds, fertilizers, lime, trees, or any other farming material, or any soil-terracing services, and making grants thereof to agricultural producers to aid them in carrying out farming practices approved by the Secretary under programs provided for herein: *Provided further*, That no part of any funds available to the Department, or any bureau, office, corporation, or other agency constituting a part of such Department, shall be used in the current fiscal year for the payment of salary or travel expenses of any person who has been convicted of violating the Act entitled "An Act to prevent pernicious political activities", approved August 2, 1939, as amended, or who has been found in accordance with the provisions of title 18, United States Code, section 1913, to have violated or attempted to violate such section which prohibits the use of Federal appropriations for the payment of personal services or other expenses designed to influence in any manner a Member of Congress to favor or oppose any legislation or appropriation by Congress except upon request of any Member or through the proper official channels.

[Not to exceed $5,000,000 of the appropriation under the head "Agricultural Conservation Program Service", in the Department of Agriculture and Farm Credit Administration Appropriation Act, 1955, shall be available for the purposes specified under the head "Agricultural conservation program", in the Second Supplemental Appropriation Act, 1955, and shall be merged with the amount provided therein.] *(69 Stat. 65, 545; Department of Agriculture and Farm Credit Administration Appropriation Act, 1956; Supplemental Appropriation Act, 1956.)*

PROGRAM AND PERFORMANCE

This program is designed to encourage conservation by sharing with farmers and ranchers the cost of applying approved measures considered as needed in the public interest and which farmers generally would not perform adequately with their own resources.

Funds are distributed among the States and Territories on the basis of conservation needs. The rate of cost-sharing averages less than 50 percent of the cost. Cost sharing may be in the form of a payment upon completion of the practice, or by furnishing materials or services.

Conservation measures include primarily: (1) Establishment of permanent protective cover, (2) improvement and protection of established vegetative cover, (3) conservation and disposal of water, (4) establishment of temporary vegetative cover, and (5) temporary protection of soil from wind and water erosion.

A program is developed for each State and county by the State and county agricultural stabilization and conservation committees, and representatives of the Soil Conservation Service and of the Forest Service. Representatives of the land-grant colleges, Farmers' Home Administration, State soil conservation committees, local soil conservation districts, the Agricultural Extension Service, and other State or Federal agricultural agencies are consulted. The program is administered by farmer-elected county and community committeemen. The Soil Conservation Service and Forest Service assume responsibility for the technical phases of permanent-type practices in their respective fields.

Loans from the Commodity Credit Corporation to the Secretary of Agriculture are used to make advances for the purchase of conservation materials or services from January 1 to June 30 of each year; repayment with interest is made during the current fiscal year from balances available from prior years' appropriations or in the succeeding fiscal year from the new funds appropriated. The status of the loan account is:

PROGRAM AND PERFORMANCE

The domestic agricultural marketing and distribution functions of the Department are concentrated primarily in the Agricultural Marketing Service. The marketing job has become more complex with growth and shift in populations, increased production, and as more and more functions have been transferred from the farm and home to various segments of the marketing system. The work under this appropriation on marketing research and service aimed at aiding in the orderly and efficient marketing and effective distribution of agricultural products from the Nation's farms to the consumers is organized on a functional basis.

1. *Marketing research and agricultural estimates*—(a) *Marketing research.*—This work is aimed at developing practical answers to problems encountered in moving products from the farm to the consumer. In cooperation with public and private agencies and trade groups efforts are made to find and develop wider markets, more efficient marketing facilities, and less costly handling methods.

Substantial progress in marketing research was made during 1955. In many cases, the results of this research could be measured in terms of significant dollar savings. Others, while not adapted to dollar measurement, provided valuable information for use in solving marketing problems.

The increase for 1957 will be used to find ways of increasing efficiencies in specific marketing operations in order to minimize the cost increases attached to the expanding scope of marketing operations.

(b) *Economic and statistical analysis.*—This work involves the collection, analysis, and interpretation of data affecting agricultural prices, farm income, the supply and consumption of farm products, trends in farm population, and changes in the level of living of farm people. The results of these studies are made available to farmers through research bulletins and Situation and Outlook reports disseminated by the Extension Service and farm organizations. Farmers and others rely on these reports in planning the most profitable adjustments in their operations and marketing programs.

The increase for 1957 is to meet the need and demand for more specialized economic and statistical analyses of short-run price changes, more detailed analysis of factors affecting demand, and studies on problems of low-income farm families.

(c) *Crop and livestock estimates.*—This service provides the official estimates on agriculture, including acreage, yield, and production of crops, stocks and value of farm commodities, number and production value of livestock items, and prices paid and received by farmers. These data also are basic to computation of parity prices. Data on approximately 150 crop and livestock products are covered in the more than 500 reports issued each year. The activity is conducted through 1 Territorial and 41 State offices, most of which are operated as joint State and Federal services. Cooperative arrangements permit the States to obtain a great deal of data which could not be collected or made available from Federal funds. During 1955, States expended an estimated $1 million on cooperative programs.

There are continuing and increasing demands from farmers and others for more crop reports in greater detail with wider coverage of production. The increase for 1957 is for use on potatoes, selected horticultural specialities, pig reports, cold storage stocks, and measuring the quality of the corn crop.

2. *Marketing services*—(a) *Market news service.*—This service provides current information on supply, movement, and prices at specific markets for practically all agricultural commodities. This day-to-day market information enables American farmers to determine where and when to sell and at what price. The information is collected and disseminated at year-round and seasonal offices maintained in more than 100 cities and towns, often with financial support and cooperation of the States. Every available means of dissemination is used—mail, press,

The increase for 1957 would be used primarily to place the poultry slaughter report on a service basis, expand reporting of fruit and vegetable truck movement, and step up transmission speed on part of the leased wire network.

(*b*) *Inspection, grading and classing, and standardization.*—Uniform standards of quality for agricultural products are established and applied to specific lots of produce to promote confidence between buyers and sellers; reduce hazards in marketing due to misunderstandings and disputes arising from the use of nonstandard descriptions; encourage better preparation of products for market; and furnish consumers with more definite information on the quality of products they buy. The standards are applied directly by or under the supervision of Federal employees at the request of any interested party, and generally for a fee. Approximately 77 percent of the total cost of the work under the project was offset by fees and other revenue in 1955.

The use of and demand for this service have been expanding. An increase is proposed for 1957 to strengthen the supervision of grain inspections and to provide for regular financing of tobacco inspection at four newly designated auction markets.

(*c*) *Freight rate services.*—Assistance is provided to farmers and others in obtaining and maintaining equitable and reasonable transportation rates and services on farm products and supplies. Rate adjustments effected in any 1 year range from reductions in rates on particular commodities between specified points to adjustments that cover the entire country on all commodities. The Department in 1955 participated in 69 formal litigation actions before the Interstate Commerce Commission and other regulatory bodies and carried on 55 informal negotiations with carriers and groups of carriers—an increase of about 14 percent over the number of cases in which the Department participated in 1954. The Department's participation is limited to actions that may affect many commodities, a large area of production or which might set an important precedent for the future.

(*d*) *Regulatory activities.*—These include the administration of regulatory laws, such as packers and stockyards, standard container, United States warehouse, and Federal seed, to assure fair play in the market place and protect producers and handlers of agricultural commodities from financial loss due to deceptive, careless, or fraudulent marketing practices.

The continued growth of facilities and means for storing, buying, and selling, results in more demand and need for protection and benefits of regulatory laws. The increase in 1957 is for extending benefits of the Packers and Stockyards Act to additional eligible stockyards and to step up the frequency of examinations of licensed warehouses.

|---|---|---|---|

| Cotton (millions—bales) | 11.8 | 12 | 12 |
| Average number of supervisory inspections per warehouse | 1.6 | 1.7 | 2.1 |

(*e*) *Administration and coordination of State payments.*—This covers the work of administering and coordinating the marketing service work performed by the States matched with funds provided by the appropriation "Payments to States, Territories, and possessions." In 1955, agreements were in effect with 36 States and 3 Territories.

(*f*) *Special mobilization planning.*—A limited amount of work, integrated with regular continuing functions, has been performed in carrying out the Department's defense mobilization functions assigned to Agricultural Marketing Service. This work would be expanded to assure planned readiness to deal appropriately with the food processing and distribution problems which would exist under emergency conditions.

PROGRAM AND PERFORMANCE

Payments are made on a matched fund basis to State and Territorial marketing agencies for projects aimed at getting into use, in the marketing of farm products, improved methods and practices developed in the expanded marketing research program.

This program covers projects such as methods of maintaining and improving the quality of products; ways of reducing marketing costs; and use of special local market information to move abundant supplies to the most profitable market. Through this cooperative approach, the Federal Government's leadership and funds are coupled with State resources and experience to aid in the solution of the most urgent local and area marketing problems.

States generally have been expanding their agricultural marketing programs. In 1956, 39 States and Territories are conducting about 100 projects under this program compared with 34 States and 78 projects in 1954.

The increase for 1957 is to provide additional matching funds for a further expansion of this work expected to be proposed by the States.

PROGRAM AND PERFORMANCE

Assistance, in the form of both funds and food, is provided to States and Territories for use in serving lunches to schoolchildren. Each State's portion of the total funds available is determined by means of a statutory formula which takes into account the number of school-age children in the State and the relationship between the per capita income of the State and the average United States per capita income.

The program is operated according to the terms of an agreement entered into by the State educational agency (which administers the program within the State) and the Department of Agriculture. Schools make application to the State agency and, if accepted for participation in the program, are reimbursed for a part of the food cost of each meal served.

In 1955, the States contributed to this program over $462 million, most of which came from payments by children. This was far in excess of the $86.8 million necessary to meet the statutory matching requirement of $1.50 for each Federal dollar of cash payment.

In addition to the cash assistance, this appropriation is also used to purchase food for distribution to the schools. This program also provides one of the major outlets for surplus commodities purchased under section 32 of the Agricultural Adjustment Act, as amended. Commodities acquired under the price-support program are also available to the school-lunch program under section 416 of the Agricultural Act of 1949, as amended. The volume of surplus commodities distributed to schools, however, is dependent upon market conditions and the need for the Federal Government to remove surpluses.

The program in 1955 provided lunches to nearly one-third of the approximately 35 million schoolchildren in the country. Participation in the program is expected to continue to grow in 1956 and 1957.

During 1955 about $405.9 million worth of agricultural commodities were used in school lunches. About 22 percent of this amount represented contributions from Federal surplus removal-price support programs.

Participation and financing of the program in the last 3 years has been:

PROGRAM AND PERFORMANCE

The Foreign Agricultural Service administers programs and policies relating to foreign agriculture. It provides information and assistance as guides in the planning of production and marketing of United States agricultural commodities and helps smooth the channels through which United States exports move.

Increases are proposed to intensify the analysis of factors affecting expansion of markets for United States agricultural products, and to expand studies of foreign competition.

1. *Analysis of foreign agriculture and trade.*—Analyses and interpretations are made of world trends in foreign agricultural production, trade, price, finance, marketing, consumption, competition, commercial and trade policies and economic policies of foreign governments, as such trends affect United States foreign agricultural trade and the domestic economy. The Service directs and coordinates Department participation in the formulation and development of trade programs and agreements to stabilize and expand world trade in American agricultural products, and to reduce restrictive tariff and trade practices against import of American agricultural commodities. Recommendations and positions for the Department on bilateral and multilateral trade agreements and international commodity agreements are formulated. Continuous review is made of the trade regulations and financial conditions of signatories to the General Agreement on Tariffs and Trade in American farm products. Policies, programs, positions, and standards of participation in public and private international organizations are developed.

2. *Agricultural attachés.*—A worldwide agricultural attaché program is conducted by the Department of Agriculture. Assistance is provided in development of markets abroad for United States agricultural commodities. A comprehensive schedule of foreign agricultural market and trade reporting to meet the needs of the American agricultural industry is maintained.

PROGRAM AND PERFORMANCE

Enforcement of the Commodity Exchange Act requires supervision over futures trading in 22 commodities on 17 exchanges to prevent price manipulation and corners and insure honesty and fair dealing. Wool was added to the act in fiscal year 1955 and onions in 1956. Transactions on contract markets were estimated at 8,385,000 in 1955, and the value of trading over $38 billion.

1. *Licensing.*—Commission merchants and floor brokers are registered annually. In 1955 there were 620 commission merchants and 883 floor brokers so registered. The estimates for 1957 are 625 and 875 respectively. Exchange rules and regulations are reviewed to insure that legal requirements are met.

2. *Supervision of futures trading.*—This embraces (*a*) examination and analysis of reports and other market data, the making of market position surveys, and publication of summary data; (*b*) establishment, review and enforcement of speculative limits; and (*c*) cooperative activities with control committees of contract markets. In 1955, position surveys covered 4,474 traders.

| Delivery notices | 27,735 | 30,000 | 30,000 |

3. *Audits.*—Misuse of customers' funds is prevented by (*a*) audit and examination of books of futures commission merchants; and (*b*) analysis of brokers' and traders' books and financial statements.

| Financial statements examined | 617 | 625 | 675 |

4. *Investigations.*—Apparent or alleged violations of the law and regulations are investigated, and trade practice surveys are made to discover violations and compile legal evidence. The Authority also prepares and presents evidence of violations in administrative hearings and judicial proceedings. In 1955 there were 30 compliance investigations completed and 2,638 transactions examined.

PROGRAM AND PERFORMANCE

Agricultural adjustment programs include acreage allotment and marketing quota programs designed to assist in stabilizing fluctuations in the supply, marketing, and price of specified basic agricultural commodities. Acreage allotments, when necessary, are established at National, State, and county levels (only at State level in the case of tobacco). In general, the acreage allotted to any county is apportioned by farmer-elected county committeemen. National marketing quotas must be proclaimed for basic commodities whenever the supply situation specified in basic legislation requires them. However, quotas do not become effective unless approved by two-thirds of those voting in a referendum of farmers producing the commodity for which a quota is proclaimed.

Acreage allotment and marketing quota programs have been announced for the 1956 crops of tobacco, peanuts, wheat, and cotton. Present indications are that acreage allotments and marketing quotas will be in effect on the 1956 crop of rice and acreage allotments on the 1956 crop of corn. The estimate assumes continuation of programs on the 1957 crops. Work in fiscal years 1956 and 1957 will consist primarily of the following:

PROGRAM AND PERFORMANCE

To provide consumers with adequate supplies of sugar at reasonable prices, to maintain and protect the domestic sugar industry and to promote the export trade of the United States, quotas are established for the five domestic sugar-producing areas, the Philippines, Cuba, and other foreign countries. In addition, the quota for each of the domestic areas is allotted to individual sellers when necessary to achieve orderly marketing, and restrictive farm acreage allotments are established for producers when necessary to avoid surpluses.

1. *Payments to sugar producers.*—Payments are made (*a*) to domestic producers of cane and beets who meet specified conditions of employment, production, and price; and (*b*) for abandonment of planted acreage and crop deficiencies on harvested acreages due to natural calamities.

2. *Operating expenses.*—These consist mainly of the expenses of (*a*) the Agricultural Stabilization and Conservation State and county offices in establishing production controls, determining compliance, and making payments to producers; and (*b*) of the Service's departmental work in determining sugar consumption requirements, establishing quotas and allotments, making fair wage and price determinations, establishing production controls where necessary, and formulating overall policies and procedures.

PROGRAM AND PERFORMANCE

Pursuant to specific legislation, the funds and facilities of the Commodity Credit Corporation have been utilized to carry out programs outside of its regular functions but involving the disposition of surplus commodities. In the past the Corporation has been reimbursed for costs in connection with these programs under a separate appropriation for each program. In order to simplify the estimates and present an overall picture of these programs, the amounts required for 1957 have been consolidated into a single budget estimate.

1. *International Wheat Agreement.*—This agreement operates to provide an assured market for wheat to exporting countries and assured supplies of wheat to importing countries, at stable and equitable prices.

Federal Reserve Bank of St. Louis

Capital funds of Commodity Credit Corporation are used to pay (*a*) the difference between the price specified in the agreement and the domestic market price of wheat, and (*b*) administrative and interest costs. The estimate, $101,130,155 (including interest through June 30, 1956), provides for reimbursing the Commodity Credit Corporation for costs incurred in 1955 when 131,491,407 bushels of wheat and wheat flour were exported under the agreement.

The following table shows, by major cost elements, Commodity Credit Corporation costs of International Wheat Agreement program operations from its inception:

| | *Fiscal year 1952–55 (fiscal year 1950–53 operations)* | *Fiscal year 1956 (fiscal year 1954 operations)* | *Fiscal year 1957 (fiscal year 1955 operations)* |
|---|---|---|---|
| Differential payments to commercial exporters | $386,042,355 | $51,640,495 | $96,867,689 |
| Due Commodity Credit Corporation for export of price support and supply stocks | 161,300,660 | 4,504,056 | 1,806,818 |
| Interest | 12,921,425 | 1,234,000 | 2,455,648 |
| Reimbursement by appropriation | 76,808,000 | 57,378,551 | 101,130,155 |
| Reimbursement by cancellation of notes | 483,456,440 | | |

It is estimated that 140 million bushels of wheat will be exported under this program during 1956 at a cost to the Corporation of $87,183,225. Reimbursement to Commodity Credit Corporation for these costs will be requested in the 1958 budget.

The International Wheat Agreement of 1953 expires July 31, 1956. Therefore, operations and costs in 1957 are dependent upon the terms of any agreement which may be entered into to cover this program after that date.

2. *Emergency famine relief to friendly peoples.*—The act of August 7, 1953, directed the Commodity Credit Corporation to make its stocks of agricultural commodities available to the President through March 15, 1954, for emergency assistance to friendly peoples in meeting famine or other urgent relief requirements. The act also authorized the appropriation of funds to reimburse the Corporation for such commodities including handling and delivery costs. Operations under this act have been completed and the Commodity Credit Corporation reimbursed therefor.

Title II of Public Law 480, approved July 10, 1954, directs the Commodity Credit Corporation to continue a program of this nature through June 30, 1957, and similarly authorizes the appropriation of not more than $300 million. The estimate, $88,628,927, makes such reimbursement for operations during 1955 (including interest through June 30, 1956). The cost to the Corporation for operations in 1956 and 1957 is estimated at $108,216,495 and $103,126,463, respectively. Appropriations will be requested for reimbursement of such costs in subsequent fiscal years.

3. *Sales of surplus agricultural commodities for foreign currencies.*—Title I of Public Law 480 authorizes the sale of surplus agricultural commodities for foreign currencies. Foreign currencies received from such sales may be used by departments and agencies for specific purposes enumerated in the act. When an agency uses these funds, for one of the purposes for which it has appropriated funds, it pays in dollars, from appropriated funds, an amount equivalent to the value of the currency used. Such dollars are used to reimburse Commodity Credit Corporation. The act also authorizes appropriations of not to exceed $1.5 billion to reimburse the Corporation for its unrecovered costs in carrying out this program. The estimate of $67,477,228 covers costs of operations during 1955 (including interest through June 30, 1956) amounting to $132,103,453 less $64,626,225 representing the dollar equivalent of various foreign currencies required to be deposited for agricultural commodities exported as of June 30, 1955. The net cost of operations in fiscal year 1956 is estimated to be $743,072,925 and in 1957, $524,093,750 after application of estimated receipts of dollars for foreign currencies amounting to $10 million and $25 million during 1956 and 1957, respectively. Appropriations will be requested for reimbursement of such costs in subsequent years.

4. *Transfer of hay and pasture seeds.*—The act of July 26, 1954, provided for the transfer of hay and pasture seed acquired by the Commodity Credit Corporation under the price-support program to the Forest Service, and to the Fish and Wildlife Service and the Bureau of Land Management, Department of the Interior, and authorized the appropriation of funds to reimburse the Commodity Credit Corporation for its investment in the seeds transferred. The estimate covers reimbursement for operations during fiscal year 1955 in the amount of $184,678 (including interest through June 30, 1956). No further activity is contemplated under this program.

Following is a summary of Commodity Credit Corporation expenses and receipts under these programs:

PROGRAM AND PERFORMANCE

The Administration conducts two major programs: (*a*) The rural electrification program, to provide electric service to farms and other rural establishments; and (*b*) the rural telephone program, to furnish and improve telephone service in rural areas.

It is expected that electrification and telephone loans will continue at about the same level in 1957.

1. *Rural electrification.*—To provide electric service in rural areas, loans are made at 2 percent interest which must be repaid within 35 years. Loans are also made for shorter periods at 2 percent interest to electrification borrowers to be reloaned to their consumers for wiring and for the installation of electrical and plumbing appliances and equipment. Funds for making loans are borrowed from the Secretary of the Treasury.

When the rural electrification program was initiated in 1935, less than 11 percent of all farms had electric service. On June 30, 1955, about 93 percent of the farms were electrified.

| Number of borrowers | 1,077 | 1,078 | 1,079 |

2. *Rural telephone.*—Loans are made for the purpose of financing the improvement, expansion, construction, acquisition, and operation of the telephone systems in rural areas. The loans bear 2 percent interest and must be repaid within 35 years. Funds for making loans are borrowed from the Secretary of the Treasury.

The 1950 census showed 38.2 percent of all farms with telephone, fewer in both number and percentage than in 1920. Cumulative Rural Electrification Administration loans through June 30, 1955, will provide initial or improved service to an estimated 516,000 rural subscribers.

PROGRAM AND PERFORMANCE

Borrowers are encouraged to develop their systems on an area coverage basis to make central station electric and economical telephone service available to all farms. Loan applications are studied to assure that the project is self-liquidating and will adequately meet the needs of the rural consumers.

When applications are received from existing companies, the quality of business management is appraised. Business management consultation is furnished where needed to protect the Government's loan security, and new borrowers are given technical help in establishing the necessary accounting systems to meet requirements of regulatory bodies. The borrowers are required to have their records audited by public accounting firms and, as accounting and other financial management problems affecting loan security are revealed by the audit, the administration works with borrowers toward improvement of their operations. Standards are developed for the design and construction of facilities at minimum cost; engineering studies are carried on to solve complex technical problems; and engineering review of designs and physical facilities is provided to assure that construction conforms to approved standards and is adequate to provide continuous and reliable service.

PROGRAM AND PERFORMANCE

For the benefit of farmers unable to secure credit from other sources at reasonable rates, the Administration makes (*a*) direct loans and insured loans for the purchase, enlargement, or development of family-size farms; (*b*) direct loans for farm housing; (*c*) direct loans for farm operating expenses; and (*d*) direct loans and insured loans for water facilities and soil conservation purposes.

The total borrowing authorization requested for loans amounts to $164.5 million representing a net decrease of $3.5 million below the current year's authorization. This change consists of a decrease of $6 million for soil and water conservation loans and an increase of $2.5 million for production and subsistence loans.

1. *Farm ownership loans.*—Direct farm ownership loans are made to tenants, sharecroppers, farm laborers, owners of inadequate farms, and eligible veterans for the purchase or improvement, including farm housing and other building construction, of family-type farms. These may be made up to the full normal value of the farm at 4½ percent interest up to 40 years. Loans for the same purposes are also made with funds advanced by private lenders. These loans are insured by the Government and are made in amounts up to 90 percent of the normal farm value up to 40 years at 3½ percent interest, plus one-half of 1 percent as an insurance premium and one-half of 1 percent as an administrative expense charge. The Administration services these insured loans, makes collections, and pays the lender.

PROGRAM AND PERFORMANCE

County supervisors assisted by area supervisors, and in a few of the larger workload States by appraisers and engineers working on a statewide basis, review loan applications, secure the approval of the county committee, and make loans within specified limits. Loans above such limits are approved by State office representatives. County office personnel collect and service outstanding loans.

Supplemental appropriations for later transmission appear at the end of this chapter to cover administrative costs for (*a*) farm-housing loans in 1956, and (*b*) loans to part-time and low-income farmers in 1957.

PROGRAM AND PERFORMANCE

The Office performs all legal work arising from the activities of the Department and represents the Department in proceedings in connection with the administration of regulatory laws of the Department. The Office assists the Department of Justice by preparing briefs for and participating in the trial of cases in court.

1. *Agricultural credit and conservation.*—Legal services are provided the Farmers Home Administration for its various loan programs, for the electrification and telephone loan programs of the Rural Electrification Administration, and for the Forest Service and Soil Conservation Service. This work includes the review and legal approval of loan and security documents; review and legal approval of borrowers' contracts, titles, easements, franchises, and rights-of-way. It involves participation in litigation before State regulatory bodies and in the courts; legal and abstracting services in connection with the acquisition and exchange of lands; operation and management of the national forests, soil conservation districts, and other public lands; and flood prevention.

A supplemental appropriation of $38,500 will be required for 1957 to meet costs of legal work occasioned by a proposed program to aid part-time and low-income farmers.

2. *Commodity credit, production, and adjustment programs.*—Legal services are provided for price support activities, domestic and foreign procurement, disposal of agricultural surpluses, national school-lunch program, agricultural conservation, farm-marketing quotas crop insurance, sugar programs, claims settlement and adjustment,

PROGRAM AND PERFORMANCE

The Office provides the overall planning, coordination, and administration of the Department's programs, and also supplies certain services on a departmentwide basis. In addition to general administration by the Secretary, the Under Secretary, the Assistant Secretaries, and their staffs, activities are:

2. *Personnel administration and service.*—Departmentwide supervision, leadership, and coordination are provided for the personnel management program. Departmental policies and procedures are promulgated. Authority for carrying out the operational phases of the personnel management program have been substantially delegated to the agencies. A systematic and periodic review is conducted to insure unification of the personnel

management program and to measure its effectiveness and how well it serves the agencies' personnel management requirements.

3. *Budgetary and financial administration and service.*—Departmentwide supervision, leadership, and coordination are provided in the fields of budgetary, fiscal, property, and supply management, and in related activities of the Department. Departmental policies and procedures are formulated and promulgated, programs and legislative proposals are reviewed and evaluated for budgetary, financial, and related implications; and improvements are fostered in the management and operation of work programs administered by the Department.

4. *General operations.*—Departmentwide supervision, leadership, and coordination are provided in the fields of real property and records management; departmental policies and procedures therefor are formulated and promulgated; administrative services and budgetary functions for the Office of the Secretary, departmental service operations in the District of Columbia, including the Department's post office, telephone switchboard, telegraph office, reproduction and supply services, and motor transport service are provided.

5. *Regulatory hearings and decisions.*—The hearing examiners hold hearings in connection with the prescribing of new regulations and orders and on disciplinary complaints filed by the Department or on petitions filed by private parties asking relief from some action of the Department. Final administrative decisions in regulatory proceedings are rendered by the judicial officer. "Agriculture Decisions" is published monthly.

6. *National Agricultural Advisory Commission.*—Provision is made for the payment of necessary expenses incident to periodic meetings of the National Agricultural Advisory Commission.

PROGRAM AND PERFORMANCE

The Office has responsibility for directing, integrating and coordinating the information work of the entire Department. Its major objective is to report to farmers, to other specially affected groups and to the public generally regarding the research, action, regulatory and other programs. The Department uses all media of information in disseminating reports of its work in order that the greatest number of farmers and others may obtain this information through the usual channels to which they are accustomed.

The information work of the Department is carried on in closest cooperation with the land-grant colleges, with the Department largely preparing the informational materials which the colleges adapt and distribute.

The Department also carries on information activities in cooperation with private industries which serve agriculture.

The workload of the Office is dependent to a large extent upon the demands from the Department programs, from direct requests for information, and upon legislative requirements.

1. *Publications, review and distribution.*—Publications include farmers' bulletins, leaflets, periodicals, scientific, research and marketing publications, and agricultural statistics.

2. *Review and distribution of current agricultural information.*—The Department's activities require the issuance of about 3,300 periodic crop, price, and market reports and press releases annually. Special information is furnished to national magazines, encyclopedic annuals, and trade publications. Digests, newsletters, and other services are made available to press associations, daily newspapers, and farm publications. Part 2 of the Secretary's annual report, known as the Yearbook of Agriculture, is published by the Office and distributed by Members of Congress. Radio is used to reach farmers locally and to broadcast regular weekly programs on major networks. Television package programs are prepared for use of land-grant colleges and television farm broadcasters.

3. *Review, preparation, and distribution of visual agricultural information.*—Motion pictures for the Department and private industries which serve agriculture are produced on a reimbursable basis and distributed through 74 cooperating State film libraries. Still photographs, illustrations, and graphics are similarly produced. Exhibits are produced and supplied to State extension workers for their use in State exhibit showings.

PROGRAM AND PERFORMANCE

The Library, serving as the National Agricultural Library, procures, preserves, and makes available books, periodicals, and published materials on agriculture. Its collection consists of most of the important publications of the world covering the field of agriculture and its related sciences. It is organized into a main office in Washington and six specialized branches for major field research installations. Various State agencies provide library services to Department employees in designated geographical areas under cooperative agreement.

During fiscal year 1955 about 35,450 volumes were added to the collection of approximately 1,050,000 volumes on agriculture and related sciences. In addition, about 272,500 separate issues of periodicals were recorded. Materials are procured by purchases, gifts and exchanges. During 1955, 1,262,092 loans of books and periodicals (including photocopies in lieu of loans) were made, and 163,931 reference questions were answered. The Bibliography of Agriculture was issued monthly with a total of 100,698 items listed.

Special bibliographies for research purposes were furnished to major segments of the Department's research program. Highly specialized library service was furnished through branch libraries to the Department's utilization research branches. Estimated obligations for general library services and specialized services for research are:

| | *1955* | *1956* | *1957* |
|---|---|---|---|
| General library services | $525,860 | $463,150 | $522,175 |

PROGRAM AND PERFORMANCE

1. *Development and improvement of a ranger dwelling, Tonto National Forest.*—Funds from the sale of certain ranger station buildings and appurtenant facilities on the Tonto National Forest are being used for a new ranger dwelling (68 Stat. 253).

2. *Forest fire prevention.*—Fees for the use of the character "Smokey Bear" by private enterprises are collected under regulations promulgated by the Secretary and are available for furthering the nationwide forest fire prevention campaign (66 Stat. 92).

3. *Payment to Minnesota.*—At the close of each fiscal year the State of Minnesota is paid three-fourths of 1 percent of the appraised value of certain Superior National Forest lands in the counties of Cook, Lake, and Saint Louis for distribution to these counties (16 U. S. C. 577g).

4. *Payments due counties, submarginal land program.*—Of the revenues received from the use of submarginal lands, 25 percent is paid to the counties in which such land is situated, for school and road purposes (7 U. S. C. 1021).

5. *Payments to school funds, Arizona and New Mexico.*—The States of Arizona and New Mexico are paid a share of the national-forest receipts for school purposes (36 Stat. 562, 573).

6. *Payments to States and Territories.*—With minor exceptions, 25 percent of the money received from the national forests is paid to the States and Territories for public schools and roads of the county in which such forests are situated (16 U. S. C. 500).

PROGRAM AND PERFORMANCE

License fees are deposited in this special fund and used to meet the cost of administering the Perishable Agricultural Commodities, Produce Agency, and Export Apple and Pear Acts (7 U. S. C. 499a–499s, 491–497, 581–589).

These acts assure equitable treatment to farmers and others in the marketing of fresh and frozen fruits and vegetables. Commission merchants, dealers, and brokers handling these products in interstate and foreign commerce are licensed. Complaints of violations are investigated and violations dealt with by (1) informal settlements agreeable to both parties, (2) formal decisions involving payments of reparation awards between parties, and (3) suspension or revocation of license and/or publication of the facts. About 26,900 licenses are now in effect. This represents an average increase of about 600 in each of the past 4 years. This trend is expected to continue at a slightly accelerated rate. Complaints continue to be received at a fairly constant rate—about 2,400 annually. Efforts are being concentrated on prompt handling of all cases.

PROGRAM AND PERFORMANCE

Under section 32 of the Act of August 24, 1935, as amended (7 U. S. C. 612c), an amount equal to 30 percent of customs receipts during each calendar year plus unused balances up to $300 million are available for encouraging exportation and domestic consumption of agricultural products. These funds are also authorized for administering marketing agreements and orders and the section 22 import control programs. From time to time, special laws have been enacted which affect the use of these funds. A maximum of $15 million of section 32 funds can be used during each of the fiscal years 1956 and 1957 for the purchase and donation of wheat flour and cornmeal to needy persons. An amount equal to 30 percent of receipts collected for fishery products is transferred to the Department of the Interior to encourage distribution of fishery products and for other purposes.

The basic legislation provides that not more than 25 percent of funds available shall be used for any one commodity or product thereof. It also provides that section 32 funds shall be devoted principally to perishable agricultural commodities, other than those receiving price support under title II of the Agricultural Act of 1949, as amended. These title II commodities are tung nuts, honey, milk, butterfat and the products of milk and butterfat. In 1955, perishable commodity expenses represented 53 percent of total funds used and 65 percent of total commodity program costs. Funds are budgeted for two principal categories—commodity program costs and operating expenses.

Commodity program costs incident to the removal of surplus agricultural commodities from the normal channels of trade include: (1) *Direct purchases*, which are donated to the school lunch program, charitable institutions serving needy persons, and persons certified by welfare agencies as eligible for relief; (2) *Export payments*, so surplus commodities can be purchased by exporters on the domestic market and sold by them on the world market at competitive prices; and (3) *Diversion payments* to processors, so surplus commodities can be purchased at current market prices diverted to byproducts and new uses and sold at prices comparable to competing products in order to stimulate the creation of new markets for surplus commodities.

The use of section 32 program funds is contingent upon economic conditions, the type of program being dependent upon the action which will best solve the particular need at the time.

Operating expenses consist of: (4) *Surplus removal operating expenses*. These are mainly expenses of purchasing, distributing, exporting, and diverting surplus commodities. Supervisory assistance is furnished local and State groups

*Removal of Surplus Agricultural Commodities*—Continued

to encourage the preservation of local surpluses for year-round use; increasing emphasis is being placed on a cooperative effort with food producers and distributors to increase sales of plentiful foods. In 1955, the monthly abundant food list contained an average of 15 foods; and 6 national and 14 area, State, and local food drives were conducted; (5) *Marketing agreements and orders.*—Voluntary arrangements between the Secretary and handlers of farm products are put into effect, upon request from the industry and after hearings, investigations, and referenda among producers, to strengthen prices by establishing and maintaining orderly marketing conditions. Administration of the program at the local level is financed by assessments upon handlers. On June 30, 1955, 58 orders were in effect for milk, 1 for shade-grown tobacco, and 30 covering tree fruits, tree nuts, and vegetables. This program is expanding principally on milk; (6) *Foreign market promotion.*—Maintenance and expansion of foreign markets for United States surplus agricultural products are promoted by (*a*) obtaining and analyzing information on foreign-market requirements and making such information available to farm and trade groups; (*b*) developing market programs for use by producers, exporters, and Government officials to maintain and expand the market abroad of United States farm products; and (*c*) assisting domestic trade representatives in negotiations with foreign government officials, importers, and consumers, and bringing together American exporters and foreign importers under conditions favorable to trade; and (7) *Import controls.*—Importation of articles which interfere with programs carried out by the Department of Agriculture is investigated and recommendation for action is submitted to the President. Import controls are administered. During 1955, preliminary investigations were conducted on 23 commodities, resulting in the application or modification of import restrictions. A total of 2,284 licenses for imports of cheese were issued and 74 for manufactured dairy products other than cheese.

PROGRAM AND PERFORMANCE

The National Wool Act of 1954 declares it to be the policy of the Congress, in promotion of the national security and the general economic welfare, to encourage the annual production of 300 million pounds of shorn wool. This is to be accomplished through incentive payments made to producers by the Commodity Credit Corporation.

In the fiscal years 1956 and 1957 it is estimated that incentive payments will be made on 293 million pounds of wool at an average rate of 19.1 cents per pound, or a total of $56 million in each year. Program and interest expenses in 1956 and 1957 are shown in the table below.

Section 705 of the National Wool Act appropriates funds to reimburse the Corporation for costs of the program during the preceding fiscal year as well as for any unreimbursed costs incurred in prior years. The latter provision was made because annual appropriations are limited to an amount equal to 70 percent of duties collected on wool during the calendar year preceding the beginning of each fiscal year. Reimbursements to the Corporation pursuant to this authority in 1956 and 1957 are also shown in the table below. The appropriation estimate for 1957 assumes that duties collected during the calendar year 1955 will be the same as for 1954. The unrecovered balance will remain on the books of the Corporation as a receivable until subsequent appropriations become available. At the current rate of duties collected, it is anticipated that full reimbursement for costs during the fiscal year 1956 will not be effected until appropriations for the fiscal year 1959 become available.

Following is a summary of Commodity Credit Corporation expenses and receipts under this program:

[1] Sales under the price support program include sales of agricultural commodities under barter contracts and sales of strategic materials and other commodities acquired under such barter contracts in lieu of cash payments. In addition, included in sales are (1) sales to processors under contracts providing that the Corporation will repurchase the commodities in another form, (2) sales of cottonseed products to crushers which were made simultaneously with the purchase of such products and without physical delivery to or by the Corporation, and (3) sales of wheat which are required to be offset by purchase of wheat for the purpose of rotating or reconcentrating stocks.

[2] Minus figures result from adjustment to sales to eliminate the market value of agricultural commodities transferred from the price support program.

The Commodity Credit Corporation engages in buying, selling, lending, and other activities with respect to agricultural commodities, their products, food, feeds and fibers, for the purpose of stabilizing, supporting, and protecting farm income and prices; assisting in the maintenance of balanced and adequate supplies of such commodities; and facilitating their orderly distribution. The Corporation also makes available materials and facilities required in connection with the production and marketing of such commodities.[1]

The Corporation has an authorized capital stock of $100 million held by the United States, and authority to borrow up to $12 billion.

PROGRAMS

The budget is based on five types of programs: (1) price support, (2) supply and foreign purchase, (3) storage facilities, (4) commodity export, and (5) special activities.

Obligations and expenditures for these programs include primarily loans, purchases, purchase agreements, carrying charges, incentive payments, operating and interest expenses, and advances and current obligations incident to special activities as authorized by specific legislation.

*Budget assumptions.*—The Corporation's budget estimates for 1956 and 1957 are based on the general assumptions (*a*) that employment, production, and national income will rise moderately both in 1956 and 1957 from the

[1] A more detailed statement describing the creation, purposes, authorities, management, and financial structure of the Corporation is contained in the budget of the United States, 1948, as supplemented by subsequent budgets.

1955 level; (*b*) that prices will change little, on the average, from the present level; (*c*) that developments in international relations will not be such as to affect Government civilian programs generally; (*d*) that exports of agricultural products will be higher than at present; (*e*) that yields will be in line with recent averages; and (*f*) that acreage allotments and marketing quotas will be in effect for the 1956 crops of peanuts, rice, certain kinds of tobacco, wheat and cotton, and acreage allotments will be in effect for the 1956 crop of corn in accordance with existing legislation.

In considering these estimates, it should be recognized that it is difficult to estimate requirements for the year ending June 30, 1957. They are dependent upon weather conditions, volume of agricultural production in this country and abroad, economic conditions generally, food needs in occupied areas and other foreign countries, availability of dollar exchange, and other complex and unpredictable factors.

*Price support.*—Price-support operations are carried out under the Corporation's charter powers, in conformity with the Agricultural Act of 1949 (63 Stat. 1051), the Agricultural Act of 1954 (68 Stat. 897), which includes the National Wool Act of 1954, and with respect to certain types of tobacco, in conformity with the act of July 28, 1945 (59 Stat. 506). Under the Agricultural Act of 1949, price support is mandatory for six basic commodities—corn, cotton, wheat, rice, peanuts, and tobacco—and specific nonbasic commodities, namely tung nuts, honey, milk, butterfat, and the products of milk and butterfat. Price support for wool and mohair is mandatory under the National Wool Act of 1954. Price support for other nonbasic agricultural commodities is discretionary. This program may also include operations to remove and dispose of or aid in the removal or disposition of surplus agricultural commodities for the purpose of stabilizing prices at levels not in excess of permissable price support levels.

Price support is made available through loans, purchase agreements, purchases, and other operations, and, in the case of wool and mohair, through incentive payments based on marketings. The producer's commodities serve as collateral for price-support loans. With limited exceptions, price-support loans are "nonrecourse" and the Corporation looks only to the pledged or mortgaged collateral for satisfaction of the loan. Purchase agreements generally are available during the same period that loans are available. By signing a purchase agreement, a producer receives an option to sell to the Corporation any quantity of the commodity which he may elect within the maximum specified in the agreement.

In all its price-support operations the Corporation utilizes normal trade facilities to the maximum extent practicable. In its lending activities the Corporation uses local banks, cooperatives, and other private lending agencies. Commercial storage facilities are used to a great extent in the storage of loan collateral and in the storage of stocks acquired by the Corporation.

Disposition of commodities acquired by the Corporation in its price-support operations is made in compliance with sections 202, 407, and 416 of the Agricultural Act of 1949, and other applicable legislation, particularly the Agricultural Trade Development and Assistance Act of 1954 (68 Stat. 454), and title I of the Agricultural Act of 1954 (68 Stat. 897).

*Supply and foreign purchase program.*—This program is carried out under the authority contained in the Corporation's charter, particularly sections 5 (b) and (c) thereof. The Corporation procures foods, agricultural commodities, their products, and related materials to supply the requirements of Government agencies, foreign governments, and relief and rehabilitation agencies and to meet domestic requirements. Foods, agricultural commodities, and their products are procured or aid is given in their procurement to facilitate distribution or to meet anticipated requirements during periods of short supply. The Corporation may also, through purchases, loans, or other means, make available materials and facilities required in connection with the production and marketing of agricultural commodities.

Operations involving procurement for other Government agencies are conducted in accordance with procedures and policies reasonably calculated to assure compliance with section 4 of the act of July 16, 1943 (15 U. S. C. 713a–9), which requires that the Corporation be fully reimbursed for services performed, losses sustained, operating costs incurred, or commodities purchased or delivered to or on behalf of any other Government agency from the appropriate funds of such agency. Operations not subject to section 4 of such act may involve losses if such are necessary to the accomplishment of the objects of the particular operation.

The main activities now carried on are procurement of commodities for the International Cooperation Administration, and initial financing of certain programs authorized under the Defense Production Act to assure adequate supplies of strategic and critical materials.

*Storage facilities program.*—This program is carried out under the authority contained in the Corporation's charter, particularly sections 4 (h), 4 (m), and 5 (a). The Corporation (*a*) purchases and maintains granaries and equipment for care and storage of grain owned or controlled by the Corporation; (*b*) makes loans for the construction or expansion of farm storage facilities; (*c*) provides storage-use guaranties to encourage the construction of commercial storage facilities; and (*d*) undertakes other operations necessary to provide storage adequate to carry out the Corporation's programs.

*Commodity export program.*—The Corporation stimulates the export of agricultural commodities and products through sales, barters, payments, and other operations. This program is carried out under the authority contained in the Corporation's charter, particularly sections 5 (d) and 5 (f), sections 407 and 416 of the Agricultural Act of 1949, the International Wheat Agreement Act of 1949, the

Agricultural Trade Development and Assistance Act of 1954, and title I of the Agricultural Act of 1954. In general, transactions involving foreign currencies are conducted pursuant to the Agricultural Trade Development and Assistance Act of 1954. However, other such transactions may be conducted under the charter authority.

Current obligations under the International Wheat Agreement and title I of the Agricultural Trade Development and Assistance Act of 1954, which operations are described in the estimates under the heading "Reimbursements to Commodity Credit Corporation," are paid by the Corporation. Appropriations have been authorized to reimburse the Corporation for its costs incident to these programs; pending such reimbursements the net costs of these programs are reflected in the records of the Corporation as accounts receivable.

In addition to exports under the International Wheat Agreement, wheat is being offered to the export trade for export as wheat or flour at competitive prices below domestic price but not below the applicable International Wheat Agreement price.

To the extent that operations under the commodity export program involve the disposal of price-support commodities held in Commodity Credit Corporation's inventories, such disposals are for accounting purposes treated as price-support program disposals.

*Special activities.*—These are miscellaneous activities carried out under authority of section 5 (g) of the Corporation's charter and specific statutory authorizations with respect thereto which are currently in effect or which may be subsequently enacted.

Illustrative of current activities of this nature are loans to the Secretary of Agriculture in connection with the agricultural conservation program as authorized by section 391 (c) of the Agricultural Adjustment Act of 1938, as amended (7 U. S. C. 1391); and advances to the Agricultural Marketing Service for grading tobacco and classing cotton as authorized by the acts of June 29, 1949, and August 31, 1951 (7 U. S. C. 440, 414a).

Current obligations for these activities are paid by the Corporation and appropriations have been authorized to reimburse the Corporation for its costs. Pending such reimbursements the net costs of these programs are reflected in the records of the Corporation as accounts receivable.

A more detailed description of the operations under these miscellaneous programs may be found in the budget under appropriations pertaining to the Agricultural Conservation Program Service, the Agricultural Research Service, the Agricultural Marketing Service, and the Commodity Stabilization Service, respectively.

*Expenses.*—There are a number of expenses which are not allocated to a specific program. These include interest on the capital stock of the Corporation and on borrowings from Treasury, administrative expenses, and other miscellaneous costs, including expenses of the agricultural stabilization and conservation county committees, lending agencies, and Federal Reserve banks in connection with the Corporation's programs.

Administrative expenses are for the operating staff, including the services of employees of the Commodity Stabilization Service engaged in Commodity Credit Corporation activities, services performed by other agencies of the Department, costs of audit, and payments to the General Services Administration for space in the District of Columbia.

Expenses in connection with the acquisition, operation, maintenance, improvement, or disposition (including inspection, classing and grading work performed on a fee basis by Federal employees or Federal- or State-licensed inspectors) of property which the Corporation owns or in which it has an interest have been treated as program rather than administrative expenses since 1951.

Similarly, expenses of other Federal agencies whose services are utilized in the handling of Commodity Credit Corporation property are treated as program expenses. Such expenses would include the fleet storage operations of the Maritime Administration conducted intermittently since 1949 and the services rendered by the General Services Administration in connection with the strategic, critical, and other materials acquired by the Corporation.

The requested authorization excludes expenses in connection with the supply and foreign purchase program and the wool and mohair price-support program under the National Wool Act of 1954; the budget for 1957 contemplates full reimbursement for these expenses. Such reimbursements in connection with the supply and foreign purchase program will be obtained and used in 1957 in the same manner as in 1955 and 1956. Reimbursement for administrative expenses, as well as program expenses under the wool and mohair program will be obtained from appropriations made by the National Wool Act of 1954.

Estimates for 1957 include a limitation of $31 million for costs of administration exclusive of reimbursements for services performed but including a reserve of $1,860,000 for contingencies. Because of the increasing price-support workload during the current year, present indications are that the 1956 limitation of $26 million will be insufficient. As a result, a supplemental estimate to increase this limitation will be submitted early in this session of Congress.

#### FINANCING

The programs of the Commodity Credit Corporation are financed by capital stock, borrowings from the Treasury, guaranties to purchase loans held by lending agencies, restoration of capital impairment, and receipts from operations.

*Borrowing authority.*—On the basis of the budgetary assumptions heretofore described and consequent estimated program requirements, no additional borrowing authority is expected to be needed for 1957. On June 30, 1957, statutory borrowing authority in use—consisting of borrowings from the Treasury and guaranties to purchase loans held by lending agencies—is estimated to be $11.2 billion, leaving a margin of $0.8 billion available for additional commitments.

In connection with loan guaranties, the Corporation reserves a sufficient amount of its borrowing authority to purchase at any time all loans and other obligations held by lending agencies. During the fiscal year 1955 the Corporation continued its certificate-of-interest method of financing current crop loans on cotton. In addition, it also continued issuing certificates of interest against any commodity loans held by the Corporation. The budget estimate anticipates that this plan will continue in effect

during each of the fiscal years 1956 and 1957. Although this method of financing has no effect on obligations against the Corporation's borrowing authority, it postpones a portion of the actual cash expenditures of Federal funds until subsequent fiscal years.

Funds may also be borrowed from private lending agencies when the Corporation desires to utilize such agencies in carrying out a particular operation. All borrowing agreements with private lending agencies are subject to approval by the Secretary of the Treasury.

Interest on borrowings from the Treasury (and on capital stock) is paid in accordance with a policy of the Treasury Department that the rate shall be based upon the average interest rate on all outstanding marketable obligations (of comparable maturity date) of the United States as of the end of the preceding month.

*Restoration of capital impairment.*—Pursuant to the act of March 8, 1938, as amended (15 U. S. C. 713a–1, 68 Stat. 30), an appraisal of the assets and liabilities of the Corporation is made each year by the Secretary of the Treasury to determine net worth. If the net worth is less than $100 million, the Secretary of the Treasury restores the amount of capital impairment; if net worth is more than $100 million the Corporation pays the surplus to the Treasury (15 U. S. C. 713a–2). The appraisal of assets is on the basis of cost to the Corporation—in effect, realized losses. The realized losses reflected on the books of the Corporation for 1955 were $929,870,140. Of this amount, $582,962 consisted of losses in connection with the 1953 emergency feed program for which the Corporation received reimbursement after June 30, 1955, from a specific appropriation made for this purpose. The balance, $929,287,178, represents the capital impairment for which restoration is included in the 1957 estimates.

*Receipts from operations.*—These include proceeds from sales of commodities, loan repayments, interest income, reimbursements for special activities financed by the Corporation and miscellaneous income, refunds, and collections.

*Loan and inventory operations and realized losses.*—Schedule 1 shows for 1955, 1956, and 1957 the actual and estimated loan and inventory operations and realized losses, by commodities and programs.

[1] Sales under the price support program include sales of agricultural commodities under barter contracts and sales of strategic materials and other commodities acquired under such barter contracts in lieu of cash payments. In addition, included in sales are (1) sales to processors under contracts providing that the Corporation will repurchase the commodities in another form, (2) sales of cottonseed products to crushers which were made simultaneously with the purchase of such products and without physical delivery to or by the Corporation, and (3) sales of wheat which are required to be offset by purchase of wheat for the purpose of rotating or reconcentrating stocks.

[2] Operation and maintenance costs applicable to owned storage structures are reflected as carrying charges on the commodities stored.

[3] Public Law 40 (84th Cong.) provides for reimbursement as of July 1, 1955, of current and prior year losses under this program.

[4] Adjustment to eliminate the market value of agricultural commodities transferred from the price support program to the commodity export program and emergency feed program.

[5] Amounts recovered or to be recovered from appropriations for special activities authorized by the Congress are not reflected as losses.

## LIMITATION ON ADMINISTRATIVE EXPENSES

### Administrative Expenses, Commodity Credit Corporation

Nothing in this Act shall be so construed as to prevent the Commodity Credit Corporation from carrying out any activity or any program authorized by law: *Provided*, That not to exceed [$26,000,000] *$31,000,000* shall be available for administrative expenses of the Corporation *including uniforms, or allowances therefor, as authorized by the Act of September 1, 1954 (5 U. S. C. 2131), as amended* [*Provided further*, That $1,000,000 of this authorization shall be available only to expand and strengthen the sales program of the Corporation pursuant to authority contained in the Corporation's charter]: *Provided further*, That [$934,914] *not less than 6 per centum* of this authorization shall be placed in reserve to be apportioned pursuant to section 3679 of the Revised Statutes, as amended, for use only in such amounts and at such time as may become necessary to carry out program operations: *Provided further*, That all necessary expenses (including legal and special services performed on a contract or fee basis, but not including other personal services) in connection with the acquisition, operation, maintenance, improvement, or disposition of any real or personal property belonging to the Corporation or in which it has an interest, including expenses of collections of pledged collateral, shall be considered as nonadministrative expenses for the purposes hereof.

[For the purpose of assisting the Commodity Credit Corporation in selling its agricultural commodities, the position of sales manager is hereby authorized in grade 17 of the General Schedule of the Classification Act of 1949, as amended, in accordance with the standards and procedures of that Act.] (*7 U. [1] Sales under the price-support program include sales of agricultural commodities under barter contracts and sales of strategic and critical materials and other commodities acquired under such barter contracts in lieu of cash payments. In addition, included in sales are (1) sales to processors under contracts providing that the Corporation will repurchase the commodities in another form, (2) sales of cottonseed products to crushers which were made simultaneously with the purchase of such products and without physical delivery to or by the Corporation, and (3) sales of wheat which are required to be offset by purchase of wheat for the purpose of rotating or reconcentrating stocks.

[2] Includes balance of set-aside of commodities as provided in the Agricultural Act of 1954, as follows:

[1] Sales under the price support program include sales of agricultural commodities under barter contracts and sales of strategic and critical materials and other commodities acquired under such barter contracts in lieu of cash payments. In addition, included in sales are (1) sales to processors under contracts providing that the Corporation will repurchase the commodities in another form, (2) sales of cottonseed products to crushers which were made simultaneously with the purchase of such products and without physical delivery to or by the Corporation, and (3) sales of wheat which are required to be offset by purchase of wheat for the purpose of rotating or reconcentrating stocks.

[1] Sales under the price support program include sales of agricultural commodities under barter contracts and sales of strategic and critical materials and other commodities acquired under such barter contracts in lieu of cash payments. In addition, included in sales are (1) sales to processors under contracts providing that the Corporation will repurchase the commodities in another form, (2) sales of cottonseed products to crushers which were made simultaneously with the purchase of such products and without physical delivery to or by the Corporation, and (3) sales of wheat which are required to be offset by purchase of wheat for the purpose of rotating or reconcentrating stocks.

The Federal Crop Insurance Corporation provides all-risk protection for the farmer's investment in producing crops against loss from unavoidable causes. Insurance programs are conducted on a limited basis to develop the experience necessary for the operation of a sound all-risk crop insurance plan on a national basis.

Capital stock of $100 million is authorized to be subscribed by the United States. The Secretary of the Treasury holds receipts for $27 million of authorized stock, leaving $73 million unissued.

#### BUDGET PROGRAM

Since 1948, the Corporation's policy has been to offer crop insurance to farmers on an experimental basis in selected counties on selected crops. The following table highlights the insurance program for fiscal years shown:

| | *Fiscal year 1955 (crop year 1954) actual* | *Fiscal year 1956 (crop year 1955) estimate* | *Fiscal year 1957 (crop year 1956) estimate* |

| Number of contracts in force | 346,887 | 323,343 | 400,000 |
| Number of farmers insured | 369,700 | 356,808 | 433,400 |
| Premiums ($1,000) | 22,664 | 22,256 | 26,023 |

Wheat is the principal commodity to be insured for the 1956 crop year, followed by tobacco, multiple crops, cotton, and corn. Insurance will be offered for the first time on the 1956 crop of barley.

Appropriations of up to $12 million for any fiscal year are authorized for administrative and operating expenses of the Corporation. An estimate for a portion of such expenses is presented elsewhere in the budget. Under the provisions of the appropriation act for fiscal year 1956, the direct costs of loss adjusters, as well as operating and administrative expenses of not to exceed $1.5 million, may be paid from the premium income earned by the Corporation. The 1957 budget contemplates an increase in the latter to $2 million.

Continuation of the severe and prolonged drought, principally in the southwest area where crop insurance coverage was extensive, and the heavy rust infestation in the spring wheat area where participation was concentrated, were mainly responsible for indemnities amounting to $28 million on the 1954 insured crops. These indemnities represented 64,601 claims and exceeded premium income of $22.7 million by $5.3 million.

In 1954, wheat represented 40 percent of the Corporation's insurance coverage, 57 percent of the premium income, and 66 percent of the indemnities paid. Consequently, when the insurance experience on wheat is adverse, the overall operating results are materially affected. Many of the counties where wheat was insured were included in the 1,721 counties (95 percent of these because of drought) which were designated as emergency assistance areas in 1954. Since the crop insurance program is conducted on a limited experimental basis, the spread of the insurance risk is not yet sufficiently broad to offset with premium income from other areas the losses incurred in concentrated areas where crop insurance coverage is extensive.

In order to reduce losses in areas where experience indicated that a sound program could not be developed, the crop insurance program has been withdrawn from 14 counties beginning with the 1956 crop year.

The deficit sustained in these 14 counties since 1947 of $18.4 million is more than twice the Corporation's deficit as of June 30, 1955. If the experience in these few counties were disregarded, the Corporation instead of having a deficit of $7.7 million as of June 30, 1955, would have had a reserve of $10.7 million notwithstanding substantial adverse experience that occurred in other major areas during this period. In order to operate a sounder program, the Corporation is now following a policy of concerted action to limit its liability where, because of abnormal risk due to weather or farming practices, the probability of loss is imminent. Such action includes:

1. Withdrawal of crop insurance protection from high risk counties.
2. Closing sales campaigns in advance of normal closing dates.
3. Limiting liability to carryover contracts.
4. Limitation of insured acreage.
5. Adjustment of premium rates and coverages.

The continued drought will again result in the payment of heavy losses in 1955, especially on wheat. Wheat indemnities will exceed premium income by approximately $3.7 million. Wheat losses from rust in the spring wheat area will be negligible, but corn indemnities will increase considerably because of the hot dry weather that prevailed throughout the entire Corn Belt. In addition, increased tobacco losses will result from hurricanes and accompanying heavy rainfall that occurred in the eastern seaboard States.

#### FINANCING THE BUDGET PROGRAM

No new budgetary authorization is presently being estimated for 1957. Net capital of $12.5 million is estimated to be available at the start of the year and net income of $2.4 million is anticipated. However, additional capital funds may be necessary should losses substantially exceed those reflected in the estimates.

OPERATING RESULTS AND FINANCIAL CONDITION

Income for 1957 is estimated to increase to $26.1 million. Indemnities and expenses for 1957 are estimated at $23.7 million, $5.4 million less than 1956. The deficit as of June 30, 1955, was $7.7 million. The net result of an estimated loss of $6.8 million for 1956 and a net income of $2.4 million for 1957 would increase the deficit to $12.1 million, and decrease the net capital to $14.9 million.

Net budget receipts of $2.7 million are anticipated for 1957, as compared with net expenditures of $5.4 million estimated for 1956, and $7.2 million actual in 1955.

The following table summarizes insurance operations for the 1955, 1956, and 1957 fiscal years.

This fund finances loans to farmers and stockmen in the event of disasters and other emergencies, in areas where agricultural credit is not readily available. It was created by the transfer of the assets of the Regional Agricultural Credit Corporation of Washington which was abolished.

BUDGET PROGRAM

1. *Production emergency loans.*—Loans are made at 3 percent interest to farmers and stockmen suffering production disasters when agricultural credit is not readily available from other sources. The $37.7 million estimate for 1956 is up $9.2 million over 1955 and is due to the newly established program for the Great Plains area, together with the demand for loans of this type in other localities. The estimate for 1957 of $29.5 million is $8.2 million lower than the 1956 estimate.

2. *Economic emergency loans.*—Loans are made at 3 percent interest in any economic disaster area declared by the President if agricultural credit cannot be met temporarily by regularly established lending institutions. Loans are estimated at $9.3 million in 1957, as compared with $15 million estimated in 1956 and $40 million actual in 1955.

3. *Special livestock loans.*—For 4 years after July 14, 1953, loans may be made at 5 percent interest to established livestock producers who are temporarily unable to get credit from recognized lenders and who have a reasonable chance of working out their difficulties with supplementary financing. Supplemental loans may be made for an additional 2 years after July 14, 1957, to individuals already indebted. Estimates for 1956 and 1957 are $12 million and $10 million compared with $19.7 million in 1955.

4. *Special emergency loans.*—Special emergency loans up to a total of $15 million may be made up to June 30, 1957, in areas where the Secretary finds a need for credit which cannot be met through other means. The estimates for 1956 and 1957 are $2 million each, $0.4 million higher than 1955.

5. *Other loans.*—Loans at 5 percent interest may be made to bona fide fur farmers where necessary to protect the Government's interest in existing loans which had been made by the Regional Agricultural Credit Corporation or other authorities.

*Administrative expenses.*—These costs are attributable to the activities of the Farmers' Home Administration, the Commodity Stabilization Service, and the Office of the General Counsel, and are estimated to be $3.2 million in 1957, which is a reduction of $1.4 million from 1956 and $1.2 million from 1955.

FINANCING THE BUDGET PROGRAM

No new budgetary authorization is required for 1957. Although a net loss of $0.7 million is estimated on an accrual basis, net receipts of $18.5 million are anticipated on a cash basis.

During 1957, the program is wholly financed by receipts from operations and, in addition, the balance of prior year authorization available at the end of the fiscal year to finance future years' programs will increase by $19.6 million to $82.2 million.

OPERATING RESULTS AND RETAINED EARNINGS

Income for 1957, consisting principally of interest on loans, is estimated at $4.3 million, compared to expenses of $5 million, resulting in an estimated loss of $0.7 million. Net income of $4 million is estimated for 1956, and a net loss of $8.4 million resulted in 1955.

Loans receivable, after allowance for losses, are expected to amount to $71.2 million on June 30, 1957, as compared with $91.2 million at June 30, 1956, and $103.6 million on June 30, 1955.

The Government's investment at June 30, 1957, is expected to be $153.4 million, consisting of $205.9 million appropriated, less a deficit of $52.5 million.

### FARMERS' HOME ADMINISTRATION—Continued

*Farm Tenant-Mortgage Insurance Fund, Department of Agriculture*—Continued

BUDGET PROGRAM

Advances and purchases of loans are estimated at $3.5 million in 1957, an increase of $1.3 million over 1956 and $2.6 million over 1955. Outstanding loans insured on June 30, 1955, totaled $94,296,644 and are estimated at $162,140,000 on June 30, 1956, and $215,640,000 on June 30, 1957. The insurance endorsement on each loan includes an agreement by the Government to purchase the loan after a specified period.

FINANCING THE BUDGET PROGRAM

No new budgetary authorization is required for 1957. Net receipts of $506,000 are anticipated on a cash basis.

During 1957, the program is wholly financed by receipts from operations, and in addition, the balance of prior year authorization available at the end of the fiscal year to finance future years' programs will increase by $871,000 to $3.7 million.

OPERATING RESULTS AND RETAINED EARNINGS

Total income, consisting principally of insurance premiums, is estimated at $2 million in 1957, a considerable increase over previous years. Since expenses are expected to increase only moderately, most of the gain will result in net income.

This accelerated loan program is expected to result in outstanding loans receivable of $2.4 million at June 30, 1957. Retained earnings, which are for absorption of any future losses, are estimated to be $5.2 million at the end of 1957, and when added to the $1 million appropriation, represents a $6.2 million investment of the Government.

## FOREST SERVICE

*WORKING CAPITAL FUND*

### Working Capital Fund, Forest Service

*There is hereby established a working capital fund which shall be available without fiscal year limitation for expenses necessary, including the purchase or construction of buildings and improvements within the limitations thereon set forth in the appropriation for "Salaries and expenses, Forest Service", for furnishing supply and equipment services in support of programs of the Forest Service. The Secretary is authorized to transfer to the fund, without reimbursement, and to capitalize in the fund at fair and reasonable values, such receivables, inventories, equipment, and other assets as he may determine, and assume the liabilities in connection with such assets, but such capitalization shall not exceed $25,000,000: Provided, That the fund shall be credited with advance payments in connection with firm orders and reimbursements from funds of the Forest Service, other departmental and Federal agencies, and from other sources, as authorized by law, at rates approximately equal to the cost of furnishing the facilities and services.*

PROGRAM AND PERFORMANCE

This fund would be available, without fiscal year limitation, for financing, on a reimbursable basis, various service operations such as repairing and replacing equipment, restocking of supplies, and operation of photographic and reproduction facilities. These service operations serve concurrently the programs of fire protection, timber utilization, construction and maintenance of roads and other improvements, reforestation, grazing, watershed, forest and forest products research, and kindred conservation activities of the Forest Service, including cooperative assistance with other Federal agencies, States, counties, farmers, forest landowners, and others engaged in the same objectives. The principal of the fund, consisting of donated assets, is estimated to be $17.8 million.

## GENERAL PROVISIONS

SEC. 501. Within the unit limit of cost fixed by law, the lump-sum appropriations and authorizations made for the Department under this Act shall be available for the purchase, in addition to those specifically provided for, of not to exceed [535] *755* passenger motor vehicles for replacement only, and for the hire of such vehicles, necessary in the conduct of the work of the Department outside the District of Columbia.

SEC. 502. Provisions of law prohibiting or restricting the employment of aliens shall not apply to [(1) the temporary employment of translators when competent citizen translators are not available; (2) employment in cases of emergency of persons in the field service of the Department for periods of not more than sixty days; and (3)] employment under the appropriation for the Foreign Agricultural Service.

SEC. 503. Of appropriations herein made which are available for the purchase of lands, not to exceed $1 may be expended for each option to purchase any particular tract or tracts of land.

SEC. 504. No part of the funds appropriated by this Act shall be used for the payment of any officer or employee of the Department who, as such officer or employee, or on behalf of the Department or any division, commission, or bureau thereof, issues, or causes to be issued, any prediction, oral or written, or forecast, except as to damage threatened or caused by insect and pests, with respect to future prices of cotton or the trend of same.

SEC. 505. Except to provide materials required in or incident to research or experimental work where no suitable domestic product is available, no part of the funds appropriated by this Act shall be expended in the purchase of twine manufactured from commodities or materials produced outside of the United States.

SEC. 506. Not less than $1,500,000 of the appropriations of the Department for research and service work authorized by the Act of August 14, 1946 (7 U. S. C. 427, 1621–1629), and the Act of July 28, 1954 (Public Law 545), shall be available for contracting in accordance with said Acts.

[SEC. 507. No part of any appropriation contained in this Act, or of the funds available for expenditure by any corporation included in this Act, shall be used to pay the salary or wages of any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided*, That for the purposes hereof an affidavit shall be considered prima facie evidence that the person making the affidavit has not contrary to the provisions of this section engaged in a strike against the Government of the United States, is not a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or that such person does not advocate, and is not a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided further*, That any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence and accepts employment the salary or wages for which are paid from any appropriation or fund contained in this Act shall be guilty of a felony and, upon conviction, shall be fined not more than $1,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penalty clause shall be in addition to, and not in substitution for, any other provisions of existing law: *Provided further*, That nothing in this section shall be construed to require an affidavit from any person employed for less than sixty days for sudden emergency work involving the loss of human life or destruction of property, the payment of salary or wages may be made to such persons from applicable appropriations for services rendered in such emergency without execution of the affidavit contemplated by this section.]

SEC. [508] *507*. No part of any appropriation contained in this Act or of the funds available for expenditure by any corporation or agency included in this Act shall be used for publicity or propaganda purposes to support or defeat legislation pending before the Congress.

SEC. [509] *508*. Appropriations of the Department available for research and service work authorized by the Act of August 14, 1946 (7 U. S. C. 427, 1621–1629) shall be available for expenses of any advisory committee established as provided in title III of said Act to assist in effectuating the research and service work of the Department. ## CURRENT AUTHORIZATIONS

INTRODUCTORY STATEMENT

The Department of Commerce promotes the trade and commerce of the United States by providing economic analysis and special services to the business community, and serves as the principal organization for carrying out operational and promotional programs of the Government relating to transportation. The Department also administers export controls and carries out mobilization preparedness and defense production activities.

As in past years appropriations for transportation and related programs account for more than 90 percent of the total requests, with the principal portion being for grants for highway and airport construction and maritime and air transportation operating subsidies, based on substantive law.

PROGRAM AND PERFORMANCE

In addition to executive direction and policy guidance, the following activities are financed by this appropriation:

2. *Departmental staff services.*—Staff assistance and supervision in the general management and administration of the Department is provided in personnel, budget and management, information, publications, security, legal, internal inspection, and emergency planning activities.

3. *Administrative services.*—Departmentwide direction, supervision, and coordination is provided in property and space, records, general administrative services, safety and motor vehicles, and library activities. Centralized general administrative services are furnished to the Office of the Secretary, the Business and Defense Services Administration, the Office of Business Economics, and the Bureau of Foreign Commerce.

4. *Air transport mobilization planning.*—This activity provides for the planning and direction of the mobilization of civil aviation resources in order to insure that in time of war the air transportation facilities of the Nation are adequate and are effectively used.

5. *Coordination of release of strategic information.*—This activity provides for the development of national policy on and the evaluation of the flow of unclassified scientific, technical, industrial, and economic information in order to minimize access to such information by unfriendly nations. Advice and guidance are provided for voluntary action by public agencies, industries, and private groups who produce and distribute such information.

# BUREAU OF THE CENSUS

INTRODUCTORY STATEMENT

The Bureau is the principal factfinding and statistical agency of the Federal Government. It is responsible for taking the major censuses of population, housing, agriculture, governmental units, manufactures, mineral industries, the distributive trades, service establishments, and transportation. Current statistics on many of the subjects covered by these major censuses, and on foreign trade, are prepared and published. The Bureau's facilities are utilized by many other Federal agencies for special surveys, tabulations, and related statistical services on a reimbursable basis.

### Salaries and Expenses, Bureau of the Census

Salaries and expenses: For expenses necessary for collecting, compiling, and publishing current census statistics provided for by law; [and] for general administration, including enumerators at rates to be fixed without regard to the Classification Act of 1949, as amended; [$6,900,000] *and purchase of one passenger motor vehicle for replacement only; $7,620,000. (5 U. S. C. 601; 13 U. S. C. 23, 24, 41–45, 61–63, 181; 15 U. S. C. 173, 177–179, 181, 184–187, 193, 194; Department of Commerce and Related Agencies Appropriation Act, 1956.)*

PROGRAM AND PERFORMANCE

Reports of the results of the 1954 census of agriculture by county were started in March 1955. All reports will be released before the end of calendar 1956. Data are being published on the number of farms, uses of farmland, land ownership, farm tenancy, value of farms, number of various kinds of livestock, sale of livestock, the acreage, production, and amount sold for various crops, farm employment, and principal farm expenses. Amounts for 1957 provide for the completion of the tabulation program and orderly liquidation of activities.

## CIVIL AERONAUTICS ADMINISTRATION

INTRODUCTORY STATEMENT

The Administration controls air traffic, develops, installs, and operates aids to air navigation and traffic control, certifies the competency of airmen and the airworthiness of aircraft, and administers grants for airport construction.

### Operation and Regulation, Civil Aeronautics Administration

Operation and regulation: For necessary expenses of the Civil Aeronautics Administration in carrying out the provisions of the Civil Aeronautics Act of 1938, as amended (49 U. S. C. 401), and other Acts incident to the enforcement of safety regulations, maintenance and operation of air-navigation and air-traffic control facilities, and disposal of surplus airports and administering instruments of disposal; planning, research, and administrative expenses for carrying out the provisions of the Federal Airport Act of May 13, 1946, as amended, including furnishing advisory services to States and other public and private agencies in connection with the construction or improvement of airports and landing areas; developmental work and service-testing as tends to the creation of improved air-navigation facilities, including landing areas, aircraft, aircraft engines, propellers, appliances, personnel, and operation methods, and acquisition of sites for such activities by lease, or grant; purchase of not to exceed [sixty-five] *one hundred and ten* passenger motor vehicles for replacement only; hire of aircraft (not exceeding $370,000); operation and maintenance of not to exceed eighty-five aircraft; fees and mileage of expert and other witnesses; and purchase and repair of skis and snowshoes; [$106,150,000] *$128,500,000*: *Provided*, That there may be credited to this appropriation, funds received from States, counties, municipalities, and other public authorities for expenses incurred in the maintenance and operation of air-navigation facilities. PROGRAM AND PERFORMANCE

1. *Federal airways.*—This is a program of maintaining and operating, 24 hours daily, a national network of aids to air navigation and traffic control along the primary air routes and at principal airports in the continental United States, its Territories and possessions. Major increases in 1957 are for (*a*) additional workload resulting from increased air traffic; (*b*) the operation of newly commissioned facilities; and (*c*) the operation of air traffic control installations formerly financed by Air Force and Navy. These increases are offset in part by the discontinuance of low priority and outmoded equipment and such economy measures as can be accomplished without reducing the level of safety service to aviation.

2. *Aviation safety.*—Inspections and certifications are made of aircraft, airmen, and operators of aircraft and air agencies, including the enforcement actions necessary to assure compliance with the civil air regulations that are designed to provide safe and competent operation of aircraft.

3. *Airports.*—This activity includes (*a*) costs of administering grants for airport construction, (*b*) inspection of airport facilities to determine their utility and to assure compliance with law and regulations, and (*c*) advisory services with regard to airport design and engineering. A national plan is prepared annually for public airports in the United States, its Territories and possessions, specifying the location and type of projects needed for civil aviation and useful for national defense. The costs of administering the expanded grant-in-aid program authorized by Public Law 211, 84th Congress, will increase late in 1956 and require additional funds in 1957.

PROGRAM AND PERFORMANCE

The efficiency and safety of air navigation and air traffic control is being improved by the installation of new en route and terminal aids and the modernization of existing facilities of the Federal airways system. Major projects included in the 1957 request are: Increased use of radar for traffic control; expanded communications capacity in control towers and centers; additional VHF radio ranges to provide multiple airways; and procurement of five transport class aircraft for improved flight inspection of navigation facilities. The 1957 request is part of a newly developed installation program for the period 1957 through 1961. The program has been designed to provide facilities needed to meet current and expected demands on the Federal airways system and has been endorsed by the Air Coordinating Committee. The following table lists major facilities in the 5-year program:

PROGRAM AND PERFORMANCE

Grants are made to local sponsors for construction at airports which are part of a national system capable of meeting the needs of civil aviation and nontactical military operations. Public Law 211, 84th Congress, amended the Federal Airport Act to provide contract authorizations of $42.5 million for 1956 and $63 million for the next 3 fiscal years. The following table summarizes activity under the act since its enactment in 1946.

PROGRAM AND PERFORMANCE

The Washington National Airport is operated to provide terminal facilities for Washington, D. C. It is estimated that the realized revenues will be $2,140,000 in 1956 and $2,281,000 in 1957, as compared to $2,032,000 in 1955, all being deposited in miscellaneous receipts of the Treasury. These amounts take into consideration increased revenues to be derived from application of escalator clauses in existing contracts.

PROGRAM AND PERFORMANCE

Terminal-type airports are operated at Anchorage and Fairbanks to serve aviation in the Territory. Charges are made for most services available and revenues are estimated at $662,000 in each of the fiscal years 1956 and 1957, as compared with $524,000 in 1955, all being deposited in miscellaneous receipts of the Treasury. Legislation to establish a revolving fund for the operation of these airports is now pending before the Congress.

PROGRAM AND PERFORMANCE

The work involves research, experimentation, and development on new devices required for safety and regularity of flight under all weather conditions for joint use by civil and military aircraft. The funds requested provide for the Department of Commerce portion of a joint civil military program administered by the Air Navigation Development Board composed of representatives of the Departments of Commerce and Defense. During 1957, major emphasis will be placed upon air traffic control aids.

PROGRAM AND PERFORMANCE

The Board regulates the economic aspects of air carrier operations, both domestic and international; promulgates safety rules and standards; investigates aircraft accidents; and participates in the development of international air transportation. The increase proposed for 1957 is for continuing on a full-year basis in 1957 the rate, route, and audit of air carrier accounts program expansion authorized in 1956, and in addition for some expansion in critical program areas, both safety and economic.

1. *Economic regulation.*—This includes granting certificates of public convenience and necessity; prescribing or approving rates and rate practices of air carriers; fixing mail rate compensation; prevention of unfair competition; and approval of business relationships between air carriers.

2. *Safety regulation.*—This consists of promulgation of civil air regulations; adjudication of complaints alleging violations of these regulations; and the coordination of the civil air regulations with international safety standards and practices.

3. *Accident investigation and analysis.*—Civil aircraft accidents are investigated to determine probable cause; potential hazards are also investigated; and preventive measures are recommended and put into effect.

4. *Legal staff activities.*—Legal advice and assistance is provided on all aspects of economic and safety regulatory activities; opinions of the Board are prepared; and litigation matters are handled.

PROGRAM AND PERFORMANCE

The Board fixes rates for the transportation of airmail to promote the development of air transportation required for the commerce of the United States, the postal service, and the national defense. Many of these rates include an element of subsidy. The subsidy portion is paid by the Civil Aeronautics Board, and the service portion is paid by the Post Office Department.

[1] Effective date of Reorganization Plan No. 10.

Accrual amounts shown above represent the latest estimate of subsidy payable for operations in the designated fiscal year. Payments, which represent cash transactions, are made after claims are verified and reflect adjustments of amounts paid in past periods. In 1956 and 1957 such adjustments will be substantial due to rate actions which take account of unanticipated carrier earnings, and contemplate application of the recent Supreme Court decision affecting subsidy for multidivisional carriers. These rate actions will result in payments lower than subsidy accrual in 1956 and 1957.

Of the total subsidy accrual in 1957 about $29 million is for domestic operations, chiefly to enable smaller airlines to serve the hundreds of small cities on their routes. The balance, $17.5 million, will go to United States certificated international, overseas, and territorial carriers. The following summarizes, by carrier groups, subsidy accrual expected in 1957:

| | *Number of carriers* | | |
|---|---|---|---|
| | *Nonsubsidized* | *Subsidized* | |
| Domestic trunklines | 11 | 2 | Only Colonial and Northeast require subsidy. |
| Local service operations | ---- | 14 | Reduced subsidy need of some carriers in recent years has been offset by certification of new routes and services. |
| Helicopter operations | ---- | 3 | Subsidy permits development and further experimentation with this new type service. |
| States-Alaskan operations | ---- | 3 | Subsidy permits needed air service to remote territorial locations. |
| Intra-Alaskan operations | ---- | 9 | |
| Hawaiian operations | ---- | 2 | |
| Trans-Atlantic operations | 1 | 1 | Only routes now subsidized are those of Pan American to South Africa and Scandinavia. Subsidy in 1955 and 1956 is depressed by carrier capital gains. |
| Trans-Pacific operations | 2 | ---- | Subsidy has been completely eliminated. |
| Latin American operations | 5 | 4 | Nonsubsidized routes are mainly to Mexico and Caribbean. Subsidy in 1956 is depressed by carrier capital gains. |

The overall reduction in subsidy in recent years may be attributed primarily to the high level of economic activity, the shift of more military mail to commercial carriers, the expansion of low-fare services and the safety and dependability record and increased efficiency of the industry.

## COAST AND GEODETIC SURVEY

### Salaries and Expenses, Coast and Geodetic Survey

Salaries and expenses: For expenses necessary to carry out the provisions of the Act of August 6, 1947 (33 U. S. C. 883a–883i), including purchase of not to exceed three passenger motor vehicles for replacement only; uniforms or allowances therefor, as authorized by the Act of September 1, 1954 (68 Stat. 1114) *as amended*; lease of sites and the erection of temporary buildings for tide, magnetic or seismological observations; hire of aircraft; operation, maintenance, and repair of an airplane; extra compensation of not to exceed $15 per month to each member of the crew of a vessel when assigned duties as recorder or instrument observer, and at not to exceed $1 per day for each station to employees of other Federal agencies while making oceanographic observations or tending seismographs; pay, allowances, gratuities, transportation of dependents and household effects, and payment of funeral expenses, as authorized by law, for not to exceed 185 commissioned officers on the active list; payments under the Uniform Services Contingency Option Act of 1953; and pay of commissioned officers retired in accordance with law; [$10,225,000] *$11,020,000, of which $446,000 shall be available for retirement pay of commissioned officers*: *Provided*, That during the current fiscal year, this appropriation shall be reimbursed for press costs and costs of paper for charts published by the Coast and Geodetic Survey and furnished for the official use of the military departments of the Department of Defense. *(5 U. PROGRAM AND PERFORMANCE

The Survey publishes aeronautical and nautical navigation charts of selected areas of the United States, its Territories, and surrounding waters, using data obtained through field surveys. In addition, seismological and geodetic control data are obtained and disseminated, and worldwide tide and current information is compiled and published.

1. *Surveys and charts for marine and air navigation.*—Hydrographic, topographic, tide and current, magnetic, and aeronautical surveys are made to secure information for nautical and aeronautical charts and tables required for safe air and sea navigation.

Receipts from the sale of charts and related publications were $513,059 in 1955 and are estimated to be $513,000 during both 1956 and 1957.

2. *Geodetic control.*—Surveys are made in the United States and its Territories to determine the horizontal position (latitude and longitude) and the vertical position (elevation above mean sea level) of a network of control points which are permanently marked on the ground. These points are spaced so that adequate survey control is available for topographic, geologic, and other types of mapping, and for planning large-scale engineering projects. The positions and descriptions of these points are published and distributed to Federal, State, and local agencies and the general public.

3. *Earthquake investigation.*—Earthquakes are located and investigated to determine their severity and to obtain engineering data for the design of earthquake-resistant structures. The Bureau operates 6 seismograph stations, field investigates an average of 15 severe earthquakes annually, operates 66 strong-motion stations in the seismic area of the Western States, collaborates with 16 universities and cooperates with 100 domestic and foreign seismograph stations to determine the location of distant earthquakes.

4. *Instrument services.*—These include the design and construction, maintenance, storage, and issuance of intricate instruments used in surveying and processing operations.

5. *Retired pay, commissioned officers.*—Provision is made for the pay of the Survey's retired commissioned officers. There were 65 on the rolls June 30, 1955, and it is estimated there will be 70 June 30, 1956, and 74 June 30, 1957.

PROGRAM AND PERFORMANCE

The Administration carries out industrial mobilization readiness activities and provides statistical and informational services to the business community.

2. *Staff services.*—Coordination and formulation of operating programs are performed by a staff of program advisers and an office of small business.

3. *Marketing and distribution services.*—The office of distribution fosters the development of more effective distribution of goods and services by disseminating market facts and distribution information to Government, industry, and business.

4. *Industry divisions.*—Twenty-five industry divisions carry out the industrial mobilization programs delegated to the Department, including studies of mobilization requirements and productive capacity; postattack industrial planning and plant protection guidance; recommendations on stockpiling of critical materials; defense production expansion proposals; and priority and allocation controls over materials. Promotion of industry and commerce is accomplished through assembly and analysis of industrial and commercial information for use by both the Government and business, and by providing a focal point for cooperation between Government and business in promoting economic stability and growth. The increase for the budget year will provide for an expanded program for the collection and analysis of construction statistics.

5. *Technical information services.*—Scientific and technical data are collected and compiled primarily from Government research and made available upon request to business, industry, the general public, and Government agencies. In addition, direct assistance is furnished to industry in the development of voluntary programs for standardization of commodities. The increase for the budget year will provide for an expanded program in dissemination of technical information.

6. *Field services.*—The field offices, with assistance from local cooperating organizations, are the medium through which the information and services of the Department are made available to the business community at the local level. These offices gather information on local business trends and developments for use of the Department and other agencies. In addition to providing domestic services, these offices provide services for the Bureau of Foreign Commerce on export and import operations, including guidance on regulations and restrictions in effect here and abroad.

7. *Area economic development services.*—The office of area development provides advice and assistance to State and local communities in economic development and counsel to industry and Government regarding the Federal industrial dispersion program. The increase for the budget year will provide for an expanded area economic development program.

PROGRAM AND PERFORMANCE

Export controls are necessary to protect the domestic economy from excessive drain of scarce commodities, to safeguard the national security by regulating exports of strategic commodities, and to implement United States foreign policy. In the absence of improvement in relations with certain countries, these controls must be continued and, as necessary, extended to other areas to guard against transshipment. The Bureau of Customs is responsible for the policing of shipments at points of export. Legislation providing for these activities expires June 30, 1956. The 1957 requirements are included as a supplemental under proposed legislation.

PROGRAM AND PERFORMANCE

The 1957 estimate provides for:

(1) Construction-differential subsidy and/or national defense allowances in construction of 2 combination passenger-cargo ships and 20 other vessels under the ship replacement program.

(2) Construction for Government account of 2 mobilization prototype cargo ships and 1 nuclear-powered tanker.

(4) Acquisition costs for an estimated 15 ships being replaced.

(5) A program of advanced research and development, including the experimental modernization of one reserve-fleet Liberty ship.

(6) Administrative and warehouse expenses of the program.

Since 1955, funds for new ship construction have been appropriated under "Ship construction, maritime activities." In order to differentiate between current programs available for obligation and those for expenditure only, all programs prior to fiscal year 1955 are reflected under "Ship construction (liquidation of contract authorization), maritime activities." The following table reflects the annual obligation requirements for the projects financed from 1955 and 1956 appropriations, together with those requested for 1957.

The budget proposes a 1956 supplemental of $12.6 million for construction of the hull of the nuclear-powered peace ship, proposed last year by the President. The atomic reactor and propulsion machinery would be financed from funds available to the Atomic Energy Commission.

The nuclear-powered tanker proposed for 1957 would be built over a longer period in order to develop an improved reactor and advance commercially feasible atomic power for the merchant marine. It would be financed wholly from this appropriation.

PROGRAM AND PERFORMANCE

The following actions were taken during 1955 with respect to ship construction programs authorized prior to 1955: (1) Obligations were reduced in the amount of $4,899,426 as a result of (*a*) final contract adjustments totaling $878,052, and (*b*) change in the definition of obligations for escalation adjustments in conformance with section 1311, Public Law 663, totaling $4,021,374; (2) the unobligated balance was reduced by $559,830 through administrative cancellation of the entire unfinanced contract authorization. It is anticipated that the remaining unobligated balance, $4,339,596, will be obligated for escalation and other contract adjustments in 1956 and 1957.

## Operating-Differential Subsidies, Maritime Activities

Operating-differential subsidies: For the payment of obligations incurred for operating-differential subsidies granted on or after January 1, 1947, as authorized by the Merchant Marine Act, 1936, as amended, and in appropriations heretofore made to the United States Maritime Commission, [$110,000,000] *$124,000,000*, to remain available until expended: *Provided*, That to the extent that the operating-differential subsidy accrual (computed on the basis of parity) is represented on the operator's books by a contingent accounts receivable item against the United States as a partial or complete offset to the recapture accrual, the operator (1) shall be excused from making deposits in the special reserve fund, and (2) as to the amount of such earnings the deposit of which is so excused shall be entitled to the same tax treatment as though it had been deposited in said special reserve fund. To the extent that any amount paid to the operator by the United States reduces the balance in the operator's contingent receivable account against the United States, such amount shall forthwith be deposited in the special reserve fund of the operator: *Provided further*, That no contracts shall be executed during the current fiscal year by the Federal Maritime Board which will obligate the Government to pay operating differential subsidy on more than [one thousand nine hundred and fifty] *two thousand and seventy-five* voyages in any one calendar year, including voyages covered by contracts in effect at the beginning of the current fiscal year[; of which not less than one hundred and twelve shall be for operators who have not held contracts prior to July 1, 1955]. (*Department of Commerce and Related Agencies Appropriation Act, 1956.*)

PROGRAM AND PERFORMANCE

At present, 16 privately owned United States flag companies operate 295 ships under subsidy contracts on 29 of the 32 designated essential foreign trade routes. The contracts provide for payment of the differential between their operating costs and those of foreign competitors (subsidy accrual). The Government recaptures from the operator one-half of net profits in excess of 10 percent of capital necessarily employed up to the subsidy accrual. The subsidy recapture (amount withheld) is finally determined on a cumulative basis only at the end of a 10-year contract period. In estimating the subsidy payable, subsidy recapture is subtracted from subsidy accrual, but pending the close of the 10-year contract period the full amount of the accrual is a contingent liability of the United States.

SUMMARY OF PROGRAM JANUARY 1, 1947, THROUGH JUNE 30, 1957

[Dollars in thousands]

| Calendar years: | *Voyages* | *Estimated subsidy accrual* |
|---|---|---|
| 1947–51 | 5,325 | $210,557 |
| 1952 | 1,341 | 86,375 |
| 1953 | 1,523 | 105,422 |
| 1954 | 1,456 | 105,700 |
| 1955 | 1,611 | 116,010 |
| 1956 | 1,666 | 120,318 |
| 1957 (first 6 months) | 839 | 61,288 |
| Total | 13,761 | 805,670 |

| | *Cumulative total* |
|---|---|
| Subsidy accrual | $805,670 |
| Subsidy recapture | −128,826 |
| Subsidy payable | 676,844 |
| Subsidy paid through June 30, 1954 | −324,509 |
| Estimated subsidy payable | 352,335 |
| Subsidy to be paid in 1956 (includes 1956 supplemental of $30,000,000) | −140,027 |
| Subsidy to be paid in 1957 | −124,000 |
| Subsidy to be paid in subsequent years | 88,308 |

For the past several years, the Administration has been attempting to eliminate a large backlog of subsidy payments dating back to 1947. The budget proposes to complete this task substantially by June 30, 1957. The $88,308,000 estimated unpaid subsidy as of that date would approach a normal backlog, consisting largely of amounts withheld pending final rate and audit determinations for fiscal years 1955–57, plus subsidy bills for operations in the last quarter of fiscal year 1957, which would not be presented and paid until 1958. This estimated unpaid balance is, however, subject to adjustment for changes in the cumulative recapture position of each of the operators.

A supplemental appropriation of $30 million is anticipated in 1956.

The above estimates do not include any amounts for pending subsidy applications of presently nonsubsidized operators. Such applications would increase the maximum number of voyages under contract by 282 and the annual subsidy accrual by an estimated $26 million.

PROGRAM AND PERFORMANCE

1. *Administrative expenses.*—Shown herein are the expenses of administering most of the functions of the Federal Maritime Board and Maritime Administration, including operating-differential subsidies, continuing ship construction activities, ship operations and chartering, auditing, and property management. Administrative expenses in connection with maritime training, general agency ship operations, new ship construction, and repair of reserve fleet vessels are provided in other funds.

2. *Maintenance of shipyard facilities.*—Four Government-owned reserve shipyards are maintained in a partial state of readiness for defense purposes.

3. *Operation of warehouses.*—Five warehouses store materials and equipment for vessel operations, repair and outfitting of reserve fleet ships, and reserve shipyards.

4. *Maintenance of reserve training stations.*—One reserve training station is maintained in a custodial status for possible future reactivation.

5. *Reserve fleet expenses.*—Provision is made for the preservation and security of over 2,000 merchant vessels, maintained for national defense purposes. It is estimated that by June 30, 1957, substantially all backlog work will be liquidated.

PROGRAM AND PERFORMANCE

1. *Cadet-midshipmen training.*—The Merchant Marine Academy at Kings Point, N. Y., provides a 4-year course, including 1 year of training at sea, designed to qualify graduates for licenses as merchant marine officers and for commissions as ensigns in the Naval Reserve. The Academy provides subsistence, quarters, tuition, uniforms, textbooks, and medical care for cadets. On June 30, 1955, 571 cadets were attending the Academy and 184 were at sea.

2. *Medical services.*—By reimbursement the Public Health Service furnishes medical care and supplies at the Academy and carries on a preventive medicine program.

3. *Training liaison office.*—This office provides staff assistance to the administrator in the training area, handles recruitment of cadets, and maintains liaison with State marine schools.

PROGRAM AND PERFORMANCE

The Maritime Administration's studies of shipyard mobilization indicate that the feasibility of the mobilization ship construction program can be assured only by advance planning for prompt reactivation of existing shipyard facilities and for construction of new shipyards. The program outlined above initiates planning, primarily for reactivation of existing reserve yards.

PROGRAM AND PERFORMANCE

The Emergency Ship Repair Act of 1954 authorized the Secretary of Commerce to proceed with a program of repair of naval auxiliary vessels and authorized obligations of not to exceed $25 million for a 2-year period. A total of $18 million has been appropriated for liquidation of such obligations. The act expires August 20, 1956, and no additional funds are being requested for this program in 1957.

upon redelivery to accept or pay for consumable stores, bunkers and slop-chest items, except with respect to such minimum amounts of bunkers as the Maritime Administration considers advisable to be retained on the vessel and that prior to such redelivery all consumable stores, slop-chest items and bunkers over and above such minimums shall be removed from the vessel by the charterer at his own expense.

No money made available to the Department of Commerce, for maritime activities, by this or any other Act shall be used in payment for a vessel the title to which is acquired by the Government either by requisition or purchase, or the use of which is taken either by requisition or agreement, or which is insured by the Government and lost while so insured, unless the price or hire to be paid therefor (except in cases where section 802 of the Merchant Marine Act, 1936, as amended, is applicable) is computed in accordance with subsection 902 (a) of said Act, as that subsection is interpreted by the General Accounting Office.

Notwithstanding any other provision of this Act, the Maritime Administration is authorized to furnish utilities and services and make necessary repairs in connection with any lease, contract, or occupancy involving Government property under control of the Maritime Administration, and payments received by the Maritime Administration for utilities, services, and repairs so furnished or made shall be credited to the appropriation charged with the cost thereof: *Provided*, That rental payments under any such lease, contract, or occupancy on account of items other than such utilities, services, or repairs shall be covered into the Treasury as miscellaneous receipts.

No obligations shall be incurred during the current fiscal year from the construction fund established by the Merchant Marine Act, 1936, or otherwise, in excess of the appropriations and limitations contained in this Act, or in any prior appropriation Act, and all receipts which otherwise would be deposited to the credit of said fund shall be covered into the Treasury as miscellaneous receipts. PROGRAM AND PERFORMANCE

The Office administers the laws that govern the granting of patents for invention and the registration of trademarks.

Receipts from fees were $5,872,000 in 1955, and are estimated under existing legislation to be $6.4 million in 1956 and $6.7 million in 1957. Legislation is pending before the Congress to increase fees to more nearly cover the cost of Patent Office operations.

The 1957 estimate provides for a larger examiner force to begin a systematic 8-year program to reduce the patent application backlog to a manageable level. It also provides for an expanded program of modernizing the patent classification system, and for a program of continued research and development of electronic devices applicable to the work of the Patent Office.

1. *Administration of patent and trademark system.*—Applications are examined to determine the patentability of claimed inventions and the registrability of trademarks; quasi-judicial functions are performed in appeal or interference proceedings within the Office; patents and trademarks are issued; copies of records are furnished; and other services relating to the prosecution of applications are provided.

2. *Printing and publication of patent and trademark material.*—This activity provides for printing of specifications and drawings of patents and trademark registrations; publication of their issuance and of official notices, rules of practice, and laws; binding of patents, trademarks, and other reference material for official and public search; and other printing and binding work. The need and use of funds is governed largely by the volume of patent and trademark issuances, and related public demand for printed copies sold from stocks maintained by the Office.

## BUREAU OF PUBLIC ROADS

INTRODUCTORY STATEMENT

The Bureau administers the Federal-aid highway program for the improvement of primary, secondary, urban, and interstate highways and cooperates with other Federal agencies in improving highways in national forests, parks, and other Federal areas.

General administrative expenses: Necessary expenses of administration, including advertising (including advertising in the city of Washington for work to be performed in areas adjacent thereto), purchase of seventy-five passenger motor vehicles for replacement only, and the maintenance and repairs of experimental highways, shall be paid, in accordance with law, from appropriations available to the Bureau of Public Roads.

Of the total amount available from appropriations of the Bureau of Public Roads for general administrative expenses, pursuant to the provisions of section 21 of the Act of November 9, 1921, as amended (23 U. S. C. 21), $100,000 shall be available for all necessary expenses to enable the President to utilize the services of the Bureau of Public Roads in fulfilling the obligations of the United States under the Convention on the Pan-American Highway Between the United States and Other American Republics (51 Stat. 152), cooperation with several governments, members of the Pan American Union, in connection with the survey and construction of the Inter-American Highway, and for performing engineering service in Pan-American countries for and upon the request of any agency or governmental corporation of the United States. (*23 U. S. C. 21; sec. 6 of the Act of June 29, 1948, 62 Stat. 1105, as amended or supplemented by the Act of May 6, 1954, 68 Stat. 70; Department of Commerce and Related Agencies Appropriation Act, 1956.*)

### Federal-Aid Highways, Bureau of Public Roads

Federal-aid highways: For carrying out the provisions of the Act of July 11, 1916, as amended and supplemented (23 U. S. C. 1–22, 24–105, 107–117), to remain available until expended, [$640,000,000] *$800,000,000*, which sum is composed of [$343,500,000] *$186,500,000*, the balance of the amount authorized to be appropriated for the fiscal year [1954, $288,500,000] *1955, $610,500,000*, a part of the amount authorized to be appropriated for the fiscal year [1955, and $163,336, $75,915, $1,695,797, and $1,401,457] *1956, and $30,401, $14,097, $1,034,766, and $985,204*, the latter sums being for reimbursement of the sums expended for the repair or reconstruction of highways and bridges which have been damaged or destroyed by floods, hurricanes, or landslides, as provided by section 4 of the Act approved June 8, 1938, section 7 of the Act approved July 13, 1943, and section 9 of the Act approved September 7, 1950, as amended (23 U. S. C. 13a and 13b) and section 7 of the Act approved June 25, 1952, and [$4,663,495] *$935,532* for reimbursement of the sums expended for the design and construction of highway bridges upon and across dams in accordance with the Act of July 29, 1946 (60 Stat. 709). (*Department of Commerce and Related Agencies Appropriation Act, 1956.*)

PROGRAM AND PERFORMANCE

1. *Grants for construction.*—Grants are made to States for construction and improvement of designated Federal-aid primary, secondary, urban, and interstate highways. In general, the grants for these highways are matched on an equal basis by State funds. On interstate system projects, however, the Federal share is 60 percent. As of June 30, 1955, the mileages of the Federal-aid primary and secondary highway systems were, respectively, 234,148 and 507,676. The primary system includes 216,246 miles of rural roads and 17,902 miles of urban roads. The national system of interstate highways is composed of 40,000 miles, most of which are also part of the designated primary system. The interstate system includes major transcontinental and interurban highways important to national defense and interstate commerce.

States are reimbursed for the Federal share of the cost of work done on approved projects. A supplemental appropriation in the amount of $100 million for this purpose required in 1956 is proposed for later transmission.

Actual and estimated progress of this program is summarized in the following table:

PROGRAM AND PERFORMANCE

1. *Construction.*—Highways in the national forests are constructed and improved. Projects are jointly selected by the States, the Forest Service, and the Bureau on the basis of their contribution to meeting traffic requirements, including the production and transportation of timber. Authorizations are apportioned among States according to national forest area and value in each State. Principal

forest highways are located on the Federal-aid and State highway systems and, in the Western States particularly, are important links of the main highways of the region.

A supplemental appropriation for 1956 in the amount of $4 million is proposed for later transmission.

Actual and estimated progress of the program is summarized in the following table:

| *Fiscal year* | *Annual authorization* [1] | *Miles completed* | *Unobligated balance—end of year* | *Obligations for projects* | *Expenditures* |
|---|---|---|---|---|---|

PROGRAM AND PERFORMANCE

1. *Construction.*—The Central American section of the Inter-American Highway, from the northern border of Guatemala to Panama, approximately 1,590 miles, is being constructed in cooperation with the Central American Republics, which bear one-third of the cost. The highway through Mexico has been constructed by the Mexican Government. When completed, the highway will run approximately 3,200 miles and will permit motor travel from the United States to Panama. As of January 1, 1956, 819 miles of the Central American section had all-weather surfacing, 598 miles were all-weather, but required major improvements, and 173 miles were impassable.

Authorizations of $74,980,000 were made available to complete the highway by fiscal year 1959. Against these authorizations, $62,980,000 was appropriated in 1956.

2. *Administration and engineering.*—A small administrative and engineering staff is maintained in Washington and the Central American countries.

General provisions—Bureau of Public Roads: None of the money appropriated for the work of the Bureau of Public Roads during the current fiscal year shall be paid to any State on account of any project on which convict labor shall be employed, but this provision shall not apply to labor performed by convicts on parole or probation.

During the current fiscal year authorized engineering or other services in connection with the survey, construction, and maintenance, or improvement of roads may be performed for other Government agencies, cooperating foreign countries, and State cooperating agencies, and reimbursement for such services (which may include depreciation on engineering and road-building equipment used) shall be credited to the appropriation concerned.

During the current fiscal year appropriations for the work of the Bureau of Public Roads shall be available for expenses of warehouse maintenance and the procurement, care, and handling of supplies, materials, and equipment for distribution to projects under the supervision of the Bureau of Public Roads, or for sale or distribution to other Government activities, cooperating foreign countries, and State cooperating agencies, and the cost of such supplies and materials or the value of such equipment (including the cost of transportation and handling) may be reimbursed to current applicable appropriations.

Appropriations to the Bureau of Public Roads may be used in emergency for medical supplies and services and other assistance necessary for the immediate relief of employees engaged on hazardous work under that Bureau, and for temporary services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), but at rates for individuals not in excess of $100 per diem. (*23 U. S. C. 1–117; Department of Commerce and Related Agencies Appropriation Act, 1956.*)

[REDUCTIONS IN CONTRACT AUTHORIZATIONS]

[Bureau of Public Roads: The unobligated balances of contract authorizations provided in section 4 of the Act approved June 8, 1938 (52 Stat. 634), and section 9 of the Act approved September 7, 1950 (64 Stat. 789), as amended by the Act approved October 15, 1951 (65 Stat. 421), are hereby canceled.]

[The authorization in section 3 of the Federal-Aid Highway Act of 1952 for forest highways for the fiscal year ending June 30, 1954, is hereby reduced by the sum of $15,900,000.] (*Department of Commerce and Related Agencies Appropriation Act, 1956.*)

## NATIONAL BUREAU OF STANDARDS

INTRODUCTORY STATEMENT

The National Bureau of Standards is the agency of the Federal Government responsible for the custody, maintenance, establishment, development, and improvement of the national standards of physical measurement. Against these standards, all the working standards of the Nation—those used by scientists and engineers in research and development, those used by the industry in the measurement and production of interchangeable parts, and those used by other Government and State agencies to ascertain conformity—are calibrated. Closely associated with the standards activity, the Bureau serves as a national laboratory for science, industry, and government for research and development on methods of measurement and instrumentation; for the determination of fundamental physical constants and basic properties of materials; for the development of improved methods for testing materials and equipment; for the development of codes and specifications; and for rendering of assistance to other Government agencies through advisory services on technical problems and by invention and development of devices to meet special needs.

### Expenses, National Bureau of Standards

Expenses: For expenses necessary in performing the functions authorized by the Act of March 3, 1901, as amended (15 U. S. C. 271–278c), including general administration; operation, maintenance, alteration, and protection of grounds and facilities; and improvement and construction of temporary or special facilities as authorized by section 2 of the Act of July 21, 1950 (15 U. S. C. 286); [$7,000,000] *$9,000,000*: *Provided*, That during the current fiscal year the maximum base rate of compensation for employees appointed pursuant to the Act of July 21, 1950 (15 U. S. C. 285), shall be equivalent to the entrance rate of GS–12. (*15 U. S. C. 271–278c, 285, 286; 40 U. S. C. 14a; 5 U. S. C. 596a; Department of Commerce and Related Agencies Appropriation Act, 1956.*)

PROGRAM AND PERFORMANCE

The budget proposes an increase of $1,586,500 to strengthen the basic programs of the Bureau, with emphasis on basic research and on the development of standards of greater range and precision, adequate to meet the needs of present-day science and industry, and to provide for improved technical balance in the Bureau's scientific activities. The Bureau programs are classified under four activities:

1. *Research.*—This activity includes investigations of fundamental physical phenomena and determinations of physical constants and properties of materials which are of great importance to science and industry. Fundamental scientific knowledge is applied to achieve more effective use of new scientific and technological processes, materials, and equipment. This activity at the Bureau's Central Radio Propagation Laboratory includes the study of the fundamental physics of the atmosphere and the effects of solar and cosmic radiations and terrain characteristics on the propagation of radio waves.

2. *Development.*—This activity includes the development of new and improved standards of measurement, instruments, instrumentation techniques, methods of measurement and analysis, and commodity testing techniques. Materials, devices, and technological processes in fields of importance to national welfare are also developed.

3. *Testing, calibration, and specifications.*—This activity includes the comparison of working standards used in scientific investigations for engineering, manufacturing, communication, commercial, and educational activities with the national primary standards. It also includes the preparation of standard samples of accurately known composition or characteristics and the formulation of specifications and standards for commodities and equipment.

4. *General technical services.*—This activity includes the provision of advisory and consultative services to other Government agencies, the operation of special technical installations, and the compilation and dissemination of scientific and technical data, such as data on propagation of radio waves which are analyzed for the prediction of radio propagation conditions.

PROGRAM AND PERFORMANCE

This appropriation provides for alterations and improvements to the plant facilities of the National Bureau of Standards and procurement of unusual items of equipment.

The Bureau's laboratories and administrative offices occupy 86 buildings located on a 69-acre tract in Washington, D. C. The Bureau also has a large laboratory on a 217-acre site at Boulder, Colo., and several small field sites, some of which are outside the continental limits.

1. *Facilities.*—This activity includes construction and other work required to effect necessary improvements in the Bureau's facilities. The budget provides $127,000 for minor construction and improvements, and $85,000 to continue the rehabilitation of the mechanical facilities of the Bureau.

2. *Special equipment.*—This activity includes the procurement of equipment which is not appropriate for purchase by the working capital fund and the replacement of passenger-carrying vehicles. The Bureau began work on the design and construction of a pilot electronic data processing device during 1956. The 1957 budget includes $200,000 to continue this project.

3. *Construction.*—Two construction items are proposed: A field station building at Maui, Hawaii, and at Anchorage, Alaska, at a total cost of $80,000.

## Construction of Facilities, National Bureau of Standards

*Construction of facilities: For acquisition of necessary land and the design of the facilities to be constructed thereon for the National Bureau of Standards outside of the District of Columbia to remain available until expended, $2,750,000, to be transferred to the General Services Administration. (40 U. S. C. 341, 15 U. S. C. 271–278c, 285, 286.)*

PROGRAM AND PERFORMANCE

This new appropriation provides for the work required in preparation for future construction of facilities for the National Bureau of Standards at a location to be selected outside the District of Columbia. The work will be carried out largely by private contractors under the supervision of the General Services Administration.

1. *Design and engineering.*—This includes the preparation of plans and specifications, engineering, and site selection.

2. *Construction.*—This covers preparatory work prior to beginning the construction, including surveys, purchase of land, and soil tests.

## WEATHER BUREAU

### Salaries and Expenses, Weather Bureau

Salaries and expenses: For expenses necessary for the Weather Bureau, including maintenance and operation of aircraft; purchase of [five] *three* passenger motor vehicles for replacement only; not to exceed $25,000 for services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); and not to exceed $10,000 for maintenance of a printing office in the city of Washington, as authorized by law; [$32,000,000 of which $4,250,000 shall be available only for the improvement and operation of hurricane, severe storm, and tornado warning services in the United States, including research related thereto, and construction of necessary facilities] *$35,500,000: Provided*, That during the current fiscal year, the maximum amount authorized under section 3 (a) of the Act of June 2, 1948 (15 U. S. C. 327), for extra compensation to employees of other Government agencies for taking and transmitting meteorological observations, shall be $5 per day; and the maximum base rate of pay authorized under section 3 (b) of said Act, for employees conducting meteorological investigations in the Arctic region, shall be [$6,000] *$6,500* per annum, except that not more than five of such employees at any one time may receive a base rate of [$8,500] *$9,000* per annum, and such employees may be appointed without regard to the Classification Act of 1949.

[For an additional amount for "Salaries and expenses", $500,000; and the limitation under this head in the Department of Commerce and Related Agencies Appropriation Act, 1956, on the amount available for improvement and operation of hurricane, severe storm, and tornado warning services, including research and construction of related facilities, is increased from "$4,250,000" to "$4,750,000".] *(5 U. PROGRAM AND PERFORMANCE

The Weather Bureau observes, records, reports, forecasts, and distributes information on weather conditions and river stages for the benefit of United States commerce, industry, agriculture, and the general public.

1. *General weather services.*—Regular forecasts are issued for United States territory and waters with special emphasis on floods and severe storms. Special forecasts and advisory services are provided for international and domestic aviation; fire-weather forecasts are furnished to assist in conservation of timber resources; and fruit-frost forecasts and warnings are prepared for areas where such crops form a major economic interest. Surface and upper-air observations are taken at several hundred locations to serve forecasting requirements. Current weather information is disseminated widely for the benefit of aviation and other interests. Several thousand voluntary and part-time observers record river stage, temperature, and precipitation readings for use in flood-control and water-use activities. All observational records are combined to form the climatic history of the United States and possessions.

2. *Research.*—Research is directed primarily toward the development of new operational and forecasting techniques directly applicable to major service programs, but also includes some supplemental studies of basic meteorology and meteorological physics. Intensive investigations of hurricanes and tornadoes will be continued on an expanded basis.

PROGRAM AND PERFORMANCE

The accuracy of meteorological observations, forecasts, and warnings is being improved by the installation of new observational instrumentation, by the modernization of existing meteorological facilities, and by the procurement and installation of special equipment for hurricane and tornado research purposes. The estimate provides for rehabilitation of housing facilities at remote locations in Alaska, procurement of radar equipment for the detection of severe storms, and end-of-runway equipment for the safety of aircraft during landing operations.

### GENERAL ADMINISTRATION

*Defense Production Guaranties, Commerce*

Guaranties are given on loans made by private sources or Federal Reserve banks to facilitate performance of defense production contracts. Guaranty fees are used to pay Federal Reserve banks which serve as fiscal agents. Net earnings are retained to meet possible future losses (Defense Production Act of 1950, sec. 301, as amended).

Owing to decrease in level of activity and to the absence of continuing legislation, no estimate is submitted for 1957.

### MARITIME ACTIVITIES

**Vessel Operations Revolving Fund, Maritime Activities**

Vessel operations revolving fund: Hereafter the vessel operations revolving fund, created by the Third Supplemental Appropriation Act, 1951, shall be available for necessary expenses incurred, in connection with protection, preservation, maintenance, acquisition, or use of vessels involved in mortgage-foreclosure or forfeiture proceedings instituted by the United States, including payment of prior claims and liens, expenses of sale, or other charges incident thereto; for necessary expenses incident to the redelivery and lay-up, in the United States, of ships now chartered under agreements which do not call for their return to the United States; *for activation, repair and deactivation of merchant ships chartered under the jurisdiction of the Secretary of Commerce;* and for payment of expenses of custody and husbanding of Government-owned ships other than those within reserve fleets: *Provided,* That [not to exceed $1,500,000 of the funds of the vessel operations revolving fund may be used during the fiscal year 1956 for the purposes set forth in this paragraph] *said fund shall be credited with all receipts from charter of Government-owned ships under the jurisdiction of the Secretary of Commerce.* (*Department of Commerce and Related Agencies Appropriation Act, 1956.*)

PROGRAM AND PERFORMANCE

This fund was created in 1951 to finance direct operation and charter of cargo vessels to carry the heavy military and foreign-aid shipments growing out of the Korean emergency (65 Stat. 52). Since mid-1952, operations have been limited to military requirements. In 1956 the fund was made available for expenses of certain chartering and ship custody contingencies, such as custody of ships in mortgage-foreclosure or forfeiture proceedings, redelivery and layup of certain presently chartered ships, and custody and husbanding of Government ships other than those in reserve fleets (65 Stat. 226). The 1957 budget proposes language which would (*a*) make the fund available for expenses of activation, repair, and deactivation of vessels chartered in domestic and foreign commerce, and (*b*) authorize deposit in the fund of charter hire revenue now going into miscellaneous receipts.

The initial appropriation to the fund was $20 million. In 1955, $10 million of that appropriation was repaid to the Treasury, and the remaining $10 million is proposed for repayment in 1956.

ANALYSES OF BUDGET PROGRAMS

Three main activities are financed in the fund:

1. *Vessel operations.*—Cargo vessels are operated by private operators acting as agents of the Maritime Administration to carry shipments for the Military Sea Transportation Service. Ships operated under the fund reached a peak of 538 in April 1952, and declined steadily thereafter to 37 on June 30, 1955. It is anticipated that 12 additional ships will be activated in 1956 and continue to be operated throughout 1957.

2. *Charter operations.*—As of June 30, 1955, 26 Government-owned ships were under charter to private operators. However, the fund was authorized to receive charter hire revenue and incur expenses, like owners' repairs, layup, etc., on only 14 of these ships. Charter hire revenue on the balance of the ships went into miscellaneous receipts. During 1956, the total number of chartered ships is expected to decline to 17, and the number financed in the fund will remain at 14. In 1957, it is anticipated that the total number of ships will increase to 30, all of which, under the proposed language, would be financed in the fund.

3. *Vessel custody and contingencies.*—This activity provides primarily for expenses of custody and layup of vessels (*a*) involved in mortgage-foreclosure proceedings or, (*b*) forfeited by owners for violation of shipping laws.

### MARITIME ACTIVITIES—Continued

#### Vessel Operations Revolving Fund, Maritime Activities—Con.

In 1955, this activity was financed by direct appropriation. In 1956, it is expected that the fund will incur expenses of $385,000 to lay up 7 forfeited tankers. No expenses are now forecast for 1957.

| Under charter | 26 | 17 | 30 |
| Loaned to other agencies | 72 | 72 | 72 |
| Total | 135 | 138 | 151 |

OPERATING RESULTS AND RETAINED EARNINGS

After repayment of the remaining $10 million of appropriated capital in 1956, the Government's investment will consist entirely of retained earnings estimated to be $36.7 million on June 30, 1957. In view of present conditions, retention of these earnings in the fund is necessary to provide for (*a*) working capital for current ship operations, and chartering and custody contingencies, and (*b*) rapid expansion of shipping services in the event of emergency.

1. *Vessel operations.*—Rates charged the Military Sea Transportation Service cover full costs. Net income of $320,162 was earned in 1955 and estimates of $960,378 and $470,700 are indicated for 1956 and 1957, respectively.

2. *Charter operations.*—The estimated decline in charter-hire revenue from 1955 to 1956 is based upon the removal of nine vessels from charter in 1956. The increase in charter-hire revenue of $1.6 million in 1957 reflects (*a*) deposit in the fund of charter hire now going into miscellaneous receipts, and (*b*) increase in the total number of ships chartered. This increase will be offset by an initial expense of $1.5 million for activation of additional ships for charter, so that estimated net income in 1957 of $2,656,000 will be about the same as that in 1956.

3. *Vessel custody and contingencies.*—Since there is no income for this activity, any expenses become net losses.

*Federal Ship Mortgage Insurance Fund, Revolving Fund, Maritime Activities*

PROGRAM AND PERFORMANCE

The Maritime Administration is authorized to insure mortgages on certain types of cargo and passenger-carrying vessels and other watercraft. Premiums for insurance and certain incidental fees are deposited in this fund and, together with such amounts as may be appropriated, are available for the redemption of any defaulted mortgages. As of June 30, 1955, the total of the unpaid mortgages on four vessels insured under this fund was $2,204,167. However, by the end of fiscal year 1957, it is anticipated that insured mortgages will total approximately $225 million, the increased activity resulting from new applications being filed for consideration under the provisions of Public Law 781, approved September 3, 1954 (68 Stat. 1267–1276) which facilitates private financing of new ship construction. Retained earnings of $1.5 million are expected at the close of 1957.

*War Risk Insurance Revolving Fund, Maritime Activities*

PROGRAM AND PERFORMANCE

This fund was established to provide war-risk insurance in the event that commercial insurance is not available at reasonable terms and conditions during time of war (46 U. S. C. 1281, 1288). Commercial war-risk insurance policies are at present subject to an automatic termination clause upon the outbreak of war between any of the four powers: United States, France, Great Britain, and the United Soviet Socialist Republics. As of June 30, 1955, interim binders for war-risk hull, protection and indemnity, and second seamen's insurance, which becomes effective upon the outbreak of war, had been issued covering approximately 880 vessels and $3.7 billion of insurance. The underwriting authority covering this program has been extended to September 7, 1960 by 46 U. S. C. 1294.

The transfer of $10 million is authorized from the vessel operations revolving fund to this fund if it becomes necessary to provide insurance coverage (65 Stat. 747). To date no transfers have been made and none are anticipated in fiscal years 1956 or 1957. At present the income of the fund comes from insurance premiums and fees paid for issuance of the interim binders. Expenses of the fund consist of fees paid to underwriting agents, travel expenses for marine insurance experts, and for contract appraisal costs. Retained earnings of $289,114 are expected at the close of 1957.

## INLAND WATERWAYS CORPORATION

### Inland Waterways Corporation Fund

*The following corporation is hereby authorized to make such expenditures, within the limits of funds and borrowing authority available to such corporation and in accord with law, and to make such contracts and commitments without regard to fiscal year limitations as provided by section 104 of the Government Corporation Control Act, as amended, as may be necessary in carrying out the programs set forth in the Budget for the fiscal year 1957 for such corporation, except as hereinafter provided:*

PROGRAM HIGHLIGHTS

The physical facilities and operating rights of the Inland Waterways Corporation, created by Act of June 3, 1924, were sold to Federal Barge Lines, Inc., a subsidiary of the St. Louis Shipbuilding & Steel Co., as of July 1, 1953, for $9 million, to be paid through a long-term mortgage, bearing interest at 3¾ percent. As of June 30, 1955, the purchaser had paid $0.8 million on the principal, and interest of $0.7 million.

During 1956 and 1957, activity will be largely confined to liquidation of outstanding claims and settlement of suits. Successful defense of suits in 1955 resulted in savings of $0.2 million that had been reserved at time of sale. Additional savings by such writeoffs are anticipated in 1956 and 1957.

*Operating results.*—Net income of $271,850 is expected in 1957, consisting of interest collections, less a small amount of administrative expenses.

*Effect on budget expenditures.*—The favorable operating results forecast, together with annual payments on the principal and interest of the mortgage should continue, as in 1955, to produce a net budgetary receipt each year of about $0.6 million.

*Financial condition.*—The Corporation's capital of $27.3 million had been depleted to $11.5 million at the end of 1955. Favorable results in excess of $0.5 million in 1955 predict the recovery of $0.8 million additional by the end of 1957.

The purchaser has been engaged in rehabilitating the equipment of the water line, by sale of dilapidated and outmoded equipment, upon approval by the Secretary of Commerce. The proceeds of such sales are augmented to the extent necessary by financing. Notwithstanding the burden of this additional financing, financial statements of Federal Barge Lines, Inc., reflect a reasonable return on its investment.

*Working Capital Fund, Department of Commerce*

PROGRAM AND PERFORMANCE

This fund finances, on a reimbursable basis, common services which can be performed with greater advantage centrally (5 U. S. C. 607). On June 30, 1955, the principal of the fund consisted of $100,000 appropriated and $247,965 donated assets. Retained earnings are estimated to be $225,520 on June 30, 1957, and are retained to provide adequate working capital. During 1955, $100,000 which was surplus to requirements of the fund was returned to the Treasury.

*Federal-aid highways and forest highways, Bureau of Public Roads* (under existing and proposed legislation, 1956, and proposed legislation, 1957).—Federal-aid and forest highways authorizations provided in the 1954 Federal-Aid Highway Act have all been apportioned among the States. New authorizing legislation is therefore required. For this purpose $875 million is included for the Federal-aid highway program and $22.5 million for the forest highway program, reflecting at this time the levels authorized in the 1954 Highway Act.

A supplemental appropriation of $100 million is required in 1956 to reimburse the States for the Federal share of work done under Federal-aid highway authorizations.

Also in 1956, a supplemental appropriation of $4 million is required to pay obligations incurred under authorizations for construction of forest highways provided in the 1954 Federal-Aid Highway Act.

Because of the widespread damage to Federal-aid highways caused by floods during the summer of 1955, an increase of $10 million in the annual authorization for grants to States for repair of such damage will be required during 1956.

## CURRENT AUTHORIZATIONS

INTRODUCTORY STATEMENT

The 1957 budget for the Military Functions of the Department of Defense is based on the same general concepts and policies which have guided the development of the defense program over the past several years. It provides for approximately the same number of active-duty military personnel as planned for the end of the current fiscal year and for an increase in the number of units employing new weapons and units assigned to continental air defense.

Continued emphasis is given to the development of ready retaliatory forces of tremendous striking power and to a continental defense system of steadily increasing effectiveness. Provision is also made for other essential forces required in general war and to assist our allies in meeting local aggression. The combat effectiveness of all forces will be improved by the continued modernization of weapons and equipment.

The Army, at the end of 1957, will be supporting 19 divisions, 10 regiments, and 143 antiaircraft battalions, together with an increased number of nondivisional units employing weapons with atomic capabilities. The Navy will be operating 1,005 active ships, including 411 major combatant ships, 17 carrier air groups, and an increased number of air early warning squadrons for the continental defense. The Marine Corps will continue to maintain three divisions and three air wings. The Air Force will complete its buildup to the 137 wing goal and will continue, jointly with the Army and Navy, to expand and improve the continental air defense system.

An increase in funds for operations and maintenance is provided because of the larger number of air bases, radar and NIKE sites which must be supported and the higher cost of operating and maintaining the expanding inventories of newer and more complex weapons and equipment.

Aircraft procurement and shipbuilding will continue at about the 1956 levels, but procurement of guided missiles will increase substantially. Procurement of ammunition, tanks, trucks, and so forth, requirements for which have been largely met from prior year funds, will continue to decline. Electronics procurement for the continental defense system and for electronic countermeasures will remain high.

Funds requested for military public works, as in the current fiscal year, are required principally for air bases and for the continental defense system. Continuation of the present high level of research and development is also provided.

Increased funds are included for the expanding Reserve Forces program, reflecting the implementation of the Reserve Forces Act of 1955.

Further economies in the operations of the Defense Department are anticipated through the extension of industrial and stock funds. The industrial funds are applicable to industrial and commercial type activities in the Department of Defense and the stock funds to consumption-type inventories. Both provide a business type buyer-seller relationship between the activity and its customers, thereby stimulating economy and efficiency. The worth of these procedures has been clearly demonstrated.

In the fiscal year 1957, the Army will further extend industrial funding to additional installations where appropriate. The Navy will nearly complete its coverage of installations of an industrial nature. Beginning in 1957, and proceeding as rapidly as practicable, the Air Force will place the Military Air Transport Service under industrial fund financing. During that fiscal year the Air Force will also extend industrial funding to major overhaul and maintenance of aircraft and components. Authorization will be requested to provide the initial working capital required in 1957, by transfer as needed, of not to exceed $150 million from the Army and Navy industrial funds.

The scope and coverage of Service stock funds will be extended further during 1957. The Navy has utilized stock funds since 1893 and plans to extend coverage to additional items. The Army started its stock fund operation in 1951 and now has substantially complete coverage of depot stocks and partial coverage of stocks at posts, camps, and stations in the United States. In 1957 the Army will extend its coverage to additional items and to stocks at other installations. The Air Force began its stock fund in 1950, and will continue to expand its coverage in 1957.

Notwithstanding the extension of coverage, the stock funds will again accumulate funds excess to their needs during the current fiscal year. Authorization will be requested to transfer $785 million from Army, Navy, and Marine Corps stock funds for use in meeting the requirements for new obligational authority for the general appropriations of the Department of Defense for 1957.

PROGRAM AND PERFORMANCE

The Secretary of Defense serves as the principal assistant to the President on all matters relating to defense and exercises over the Department of Defense the direction, authority and control vested in him by the National Security Act. He is assisted by the Deputy Secretary of Defense, nine Assistant Secretaries of Defense, the General Counsel, the Joint Chiefs of Staff, and such special

assistants as are required, including the Chairman of the Military Liaison Committee to the Atomic Energy Commission, who also serves as the Assistant to the Secretary of Defense on all atomic energy matters.

The increase over the current fiscal year is due primarily to a new contractual arrangement with the Massachusetts Institute of Technology for assistance to the Department of Defense in weapons systems analysis and evaluation.

PROGRAM AND PERFORMANCE

These funds provide for tools, equipment and facilities for current production purposes and for a specialized reserve in excess of current requirements in order to provide a military end-item production capacity of a long-lead-time character, the lack of which would constitute a serious bottleneck in the event of full mobilization. Funds will be transferred, upon approval by the Director of the Bureau of the Budget, to any appropriation for military functions after analysis of program requirements.

RETIRED PAY—continued

### Retired Pay, Department of Defense—Continued

PROGRAM AND PERFORMANCE

This estimate includes funds for the pay of all military personnel on the retired lists of the Department of Defense, and represents the consolidated requirements of the military departments for (1) payments to retired officers and enlisted personnel of the Army, Navy, Marine Corps, and Air Force, (2) the retainer pay of regular enlisted personnel of the Fleet Reserve of the Navy and Fleet Marine Corps Reserve, and (3) survivors benefits payable under the Uniformed Services Contingency Option Act of 1953. No administrative expenses are paid from this account. The more liberal retirement policies, the forced separation program of officers and the return of recalled retired personnel to the retired list have resulted in a significant increase to the retired rolls.

PROGRAM AND PERFORMANCE

The United States Court of Military Appeals serves as the court of last resort for all of the more serious court-martial convictions of military personnel. The number of cases docketed in 1954 and 1955 totaled 2,038 and 1,909, respectively. A comparable number is anticipated for the next fiscal year on the basis of the present strength of the Armed Forces.

In compliance with the mandatory requirement of the Uniform Code of Military Justice, the court maintains a current docket with the review completed in 97 percent of the cases filed.

PROGRAM AND PERFORMANCE

Provision is made for advances to the Coast Guard for construction of additional loran stations in areas essential to the defense of the United States. An electronic system of navigation which provides to ships and aircraft continuous navigational positions by means of intersecting lines of position, loran coverage permits safe and effective operation of Navy and Air Force ships and aircraft in all kinds of weather, day or night. The 1956 program provides for seven stations.

It is anticipated that a supplemental estimate will be submitted later to cover additional stations in 1957.

Program and Performance

Foreign currencies, generated by the sale of agricultural surplus commodities under title I of the Agricultural Trade Development and Assistance Act of 1954, may be allocated to the Department of Defense to finance the construction of housing for our military personnel and families stationed abroad. The Department of Defense will pay the Commodity Credit Corporation in dollars, as authorized by Public Law 161, 84th Congress, from appropriations otherwise available to pay quarters allowances to military personnel occupying the housing, for the foreign currencies used to provide this housing. An estimated $30 million of housing may be constructed in five foreign countries on this basis, using proceeds of sales agreed to by September 30, 1955.

Reimbursements from non-Federal sources are principally from the sale of goods and services to authorized individuals, and include such items as laundry services, subsistence of hospital patients, surcharges on commissary sales, and unofficial telephone service.

PROGRAM AND PERFORMANCE

Provision is made for all maintenance and operational activities of the Army.

1. *Command and management.*—This provides for civilian personnel and other expenses of headquarters at the Department of the Army in Washington, the Continental Army Command, the six Army areas, the Military District of Washington, antiaircraft commands, and oversea commands.

2. *Evaluation system.*—This covers activities and operations under the Assistant Chief of Staff for Intelligence, including the Army Attaché System, the Army Intelligence Center, the Army Map Service, and certain related contingencies.

3. *Training.*—Provision is made for the training of individuals (other than medical personnel), including the operation of replacement training centers and training divisions, the Army War College, the Command and General Staff College, the United States Military Academy and various combat, service, and technical schools. Also included are training at civilian institutions, training aids, films and publications, and special field exercises.

4. *Supplies and minor equipment.*—This covers most supplies used by troops except individual clothing, subsistence, repair parts, and major items of materiel. Included are the procurement of minor items of organizational equipment, petroleum products, office supplies and equipment, and miscellaneous installation equipment, such as mess equipment and furniture.

5. *Procurement operations.*—This is for the operation of all procurement offices (except medical) throughout the world. Also included is the Army's share of the governmentwide cataloging and standardization programs.

6. *Supply distribution and maintenance.*—This provides for the receipt, storage, distribution, maintenance, and disposal of Army supplies and equipment (except medical) throughout the world. These supplies and equipment are purchased from other activities and funds. Included are the operation of 49 supply depots within the United States and 59 in oversea areas. Also included are the supply activities at all Army posts and camps, maintenance of equipment issued to troops, the procurement of repair parts and materials, and operation of supply control points.

7. *Army Reserve and Reserve Officers' Training Corps.*—This covers the operation of training facilities for the Army Reserve and the Reserve Officers' Training Corps units at camps, institutions, and home stations; operation of military district headquarters, and expenses for Army Reserve recruiting.

8. *Joint projects.*—These are activities of an interdepartmental or defense establishmentwide nature for which the Army has been assigned administrative responsibility. Included are such activities as the National War College, the Industrial College of the Armed Forces, the joint alternate communication center, certain joint headquarters in oversea areas, and the Armed Forces information and education program.

9. *Other operational activities.*—This covers costs of tactical operations and miscellaneous support costs of tactical units.

10. *Armywide services.*—Administrative services consist of the adjutant general records centers, the criminal investigation program, mail costs, welfare and morale activities for military personnel, religious activities, the education of dependents overseas, procurement and processing of military personnel, expenses of courts, boards, and commissions, and operation of disciplinary barracks and rehabilitation centers. Logistics services include the operation and maintenance of armywide communication services, real estate management, engineer planning, the disposition of remains, the movement of freight, both by commercial transportation and by the Military Sea Transportation Service, and the operation of ports and other transportation facilities. ### Military Construction, Army Reserve Forces—Continued

PROGRAM AND PERFORMANCE

This program is to provide adequate training and storage facilities for training the Army National Guard and the Army Reserve. To the greatest practicable extent, facilities are utilized jointly by two or more units of the Reserve forces.

1. *National Guard armory construction.*—Requirements include construction of new armories and expansion of existing armories. Two hundred and twenty-five projects were initiated in 1955.

2. *National Guard nonarmory construction.*—Requirements include construction of maintenance shops, liaison airplane hangars, and storage facilities, and improvement of field training sites.

3. *Army Reserve construction.*—Requirements include acquisition of Army Reserve training centers and motor vehicle storage buildings by construction, purchase, or expansion of existing facilities. During 1955 contracts were awarded for 22 projects. The number in 1956 will be substantially higher and will continue to increase in 1957.

PROGRAM AND PERFORMANCE

Provision is made for training the Army Reserve and the Reserve Officers' Training Corps.

1. *Army Reserve.*—Included are funds for military personnel costs of pay, travel, subsistence, and clothing. Provision is made for paid drills for members of organized units, personnel assigned to USAR schools as students, and mobilization designees. A mandatory tour of active duty for training is provided each year for members in drill pay status. School training is provided for selected members of the Ready Reserve.

This program operates under the provisions of the Reserve Forces Act of 1955. It is planned in 1957 that 88,000 enlisted persons and 4,500 commissioned ROTC graduates will enter the 6-month training program provided under the act. The number of persons who are in the 6-month training phase at the end of the fiscal year, estimated at 34,738 on June 30, 1956, and 50,695 on June 30, 1957, are not included in the planned drill pay status strengths, in the following table, until after completion of the 6-months' training.

PROGRAM AND PERFORMANCE

National Guard personnel are trained in their respective units in 48 armory drills and 15 days field training. Enlisted men of grade E–2 and below may volunteer for 6 months' active-duty training under the provisions of the Reserve Forces Act of 1955. Selected personnel receive specialized training at Army schools and command post exercises. The States, Territories, and the District of Columbia also provide support for the Army National Guard.

In 1957 the number of local units is programed to increase from 5,260 to 5,360 as a result of adjustments in the Army troop basis. Additionally, 51 engineer units formally known as Special Category Army with Air Force units are being transferred from the Air National Guard to the Army National Guard effective March 1, 1956. The structure of the major units will be maintained at 27 divisions, together with combat support units. The military personnel strength is summarized in the following table:

## CURRENT AUTHORIZATIONS—Continued

## DEPARTMENT OF THE ARMY—Continued

ARMY NATIONAL GUARD—continued

### Army National Guard—Continued

The strength now planned at the end of fiscal year 1956 is lower than that provided for in the 1956 appropriation in view of difficulties in accomplishing net increases at the rate previously anticipated. Present plans are to give greater emphasis to improvements in the readiness and quality of National Guard units.

1. *Military personnel.*—Army National Guardsmen attending armory drills, including weekend training, receive basic pay; those participating in field training, 6 months' training or attending schools receive additional allowances. Subsistence is provided for enlisted men during active duty training and for both officers and enlisted men at weekend training. Provision for travel is made for the active duty training programs. Uniform clothing is provided for enlisted men, and monetary uniform allowance for officers.

2. *Command and management.*—This provides for the administrative expenses of the National Guard Bureau (except the Air Division), including civilian salaries, military and civilian travel, printing and reproduction requirements, and for a program to assist the States in recruiting.

3. *Training.*—This provides for expenses of armory drill and field training, including travel of Regular Army personnel, transportation of supplies and equipment, and miscellaneous supplies and services.

4. *Materiel.*—Organizational and individual equipment, and other necessary materiel are provided for unit training.

5. *Supplies and repair parts.*—Supplies and repair parts, training aids, publications, and organizational and office supplies are provided.

6. *Services, including equipment maintenance.*—Provision is made for transportation, travel, communication and miscellaneous services, for the support of units, for an average strength of 17,870 State civilian employees for the administration of units and the storage, issue, maintenance and repair of supplies and equipment; for maintenance, repair and utility costs at National Guard facilities; and for opening, operating, and closing State and Federal training camps.

7. *Antiaircraft defense.*—This provides for the operation of National Guard AAA units, occupying AAA sites, as part of the antiaircraft defense of the continental United States. Included are an average of 2,392 State civilian employees who maintain onsite equipment on a 24-hour standby operational readiness; and for spare parts, supplies, and services for the maintenance and operation of equipment and facilities.

PROGRAM AND PERFORMANCE

This appropriation provides for the application of scientific and technical resources to the problems of providing the Army with the firepower, mobility, intelligence, and supporting capabilities necessary to meet the changing conditions of modern war. The work is carried on under contracts with industry and other private institutions, and in research, development, and test facilities of the Army and other Government agencies.

1. *Aircraft and related equipment.*—This activity covers research and development of piloted aircraft, including propulsion systems and other equipment. Emphasis is on short-takeoff fixed and rotary-wing aircraft of increased range and all-weather capability.

2. *Guided missiles and related equipment.*—The objective of this program is the development of surface-to-air missiles for air defense and surface-to-surface missiles for support of ground troops in land combat. Propulsion and guidance systems and other related equipment are also developed under this activity.

3. *Ships and small craft and related equipment.*—Small craft for transport, reconnaissance, and assault use are under development.

4. *Combat and support vehicles and related equipment.*—This program includes a variety of vehicles ranging from tanks and self-propelled guns to personnel and cargo carriers.

5. *Artillery and other weapons and related equipment.*—Rocket launchers for advanced weapons are included in this activity in addition to improved field guns, howitzers, mortars, small arms, and other weapons, together with fire control and other related equipment.

6. *Ammunition and related equipment.*—Emphasis is placed on new types of ammunition such as rockets, as well as on increased effectiveness of artillery ammunition, mines, grenades, and small-arms ammunition. Improved explosives and propellants are included.

7. *Other equipment.*—Development of a wide variety of supporting equipment for communications, construction, reconnaissance, mapping, and other purposes is carried on under this activity. Among these developments is the nuclear package powerplant program.

8. *Military sciences.*—This provides for basic and applied scientific research of general application to military problems and for the development of materials and components not directly associated with other items under development. Examples of the areas of research under this activity are medical research and research in the use of radiation in preserving food.

9. *Operation and management of facilities.*—Included in this activity are support costs for operation, maintenance, and management of research, development, and test facilities not charged directly to other budget activities.

ALASKA COMMUNICATION SYSTEM—continued

### Operation and Maintenance, Alaska Communication System—Con.

PROGRAM AND PERFORMANCE

This system provides internal and external telegraph and long distance telephone service for the Territory of Alaska. In 1955, the value of governmental and commercial use was $6.3 million, the estimated value in 1956 is $6.4 million and in 1957 is $6.8 million. Revenue from commercial customers was $2.8 million in 1955 and is estimated at $3.1 million in 1956 and $3.3 million in 1957.

1. *Construction of telephone, telegraph, and cable systems.*—Completion of planned construction work is to be accomplished by end of 1957.

3. *Improvement of fire protection systems.*—A special project is planned for installation of automatic fire-alarm and sprinkler systems at a number of installations in order to reduce the risk of loss of lives and property.

4. *Maintenance and operation of the communication system.*—Provision is made for normal expenses incident to maintenance and operation of the system, exclusive of costs of pay, allowances, subsistence, and medical care of military personnel utilized.

PROGRAM AND PERFORMANCE

This account provides for the construction of operational buildings and utilities to house technical equipment, barracks to house enlisted men, and family quarters for the housing of operating personnel. No obligations for such projects are planned in 1957, pending further consideration of the relationship of additional construction to possible changes in the operation of the system.

NOTE.—Reimbursements from military assistance fund reservations in 1955 are adjusted for transactions to equalize military assistance expenditures and deliveries (68 Stat. 1224).
Reimbursements from non-Federal sources are derived primarily from agreements with foreign governments and local communities (61 Stat. 501, 675, 774; 63 Stat. 576).

PROGRAM AND PERFORMANCE

Provision is made for the procurement of major supplies and equipment, including ammunition, necessary to equip, maintain, and train the active Army and the Reserve forces; and for the provision of facilities essential to production requirements.

This program is based upon the concept of reducing emphasis on the continued production of conventional weapons as early as is practicable in the light of new developments. Reliance is being placed on maintaining production lines at minimum rates where practicable, rather than on the accumulation of the full reserves to support the current mobilization plan.

1. *Major equipment.*—Provision is made for procurement of weapons and vehicles actually used for combat; vehicles, both tactical and quasi-commercial, which are used for general purposes; Army aircraft, including helicopters; electronics and communications equipment; and other major items of equipment used by the Army. Pro-

curement in 1957 will be principally for aircraft and newly developed weapons, electronics and other equipment.

2. *Ammunition and guided missiles.*—Provision is made principally for guided missiles assigned to the Department of the Army for procurement. In addition, some procurement of ground explosives and ammunition used with conventional weapons will be made where necessary.

3. *Industrial mobilization.*—Provision is made for the rehabilitation and expansion of manufacturing facilities to meet production requirements; for pilot-line production and for production engineering tests leading to reduction in the use of critical materials and manpower; and for the layaway of Government-owned production facilities and equipment as they are released from production.

PROGRAM AND PERFORMANCE

This appropriation finances procurement of new aircraft, guided missiles, and their supporting equipment for the Navy and Marine Corps. It also finances the procurement of specialized training equipment, ground electronic equipment required in connection with aircraft and missile operations, and the modernization of service aircraft.

1. *Aircraft procurement.*—Procurement requirements for new aircraft are based on the projected operating program, and replacement of attrition losses and obsolescence. The 1957 procurement program is designed to continue the modernization of the operating forces.

2. *Guided missile and target drone procurement.*—Procurement of guided missiles for service use is being continued in 1957 at approximately current levels. Increased emphasis is being placed on operational evaluation of newly developed missiles to accelerate introduction of these models into the fleet.

3. *Training equipment.*—Operational flight trainers, specialized maintenance trainers, and minor training aids are financed under this activity. Programed procurement has been phased with the new aircraft being procured under activity 1.

4. *Aircraft modernization.*—Whenever practicable, aircraft in inventory are modernized or converted to meet greater operational requirements and reduce new aircraft procurement requirements. The 1957 estimate provides newly developed electronics, armament and instruments for installation in service aircraft so that they may operate concomitantly with the new aircraft models being delivered to the fleet directly from production lines.

5. *Ground electronics and detection equipment.*—Positive control of high speed combat aircraft necessitates a continuing program to modernize and improve air station communication and navigation equipment for air operations. The 1957 estimate provides for continuation of this modernization program.

NOTE.—Reimbursements from military assistance fund reservations in 1955 are adjusted for transactions to equalize military assistance expenditures and deliveries (68 Stat. 1224).

Reimbursements from non-Federal sources above are from proceeds of sale of utilities and related services (10 U. S. C. 1269 and 63 Stat. 576), and refund of terminal leave payments (5 U. S. C. 61b).

PROGRAM AND PERFORMANCE

This appropriation finances the operating costs of naval aviation, which consists of the air combat forces of the Regular Navy and Marine Corps, supporting service and training forces, the Naval and Marine Air Reserves, air weapons and air techniques, naval air stations and other related shore facilities.

1 and 2. *Flight operations, Regular Navy and Naval Reserve.*—Flight operations are programed for 1957 at 1956 force strengths for major units, projected at peacetime flying rates, but reflect the impact of a larger percentage of modern high-performance aircraft comprising the combat operating complements in 1957.

3. *Aircraft overhaul.*—Provision is made for an overhaul workload to accord with operating strength and level of flight operations programed for 1957. Unit workload factors contemplate improved efficiency over 1955 experience, and cost factors reflect prices current in October 1955.

4 and 5. *Station operations, Regular Navy and Naval Reserve.*—General operating and maintenance costs of Regular and Reserve Navy and Marine Corps stations, whose missions are predominantly air, are budgeted in 1957 at approximately their 1956 levels except where provision has been made for supporting more extensive jet aircraft operations in combat units and the Training Command, and additional overseas air operations in both Atlantic and Pacific ocean areas.

6. *Alteration and replacement of facilities.*—Provision is made for essential structural repairs to aeronautical shore facilities, adequate maintenance of industrial reserve aircraft plants and tools, and necessary replacement of landing aids and aircraft overhaul shop equipment.

7. *Supporting equipment, materiel and services.*—Fleet operations are supported by the procurement of weather instruments, technical publications, essential ground equipment, and aerial cameras and related photographic equipment. Improvement of production methods, evaluation of newly developed equipment, standardization of material and equipment, and maintenance of shipboard catapults and arresting gear are also included.

PROGRAM AND PERFORMANCE

1. *Maintenance and operation of the active fleet.*—Provision is made for the overhaul, both scheduled and nonscheduled, of active fleet ships and for their necessary supplies and equipage.

2. *Active fleet alterations and improvements.*—This allows for a comprehensive program of military and technical alterations and improvements to vessels of the active fleet. Included in this are programs for shipboard habitability improvements, alterations of installed ordnance, and evaluation of newly developed items by the operating forces.

3. *Technical support programs.*—Provision is made for a wide range of programs which contribute directly or indirectly to fleet maintenance. These programs are—the maintenance of service craft at shore activities; commissioning and outfitting of vessels; preparation or procurement of certain design work; salvage operations; charter and hire of vessels, furnishing private electronic engineers to supplement fleet and shipyard technical capabilities; and support of ocean weather stations operated by the Coast Guard.

4. *Maintenance and preservation of reserve fleet.*—This program allows for limited maintenance on reserve vessels; provides for maintenance, repair, preservation of hulls, machinery, and ordnance equipment, improvement of reserve fleet ships, and the inactivation of ships.

5. *Maintenance and operation of Naval Reserve training vessels.*—Provision is made for maintenance, operation, alteration, and improvement of ships assigned to the Naval Reserve training program.

6. *Fuel for ships.*—This includes fuel, water, and utility services for ships and service craft of the Active fleet and the Reserve fleet, and for Naval Reserve training vessels.

7. *Procurement and rehabilitation of maintenance material.*—This project finances the procurement of the wide range of shipboard hull and machinery components required for the fleets; the rehabilitation of components turned into store; and maintenance repair parts for support of the servicewide cryptographic system.

8. *Fleet support facilities.*—This covers fleet support and plant improvements at 11 naval shipyards and 8 Bureau of Ships' laboratories; maintenance, operation, and miscellaneous charges at other shore stations; expenses of fleet activities assigned to the operating forces; maintenance of industrial facilities held in standby condition; care of machine tools and industrial equipment; industry preparedness measures designed to reduce lead and production time; and planning and scheduling mobilization equipment requirements. Provision is also made for procurement of equipment (except electronics) for regular Navy schools, Naval Reserve training facilities, advanced bases, and harbor defense; and inspection testing and standardization of material and equipment.

PROGRAM AND PERFORMANCE

This appropriation provides for basic and applied scientific research and for the development and improvement of weapons and equipment of the Navy. The work is conducted by contracts with industry, private research organizations, and universities; and by the research, development, and test facilities operated by the Navy and other Government agencies.

1. *Naval research.*—This program provides a major portion of the broad supporting work sponsored by the Navy to discover new scientific knowledge for military uses.

2. *Aviation.*—Development of new and improved aircraft, guided missiles, powerplants, electronic equipment, and related components.

3. *Ships.*—Scientific and technological advances in the design and construction of naval vessels, their machinery, electronics, and other equipment.

4. *Ordnance.*—Development of new and improved guided missiles, torpedoes, mines, ammunition, explosives, propellents, fire control, guidance systems, and related weapon system components; and applied and supporting research in ordnance technology and countermeasures.

5. *Medicine.*—Research and development in the fields of aviation medicine, shipboard and submarine medicine, general medicine and surgery, dentistry, and atomic medicine.

6. *Civil engineering.*—Applied research and development on problems related to engineering and construction.

7. *Supply.*—Research and development on problems relating to food, clothing, and logistics.

8. *Naval personnel.*—Research and development directed toward the analysis and solution of personnel problems.

9. *Marine Corps.*—Development of landing force equipment, tactics, and techniques.

PROGRAM AND PERFORMANCE

1. *Administrative headquarters for naval districts, bases, and stations.*—This is for support of the district headquarters, bases, and stations which contribute to the direction, coordination, and supervision of the Naval Shore Establishment.

2. *Service-wide communications.*—The naval communication system, a combination of leased and Government-owned communication facilities, supplies rapid and secure worldwide communications to the naval operating forces and the Naval Shore Establishment.

3. *Hydrographic Office.*—Hydrographic and oceanographic charts and publications essential for safe navigation of the Navy and the merchant marine and special tactical and strategic projects for the Department of Defense are produced, stocked, and distributed.

4. *Naval Observatory.*—Astronomical data are supplied for safe navigation. Accurate time is determined and time signals and time transmissions are controlled, not only for the Navy, but for the Nation. Continuous astronomical observations and research are conducted for the general advancement of navigation and astronomy. The residences of the Chief of Naval Operations and certain other flag officers are maintained.

5. *Inter-American affairs and support of international projects.*—Hemispheric defense is improved by standardization of equipment and training and operation of Latin-American navies in accordance with United States Navy standards. Provisions is also made for support of Trust Territory civil administration and certain unified commands.

6. *Departmental administration.*—Provision is made for expenses incurred at the seat of government by the Offices of (*a*) the Chief of Naval Operations in commanding the operating forces, (*b*) the Judge Advocate General in providing legal services for the Naval Establishment, (*c*) the Chief of Naval Research in coordinating and conducting naval research and development, and (*d*) the Secretary of the Navy in directing and supervising the Department.

7. *Printing equipment and related costs, printing plants.*—This provides funds for the purchase and installation of printing equipment for the 25 printing plants of the Defense Printing Service (Washington) and the Navy Printing Service (field).

8. *Field services.*—Provision is made for expenses incurred in the field by the Executive Office of the Secretary in administering the Navy-wide records administration, wage and classification, Fleet Home Town News, and internal audit and cost inspection programs. Included also are installation and maintenance of specialized training equipment which simulates operating problems and actual war conditions for use in individual and large-scale training and administration of all activities on behalf of the Department of the Navy relating to patents, inventions, trademarks, copyrights, royalty payments, and similar matters.

9. *Contingencies of the Navy.*—Expenditures for emergencies and for extraordinary requirements are provided for upon the approval of the Secretary.

PROGRAM AND PERFORMANCE

The 1957 program is designed to continue modernization of the 137-wing force with the latest and most advanced type of aircraft through 1959. This appropriation provides for (*a*) procurement of new aircraft and guided missiles with spare components, industrial facilities and equipment; and (*b*) modification of inservice aircraft, guided missiles, and components thereof.

1. *Aircraft and related procurement.*—New aircraft are procured in relation to the projected aircraft inventory required to support currently planned forces, estimated aircraft losses, obsolescence of aircraft in the inventory, and development of new models. This activity also provides for modification of inservice aircraft, and spare components thereof; and production facilities for expansion to maintain a reasonable production capability.

2. *Guided missiles.*—Guided missiles and associated equipment are procured to augment the combat capabilities of the Air Force in air defense, strategic air, and tactical air operations. This activity also provides for the modification of inservice guided missiles and spare components thereof.

PROGRAM AND PERFORMANCE

Provision is made for ammunition, equipment, components thereof, and supplies and materials, required by the Air Force, the Air Force Reserve, the Air National Guard and the Air ROTC. The requirements are for initial issue and replacement purposes in support of organizations and installations active or to be active under the 137-wing program. Initial issue requirements for the buildup in forces to 137 wings are largely satisfied. However, requirements for ground electronics and communications are expanding to provide for the implementation of air defense, navigation, and communications systems which are not directly associated with numbers of organizations or bases.

1. *Weapons, ammunition, and propellents.*—Ammunition is provided for a combat reserve, peacetime training of crews, and for service test of new types.

2. *Vehicular equipment.*—Provision is made for passenger motor vehicles, trucks and tractors, trailers, and materials handling equipment.

3. *Ground communication-electronic equipment.*—Provision is made for radar equipment, radio equipment, wire communication equipment, countermeasure equipment, cryptographic equipment, and meteorological equipment.

4. *Ground handling equipment.*—Provision is made for aircraft landing and launching equipment, aircraft ground

servicing equipment, airfield specialized trucks and trailers, and guided missiles ground handling equipment.

5. *Training equipment.*—Provision is made for training aids, armament training devices, operational training devices, and communication training devices.

6. *Support equipment and supplies.*—Provision is made for shop machinery and equipment, shop tools and materials, personal equipment, photographic equipment and supplies, printing equipment, office machines and equipment, furniture and furnishings, food service equipment, and service and trade equipment.

7. *Base maintenance equipment.*—Provision is made for engineering machinery and equipment, firefighting equipment, utility equipment, prefabricated structures, and decontaminating equipment.

PROGRAM AND PERFORMANCE

This appropriation provides for development and improvement of Air Force weapon systems, components, and equipment and for basic and applied research in fields of particular concern to the Air Force. The major portion of research and development work is carried out through contracts with industry, with the remainder carried out in universities and in Air Force and other governmental facilities. Testing and evaluation of newly developed items are carried on at the development and test centers of the Air Force.

1. *Aircraft and related equipment.*—This program provides for research and development of aircraft and related

aircraft equipment, including, for example, airframes, engines, armament, communications, navigation, bombing and fire control equipment.

2. *Guided missiles and related equipment.*—This program provides for research and development of air-to-air, surface-to-air, air-to-surface, and surface-to-surface guided missiles, guided missiles training and test vehicles and related equipment.

3. *Ammunition and related equipment.*—This program provides for the research and development of ammunition, rockets, bomb components such as fuses and propellents, and related ammunition equipment and components.

4. *Other equipment.*—This program provides for research and development of equipment not separately provided for under other budget programs including communications, construction, training, photographic, organizational, and personal equipment.

5. *Military sciences.*—This program provides for studies in the physical, engineering, and biological sciences to acquire fundamental knowledge applicable to the solution of development problems and studies of techniques and skills for which there will be a military requirement. These studies represent an extension of investigative findings and theories of a scientific or technical nature into practical applications. The program also includes development of general materiel and components.

6. *Operation and management.*—This program provides for the operation, management, and maintenance of research, development, and test facilities of the Air Force.

PROGRAM AND PERFORMANCE

1. *Operation of aircraft.*—Provision is made for consumption requirements of aviation fuel and oil and for service test quantities of new types of fuels and lubricants. The estimate contemplates adequate support of approved programs for the Regular Air Force and Air Force Reserve as the Air Force builds toward an authorized 137 wings.

2. *Logistical support.*—Provision is made for civilian personnel, contractual services, local purchase of supplies, and necessary additional support of (*a*) depot maintenance of the aircraft inventory, special purpose vehicles, and equipment; (*b*) operation of the Air Force depot supply system; (*c*) commercial transportation, other than first destination, of Air Force property from Air Force depots; ocean transportation of civilian personnel and materiel by the Military Sea Transportation Service; commercial airlift as directed by Headquarters USAF; and shipments from Army, Navy, and other agencies when made for the benefit of the Air Force; (*d*) commercial, Government, and contract printing; printing procured from Air Force printing plants financed from industrial funds; and central procurement of printed items; (*e*) procurement and production operations; industrial preparedness program; reserve production equipment maintenance; and maintenance of reserve plants; (*f*) disposition of deceased personnel; (*g*) installation of communications-electronics technical facilities; and (*h*) maintenance and operation of 36 logistical facilities on a worldwide basis.

3. *Training support.*—Provision is made for the training of the Regular Air Force, Air Force Reserve, Air Reserve Officers' Training Corps, students from the mutual defense assistance program and Latin America and other services. Training of Regular Air Force personnel consists of (*a*) basic military training for those entering without prior military service; (*b*) technical training in specialized fields; (*c*) flying training; and (*d*) professional training designed to qualify personnel for positions of greater responsibility. The estimate provides for an average basic military and technical training load during the latter part of 1956 and 1957 of 73,830. Pilot and observer training in fiscal year 1957 will be at the annual production rate of 6,248 pilots and 2,698 observers. In addition, 1,800 Army students will undergo Air Force pilot training. Air Force reservists will receive training at 42 Reserve flying training and 107 ground training locations. The Air Reserve Officers' Training Corps activities will be conducted at 188 educational institutions and 41 summer camp sessions. The Air Force Academy was established in August 1954 at the interim location, Lowry Air Force Base, Colo., pending construction of permanent facilities, and this estimate provides for support of the Academy. Class entry is 300 cadets per year, pending movement to permanent site. The cost of certain recruiting activities of the Air Force is also included in this estimate.

4. *Operational support.*—Provision is made for (*a*) the maintenance and operation of the installation and facilities required to support the primary combat missions and supporting operational missions assigned to Air Force Commands; (*b*) the operation of aircraft control and warning systems and tactical control systems; (*c*) operation of the aeronautical chart and information service; (*d*) the supporting operational requirements incident to air-combat maneuvers, rotational movements of Strategic Air Command and Tactical Air Command operational units, airways, and air-communication service, air-rescue service and other supporting services; and (*e*) installation of fixed communications-electronics technical components. In 1957 there will be 224 active operational support installations.

5. *Medical support.*—This program covers (*a*) medical support of the Air Force, Organized Reserves, and Reserve Officers' Training Corps; (*b*) operation and maintenance of Air Force medical treatment facilities in the United States and overseas; (*c*) medical care and hospi-

Funds are also provided for the Air Force pro rata share (one-third) of the total direct operating costs of the Armed Services Medical Procurement Agency and the expenses of administration of medical service of the Air Force at the departmental and major command levels.

6. *Service-wide support.*—Provision is made for (*a*) administration and management of the Air Force at departmental and major command headquarters and for finance services, audit agency, field investigative and inspectional services, and other specialized Air Force-wide services; (*b*) the leasing of Air Force-wide command and operational communications networks and systems; (*c*) operation and maintenance of air attaché and air mission offices, and expenses of Air Force participation in inter-American cooperation; and (*d*) the direct operation and maintenance expenses of Headquarters, United States Air Force, directed projects.

7. *Contingencies.*—This program provides for extraordinary expenses as approved by the Secretary of the Air Force and accounted for solely on his certificate.

### DEPARTMENT OF THE ARMY

*Army Industrial Fund*

AMOUNTS AVAILABLE FOR OBLIGATION

Reappropriation of prior year balance (5 U. S. C. 172)—1955, $150,000,000.

ANALYSIS OF TRANSFERS TO REVOLVING FUND

Obligations incurred during the year (total transfers to revolving fund out of current authorizations)—1955, $150,000,000.

PROGRAM AND PERFORMANCE

This fund finances industrial- and commercial-type activities on a reimbursable basis (5 U. S. C. 172d). The 18 activities now financed include a printing plant, 4 Quartermaster manufacturing and maintenance activities, 7 Ordnance Corps and 2 Chemical Corps arsenals, a proving ground, an ordnance research installation, a chemical research installation, and a transportation terminal.

Two major factors influence the trend of income and expenses after 1955. The financing of additional activities under the fund and increased emphasis on the guided-missile program cause sales to increase in 1956. Conversely, a general decline in workload will cause sales to decrease from 1956 to 1957, especially at ordnance and chemical arsenals.

Because of this decline in operations and an increase in rate of inventory and working capital turnover, the total investment required to provide working capital, including the capital required for activities being considered for fund-financing in 1956 and 1957, will amount to $277 million, or about $110 million less than the current Government investment in the fund. A transfer of the $110 million to the Air Force industrial fund in 1957 is proposed.

Additional activities being considered for industrial fund financing in 1956 and 1957 produce an estimated $665 million in goods and services annually and, if so financed, would require $130 million working capital of this fund. These installations include: 2 transportation terminals (formerly known as ports of embarkation with headquarters at New Orleans, La., and San Francisco, Calif.); 2 ordnance arsenals (Detroit, Mich., and Joliet, Ill.); 4 proving grounds (Aberdeen, Md.; Jefferson, Ind.; White Sands, N. Mex.; and Fort Huachuca, Ariz.); 2 railroad repair shops (Baltimore, Md., and Ogden, Utah); a chemical center (Edgewood, Md.); a pictorial center (Long Island City, N. Y.); 9 ordnance equipment rebuild facilities (Letterkenny, Pa.; Benicia, Calif.; Tooele, Utah; Red River, Tex.; Raritan, N. J.; Anniston, Ala.; Erie, Ohio; Mt. Rainier, Wash.; and Lima, Ohio); 2 engineer equipment rebuild facilities (Marion, Ohio, and Granite City, Ill.); 4 signal equipment rebuild facilities (Sacramento, Calif.; Lexington, Ky.; Tobyhanna, Pa.; and Decatur, Ill.); and a quartermaster general depot (Atlanta, Ga.).

Industrial fund financing will, however, be extended to these activities only as analysis of specific activities indicates that definite economies can be achieved, and as programs are developed that will assure the application of management and cost controls that will achieve such economies in actual practice.

The financial statements presented here include data only for activities now operating under the fund. The 1957 program, upon which these statements are based, anticipates the achievement of significant economies at such installations. Engineered standards now cover operations at chemical arsenals and have resulted in substantial savings. A production control system using engineered standards is being installed in a quartermaster manufacturing and maintenance operation and will be extended to other quartermaster operations in 1957. Engineered standards have been installed in two ordnance arsenals, and will be installed in the others in 1957. Predetermined rates for cargo handling at transportation terminals will be introduced in 1957. Predetermined price and standard cost billing systems will be adopted covering other operations. Internal operating budgets, together with other financial and operating data, will make possible stronger management control in 1957.

The Government investment at the end of 1957 is estimated at $277 million, consisting of $256.9 million in

reappropriations, $19.5 million in capitalized assets, and $0.5 million in retained earnings.

PROGRAM AND PERFORMANCE

This fund was created to facilitate the conduct of operations which are financed by two or more appropriations (5 U. S. C. 172e). The corpus of the fund consists of $1 million. The activities at present include:

1. Defense telephone service, Washington, finances the operations of the telephone service of the Department of Defense, Washington, D. C.

2. Joint construction agency finances certain administrative and overhead expenses of the Department of Defense construction programs in Western Europe.

3. Ordnance consolidated procurement account financed the procurement of certain items of ordnance supplies, materials, and equipment required by more than one appropriation. New obligations have not been incurred for this activity since September 30, 1954. Transactions subsequent to this date represent payments and adjustments of prior obligations and collections of outstanding receivables. It is expected that all such transactions will be completed during 1957. Pertinent financial data for this activity are as follows:

| | *1955 actual* | *1956 estimate* | *1957 estimate* |

*Army Stock Fund*

PROGRAM AND PERFORMANCE

This fund finances the procurement and stockage of bulk inventories of consumption-type items of materiel, including spare parts and components, and selected items of minor equipment. Inventories of materiel include stocks held for mobilization reserve as well as those procured for sale to authorized purchasers (5 U. S. C. 172d) from which the income of the fund is derived.

ANALYSIS OF BUDGET PROGRAM

The value of inventories capitalized into the fund (schedule B–1) is estimated to increase $5,998.8 million from July 1, 1954, through June 30, 1957. Of this total, $3,780.2 million was capitalized during 1955 principally through expansion of the fund to include stocks of chemical, engineer (excluding spare parts), ordnance, signal and transportation materiel at continental United States depots and medical-dental materiel and subsistence at United States posts, camps, and stations. An additional $2,126.3 million is being capitalized during 1956. Most of this increase is due to the capitalization of engineer spare parts and of the stocks in the principal overseas depots and the major posts, camps, and stations in the United States. The remaining $92.3 million planned for capitalization during 1957 is to include additional categories of ordnance materiel in the stock fund and extension of fund operations to the Ryukyus command.

In addition to the capitalization of Army-owned stocks during 1956, Navy and Marine Corps depot stocks of subsistence are being transferred to the Army stock fund, pursuant to a Department of Defense directive which designates the Secretary of the Army as the single manager responsible for supply management of subsistence for all military services. The current estimate of the stocks to be transferred is $25 million. The change in supply procedures is expected to increase the sales of the fund by about $65 million in 1956 and about $200 million in 1957.

FINANCING OPERATIONS

Funds applied to operations are estimated to be considerably less than funds provided by operations (statement A). This is due to the continuing availability of stocks in long supply which are not required to be replaced when sold. It is also due in part to improvements in supply procedures which have reduced the numbers of items and the quantities required to be carried in depot stocks. During 1955, the fund accumulated $353.3 million of cash of which $300 million was returned to the Treasury. In 1956 it is estimated that $600 million in cash will be generated and $700 million excess has been returned to Treasury. During 1957, it is expected that

Federal Reserve Bank of St. Louis

the fund will accumulate an additional $480 million and that $550 million will be available for transfer to other accounts. Thus, by the end of 1957, a total of $1,835 million will have been returned to the Treasury or transferred since the inception of the fund or $1,410.9 million more than the $424.1 million received in appropriations or reappropriations to initiate the fund.

OPERATING RESULTS AND RETAINED EARNINGS

Income (statement B) from sales continues to increase. Of the increase of $203.8 million in 1956, approximately $65 million is due to assumption of the single manager responsibilities for subsistence. The remainder results from the inclusion of issues of engineer spare parts and of issues by overseas commands and United States posts, camps, and stations, which are greater themselves than the issues from United States depot stocks, as reported in the previous year. Estimated sales actually give effect to a decline in the consumption of stock-fund materiel by the Army in 1956 and relatively little further change in 1957. During 1957, sales are expected to be $149 million higher than the previous year due primarily to the inclusion of the single manager subsistence operation for the full year.

Expenses for purchase of goods are higher each year as the declining availability of stocks which may be issued without replacement necessitates procurement of an increasing number of items. In 1955, expenses for purchase of goods were 53 percent of sales. In 1956 and 1957, such expenses are estimated at 68 percent and 74 percent respectively.

Effective July 1, 1956, the stock fund will assume responsibility for paying the cost of overseas transportation of petroleum products (included in general quartermaster supplies). This is the principal cause of the substantially increased transportation expenses in 1957 and also accounts for the $18.5 million gain from revision of standard prices, as overseas inventories will then be carried at prices representing their delivered costs in the various commands.

Other operating costs are limited to repair and rehabilitation of unserviceable stock-fund property. The increase in 1957 will result from the fund assuming responsibility for payment of all such costs. In 1955 and 1956, such costs have been paid by the fund only for repair of quartermaster supplies and equipment.

Inventory gains and losses reflect accounting adjustments, as well as overages or shortages revealed by physical inventories and known physical losses of property. The rate of adjustments has been unusually high, largely due to the correction of inaccuracies in the inventory records used at the time additional categories of material were capitalized. The net amount is expected to approach more nearly a normal rate in 1957.

The fund is continuing to experience substantial losses from the disposal of excess and surplus inventories. A larger proportion of the loss in 1957 is reported as an operating loss, since losses are charged to reserves set aside directly from the capital account only when disposal is accomplished within 1 year from the time the stocks are capitalized in the fund. The analysis of inventories in order to identify stocks which it is more economical for the Government to dispose of than to retain is continuing. Abnormally high losses will be sustained until this major disposal program is completed.

Revisions of standard prices have been unusually large in 1955 and 1956 due to some changes in prices on new procurement and to the correction of errors in the initial pricing of the large numbers of new items brought into the stock fund. Such adjustments are not expected to be significant in 1957.

FINANCIAL CONDITION

After the transfer of $550 million to other accounts, which is to be proposed to cover the cost of legislation being recommended, the investment of the Government on June 30, 1957, is estimated to be $7,303.3 million, consisting of capitalized inventories of $9,329.2 million; less net rescissions of $1,410.9 million and a deficit of $615 million.

### DEPARTMENT OF THE NAVY

*Marine Corps Stock Fund*

PROGRAM AND PERFORMANCE

The Marine Corps stock fund began operating on July 1, 1953, and finances the procurement and stockage of inventories including electronic parts; engineer property, materials and spare parts; general property, clothing and equipment; motor transport equipment and spare parts; ordnance spare parts; nonperishable subsistence; and fuels. All inventories except individual clothing are confined to storage locations within the continental United States. Inventories of materiel include stocks held for mobilization reserve as well as those procured for sale to authorized purchasers (5 U. S. C. 172d) from which the income of the fund is derived.

ANALYSIS OF BUDGET PROGRAM

The value of inventories capitalized (schedule B–1) is estimated to increase $171.5 million from July 1, 1954, through June 30, 1957. Of this total, $77.8 million was capitalized during 1955 principally through inclusion of additional categories of ordnance spare parts, and engineer spare parts. An additional $93.4 million, principally additional ordnance and motor transport items, is being capitalized during 1956. This amount is net of an estimated $2 million of depot subsistence stocks transferred to the Army stock fund pursuant to a Department of Defense directive which designates the Secretary of the Army as the single manager responsible for supply management of subsistence for all military services.

FINANCING OPERATIONS

Funds required to finance operations are estimated to be considerably less than the amounts provided by operations (statement A). This is due to the continuing availability of certain stocks in long supply which are not required to be replaced when sold. During 1955, the fund accumulated $30.4 million of cash of which $25 million was returned to the Treasury. In 1956, it is estimated that $25 million in cash will be generated and $25 million has been returned to the Treasury. During 1957, it is expected that the fund will accumulate an additional $15 million and that $35 million will be made available for transfer to other accounts. By the end of 1957, a total of $85 million will have been returned to the Treasury or transferred since the inception of the fund or $45 million more than the $40 million received by reappropriation to initiate the fund.

OPERATING RESULTS AND RETAINED EARNINGS

The sales increase of $11.6 million in 1956 is principally due to the full year support in the United States of one division previously overseas. The increase in 1957 is the result of inclusion of additional items in electronics; the advancing age of motor transport vehicles being supported with spare parts; and the reflection of a full year's sales for ordnance items capitalized during the third quarter of 1956.

At the beginning of 1957, the program of item analysis (stratification) to identify peacetime and mobilization stock requirements will be complete for all items except those in the ordnance category.

After the transfer of $35 million to other accounts, which is to be proposed to cover the cost of legislation being recommended, the investment of the Government on June 30, 1957, is estimated to be $496.5 million, consisting of capitalized inventories $543.6 million, less net rescission or transfer of $45 million and a deficit of $2.1 million.

AMOUNTS AVAILABLE FOR OBLIGATION

Reappropriation of prior year balance, 1955, $69,000,000.

ANALYSIS OF TRANSFERS TO REVOLVING FUND

Obligations incurred during the year (total transfers to revolving fund out of current authorizations)—1955, $69,000,000.

PROGRAM AND PERFORMANCE

This fund finances industrial- and commercial-type activities on a reimbursable basis (5 U. S. C. 172d). The 48 activities reflected in the statements include Military Sea Transportation Service, 11 naval shipyards, 6 naval ordnance plants, 26 printing plants, 2 research laboratories, a clothing factory, and a ship repair facility. Of these, 3 printing plants, 2 ordnance plants, and the ship repair facility, did not appear in the 1956 budget.

Two major factors influence the trend of income and expenses after 1955. Income and expenses increase from 1955 to 1956 because 4 shipyards operated under the fund for only a part of 1955, and 1 ordnance plant and a ship repair facility began operations under the fund in 1956. Conversely, a progressive decline in workload at shipyards and ordnance facilities causes a decrease in income and expenses in 1957, even though an additional ordnance plant is reflected in the statements for the first time in 1957.

Of the current Government investment in the fund, $40 million is not necessary to finance operations, and transfer of this amount to the Air Force industrial fund is proposed in 1957. Total Government investment on June 30, 1957, would then be an estimated $404 million. Of this amount, $250 million is necessary to meet the working capital requirements of the installations included in the financial statements presented here. The remainder, approximately $154 million, represents the working capital requirements of additional installations being considered for industrial fund financing during 1956 and 1957. These additional installations, if so financed, would do an estimated $420 million worth of business annually. They include an ordnance plant (Louisville, Ky.); 11 ammunition depots (Crane, Ind.; St. Juliens Creek, Va.; Bangor, Wash.; Earle, N. J.; Fallbrook, Calif.; Hastings, Nebr.; Hawthorne, Nev.; Hingham, Mass.; Mare Island, Calif.; McAlester, Okla.; and Oahu, T. H.); 10 aviation repair facilities (Alameda, Calif.; San Diego, Calif.; Corpus Christi, Tex.; Pensacola, Fla.; Cherry Point, N. C.; Norfolk, Va.; Quonset Point, R. I.; Jacksonville, Fla.; Lakehurst, N. J.; Philadelphia, Pa.); 2 public works centers (San Francisco, Calif., and Norfolk, Va.); 8 research and development installations (Carderock, Md.; San Francisco, Calif.; New London, Conn.; Annapolis, Md.; Philadelphia, Pa.; Panama City, Fla.; San Diego, Calif.; and White Oak, Md.); 3 ordnance test stations (China Lake, Calif.; Chincoteague, Va.; Newport, R. I.); a proving ground (Dahlgren, Va.); and 4 specialized depots (ammunition and net, Seal Beach, Calif.; magazine, Port Chicago, Calif.; torpedo station, Keyport, Wash.; mine depot, Yorktown, Va.).

Industrial-fund financing will be extended to these additional installations only when (1) the analysis of the specific installation indicates that definite economies can be derived and (2) a program is developed that will assure the application of management and cost controls so as to achieve such economies.

The program for 1957 contemplates an increase in the rate of turnover of inventory and working capital, thereby reducing the required amount of Government investment and contributing to the availability for transfer of $40 million in 1957. The Military Sea Transportation Service, Marine Corps Clothing Factory, and the printing plants have been able in 1956 to absorb substantial labor and material cost increases without significantly increasing the rates at which their customers are charged. Continuation of the development of comparable savings in 1957 is contemplated.

An intensive pilot study is underway on the development of engineered standards and their application to

Federal Reserve Bank of St. Louis

production control and performance measurement in naval shipyards. Another pilot study on production planning and performance measurement is going forward in ordnance plants. These developments will make possible greater use of standard prices and related management controls for these activities.

Internal operating budgets, together with other financial and operating data, will make possible stronger management control in 1957 and will be of particular value in assigning work among installations.

The Government investment, estimated at $404 million at June 30, 1957, consists of $400 million in reappropriations and $32 million in retained earnings, less $28 million in net capitalized assets. The latter figure represents the excess of liabilities assumed over inventories acquired at transfer of activities to the fund.
